ROLLESTON (43° 58′ S. lat., 172° 25′ E. long.) (Selwyn co., Canterbury prov.), a post town, with money-order office, savings bank, telegraph and railway station, 15 miles from Christchurch, 250 miles SW. of Wellington. Has one hotel and public school. District is agricultural and pastoral. Population, 136; of district, 187.

RONGOTEA (40° 26′ S. lat., 175° 20′ E. long.), post town in Wellington province, Manawatu co., riding of Campbell, on the Oroua River and Oroua Downs Estate, about 8 miles from Sanson and 108 miles from Wellington, coach to Fielding, Palmerston, or Longburn, thence train. Has money order office, telephone bureau, and savings bank office. It is a bush township, containing branch Bank of New Zealand (open Thursdays), State school, Oddfellows' and Good Templars' lodges, dairy, patent leather factory, bee farm, teacher's residence, store, and Primitive Methodist, Lutheran, Roman Catholic, Wesleyan, Anglican, and Brethren places of worship. Coach factory, grinding and crushing mill, timber yard, butter box factory. Daily mails. Lighted with kerosene; water from artesian wells. Formation: Loamy and sandy soil with clay bottom. Population of district about 900.

ROSLYN (borough of) (prov. Otago, co. Taieri). Has telegraph station, two lines tramway, two public schools, and Anglican, Presbyterian, Wesleyan, and Baptist churches, Druids, Oddfellows, Foresters, and Templar lodges, public library, woollen mills, fellmongers, &c. Borough is lighted with gas. Population (census 1896), 4,118; now about 4,400.

ROSS (42° 53′ S. lat., 170° 45′ E. long.), the second inland town in the county and province of Westland, situated about 20 miles from Hokitika, and about 100 miles W. of Christchurch. It has an agency of the New Zealand Bank, post, telegraph, savings bank, and money-order office; a court house, four churches—English, Presbyterian, Wesleyan, and Roman Catholic; a hospital with 15 beds. Ross is connected with Hokitika by a good dray road, and a coach runs twice a day; fare, 4s. A main road extends from Ross to Okarito, on the coast, distance 76 miles, a continuation of the trunk line of road through the province. Hotels: Empire, Junction, Club, Albion, Criterion, Commercial, and Rising Star; and theatre, Totara Hall, attached to the Club Hotel, is well fitted up, and capable of seating 600 persons. Schools: two Government and one Catholic. Good Templars', Masonic, Oddfellows' Lodges, and a School of Mines. Within 16 miles of the town coal has been found. The Mont d'Or Gold-mining and Water-race Company possesses the richest alluvial hill in the whole of Westland, which it works by means of sluicing by giant nozzles, and had it anything like an adequate water supply it has proved that it would pay large and regular dividends for many years to come. In July, 1884, a very good quartz reef was discovered 5 miles S. of Ross. Stone treated by the Government Geologist assayed 4 to 13 ozs. per ton. The measure was worked for some years, but abandoned; the reef has again been struck at the William Tell mine, which yielded 4 ozs. 2 dwts. to the ton. English capital is working the mine. The Westland County Council have constructed a track to and from the borough boundary to Cedar Creek, *viâ* the Mikonui Fall, a distance of 9 miles, and a dray road by way of the Totara river, about 14 miles. The flats adjacent to Cedar Creek are heavily timbered with wood of excellent quality, and in the rivers and creeks specimens of silver, copper ores, and sheelite are frequently found. Fossil remains have been found at various high elevations. Population of borough (census 1896), was 727, now 750; county, 4,723. Newspaper: The *Ross Advocate*.

ROTHERHAM (42° 40′ S. lat. 173° E. long.) (Amuri co. and prov. Canterbury), a post town on the Waiau, with telephone station, 76 miles from Christchurch, reached by coach to Culverden, thence rail; Wellington reached by rail to Lyttelton, thence sea. Hotel and State school, in which Presbyterian service is held fortnightly. Agricultural and pastoral district. Population, 113; district, 59.

ROTORUA (38° 9′ S. lat., 176° 15′ E. long.), a post town and meteorological station in Rotorua county, 171 miles from Auckland, which is reached by rail, fares 21s. 6d. and 14s. 4d. single. It is situated in Auckland province, near the south-west corner of the Rotorua Lake, and is the centre of the Hot-spring district, and within easy reach of all the natural wonders of the locality. It has post, money-order, telegraph, savings bank, and railway offices. Other Government buildings are court-house, police station, road surveyor's office, Bath buildings, town board office. There are five hotels, the Palace, Grand, Rotorua, Geyser, and Lake House, numerous boarding houses, stores, a public library and reading room, a native school, and a district public school. Places of worship, Episcopal (St. Faith), Presby-

terian, Native Church of England, and R.C. Mission. Oddfellows' lodge. The Government have done much for the place in their desire to make it a health resort for all classes of invalids, and have set apart the principal curative springs, and have erected a costly sanatorium for the reception of patients who come from all parts of the world. The old township still retains its interest for tourists, for here is situated the pah or village with its numerous wares, and the Big House, or Tame te Kapua, the largest structure of the kind in New Zealand, and in which the sittings of the recent Maori parliament took place. Scattered along the lake shore are numerous ngawhas (pronounced nafas), utilised by the natives, some for bathing in, others for cooking purposes. All the springs here and throughout the district are of the most varied chemical character, and of every degree of temperature, from 60° to 212° Fahr. Medical opinion and chemical analysis, corroborated by actual results, show that these springs are highly efficacious in all sorts of skin diseases, in gout, dyspepsia, sciatica, disorders of the liver, impotence, dropsy, amenorrhœa, and all forms of rheumatism. Since the earth tremors, superinduced by the eruption of Tarawera in 1886, have ceased, there has been no disturbance of any moment felt. The Geysers at Whahare-warewa are intermittently as active as ever, and are a favourite resort with tourists, who may not have time to visit the greater phenomena at Wairakei and Tikitere. Robertson's line of coaches run through the Wonderland *viâ* Wairakei (Geyser House Hotel) to Taupo, fare 25s. and 40s., thence to Napier by Crowther and McAuley's line, fare 50s. and 80s. Robertson's line also runs to Tauranga, fare 20s., thence steam Auckland or Wellington. The population of the town comprises about 300 Europeans and 200 natives, but during the season, which begins in September, and lasts to about the end of March, an immense number of tourists flock thither from all parts of the world, and the number is yearly increasing. Water supply from Waihorowhite Creek. Newspaper: *Hot Lakes Chronicle.*

ROUND HILL (46° 20′ S. lat., 168° E. long.) (Otago prov., Wallace co., and riding of Orepuki). A township, with a post-office, telephone, large hotel, public library, Presbyterian Mission, and school. Nearest railway Wakatipu, 2½ miles. Mining district. Formation: carboniferous, period recent. Population, 200.

ROXBURGH (45° 30′ S. lat., 169° 10′ E. long.) (Teviot was the name of the goldfield in the early days), a borough in the county of Tuapeka (Otago prov. dist.). It has a telegraph station, savings bank, and money-order and post office, 98 miles from Dunedin, and 38 miles N. from Lawrence, situate on the Molyneux or Clutha river, now crossed by a substantial bridge, at the foot of the Mount Benger range. Communication is by rail to Lawrence, thence coach daily. The hotels are: Commercial, Goldfield's, Ormond's, and Albion. It is the centre of a large and important gold-field. Agencies of the Bank of New Zealand and of the New Zealand and National of New Zealand Insurance Companies are here, and a public school. Several notable buildings of stone have been erected, among which may be instanced the Anglican church and the Presbyterian church. Wesleyans and Catholics have also places of worship, and there is a court-house, an Athenæum, A.O.F., M.U.I.O.O.F., and I.O.G.T. lodges, and a number of substantial business places. A main laid in a creek running out of Mount Benger supplies the town with water. Town lighted with kerosene. The land in the district is described as some of the finest grazing country in the colony. The gold is principally obtained by dredging, and powerful dredgers are being built to cope with the work. The gullies in the neighbourhood have furnished a quantity of gold. Several dredges are at work dredging the bed of the river; these are all worked by steam. In the neighbourhood are four very superior lignite mines. The name of the goldfields district is called Mount Benger, Roxburgh being the centre. The district has a large and thriving population, and although gold is the principal product, farming is carried on successfully. It is from Coal Creek (near Roxburgh) where what is usually termed the far-famed Teviot fruit is grown. Many of the principal towns in Otago obtain their chief supply of fruit—such as apricots, peaches, plums, pears, grapes, cherries, apples, strawberries, &c., &c.—from this district. There are four public schools in Mount Benger district. Population of borough about 433. Newspaper: *Mount Benger Mail.*

RUSSELL (35° 16′ S. lat., 174° 8′ E. long.), so called after Lord John Russell, native name Kororareka, is a post town, with savings bank, money-order and telegraph offices. It is the port of the Bay of Islands county, and situated 128 miles from Auckland. A steam ferry-boat plies daily to Opua, fare, 2s., and weekly steamers to Auckland. The steamers running to Fiji call at Opua for coaling purposes. Hotel: Duke of Marlborough. It is the principal shipping port in the north, and possesses one of the finest harbours in the world, completely sheltered from every storm and wind by the numerous islands—nearly one hundred—that give the bay its appropriate name of the "Bay of Islands." The bay is 11 miles across, and is all bold deep water; vessels of any draught can go in and out in all weathers, and at any state of tide. Russell has a European school, Episcopal and Wesleyan places of worship, custom-house, harbour office, court-house, gaol, and town hall. There is a Lloyd's agency here (United States Consulate closed). The Rev. S. Marsden, the father of the mission in New Zealand, first landed here in 1814. In 1832 Russell had a population of about 100. In 1838 the population had increased to upwards of 1,000. It then contained a church, five hotels, innumerable grog-shops, a theatre, gambling saloons, and skittle alleys. From 1833 to 1840 Mr. James Busby acted as British resident. In 1839 Russell was proclaimed the capital of the colony, having a resident governor (Governor Hobson), who resided here from January, 1840 to March, 1841, a garrison, ships of war, Government buildings, a newspaper, bank, and other institutions, and over 2,000 inhabitants. This peaceful state of things was disturbed by the native war in 1842, when the renowned chief Hone Heki and his numerous followers devastated the district, dispersed the settlers, and caused the removal of the seat of government to Auckland, then only a native village and plantation. On conclusion of peace, the present town rose from the ashes of the previous one. The old church bears many bullet marks, and in the churchyard lie many of the English soldiers slain in the war. Coal and kauri gum from this district are the principal exports. The coal has good steaming qualities, and the shipments are very large. Russell was the chief whaling station in the South Pacific, but the trade has fallen off owing to low price of oil. Shore whaling by local people is still carried on. Manganese mining and antimony works are established. Quicksilver and galena have been recently discovered. The exports from Russell are coal chiefly, and gum, timber, oil, wool, flax, oysters, and fish. Around the town the land is poor and very broken. Gorse is being cultivated experimentally as a food for sheep. Inland from Kawakawa are rich plains, mostly in native hands. The principal rivers falling into the bay are the Kawakawa, Waikare, Kerikeri, and Waitangi, all of which have deep water some miles up, at all times of the tide. Kerikeri Fall is in the district. The hills are densely wooded with kauri, totara, and the other useful timbers so well known in New Zealand and the Australian colonies. The natives have erected a splendid hall, 4 miles across the Bay at Te Te, at a cost of £860, in commemoration of the treaty of Waitangi (in the signing of which the sovereignty of the Queen was acknowledged). Meetings are held therein monthly, during which matters pertaining to the welfare of their race are discussed. There is a Government school, Anglican and Wesleyan churches. There are two fish canning industries. Population, town, 180; district, 3,500. The electoral district of the Bay of Islands includes the counties of Mongonui, Whangaroa, Hokianga, and portion of Hobson. Formation: palæozoic (including lower secondary), indurated sandstones, and slates and jasperoid rocks.

ST. ALBANS (prov. Canterbury, co. Selwyn) (borough of), suburb of Christchurch, to which there is a tram service; with post and money-order office, savings bank, telephone station, two hotels, two public, two private schools, and two Church day schools, Anglican and Wesleyan churches, Druids' and Oddfellows' lodges, free library, and police-station. Water from artesian wells. Population, 6,500.

ST. ANDREW (prov. dist. Canterbury, Waimate co. and riding of Pareora), a post town with money-order office, savings bank, telegraph and railway station, 11 miles from Timaru. Has hotel, school, A.O.O.F., public library and Anglican and Presbyterian churches. Lighted with kerosene. Population of town 250; and district about 500.

ST. BATHANS (Dunstan Creek) (44° 35′ S. lat., 170° 0′ E. long.), Otago prov. dist., Maniototo co. and riding of St. Bathans, is a mining centre with post, money-order, savings bank and telegraph offices, 117 miles from Dunedin. Hotels: Ballarat and Vulcan. A gold-mining district, sluicing being largely carried on, water being brought from long distances, Banks: New South Wales and Bank of New Zealand. Schools: Government and Catholic. Episcopal, Presbyterian and Roman Catholic churches. Official buildings: court-house, and police-camp. There are several stores, and curling clubs. Lighted with kerosene. Mount St. Bathans, 6,837 feet, is easily ascended. Agricultural interests are also large. Population of St. Bathan's town, 200; district, 800.

ST. JOHN'S COLLEGE (39° 37′ S. lat., 174° 53′ E. long.), a postal centre in the county of Eden, and riding of Tamaki, 6 miles from Auckland, near the Tamaki river. St. John's College is a theological college of the Church of England; it includes a school for boys, and numbers about 75. Besides the college there are in the vicinity a public school, Anglican and Presbyterian churches. Hotel: St. Heliers. Omnibus communication eight times daily, fare, 1s. 6d. return. The locality is of interest as having been for many years the headquarters of the late Bishop Selwyn and of the Melanesian mission. St. Helier's Bay is a great pleasure resort for picnics and bathing. Population (census 1896) of riding 1,581.

ST. KILDA a residential borough 2 miles suburban to Dunedin (Otago province), with which it is connected by trams. Has five hotels and several schools and churches within easy distance. The Ocean Beach which bounds the borough on one side is a favourite resort. The area of the borough is 463 acres, has 288 dwellings, and a population of about 1,400.

SALTWATER CREEK (43° S. lat., 173° E. long.), (Ashley co., prov. Canterbury. A post town, with district school, and public library. Wellington is reached by 3 mile drive to Sefton, rail to Christchurch, thence steamer. Agricultural and pastoral district. Population about 150.

SANSON (40° 14′ S. lat., 175° 6′ E. long.), a post-town, with money-order office, savings bank and telegraph station, in the county of Manawatu and riding of Sandon (Wellington prov. dist.), 97 miles from Wellington, 5 miles from Bulls and 20 from Foxton, to which steam tram thrice weekly. Hotel: Junction. It has an agency of New Zealand Bank, two churches (Anglican and Wesleyan), the office of the Manawatu County Council, which owns the tramway, public library, I.O.G.T. and Rechabite lodges, stores, and large public school. Population, 300; riding, 800.

SEACLIFF (prov. dist. Otago, Waikouaiti co., Merton riding), a post town, with money-order office, savings bank,

telegraph and railway station, half a mile from the sea and 24 miles from Dunedin. Has hotel, school, cheese factory, and Seacliff Lunatic Asylum (640 patients 85 staff). District is agricultural and pastoral. Population, 150; of riding, 1,327.

SEDDONVILLE (41° 30′ S. lat., 172° E. long.) (co. Buller, prov. Nelson), is a postal township, with money-order, savings bank, telephone office, and railway station, near Westport, 280 miles from Wellington. Has hotel, two schools, Methodist church, police-station, and Masonic lodge. Cardiff Coal Company's mine in the Mokihinui district. Population about 350.

SEFTON (43° 5′ S. lat., 172° 44′ E. long.), a post town, with money-order, savings bank and telegraph office, in the county of Ashley and riding of Kowai, Canterbury prov. It is a station on the Christchurch and Amberley line, fares, 3s. 4d. and 2s. 3d., and is 26 miles from Christchurch. Hotel: the Sefton. Places of worship: English, Presbyterian, and Wesleyan. There are stores, library, dairy factory, a town-hall, two schools, and large grain stores. Kowai Rifle Club. Farming district. Population, 300.

SELWYN (prov. Canterbury, Selwyn co. riding Ellesmere), a post town, with telegraph and railway station, 23 miles WSW. from Christchurch. No hotels, schools, banks or churches. Agricultural district. Population of town, 55; and district, 90.

SHEFFIELD (Selwyn co., Malvern riding, Canterbury prov. dist.), a post town, with money-order office, savings bank, telegraph and railway station, 38 miles from Christchurch, 227 SW. from Wellington. Has one hotel, school, Anglican and Wesleyan churches. Library and Oddfellows' lodges. Lighted with kerosene. Mining and agricultural district. Good scenery. Soil: clay and shingle drainage. Population about 200.

SHORTLAND (37° 5′ S. lat., 175° 32′ E. long.), co. and electorate of Thames (Auckland prov. dist.), is a part of Grahamstown borough, 42 miles E. of Auckland, on the Hape and Karaka Creeks. It has post office and telephone receiving station. Hotels: The Exchange, Imperial, Brian Born, Post Office, Salutation, Warwick Arms, and Shortland. It was the first township on the Thames goldfields, but has had to resign its priority and importance as a business centre to Grahamstown; a considerable number of those engaged in business at the latter place reside at Shortland. Cabs ply between Shortland and Grahamstown. The gaol, native land court, hospital, and gasworks are here; as are also Oddfellows', Rechabite, Protestant Alliance and Hibernian Societies, and the principal places of worship, including Anglican, Wesleyan, Presbyterian, Baptist, Roman Catholic, Primitive Methodist, and other chapels. There are two public schools, boys' and girls', and a number of private educational establishments. Among the industrial works are jam and preserved fruit, a tomato factory, bicycle factory, saw-mills and veneer works, aerated water and gas works. Water is laid on in all the principal thoroughfares, and nearly all the shops and places of business are lit with gas, and the sidepaths are partially asphalted. District is mining and agricultural. Formation: volcanic tufa. Population of town, 1,191; of district about 2,000. Newspaper: *Thames Star*.

SOUTHBRIDGE (43° 51′ S. lat., 172° 25′ E. long.) (Selwyn co., riding Ellesmere, prov. dist. Canterbury), police district of Christchurch, a post town, with money-order office, telegraph station, and savings bank, 31 miles from Christchurch, with which it has rail connection, fares, 4s. and 2s. 8d; return, 8s. and 5s. 4d. Being near Lake Ellesmere, Southbridge is much frequented by sportsmen during the fishing and shooting season. It has two hotels—Southbridge and Royal; one bank,—New Zealand, open Thursdays; a Government school, courthouse, Episcopal, Wesleyan, Presbyterian, and Catholic churches, Town Hall and Board; Orange, Masonic, and Druid lodges. Caledonian and Agricultural Societies. Library, immigration and police barracks. Agricultural and pastoral district. A water-race supplies the town with water. Population (census 1896), of town district 494, of riding 4,335 Newspaper: *Ellesmere Guardian*.

SOUTHBROOK (43 16′ S. lat., 172° 42′ E. long.), a post town and railway station in the Canterbury provincial district; Ashley county and riding of Mandeville, 19 miles N. from Christchurch, with which it has a daily mail. It is on the main Northern line, open to Culverden; fares, 2s. 6d. and 1s. 8d. Hotel: Masonic. There are several stores, ropewalks, fire brigade, flax and flour mills, also public library, school (150 scholars), and Wesleyan and Anglican places of worship. Population, 352.

SPIT. *See* PORT AHURIRI.

SPRING CREEK (Marlborough co. and Spring Creek riding), 4 miles from Blenheim, has a post office, savings bank, and money-order office, with telephone station. Population, 100.

SPRINGFIELD (Canterbury prov. dist., Selwyn co., and riding of Malvern), a post town, money-order, savings bank, telegraph and railway station, 44 miles from Christchurch. Coaches to West Coast Tuesday and Friday, return Wednesday and Saturday. Has State school, Anglican church and pottery. Hotel: Springfield. Resort for invalids suffering from pulmonary complaints. Agricultural, pastoral, and coal mining industries. Population (census 1896), 211; of riding, 1,940.

STAFFORD (42° 43′ S. lat., 171° 12′ E. long.) (prov. dist. Westland and riding of Arahura), on Waimea Creek, a post town, with money-order, telephone and savings bank offices, Government Insurance Agency, 8½ miles from Hokitika, with which there is one daily coach. Railway station 3½ miles distant. It has two hotels, Caledonian and White Horse, and a Temperance hotel, four places of worship, Episcopal, Roman Catholic, Wesleyan, and Presbyterian, and a public school, a literary institute, hospital committee in connection with Westland hospital, a cemetery, three saw mills, Resident Magistrate's and Warden's Courts, Oddfellows', and Good Templars' lodges, and a school of mines. Government buildings: Warden's and R.M. Courthouse and police station. Lighted with kerosene. Industry: Sawmilling and hyraulic sluicing, mining. Population of town and district, 150.

STIRLING (46° 12′ S. lat., 169° 44′ E. long.) (prov. Otago, co. Bruce and Matau riding), a post town, on Clutha river, with telegraph, savings bank, and money-order office, and railway station on the Dunedin and Invercargill line, 50 miles SW. from Dunedin, fares, 6s. 4d. and 4s. 3d. Hotel: Stirling. Coach runs to Kaitangata. It is on the main road to Kaitangata, on the north bank of the Matau branch of the Clutha river. It has a store, a public school, Anglican and Presbyterian places of worship, and an Athenæum. Mining, agricultural and pastoral district. Population 250.

STRATFORD (39° 20′ S. lat., 170° 17′ E. long.) (prov. dist. Taranaki, co. Stratford), a borough, with post and money-order office, savings bank, telegraph, telephone, and railway station, 30 miles from New Plymouth. Has five hotels, Bank of New Zealand, National of New Zealand, and Bank of Australasia, State and Roman Catholic schools, Anglican, Roman Catholic, Presbyterian, Wesleyan, Methodist, and Salvation Army places of worship, two private halls, court-house, dairy factory (receiving 4,000 gallons daily), bacon factory, sash and door factory, knitting factory, brush, furniture, cycle and steam-coach factories, two saw-mills, soda water factories, blacksmiths, printeries; Knights of Labour, Oddfellows', Foresters', Druids', and Masonic lodges, various sporting clubs, and reading-room. Town is lighted with electricity. It is the shortest route to Mount Egmont, 8,260 feet high, a very popular tourist resort in summer. The climate is very exhilarating, being 1,012 feet above the sea, and is situated at junction of main road to Auckland—the Wellington New Plymouth railway. Soil volcanic. Pastoral district. Population, borough, 2,000; county, 7,000. Newspapers: *Egmont Settler* and *Egmont Post*.

STUDHOLME JUNCTION (Waimate co. and Deep Creek riding), a post town, with telegraph and railway station, 24 miles from Timaru. Has one hotel and public school. Agricultural district. Hannaton village settlement is two miles distant. Alluvial flats formation. Population, 93.

STYX (Prov. Canterbury, Selwyn co., Riccarton riding). A post town and railway station, 6 miles from Christchurch. Agricultural district. Cider making industry. Population, 30.

SUMNER (43° 36′ S. lat., 172° 44′ E. long.) (Selwyn co., prov. Canterbury), a popular sea-side winter resort, with post office and telegraph station, 7½ miles from Christchurch, with which there is tramway connection. Wellington is reached by steamer from Lyttelton. There are three hotels. Government school, public hall, Anglican and R.C. churches. Institute for deaf mutes. Town is lighted with naphtha. Has good pier. Artesian high pressure water supply. Good sea bathing and beautiful views. There is a lifeboat and signal station. Formation: volcanic. Population of borough, 610.

SWITZERS (WAIKAIA) (45° 48′ S. lat., 169° 18′ E. long.), a post town, with money-order office, savings bank, telephone and telegraph station, in the county of Southland, electoral district of Wakatipu (Otago prov. dist.), 132 miles from Dunedin and 73 from Invercargill, on the Waikaia river. Coach runs to Riversdale railway station (15 miles). Hotels: Crown, Commercial, and Empire. The National Bank has a branch here and there are several stores. There are places of worship belonging to the Presbyterians and Catholics, I.O G.T. and M.U.I.O.F. lodges, Athenæum and Mining Institute, court-house, one public hall, Bell's Hall, a public school, and a saw-mill. It is an alluvial mining district. Four coal mines in the district. Gold was first found here by James Lamb and party in the early part of 1862. The farm and mining industries are making considerable progress, while rabbiting and skin export is also increasing. There is good fishing in the Waikaia river. Popuation of town 300; district, 320.

SYDENHAM (43° 32′ S. lat., 172° 38′ E. long.), post town and borough, with telephone, money-order, and savings bank offices, situated in Canterbury district to the south of, and adjoining, Christchurch, a southern extension, in fact, of the city, on the river Heathcote, having railway coach and tram car communication. It was incorporated on September 20, 1877. Area 1,100 acres, 2,335 dwellings, capital value of property (1899) £906,000, ratable value, £763,334. Within the limits of the borough are two Episcopal churches—St. Saviour's and St. Mary's—Wesleyan chapel, Free Methodist chapel, Presbyterian church, Baptist chapel, two United Methodist chapels, Salvation Army, Oddfellows', Foresters', and Druid lodges, three schools, six hotels, pottery works, furniture factory, hosiery factory, soap works, agricultural implement works, and three breweries. Chiefly residential locality. Town is lighted with gas. Water from wells. Population of borough, 11,388.

TAIERI (county of, Otago prov.) (46° S. lat., 170° 14′ E. long.), an extensive agricultural district, lying about 6 miles S. of Dunedin, and mostly occupied by farmers. There are several mines of lignite in the district, which are worked to advantage. The county of Taieri includes the municipality of Mosgiel, and the town districts of Outram and Greytown. It is a very fertile district, celebrated for its pastoral and agricultural resources. There is also a considerable amount of gold mining carried on within its boundaries. Coal mining is also an important industry. The Southern Trunk Railway runs through it, and it is easy of access from the city of Dunedin. It has money-order, post and telegraph and savings bank offices at various centres in the district. The principal township in the county is Mosgiel, justly noted for the woollen goods produced there. There is a

branch railway from the Southern Trunk line to Outram (a township lighted by electricity), and the Otago Central Railway (extending to Ranfurly, in the interior of Otago), also branches off from the same line. Has two hotels, Bank of New Zealand and National Bank; Wesleyan, Episcopal, Roman Catholic, Presbyterian, Baptist, and other places of worship; Masonic, Oddfellow, Druid, and Foresters' societies; a college for training Roman Catholic priests; flour-mill and brickworks. Population of town, 1,500; of county, 7,500. Newspaper: *Taieri Advocate* (twice weekly).

TAIRUA (36° 59′ S. lat. 170° 55′ E. long.) (prov. Auckland, county Thames, Hastings riding), a post town, with money-order office and savings bank and telephone station, 90 steamer miles from Auckland, and 263 miles N. of Wellington. Has two hotels and a school, in which church service is held. District is devoted to mining, timber and gum getting. Population, 141.

TAKAKA (40° 51′ S. lat., 172° 44′ E. long.), a post town, with money-order and savings bank office and telephone station, in co. Collingwood, Motueka electorate, prov. dist. of Nelson, 53 miles from Nelson, on the Takaka river. Hotels: Globe, Junction, and Telegraph; Forest Inn at foot of Ranges. Four district and six aided public schools, school of mines, Anglican and Roman Catholic places of worship, court-house, butter and bacon factory, timber mills, and various stores. Oddfellows', Freemasons', and Druids societies and three public libraries. Steam tramway from port of Waitapu eight miles up Takaka Valley; a tram line from the asbestos deposits has been surveyed to connect present line. There are four leading lights for entering the channel at night. Overland mail to Nelson once a week. Nelson is reached by coach to Riwaka, 30 miles, thence coach to Richmond, 30 miles, thence the train, 8 miles. Also steamer, *Lady Barkly*, makes six return trips monthly to Nelson. Limestone caves, Bubu Springs, and beautiful scenery in the district. Formation: Eastern side, limestone; Western side, limestone, slate and coal. Abundance of ironstone at the head of the valley, supposed to be a continuation of the Para Para. Asbestos, gold, silver, platinum, coal, and other minerals are also known to exist. Coal deposits are being opened. Chief products are timber, hops, wool, and dairy produce. There is good fishing in rivers and in Golden Bay. Population, about 1,700. Newspaper: *Takaka News* (every Thursday).

TAKAPAU (40° 32′ S. lat., 176° E. long.) (co. Waipawa, riding of Ruataniwha, Hawke's Bay prov. dist.), on the Ruataniwha plains, a post town, with telegraph, money-order, and savings bank offices, and railway station, 59 miles from Napier, 144 from Wellington and 18 from Waipawa, fares, 7s. 3d. and 4s. 10d. Hotel: Takapau. District school and large Caledonian Society here. Has Roman Catholic, Anglican and Presbyterian churches. Saw and flax mills, fellmongery. Grazing district, principally for sheep. Water from wells. Limestone formation. Population, 300.

TANEATUA (38° 5′ S. lat., 176° 30′ E. long.), a postal district, 159 miles S.E. of Thames, and about 9 miles from Whakatane. It is in the celebrated Opouriao estate purchased by the New Zealand Government from Messrs. Gould Bros. in 1895, and now occupied by small farmers on lease in perpetuity. Soil and climate are admirable, adapted for maize-growing, the yield being estimated at an average of 60 bushels to the acre. There are two stores and two schools (in which religious services are held) in the district, which has a population of about 250.

TAPANUI (46° 20′ S. lat., 169° 30′ E. long.), a post town, with money-order office, savings bank, telegraph, telephone and railway station, on the Waipahi and Kelso branch of the Dunedin and Invercargill Railway in the county of Tuapeke, electorate of Clutha, on the Pomahaka River, 96 miles SW. from Dunedin; fare, coach and railway, 19s. 8d. and 12s. 2d. Has three temperance hotels. It is under municipal government, having a mayor and nine councillors. Banks: New Zealand and National. Presbyterian, Episcopal, Wesleyan and Salvation Army places of worship, a Government school, a large court-house, Athenæum, and a Good Templars' hall. There are lodges of Masons and Oddfellows, Poultry Association, Horticultural Society, and a Farmers' and Racing and Cycling Club. In the vicinity is a saw-mill, dairy factory, and water-power flour-mills. It is the centre of a large agricultural district, but only does a small timber trade. There is evidence that the district was once an estuary. Population of borough (census 1896), 408. Newspaper: *Tapanui Courier*.

TAPU (37° S. lat., 175° 30′ E. long.) (prov. Auckland, Thames county, Hastings riding), a post village on the Tapu Creek, with postal note office and telephone station, 12 miles from Thames, to which coach. Steamer to Auckland, 16 miles. Has hotel and public school. Mining, gum digging, and farming. The principal mine is the Mahara Royal. It is a pretty little place in summer. Formation: volcanic. Population about 80.

TARADALE (39° 31′ S. lat., 176° 53′ E. long.), county of Hawkes Bay, electorate Napier, a post town, with money-order and telephone office, and Government savings bank. It is 6 miles from Napier, and has one hotel; a town hall, three places of worship, Episcopal, Roman Catholic and Wesleyan, Mechanics' Institute and library, with 638 vols., a district school, and Roman Catholic mission schools in the neighbourhood, Oddfellows' and Foresters' lodges; a Winery. Coach communication with Napier every hour 6d., to Meanee 1s. 2d., about 2 miles distant, twice daily, and to Puketapu twice daily; the river Tutaekuri flows about 1 mile away. Agricultural district, principally small farms. Local governing bodies are Town Board (Geo. Bradley, clerk), and Board of River Conservators. Lighted with kerosene. A good supply of water is obtained from artesian wells. Population (1896 census), 807; now about 900.

TARANAKI. *See* NEW PLYMOUTH.

TARAWERA (Wairoa county, Hawkes Bay prov. dist.), a postal township, with telegraph station, 50 miles NW. from Napier, first occupied as a constabulary post in 1869. It is situated in the valley of the river Waipunga, a tributary of the Mohaka, and is very near the Auckland boundary. Has hotel and district school. Land of inferior quality for agricultural purposes, but believed to be auriferous. Much of it is still in the hands of the natives. Population about 50.

TAUPIRI (Waikato county, Kirikiriroa riding, prov. dist. Auckland), a post-town, with telegraph and railway (Flag) station, 70 miles from Auckland. Has hotel, public hall, public school, Anglican and Roman Catholic churches. Two flax-mills and a saw-mill. Pastoral district. The late Maori king Tawhiao is buried here. Population, 160; of district, 380.

TAUPO (38° 44′ S. lat. 176° E. long.) (co. East Taupo), electorate Bay of Plenty, and police district of Napier, prov. Auckland; a post town, with savings bank, money-order and telegraph offices. It is situated on the north-east shores of Lake Taupo, on the right bank of the Waikato, 100 miles from Napier, the centre of the hot springs district. There are five hotels: Lake, Taupo, Terraces, Geyser, and Spa Sanatorium; Government school, Presbyterian mission, police station, and court house. Taupo is now one of the principal resorts for tourists, health and pleasure seekers. Its geysers, hot lakes and beautiful silicate formations are unequalled by any other thermal district in New Zealand. The active volcano Ngauruhoe and Temare on Mount Tongariro, with perpetually snow-clad Ruapehu all in a cluster, forms the most conspicuous and attractive feature in the landscape, and can be reached in a day's ride. Tokaanu, on the south side of the Lake, is the centre of another wonderful thermal action, being situated at the foot of a long range of quiescent volcanoes. It is on the coach route from the Wanganui river. Two steam launches ply on the lake for pleasure parties and tourists going to Tokaanu and to make excursions to the grand and sublime scenery of the Western Bay. First class accommodation and hot baths can be had at the Wairakei Geyser Valley Sanatorium, at the Spa Sanatorium, or at the Black Terrace Sanatorium, and across the Lake at the Tokaanu Hotel. Taupo is reached from Napier by coach, fare, 50s.; from Auckland by rail to Rotorua, thence by coach (coach fare, 25s.). From Tauranga *viâ* Rotorua by coach, fare 50s. Formation: volcanic deposit of pumice. Population (census 1896) of town, 72; of East Taupo County, 232; of West Taupo County, 156.

TAURANGA (37° 34′ 30″ S. lat., 176° 10′ 30″ E. long.), county, electorate and police district of Tauranga, prov. dist. of Auckland, 84 miles from Thames, a post town with savings-bank, money-order and telegraph offices, situated on the shores of the harbour of the same name, an inlet of the Bay of Plenty. The harbour is commodious, perfectly land-locked and available at all tides for the largest vessels. The waters are deep, averaging 5 to 7 fathoms for two miles from heads, at the town 2 to 3 fathoms at low water. It is the only safe port of shelter for large vessels between Auckland and Wellington. Tauranga may be considered the capital of the more northerly east coast settlements, and is the port and principal point of departure for the Hot Lakes district. Hotels: Commercial, Tauranga, Star, and Masonic. It has nine public schools in town and county, two State-aided schools, and six native schools, private schools, Government buildings—weather department, survey, native lands court, district court-house and offices, native offices, land office, Warden's Court and Mining Registrar, gaol, civil commissioner's office; four public halls. Episcopal, Presbyterian, Wesleyan, Roman Catholic churches, Salvation Army Barracks, and Young Men's Christian Association; branch of the New Zealand bank, several insurance agencies, and a mechanics' institute. Local industries: brewery, soda-water factory, fish-curing establishments, ship and boat-building works, three flax-mills, cheese and carriage factories. Steamer communication with Auckland thrice a week by Northern S.S. Co.'s vessels, also with Gisborne, Napier, Wellington, and all southern ports by Union Company's steamers occasionally. Coaches connect with the steamers, and also ply to Te Puke, Paeroa and the Hot Lakes, thus connecting with the railway system of the Auckland province both at Paeroa (62 miles) and Rotorua (38 miles), to which coaches run three or four times a week respectively. The export of maize is increasing rapidly, and the dairying industry is also developing. District is suited to fattening stock. The Maoris are becoming expert farmers, and export large quantities of maize and wheat, besides owning large numbers of stock, waggons, implements, and machinery. Two substantial wharves erected in harbour, with tramways and goods sheds thereon, and berthage accommodation for vessels of large draught. Agricultural and pastoral district, much of it being owned by the natives. A large quantity of land is under cultivation—wheat, maize, oats, potatoes. About three miles distant is the celebrated Gate Pah, where a severe struggle took place between the Maoris and the British troops in May, 1864. A short distance further up the road is the Te Ranga Pah, where severe fighting took place on June 31, 1864. In the cemetery, overlooking the harbour, a special monument marks the spot where the British officers and men slain at the Gate Pah and Te Ranga are interred, and several tombstones show the last resting-places of other British soldiers who fell in several engagements in the district. The celebrated "White Island" is within a few miles of the coast. More than half of Tauranga county has been included in the Hauraki mining district, and several mines have been opened. Formation: volcanic ash

overlying metamorphic rock. Population (census 1896), county, 1622 : town, 1,018. Newspaper: *Bay of Plenty Times.*

TE AROHA (37° 30′ S. lat., 175° 45′ E. long.) (a meteorological station, 100 feet above sea level), is a gold mining locality on the Waihou river (co. Piako, riding of Te Aroha, prov. dist. of Auckland), first opened in November, 1880, 34 miles from Thames, from which it can be reached by river steamer. Communication with Auckland by rail direct 115 miles. Fares 14s. 6d. and 9s. 8d. ; the line through being opened on 1st March, 1886. Gold was first found at Te Aroha many years ago by Hone Werahiko. The block was leased by the Government and extensive reserves were laid off for the natives. It is on one of these that gold was found, arrangements having been made with the Maoris to allow of gold mining. The gold is in quartz, and several auriferous lodes have been discovered. Te Aroha occupies a grand position, the district uniting the Valley of the Thames with the Waikato country and the whole of the interior. The township lies at the foot of the Te Aroha mountain, which is 3,200 feet high. From the summit of the mountain one of the finest views in the colony may be had, embracing the East coast, White Island, Tauranga Heads, and the valley of the Thames. A Wesleyan chapel, Anglican, Presbyterian and Roman Catholic churches. Hotels : Palace, Hot Springs, Grand, and others, several large private boarding-houses, post-office, money-order office, savings bank, and telegraph station, public school, several stores, two public halls, court-house, Warden's office are here. Various creameries have been erected in the vicinity and are helping to develop the district. The principal mines under development are the Aroha Gold Mining Company ; Waiorongomai, which is situated on the side of the Te Aroha mountain, about 2½ miles from Te Aroha township, on what is known as the Buck reef. Hot springs are found here on a reserve of Crown lands, and these are now much resorted to by visitors from all parts of New Zealand and neighbouring Colonies. The Domain Board has erected commodious and suitable bathing accommodation, also library (1,300 vols.) and reading-room. A number of private and large swimming baths are also available, and a special bath-house for the Maoris. The new private bath house is said to be the finest of its kind south of the line. The water from the springs has been analyzed by Mr. Pond, the Government analyst, and reported to be of great medicinal value, particularly for rheumatic and dyspeptic patients. Extensive schemes for water supply have been approved. Population (census 1896) of town district, 672. Newspapers : *Te Aroha and Ohinemuri News*, tri-weekly.

TE AUTE (39° 5′ S. lat., 176° 14′ E. long.), a post town, with daily mail, money-order and savings bank office, telegraph and railway stations, 27 miles SW. from Napier. It is in the Hawke's Bay provincial district, Hawke's Bay county and Heretaunga Riding, on the main south road, and on the trunk line of railway from Napier towards Wellington, which is distant 172 miles. Has one hotel, one Government school, and native college. Anglican church. Caves, and good shooting. Most of the surrounding land, which is hilly, is in native hands. An extensive bush, principally Matai timber, is within 2 miles. Sheep farming and timber getting and cutting up are the principal industries. In the district is a native college endowed with about 7,000 acres, presented in part by the natives many years ago, and supplemented by a Government grant. Population, town, 100 ; of district about 300.

TE AWAMUTU (38° 24′ S. lat., 175° 14′ E. long.), county of Waipa and riding of Rangiaohia (Auckland provincial district), with post and money-order office, savings bank telegraph and railway station. Once the terminus of the Great Southern line from Auckland, from which it is 100 miles distant. There are through trains daily, fares, 12s. 7d., 8s. 5d. The first sod of the North Island Trunk Railway to extend from here was turned in April, 1885. The line is now open to Porootarao (in what is known as the King country), and 47 miles beyond Te Awamutu. Hotels : Te Awamutu and Commercial. It has a branch of the New Zealand Bank, a pretty English church, Presbyterian and Wesleyan chapels, a school-house, a court-house, public library and reading-room, large and well-appointed town-hall, erected at a cost of £600, Masonic lodge, several stores, butter factories and a steam flour mill. Numerous farms are in the vicinity, and some of them in a high state of cultivation, yielding large root crops and sustaining many head of stock. Dairy farming is an important industry. About 6 miles distant was a very strong pah of the Maoris, which, in March, 1864, was besieged and captured by Brigadier-General Carey. In the churchyard of the mission church lie many who fell in that and other engagements in the neighbourhood. A beautiful monument has been erected by the New Zealand Government to mark the spot where they were buried. Population (census 1896), of town district, 347; of riding, 1,098.

TE KOPURU (36° 10′ S. lat., 173° 90′ E. long.) (county Hobson, Te Kopuru riding, prov. dist. Auckland), on the Northern Wairoa river, part of Kaipara harbour, is a post town, with money-order office, savings bank, and telegraph station, shipping and clearing office, 108 miles NW. from Auckland, reached by train to Helensville, 38 miles, thence steamer, 70 miles. Has boarding-house, public school, Oddfellows' lodge, R.C. church, public hall, in which religious services are held, public library and reading-room. Industries : gum-digging, meat preserving and saw-milling. Pastoral district. Formation : sandstone. Population, 450 ; riding, 950.

TEMPLETON (43° 36′ S. lat., 172 32′ E. long.), (Canterbury prov., Selwyn co. and riding of Riccarton), a post town, with telegraph offices, 9 miles from Christchurch, with which it is connected by railway ; fares, 1s. 3d. and 10d. There are here one hotel (Templeton), general stores, grain stores, chicory works, freezing and manure works and steam flour-mills. Public library and public school, Church of England and Wesleyan places of worship. The water supply is derived from the Waimakariri by means of races. Formation : gravel and sand. District mainly agricultural. Population, about 400.

TEMUKA (44° 30′ S. lat., 171° 24′ E. long.), prov. Canterbury, Geraldine co. and riding of Temuka, police district of Christchurch, a post town, with telegraph station, savings bank, and money-order office, on the Temuka, 12 miles from Timaru and 88 miles from Christchurch. It is a railway station on the Timaru line, which runs through centre of town : one side of the line is Temuka (the business centre), the other is known as Arowhenua (chiefly dwellings). Coaches run to Hilton, 9 miles inland (fare, 2s.). Hotels : Temuka, Wallingford, Royal, Crown, and Star. Bank of New Zealand. Two public schools, convent school, a private school, mechanics' institute, six places of worship (Catholic, Anglican, Wesleyan, Presbyterian, Methodist, and Salvation Army), Masonic and Oddfellows' lodges, fire brigade, and several stores. It is an agricultural and pastoral district. Among the industries are a dairy and a bacon factory, several flour mills, fellmongeries, &c. It is admitted to be one of the best localities in New Zealand for trout fishing. Town lighted with kerosene. Population, town, 2,060 ; district, 4,120. Newspapers : *Temuka Leader* and *Geraldine Guardian.*

TENUI (40° 49′ S. lat., 175° 8′ E. long.), Wairarapa north County, riding of Castlepoint and Wellington provincial district, a post town, with money-order office, savings bank and telephone station on Whareama river, on the main road from Wellington to Castlepoint, 97 miles NE. from Wellington, and 30 from Masterton. Coach from Wellington and Masterton Monday, Wednesday and Friday ; from Tenui, Tuesday, Thursday, and Saturday. Has hotel, three stores, a police station, and Foresters' lodge, hall, Roman Catholic church, town hall and public school. Water from wells and tanks. Formation : Devonian. Pastoral and agricultural district. Population of town 200 ; of riding 600.

TE PUKE (37° 45′ S. lat., 176° 20′ E. long.) Auckland prov. (Tauranga co. and Maketu riding). Agricultural and pastoral district, with a post and money-order office, telegraph, savings bank, police station, and telephone station, 90 miles from Thames. Gold mining is being successfully carried on. Communication with Auckland by coach to Tauranga or Thames, thence steamer twice weekly, and mail coach *viâ* Rotorua, thence rail twice weekly. Has hotel, police station, two schools, mission hall, Wesleyan, Anglican, Roman Catholic, and Presbyterian churches, three coach factories. Population, 300.

THAMES (GRAHAMSTOWN) (37° 5′ S. lat., 175° 32′ E. long.), a post town with savings bank, money-order and telegraph office, and railway station, an important mining township on the Firth of Thames (county and electorate of Thames, prov. dist. of Auckland), situated about 40 miles SE. of Auckland. The district of Ohinemuri was separated from Thames Co. on Sept. 30, 1885, and constituted a separate county. (Grahamstown, Shortland, and Tararu are now known as THAMES.) Steamers ply daily to and from Thames and the Upper country, as well as Auckland. Trains run twice and thrice on alternate days between Thames, Upper country and Auckland. Coach from Te Aroha daily except Sunday. Among the hotels are the Theatre Royal, Pacific, Queen's, Royal Exchange, and many others. It takes its name from the late Robert Graham, who purchased the site from the native owners : Hoterini Taipara (who died in March, 1880) was the principal landowner. It was opened as a gold-field on July 27, 1867. It is on the western side of the Cape Colville peninsula, being about 64 miles distant from the Cape itself, and 30 miles SE. by S. from Coromandel Harbour. It is the capital and emporium of the now well-known Thames gold-fields. It is well laid-out, has a number of permanent and substantial buildings, and good wharfage accommodation. The places of worship comprise an Episcopal church, and chapels belonging to the Congregational, Wesleyan, Primitive Methodist, Roman Catholic, Baptist, and Presbyterian bodies. The New Zealand, and N. S. Wales Banks, have branches here, and several of the more prominent insurance companies are represented. It has a hospital, with 55 beds, public schools, high school, several private schools, a public library, with about 3,000 volumes, School of Mines, and theatre. Nearly all the benefit societies have lodges, and there are two corps of volunteers. Among industries are foundries, a saw-mill, jam and fruit preserving factories, furniture factory and shipbuilding yards : while on the banks of the Thames and within three miles of the township are the Hauraki and Kopu saw-mills. Large quantities of millet, schnapper, flounders, and other fish are sent daily to Auckland, and quantities of schnappers are cured by smoking and supplied to both the local and Auckland markets. The town is situated on the beach, with level and moderately wide streets, and is partly lighted with gas and immediately behind the town, and in many places bounding the streets, are the gold-bearing ranges, as well as the leading mines of the field.

Grahamstown is under municipal government, a mayor and nine councillors, under whose jurisdiction are also Shortland and the suburb of Tararu. In the municipal borough of Thames are comprised 2,560 acres, 1,200 dwellings, the annual assessment being £7,780. The permanent prosperity of the place depends in a great measure on the development of the vast mineral products of the district which comprise not only gold and silver, but iron, copper, lead, and zinc, and of the agricultural resources of the Upper Thames. The river from Ohinemuri Junction to Pakopako, a distance of about 70 miles, has been cleared and rendered navigable for steamers of light draught,

thus giving a highway to a very large area of valuable land. Good roads are being formed, which will be of immense service in promoting settlement and opening up the country, and developing the auriferous ranges in the vicinity of Te Aroha and Ohinemuri district generally. Mining operations are being carried on at Waitekauri (about 40 miles south) and at Karangahake, about 28 miles S. of the Thames township. Prospecting is being carried on in the vicinity, which is found to be auriferous. Formation : volcanic tufa. Population (census 1896), 4,261, now 5,000; county, 4,515. Newspapers, *Thames Advertiser* and *Evening Star* (daily).

THE REEFS. *See* BULLENDALE.

THORNBURY (46° 17′ S. lat., 168° 3′ E. long.) (prov. dist. Southland, co. Wallace and riding of Aparima), a post town, with money-order office, savings bank, telegraph, telephone, and railway station, 20 miles NW. from Invercargill. It is on the Orepuki branch of the Invercargill and Kingston Railway, and is pleasantly and favourably situated at the junction of five different roads. There are here National Bank of New Zealand (open Friday only), several stores, a public hall, one hotel, railway refreshment rooms, an Episcopal church, a school, and cattle and sheep dipping yards. Good trout fishing in Aparima river. Stock sales take place once a month. Good agricultural and pastoral district. Population, town, 130; with vicinity 250.

THORPE (Waimea co., Wai-iti riding,) a post town with telephone station, 32 miles from Nelson. Population 67.

TIKORANGI (Clifton co., riding of Tikorangi, Taranaki prov.), 15 miles from New Plymouth. A postal district, with dairy factories, public hall and public library, Anglican church, one school, used for Wesleyan services. Industries : Butter factory and bone mills. District is agricultural and dairying. Communication is by trap or horse to Waitara, thence train. Tikorangi was first occupied in 1866 by settlers from Taranaki militia and volunteers. Population of district, 350.

TIMARU (44° 23′ S. lat., 171° 17′ 20″ E. long.), a post town, with telegraph offices, telephone bureau, money-order and savings bank, Customs, lands, public trust, official assignee, Stock, and Education offices, in the provincial district of Canterbury (co. Levels), the chief town and seat of the Supreme and District Courts in South Canterbury, at the SW. end of the Ninety Mile beach, lying about 10 miles N. of the Pareora river, and about midway between the cities of Dunedin and Christchurch, 100 miles SW. by S. from Christchurch, and 131 miles from Dunedin. There is regular communication by steamers and sailers with the other coastal, Australian, and British ports. The harbour is enclosed to the South by a breakwater built of concrete, and on the North by a bluestone rubble mole. The New Zealand Steamship Company, Shaw Savill, Tyser and Shire lines of direct home steamers call at regular intervals; the coastal and intercolonial boats of the Union Company call almost daily, and there is rail communication both with Christchurch and Dunedin; fares from Christchurch, 12s. 7d. and 8s. 5d., from Dunedin, 16s. 6d. and 11s.; also to Fairlie, thence by coach to Mount Cook and Southern Alps. There are thirteen hotels in the municipality, the Royal, Ship, Club, Empire, Criterion, Grosvenor, Queen's, Shamrock, Melville, Timaru, Commercial, Old Bank, and Hibernian. The Episcopalian, Presbyterian, Roman Catholic, Congregational, Wesleyan, and Primitive Methodist denominations have all well-built churches, and the Hebrew denomination has a synagogue. The other principal public buildings are the hospital, having 73 beds, the Government buildings (including customs, education, and Government insurance departments), the court house, the Town Council chambers, the railway station, the Land Office, three public schools (affording accommodation for 1,500 children), the Immigration barracks, the Timaru High schools (boys and girls), and the Roman Catholic convent. The banks are the New Zealand, the Union Bank of Australia, the National, and the New South Wales. The principle places of amusement are the Theatre Royal, capable of holding 1,000 people, Oddfellows' Hall, Assembly Rooms, Sophia Street Hall, Mechanics' Institute Hall, and large Garrison Hall; also headquarters South Canterbury Battalion of Volunteers. Caroline Bay Sands popular watering place for inland settlers. All the principle Insurance Companies doing business in the colonies are represented, and there are Oddfellows', Foresters', Druids', and Hibernian lodges, also four building and investment societies. The principal industries are three roller flour mills, boot factory, woollen mill, Refrigerating works, agricultural implement manufactories, saw mills and a meat preserving and wool scouring works. Town is lighted with gas and supplied with water from the Pareora River. The principal exports during 1899 were in wool, skins, tallow, flour, wheat, oats and frozen mutton. Exports from the port during the year 1899 amounted to £726,476, and imports, £119,766. Opals have recently been found in fair quantities at Peel Forest, about 30 miles distant. Newspapers: *Timaru Herald*, morning daily; *South Canterbury Times*, evening daily; *Canterbury and Otago Almanac*, annual.

TINKERS, or TINKER'S GULLY (45° 2′ S. lat., 169° 29′ E. long.), is about 8 miles from Blacks or Ophir, at the foot of the Dunstan range, 145 miles NW. from Dunedin (Otago prov. dist., Vincent co. and Matakanui riding). Post town, with telephone station. Hotel (Newtown), public school, store. Roman Catholic Church; Presbyterian and Wesleyan services held. Mining locality. There are several claims at work here, all doing fairly well. Although only a small field it contains as rich alluvial auriferous ground as any in the colony. The mining property of the district is valued at about £50,000. Population, 40; district, 120.

TINWALD (prov. dist. Canterbury, co. Ashburton, riding Ashburton), a post town on the Ashburton river, with money-order office, telegraph station, savings bank and railway station, 54½ miles from Christchurch; fares, 7s. and 4s. 8d. Has hotel, school, Presbyterian, Anglican, and Wesleyan churches, M.U.I.O.O.F. lodge, and flax dressing industry. Agricultural and pastoral district. Population (census 1896), 538.

TIRAU (late OXFORD) (Piako county, Patatere riding, and Auckland prov. dist.), a post town with money-order office, savings bank, telephone, and railway station, 134 miles from Auckland. Has Royal Hoteland Government school. Agricultural and pastoral district. Oxford is the centre of Government fish hatchery. Excellent trout fishing in these streams. Formation: volcanic. Population, 70, and a few natives.

TOKOMAIRIRO *See* MILTON.

TOLAGA BAY (prov. Auckland, Cook co., riding of Tolaga), 35 miles from Gisborne, to which coach. A post town, with money-order, savings bank, and telephone offices. Has hotel, State school, Maori church, public library, several trades and police station. Cook's Cove is in the vicinity. Agricultural and pastoral. Population of district about 300.

TOTARANUI (Collingwood co., Takaka riding), 32 miles from Nelson by steamer. A post town, with State school. Pastoral district. Population of about 60; of riding, 1,331.

TUAKAU (co. Manukau, prov. Auckland), a post town, with money-order and telegraph office, savings bank, and railway station, 36 miles from S. Auckland, near Waikato river; single fares, 4s. 7d. and 3s. 1d.; 280 miles N. of Wellington. Has hotel, public hall, flax, flour, and rope works, two Government schools, Anglican, Wesleyan, Presbyterian and Roman Catholic churches. District is pastoral and agricultural. Population of town, 500; of riding, 2,800.

TUAMARINA (41° 23′ S. lat., 172° 2′ E. long.), a small post town, with telephone bureau, situated on the northern end of Wairau Plain, and the Wairau and Tua Marina Creeks, at the foot of Massacre Hill, from the summit of which a splendid view is obtainable, the scene of the murder of Captain Wakefield and party in 1843. Mount Dobson, 1,500 feet high, is in the vicinity. It is in the co. and prov. of Marlborough, and riding of Picton, and is a flag station on the Picton and Blenheim Railway. It lies 6 miles from Blenheim, has telephone communication with Blenheim and Picton, has one hotel, a Government school, Wesleyan and Roman Catholic chapels, two flax-mills, cheese factory, several stores, brick kiln, &c. Coach road to Nelson It is also connected by road with the gold mining settlement of Waikakaho. Population about 260. Formation: volcanic and red clay. Agricultural district.

TUAPEKA. *See* LAWRENCE.

TURAKINA (40° 2′ S. lat., 175° 4′ E. long.) (co. Rangitikei, riding of Wangaehu, Wellington prov. dist.) is situated in the valley of the Turakina river, on the left bank of the stream, about 5 miles from the sea. It has a post, money-order, savings bank, and telegraph office, and railway station on the Wanganui and Foxton line, being 44 miles from Longburn Junction; fares, 5s. 7d. and 3s. 9d., and 128 miles from Wellington. The station is nearly a mile from the town centre. Hotels: Railway and Ben Nevis. The soil of the valley, being alluvial, is of excellent quality, producing large crops where cultivation is carried on. There is also a good supply of wood not far from the township. The situation of the township, though rather low, is very healthy, and somewhat picturesque. Places of worship: Presbyterian, Anglican and Roman Catholic churches, ladies' college, a public and a private school, and library. There are several stores, smith's, and a saddler. Grazing district. Population of town about 400.

URENUI (Taranaki prov., Clifton co., Mokau riding), 20 miles from New Plymouth. A post town, with telephone station, hotel, school, Anglican church and hall. Dairy factory. District is pastoral. Coach to Waitara, thence rail to New Plymouth. Water from tanks and wells. Population 170, district, 161.

UXBRIDGE *See* GEORGETOWN.

WADE (Waitemata co., Wainui riding), on the Weiti river, 24 miles from Auckland, connected by steamer 30 miles, and coach (20 miles) to and from on alternate days. A township, with post, money-order office and savings bank, and a telephone station. Has hotel, school, three churches and two halls. Industries: Farming, gum digging, and orchard. Pastoral district. Population, 208; district 500.

WAIANIWA (46° 17′ S. lat., 168° 17′ E. long.) (Southland co., Wallacetown riding), 12 miles from Invercargill, on the Oreti river. A post town, telephone, and railway station. Has a public school, library, I.O.G.T. society. Sawmill. Agricultural district. Population of district, 200.

WAIAU (42° 34′ S. lat., 172° 46′ E. long.), a post and money-order township, with savings bank, and telegraph station, co. of Amuri, and riding of Waiau, police district of Christchurch, on the River Waiau, 83 miles N. from Christchurch, coach to Culverden, fare, 5s., rail thence 8s. 9d. and 5s. 10d. Has a State school and Roman Catholic church, a Presbyterian kirk, used also for Divine worship on alternate Sundays by Episcopalians, and one hotel, flax mill, stores, blacksmith's, boarding house, and public library and reading room. Pastoral and farming district. Formation: lime and sandstone, principally the former. Population, 183.

WAIHI (Ohinemuri co., Waitoa riding, Auckland prov.), 43 miles from Thames, 15 miles from Paeroa, from whence coach daily, 4s. A post town, with savings bank, money-order office, and telephone station. Has three hotels, State school, five churches, Salvation Army barracks, School of Mines, Miners Union, Burn's club, National bank, police station. Famous mining district; Martha mines turn out about £23,000

monthly. Industries: mining and brick-making. Masonic, Oddfellows', Foresters' and Druids' lodges. Formation; andesite and rhyolite of tertiary age. Newspapers: *Waihi Miner*, bi-weekly; *Chronicle*, bi-weekly. Population of district, about 400.

WAIHOLA (46° 2′ S. lat., 170° 10′ E. long.) (Otago prov. dist., Bruce co. and riding of Waihola), a post town on Lake Waihola with money-order, telegraph office, savings bank and railway station, 26 miles S.W. from Dunedin. It has one hotel, Government school and Presbyterian church. Water from wells. Dairy factory. District is agricultural. Formation: glacial and volcanic. Population of district, about 300.

WAIKAIA. *See* SWITZERS.

WAIKARI (Ashley co. and riding of Waipara), a post town, with money-order office, savings bank, telegraph, and railway station, 50 miles from Christchurch. There is here a public school, two hotels, library, Presbyterian church, and Oddfellows' hall. Weka Pass in district. The district is agricultural and pastoral. Population, 600.

WAIKOÏKOI (prov. dist. Otago, Clutha co., Waipahi riding), 96 miles from Dunedin, reached by horse and rail, on creek of name. A post town, with telephone station and money-order office. Has State school, Presbyterian church, public library, Good Templars' lodge. Agricultural and pastoral district. Population, 215.

WAIKOUAITI (45° 37′ S. lat., 170° 43′ E. long.), (Waikouaiti co. and riding of Merton), police district of Waikouaiti, provincial district of Otago, with post, savings bank, money-order, telegraph offices, and railway station. It lies 32 miles by rail north of Dunedin, fares to Dunedin, 4s. 1d. and 2s. 9d.; return, 8s. 2d. and 5s. 6d. Has Episcopal, Presbyterian, Wesleyan and Roman Catholic churches, State school, native school, attended by Europeans and natives, public hall. Golden Fleece and Railway hotels. Bank of New Zealand, mechanics' institute and library, Masonic and Oddfellows' lodges. There is a very good harbour for coasting vessels of small tonnage, viz., 30 to 40 tons. Waikouaiti Bay is 22 miles S. of Moeraki. It has a clear sandy beach of 2 miles in extent. There is good anchorage and excellent holding ground in SW. winds, and under Mount Cornish (the northern point of the Bay), in N. or NE. winds, in 4 fathoms. There is a depth of 5 feet on the bar entrance to the river in ordinary tides, and it should be crossed at last quarter flood. The tides are five minutes later than at Taiaroa Head. Agricultural district. Dairying industry. Population of borough (census 1896), 760; of county, 4,389.

WAIMANGAROA (41° 45′ 7″ S. lat., 171° 36′ 17″ E. long.) (Buller co., prov. Nelson, shire Karamea), 11 miles from Westport, and is situate at the foot of the Mount Rochefort plateau, on river of name. A post town (G. S. Finch, postmaster), with savings bank, money-order office, railway and telephone station. Has three hotels, State school; Anglican, Roman Catholic and Methodist churches, brick and tile mill, flax mill, saw mills, coal and gold mines, public library, and Good Templars' lodge. Mining and grazing district. Formation: slate, granite, and sandstone. Population of 350: of district, 550.

WAIMATE (44° 46′ S. lat., 171° 8′ E. long.), a post town, with money-order, savings bank, telegraph offices, and railway station, in the prov. dist. of Canterbury (co. of Waimate), 130 miles S. of Christchurch on the Waimate Creek, and about an equal distance from Dunedin. The Southern Trunk Railway passes within a few miles of the town, and a branch line connects it with the main line at Studholme. From Waimate a line of railway, known as the Gorge Railway, runs out to Waihao Downs. The hotels are the Royal, Empire, Waimate and Criterion. Banks: New Zealand and Union. Churches: St. Augustine's (English), Knox Church (Presbyterian), St. Paul's (Wesleyan), St. Patrick's (Roman Catholic) and a Primitive Methodist church. The Salvation Army occupies large barracks in the town. District High School, and Roman Catholic school. The local hospital, which cost upwards of £10,000 has 25 beds. There is a public library and reading-room, post office, and borough council chamber, Oddfellows', Foresters', and Freemason societies. Knottingley and Victoria Parks near the town are set aside for recreation purposes. The court-house and County Council offices are imposing and substantial offices. There is a Foresters' hall, Oddfellows' hall, and Masonic hall, besides the Library hall and County Council hall. The only industries are roller flour mills and steam saw mills. The district supports a Racing club, Caledonian Society, library, Agricultural and Pastoral Society, and Acclimatization Society. Religious and social societies are in a flourishing condition. Town lighted with kerosene, water from wells. Formation: newer sedimentary rocks. Population of borough, 1,300; county, 5,000. Local newspaper, *Waimate Times*.

WAIORONGOMAI (prov. Auckland, Piako co., Te Aroha riding), 38 miles from Thames, on creek of the same name. A post town, with telephone and money-order offices. Coach to Te Aroha, thence rail to Auckland, 115 miles. Has hotel and school. Mining, agricultural, and pastoral district. Formation: volcanic. Population of village about 100.

WAIPAHI (Clutha co. and riding of Waipahi, prov. Otago), a post town on the Waipahi river, with money-order office, savings bank, telegraph and railway station, 84 miles from Dunedin; fares, 10s. 7d. and 7s. 1d. Wellington 500 miles S.W. Has State school and Presbyterian church. Good fishing. Agricultural and pastoral district. Population about 100; district 300.

WAIPARA (Ashley county and riding of Waipara), a post town, with telegraph and railway station, 41 miles from Christchurch; fares, 5s. 3d. and 3s. 6d. Pastoral district. Population, 48.

WAIPAWA (39° 47′ S. lat., 176° 38′ E. long.), a post town, with money-order, telegraph station, and savings bank, in the county and riding of Waipawa (Hawke's Bay prov. dist.), 39 miles from Napier. It is a railway station, on the Napier and Wellington line; fares to Napier, 5s. and 3s. 4d. Hotels: Empire, Imperial, Exchange, and Commercial. It is situated on the Northern bank of the Waipawa river, which is here spanned by a substantial railway bridge nearly one-fourth of a mile long. Another ¾ mile higher up stream is for ordinary traffic. It is on the main line of road between Napier and Wellington. The Australasia and New Zealand banks have branches here. Four places of worship, Methodist, Presbyterian, Episcopal and Roman Catholic, free reading-room and library. Public and Roman Catholic schools, lodges belonging to the Masons, Oddfellows, Hibernians, and Foresters. Industries: jam and pickle factories and one brewery. The Waipawa County Council meets here. Population (census 1896) of town and road districts, 1,091; of riding, 1,672; county, 8 868. There is a tri-weekly newspaper, the *Waipawa Mail*.

WAIPIRO BAY (Auckland prov., Waiapu co., Waipiro riding), a post town, with money-order office, savings bank and telephone station, 70 miles from Gisborne, 350 from Wellington. Has hotel, school, native Episcopal church. There are hot springs six miles distant, and Mount Hikurangi, 3,000 feet high. Formation: papa rock. Population 100, district 250.

WAIPU (35° 50′ S. lat., 174° 32′ E. long.), a post town, provincial district of Auckland, county of Marsden and riding of Waipu; with money-order office, savings bank and telegraph station, lying 12 miles distant from Whangarei Heads, and about 102 miles N. from Auckland, on the Waipu river. It is sometimes known as the Nova Scotian Settlement, having been settled by Nova Scotians on May 19th, 1854. The settlement is a prohibition one, scattered over a considerable area of ground, and has 2 Presbyterian churches, 5 schools, Caledonian society, Oddfellows' lodge, a court-house, town hall, library, several stores, four accommodation houses, hematite paint mill, and a water-power flour mill. Coaches run to Marsden point, steamers thence to Auckland. The harbour at present is only of use for vessels of very limited tonnage. At a few miles distance are some remarkable limestone caves and the Gorge. Agricultural and grazing district. Soil light sandy, clay subsoil. Population of village and district, about 1,000.

WAIPUKURAU (39° 58′ S. lat., 176° 43′ E. long.), a post town with money-order, savings bank and telegraph offices, and railway station on the Napier and Wellington line, and main south road, 44 miles SW. of Napier. Fares, 5s. 7d. and 3s. 9d. Hotel: Tavistock. It is in the County of Waipawa, and riding of Waipukurau, and is situated on the Southern bank of the Tukituki river, which is here crossed by a railway bridge, one-fourth of a mile long, also a traffic bridge; a branch of the New Zealand Bank, a town hall, district library, Masonic, Oddfellows', Foresters' and Rechabite lodges, hospital, with 45 beds, and public school. Mails from Napier four times daily, and from Wellington (155 miles) once. Episcopal church, and Presbyterian places of worship; sash and door factory. The town is described as beautifully situated. Country is well adapted for pastoral purposes. Population, 549; of riding, 816.

WAIRAKEI ESTATE (county Taupo, prov. dist. Auckland, a post town with telephone station, lying six miles north of Lake Taupo, on left bank Waikato river, about midway between Auckland and Napier, laid off and owned by the pioneer of the district, the late Mr. Robert Graham. The estate comprises the Huka Falls, Aratiatia Rapids, Kirokinikai or "New Skin" Bath, Geyser valley, boiling springs, and many other wonders not to be found elsewhere. There is an hotel and sanatorium. Rotorua is 50 miles north, a good coach road connecting the two places; coach runs thrice weekly, thence train to Auckland; coach to Napier, weekly, thence train or steamer to Wellington; or, during summer, coach twice weekly to Pipiriki on the Wanganui River, thence by steamer to Wanganui, thence rail to Wellington—fine mountain, lake, and bush scenery on the above routes, which are all much travelled over by tourists. Population, 14; of county, 150.

WAIROA (39° 0′ S. lat., 177° 29′ E. long.), sometimes known as CLYDE, has a post and money-order office, savings bank, and telegraph station, in the provincial district of Hawke's Bay, co. of Wairoa, riding of Clyde, and electorate of Waiapu, 71 miles from Napier to which there is a bi-weekly steamer, fare 12s. 6d. Hotels: Clyde, Ferry, and Wairoa. It is located on the river Wairoa, which is navigable for 12 miles. Business and official institutions comprise a State school, court-house, lock-up, stores, mechanics' institute, and public library. Town is lighted with kerosene. Places of worship: Anglican, Roman Catholic, Presbyterian and Mormon churches. Jockey, cricket, football and polo clubs are among its institutions. Grazing country, very hilly, with very good roads; one especially, from Wairoa to Lake Waikaremoana (highest lake in New Zealand); the hot springs of Nuhaka are also becoming popular. The Government is making a road from Napier to Wairoa, which will open up a country with fine scenery; also the Government intend throwing open large tracts of land for selection. The climate is suitable for fruit growing (oranges and lemons), considered the finest in the world. Chief exports are wool, maize and wheat. Population (census 1896) of town, 600; of riding, 749; of county, 1490. Newspaper: the *Wairoa Guardian*.

WAIROA (38° 2′ S. lat., 176° 20′ E. long.), a small Maori village, on the western side of Lake Tarawera, in the county of Rotorua. It nestles almost at the foot of Mount Tarawera, which Maori traditions consider to have been for hundreds of years

an extinct volcano. Some years ago it awoke with fearful energy, overwhelming the village and district with volcanic dust and mud, and causing great loss of life.

WAITAHUNA (or HAVELOCK) (45° 55′ S. lat., 169° 47′ E. long.), (co. Tuapeka and riding Waitahuna, prov. dist. Otago), a post township, with a money-order office, savings bank, telegraph and railway station on the Dunedin and Lawrence Railway (fares, 6s. 9d. and 4s. 6d.) and Waitahuna river 53 miles SW. of Dunedin. Hotels: Bridge and Havelock. The Bank of New Zealand, has an agency here, open twice a week, and there are Anglican, Presbyterian and Roman Catholic churches, a public school, an Athenæum, also several general stores, Good Templars, and Foresters' Lodges. District, partly mining, and partly agricultural. Gold was first found here by Mr. Gabriel Read; dredging is carried on. Local institutions: Foresters', Good Templars' lodges, and a Farmers' Club. Population, 400.

WAITAHUNA GULLY (45° 50′ S. lat., 169° 40′ E. long.) a small post town (co. of Tuapeka, provincial district of Otago, and riding of Waitahuna), situate about 2½ miles from Havelock, 55 miles W. of Dunedin, and 8 miles SE. of Lawrence, and 450 from Wellington, on the Waitahuna River. It has a fine public library and reading room, Oddfellows' lodge, and a public school. Brass band. Presbyterian and Epicopalian services are held alternate Sundays. An express runs to the Waitahuna railway station, which is the nearest telegraph and money-order station. Mining and pastoral district. Gold claims worked by hydraulic elevators. Formation: cement and quartz reefs below alluvial deposit. Population 250, of riding, 730.

WAITAKI. *See* GLENAVI.

WAITARA (39° S. lat., 174° 15′ E. long.) (co., of Taranaki), a post town on the Waitara River, about 11 miles from New Plymouth, and 250 miles from Wellington, with money-order office, savings bank, telegraph and railway station. Fares, 2s. and 1s. It has branches of the New Zealand and Australasian Banks, Chamber of Commerce, Wesleyan and Anglican churches, and Salvation Army, free library, Foresters', Oddfellows', and Freemasons' lodges, parish hall, public school (Waitara West), police station, and other buildings. Hotels: Waitara, Bridge and Masonic. Industry: freezing works, mining, potted meats, fellmongery, sawmill, manure and lime-burning. Coaches run to Waitara and New Plymouth daily, fare, 2s., also to Urenui (a prosperous farming settlement, 10 miles away), 2s. and 3s. Steamer plies weekly to Auckland carrying cattle and produce (also to Wellington) and steamer also runs to Mokau thrice weekly, and to Awakino when required. A trip to Mokau, *vid* Pukearuhe by horseback to the mines, by steamer up the Mokau river, where the scenery is remarkably striking, can be recommended. Between Pukearuhe and Tongaporutu on the beach there is a stretch of rocks of peculiar formation, and highly fantastic in appearance. At Awakino are some beautiful caves. Lighted with kerosene. Formation: volcanic, pastoral and mining. Population (census 1896), 597; of riding, 3,141. Newspaper: *Waitara Mail* (1d.) thrice weekly.

WAITATI (or BLUESKIN) (45° 43′ S. lat., 170° 32′ E. long.), a government township and railway station adjacent to Blueskin Bay, with savings bank, money-order office, telegraph station and post office, in co. Waikouaiti, and prov. dist. Otago. It is a popular summer resort, situated on the Waitati river, 17 miles by rail, and 12 miles by road NE. from Dunedin. Rail fare, 4s. 6d. and 3s. (return). Has hotel, public school, Presbyterian, Roman Catholic, and Wesleyan churches; dairy factory. Saratoga hotel. It is an agricultural and dairy-farming district, with population, 500.

WAITEKAURI (Auckland provincial district, Ohinemuri co., and riding of Waitekauri), a post town, 36 miles from Thames, with money-order office, telegraph station and savings bank. Coach twice daily to Paeroa, thence steamer or train to Auckland. Has two hotels and State school. Roman Catholic and Anglican churches. Oddfellows and Foresters' lodges, Miners Union and Social Club. Quartz mining district. Formation: volcanic. Population 463; of district about 1,000. Newspaper: *Golden Age*.

WAITOTARA (39° 50′ S. lat., 174° 40′ E. long.), a post town on river of same name, with money-order office, savings bank, railway, telephone, and telegraph station (prov. Wellington, co. Patea, and shire Wanganui), 26 miles from Wanganui, and 82 rail miles from New Plymouth, fares, 10s. 4d. and 6s. 11d., 170 miles NW. of Wellington, with two hotels, a public school, Union hall, German and Anglican churches. Lighted with kerosene. Volcanic soil, with sand and paparus rock. Population of town, 300; of riding, 2,000.

WAIUKU (37° 20′ S. lat., 174° 40′ E. long.), post town, with money-order, savings bank and telephone office, in county of Manukau, and riding of Waiuku (prov. dist. of Auckland). It is situated at the head of a navigable salt water tidal creek, an arm of the Manukau, about 38 miles S. from Onehunga, 44 miles from Auckland, there being steamer communication with the former place five times a week, fare, 6s. return, 240 miles N. of Wellington. Coach runs to Pukekohe, 13 miles, connecting with the railway station there. There are several stores, an hotel, five schools, a public hall, a court house, Masonic and Oddfellows' lodges, three places of worship—Presbyterian, Anglican, and Wesleyan, three creameries, and one flour mill. Saleyards, and a cattle market held twice a month. The climate is salubrious and the scenery charming. Dairying, cattle raising. Kauri gum digging and fruit district. Water from wells. Population of village, 165, district, 452.

WAIWERA (46° 12′ S. lat., 169° 17′ E. long.), prov. dist. Auckland, co. of Waitemata, and riding of Wainui, is a small township with post, money-order, telegraph and telephone office and savings bank, in the Hauraki Gulf, 30 miles from Auckland, and of easy access, either by sea or land. There is steamer communication with Auckland daily, fare 3s. return; coach also runs to Devonport, fare, 6s., return fares, 10s. It is situated "on an alluvial spot on the right bank of the river Waiwera, where it enters the sea." It is a great place of resort in the summer, and the Hot Springs are said to be wonderfully efficacious in rheumatic, spinal and cutaneous diseases. An analysis of the water proves that it is similar to several of the famous continental waters, such as Vichy and Fachingen. There is a fine hotel—the Hot Springs, with good grounds, and in the season is largely frequented by visitors from all parts; public school (50 children). The district is an alluvial flat at the mouth of the Waiwera river. Population about 100, of riding, 1,300.

WAKEFIELD (41° 24′ S. lat., 173° 3′ E. long.), a post town on the Wai-iti river, in the co. of Waimea, riding of Wai-iti (prov. dist of Nelson), having a money-order, post, savings bank, and telegraph offices. It is a station on the Nelson-Belgrove Railway, being 17 miles distant from Nelson, fares, 2s. 3d., 1s. 6d.; return 4s. 6d., 3s. Hotel: Wakefield. Has three State schools, Church of England, Roman Catholic, and Plymouth Brethren places of worship. Masonic, Druids', Rechabite, M.U.I.O.O.F. and I.O.G.T. lodges. Lighted with kerosene and acetylene gas. Water from wells. Hops are grown. Formation: marl hills and alluvial flats. Population 700.

WALLACETOWN (Southland co., and riding of Wallace town), 8 miles from Invercargill, on the Makarewa, 8 miles NW. of Wellington. A post town, with telephone station. One hotel, school, and Presbyterian church and milk preserving works. District is agricultural. Population, 160.

WALLINGFORD (40° 13′ S. lat., 176° 40′ E. long.), co. of Patangata, riding of Eparaima, Hawkes Bay prov., a postal centre and telegraph station, 65 miles from Napier, 19 from Waipakarau railway station, and 9 from Porangahau, with a Roman Catholic church, a school, six hotels, blacksmith's shop. It is located on the Porangahau Creek. Formation: limestone. Population of town, 65; of riding 305.

WALLSEND is a part of the borough of Brunner—which *see*.

WALTON (Auckland prov. dist., Piako co., and Bay of Plenty Electorate), 60 rail miles to Auckland, to which steamer. 40 miles. A postal and farming district, with railway station and school, in which religious services are held. Good deer shooting. Population, 80.

WANGANUI (39° 56′ 48″ S. lat., 175° 5′ 50″ E. long.), with post office, savings bank, money-order and telegraph offices. It is pleasantly situated on the north bank of the river Wanganui, about 4 miles from the Heads, lying 107 feet above sea-level. The river has a bar at its mouth, limiting navigation; the depth of water ranges from 9 to 14 feet, and dredging is now going on to deepen it. Two rival companies run regular steamers up the Wanganui river as far as Pipiriki, and in summer large numbers of tourists visit the district. Wanganui is in the co. of Waitotara, Wellington prov. dist., and lies about 134 miles N. of Wellington, less than 100 miles by sea, to which place there is direct rail and steamer communication. Steamers also ply to the neighbouring ports. The railway runs from Waitara (Taranaki) in an unbroken stretch to Longburn, to the Wellington-Manawatu Co.'s line, and thence to Wellington; also in direct daily communication with Napier, and the line from Woodville to Wellington *vid* Masterton is now complete. Some good hotels, among which are the Rutland, Railway, Criterion, Commercial, Victoria, Fosters, Provincial, Metropolitan, and Custom House. Commodious workshops in connection with the railways have been buiel here. It is the chief seaport on the West Coast, and is built on a flat, the town being laid out in rectangulas blocks, the streets running from the river up to the bast of the Northern Cliff, the cross streets running east and west The principal business part of the town is on Taupo Quay, facing the river bank, and in Victoria Avenue; the latter is the principal thoroughfare. The water supply is derived from natural reservoirs called Virginia, about a mile distant, and Wastmere Lakes, 3¼ miles distant. The town is lighted with gas. There are Episcopal, Presbyterian, Roman Catholic, Baptists, Christian Brethren, and Wesleyan places of worship, all being in Victoria Avenue; Fire Brigade Hall, Academy of Music, the Princess's Theatre, museum, public library, an Endowed school, boys' school, girls' school, and infants' school, and a new hospital, built in brick at a cost of £13,000, some substantial stores, Court-house, Druids', Oddfellows', Foresters', and Masonic lodges. Several of leading insurance companies have agencies, and the N. S. Wales, Australasia, New Zealand, and National Bank of New Zealand have branches here. In the Market Square is the Moutoa monument, erected to the memory of the friendly natives who fell at Moutoa on May 14, 1864, while resisting an attack on the town by the rebel natives. An iron bridge, nearly 600 feet long, built at a cost of £32,000, connects the north and south sides of the river; this bridge is supported on seven cast-iron cylinder piers; it has a swing of 130 feet long, giving, when open, two passages of 40 feet. Local industries are steam saw-mills, sash and door factories, flour-mills, breweries, foundries, cider and fruit-preserving works, two large freezing works, and fellmongeries. The district is both agricultural and pastoral. The exports of cattle, sheep, grain, and wool are large, and the export dairy produce is also increasing. The Wanganui Wharf has a total frontage available for vessels of about 940 feet. The value of the exports from the port for 1899 was £382,625. Borough population (census 1896),

5,936, now 7,000, with suburbs about 10,000. The newspapers are the *Wanganui Chronicle, Weekly Chronicle, Evening Herald, Yeoman* and *A. I.*

WAOTU (38° S. lat., 176° E. long.) (Auckland provincial district, West Taupo co.). A post town, with savings bank-money-order and telegraph offices. On Waikato river. Auck. land is reached by conveyance to Putaruru, 12 miles, thence train. Has public native school. Limestone and pumice formation. Population about 65 Europeans, and 250 Maoris.

WARKWORTH (36° 25′ S. lat., 174° 45′ E. long.), a post town, with money-order office, savings bank, and telegraph station, in the Auckland provincial district, co. of Rodney and riding of Mahurangi, 43 miles from Auckland, situated at the head of the tidal waters of the Mahurangi river. It contains three places of worship, Anglican, Presbyterian, and Wesleyan, public school, police court and station, Masonic and Oddfellows' lodges, town hall, a library, a court-house, a public hall, one hotel, and two boarding houses, and several stores. Lighted with kerosene; water from tanks and wells. The natural resources of the district are hydraulic lime and common lime, kauri gum, building stone, clay for brick making, timber, and splendid fruit growing. Grand view from ranges 6 miles W.; eastward overlook Hauraki Gulf. There are indications of copper ore and coal. Two steamers ply thrice a week to Auckland, and coach tri-weekly, passing through Puhoi, Waiwera, Wade, and Takapuna. Formation: sandstone and limestone and stiff clay on surface. Population of town district 170, with vicinity 179; of riding, 883.

WASHDYKE (44° 23′ S. lat., 171° 17′ E. long.), in the Canterbury provincial district, county of Geraldine, riding of Levels, and Levels Road Board District, a post town, with telegraph and railway junction, 4 miles from Timaru, 96 miles from Christchurch, and 134 miles from Dunedin. Fares 16s. 10d. and 11s. 3d. Has one hotel, Government school, meat preserving works and fellmongery. District is agricultural and pastoral. Population (census 1896) of village 494; of riding 8,207.

WAVERLEY (38° 45′ S. lat., 174° 40′ E. long.), a post town, with money-order office, savings bank, and telegraph station in the co. of Patea, and riding of Waverley, 33 miles from Wanganui, and connected by railway, fares, 4s. 3d. and 2s. 10d. The station is about three-quarters of a mile from the town. Coach meets the train, fare 6d. Hotels: Commercial and Clarendon. Banks: Australasia and New South Wales. Presbyterian, Baptist, Episcopal and Roman Catholic places of worship; fellmongery, dairy and cheese factory, large public hall, reading room, and a public school. It is surrounded by grand country, agricultural and pastoral. Formation: sandstone. Population (census 1896) of town district, 442; of riding, 1,742.

WELLINGTON (41° 16′ 25″ S. lat., 174° 47′ 25″ E. long.), the capital of New Zealand and seat of Government, is situated on the shores of Port Nicholson, an inlet of Cook's Strait (county of Hutt). It is 180 miles by sea from New Plymouth, 150 miles from Nelson, about 1,200 miles SE. of Sydney, and 1,400 miles NE. of Melbourne. With both these capital cities there is steamer communication. The direct steam service and the completion of the Manawatu railway, by which an immense extent of back country has been opened up, are having a very beneficial influence on Wellington, and causing the city to "steadily grow into her true position as the commercial and maritime as well as the political and geographical capital of the colony." The hotels are numerous; amongst others are the Occidental, Empire, Royal Oak, Albert, Club, Queen's, Searl's, Masonic, Victoria, Princess, Panama, Te Aro, Star, Oriental, Metropolitan, and Bank. It was the first and principal settlement of the New Zealand Company; its convenient harbour, the safest and most commodious in New Zealand, a noble sheet of water 6 miles in length by 6 in width, and central position, giving it many advantages. At the eastern side of the entrance to the harbour on a cliff is the Pencarrow lighthouse; opposite is the pilot station. The western entrance is Palmer Head.

The principal buildings are—Government House, in Molesworth Street, a handsome building in the Italian style, surrounded with fine grounds, the Houses of Legislature, which are now illuminated by the electric light. A new Parliamentary library of extensive dimensions has been completed at a cost of £60,000 and forms part of Parliament House. The Government Building is an enormous structure of wood, covering nearly two acres, costing for labour alone £24,685, and contains over 160 rooms. It is said to be the largest wooden structure in the world. Museum, Supreme Court building, opened in 1881, costing £24,785; the churches and chapels, comprising four Episcopal—St. Paul's Cathedral, St. Mark's, St. Thomas's, and St. Peter's, the last-named rebuilt and opened during 1880; it will seat 840, has a fine organ and peal of bells; the spire is 135 feet high; three Roman Catholic (St. Mary's, St. Mary of the Angels, and Buckle Street); three Wesleyan, two Primitive Methodist churches, four Presbyterian (St. Andrew's, St. James', Kent Terrace, and St. John's; last has the finest organ in the colony), two Congregational churches, and places of worship belonging to the Catholic Apostolic Church, Baptists, Plymouth Brethren, Church of Christ, Salvation Army, and the Jews. The Oddfellows, Rechabites, and Foresters have halls, and so have the Masons. The free public library, which cost £10,000, adjoins the Education Board offices and Technical School on the reclaimed land, and is a handsome addition to the public buildings. The passenger stations are buildings of some note.

The theatres are the Royal, which can accommodate 1,000 persons; and the Opera House in Manners Street, which will hold 1,700 people. The Princess Theatre in Tory Street, the Criterion Theatre in Manners Street, St. George's Hall and Exchange Hall, on Lambton Quay, are also used for public entertainments. The Colonial Museum is situated in Museum Street, and the College on a fine site of 75 acres near the Adelaide Road. There is also a girls' high school, a handsome building erected in 1886, and St. Patrick's College, erected in 1884 by Roman Catholics. This last is a splendid building, occupying a commanding position in the Te Aro part (or Cook Ward) of the city; it was opened in February, 1886, by Cardinal Moran. The normal training school for teachers has been closed. The National Mutual Life Co. have built a handsome pile of buildings in the heart of the city, which cost about £15,000. There are numerous warehouses, stores, and shops. Many of the principal buildings are erected on land reclaimed from the sea. The Harbour Board have a large system of hydraulic lifting apparatus, comprising amongst other plant a 35 ton and 10 ton crane. There are two substantial wharves (the Queen's and the Railway) for the accommodation of shipping; also a patent slip, capable of taking up vessels of 2,000 tons. The banks comprise—Bank of New Zealand, National Bank of New Zealand (head office for colony), Bank of N. S. Wales, Bank of Australasia, and the Union Bank. Most of the leading insurance companies are represented by branches or agencies.

The industries are tanneries, candle and soap works, coffee mills, wax match factory, glass bottle factory, several boot factories, biscuit and confectionery company, foundries, sash and door factories, coach factories, brick, drain, and tile works, saw-mills, flour-mill, woollen-mills (on the banks of the Korokoro), and breweries. At the Gear Meat Preserving Works, when in full work, 5,000 sheep and 120 head of cattle are slaughtered weekly, and 80 casks of tallow and 3 tons of bone dust produced, 100 hands being employed, and new freezing machinery is being erected in order to cope with the trade. There are several clubs—Racing, Boating, Jockey, Cricketing, and others. Among charitable institutions are the hospital, near the Adelaide Road, opened in 1881, costing nearly £40,000, with 156 beds; lunatic asylum, with 76 wards and 220 beds, and a benevolent institution. The Boys' Institute, built in 1892, cost £1,000, which was raised by voluntary subscriptions. The Botanical Gardens, situated on the Tinakori Road, are much frequented; they comprise an area of 100 acres. The water supply is obtained from two large reservoirs at Karori and Polhill's Gully, and an additional supply is now got from the Wainuiomata river, about 16 miles distant, completed at a cost of £130,000. Large waterworks for the supply of the city have been constructed, and the supply is ample. The city is lighted by electricity. Newtown is connected by tramway, which runs right through the town to the railway station of the Wellington and Manawatu Railway Company, about 4 miles. It has a branch running along Courtenay Place. It is worked by horse-power, steam having been discarded. A railway from Wellington to Napier on the east coast, and another line, the Wellington-Manawatu Railway, traverses the west coast to Palmerston, connecting the city with New Plymouth, and also connecting the eastern, western, and southern seaboards. Wellington is a city under the Episcopal supervision of the Right Rev. Fred. Wallis, M.A. There is a Roman Catholic Archbishop, Most Rev. F. Redwood. In the municipal boundaries are 1,100 acres, and 54 miles of streets, with 7,358 dwellings. Ratable value of property over £436,103. The suburbs are Vogeltown, Wadestown, Kaiwarra, Karori, Brooklyn, Mitchelltown, Ohiro, and Kilbirnie. Newtown, about 1½ mile out on the Adelaide road, has been built within the last few years, and it is becoming thickly populated by tradesmen and working-men. At Evan's Bay is the patent slip and building yards of the Patent Slip Company, where vessels up to 2,000 tons can be taken up for repairs. A road, called the "Queen's Drive," has been formed round the harbour as far as Island Bay. This work, which is much appreciated, was started for the benefit of the unemployed, and partly paid for by private subscriptions. At Point Halswell, the seaward or outward point of Evan's Bay, a battery of heavy guns has been erected; above Kaiwarra is another battery for heavy guns, and at Ngahauranga. There are two racecourses, one at the Lower Hutt, and another at Island Bay. The general exports of prov. district for 1899 amounted to £2,278,916. The population of the borough, by census, 1896, was 37,414, now 42,739; suburbs, 4,796. Newspapers: *New Zealand Times*, published daily; the *Evening Post*, daily; *New Zealand Mail, Church Chronicle, Mercantile Record*, and *Free Lance*, weekly. The first paper issued here was the *Victoria Times*, on September 15, 1841.

WELLSFORD (36° 25′ S. lat., 174° 30′ E. long.) (prov. Auckland, Rodney co., Albert riding), 57 miles from Auckland. A post town, on Whakapirau, with money-order office, savings bank, and telephone station. Has school (in which Anglican, Wesleyan, and Christian Brethren hold services), fruit, butter, cheese, wine, kauri gum, timber, and cider industries. Formation: limestone. Population about 125, district 550.

WEST HARBOUR. *See* RAVENSBOURNE.

WEST MELTON (Selwyn co. and prov. dist. Canterbury), 15 miles from Christchurch, a post town, with one hotel and several stores, school, Anglican and Wesleyan churches. Waimateariri Mounted Rifles have their headquarters here. Agricultural and pastoral district. Population about 295.

WESTLAND. *See* HOKITIKA.

WESTON (45° S. lat., 171° E. long.) (prov. dist. Otago, Waitaki co. and riding of Waiareka) a post town, with telephone office and railway station, on the Awamoa Creek, 4 miles from Oamaru, 82 miles from Dunedin. Fares, 7d. and 5d.; 173 miles from Lyttelton, reached by rail, boat thence to Wellington. It has two hotels, Oamaru white stone quarries, State school, public library, Oddfellows', Temperance, and Christian Endeavour societies; Presbyterian and Baptist services held in public hall. Water from wells. Industries: quarrying, farming, and Waiareka

cheese factory. Rich agricultural and pastoral district. Formation: limestone Population, 215; district, 200.

WESTPORT (41° 31′ S. lat., 168° 50′ E. long.) (borough), a chief post town, with money-order, savings bank, and telegraph office, on the south-western coast of the provincial district of Nelson, police district of Westland, in the county and electorate of Buller, of which it is the chief town. It is situated on the Buller river. It is by far the best port for every class of vessel on the west coast of the Middle Island, there being deep water always at the bar, and easy entrance. The headland of Cape Foulwind (upon which there is a lighthouse) lies about 7 miles to the westward, sheltering the roadstead from prevailing winds. The city of Nelson is about 145 miles to the NE., and the town of Greymouth, about 40 miles SW. Westport is the distributing centre for the gold mining districts of Lyell, Lower Buller, Charleston, Addison's, Northern Terraces, Mokihinui, Karamea, &c. It is the exporting port for the practically unlimited coal-fields of Mount Rochfort, covering an area of 30 or 40 miles northwards of the town. Seventeen hotels: Empire, Club, Grand, Union, Roches, City, Royal, Criterion, and others. A line of railway connects the port with Waimangaroa, Ngakawhau, and Mokihinui (where the mines are); and several lines of steamers, besides sailing vessels, are engaged in the coal-trade. Coaches, carrying mails under contract, run to Nelson (fare, 50s.), Reefton (fare, 20s.), Lyell, and Central Buller. The Westport Coal Company and Westport-Cardiff Company are in operation. In the case of the Westport Coal Company the mineral is wrought at a height of 2,000 feet above the sea-level, and lowered by means of self-acting incline tramways. The article stands high in the market, particularly for steam and gas purposes. The Government have provided the very best system for loading vessels; a vessel of 1,000 tons, if required, can be loaded in a single tide. Vessels of 2,000 tons now enter the port, and there is increased wharfage accommodation. Extensive harbour works are in progress, over half-a-million of money having already been spent on the works, and a further loan of £50,000 authorised. Westport is increasing in size and importance; and, from the presence in its vicinity of valuable ores and minerals, is destined to become a manufacturing centre as well as a busy port. Westport is lighted by gas. The Banks of New Zealand and New South Wales have agencies here, as also have the leading Insurance Companies. Churches: Episcopal (St. John's), Catholic, Presbyterian, Primitive Methodist, United Free Methodist, Salvation Army, Seventh Day Adventists and Brethren. There are State schools here (separate boys' and girls'), Catholic, and private schools; also a literary institute, mining league, district hospital, building society, Masonic, Oddfellows', Foresters', Orange, and I.O.G.T. lodges, and other institutions, Government buildings: law courts, customs, county office, Harbour Board and Municipal offices, and Athenæum rooms. Mining district (chiefly coal and gold). Formation: large alluvial deposits, intermixed with coal formation. Exports from the port (1899), £33,552. Population of borough (census 1896), was 2,519, now 3,200; county, 4,835. Local newspapers: the *Westport Times* and *Evening Star* (daily), *Westport News* (daily), *Buller Miner* (weekly).

WHAKATANE (37° 55′ S. lat., 176° 59′ E. long.), a town with post office, savings bank, telephone station and money-order office, 55 miles SE. of Tauranga, 135 miles from Thames, and 208 miles from Auckland, in the co. of Whakatane, and riding of Omataroa, situated at the mouth of the river of the same name, in the Bay of Plenty district. Steamer plies to Auckland, fare, £2. It is described as a picturesque village, lying at the foot of a range of hills which rise precipitously from the beach. There are thermal springs about 6 miles distant on the road to Te Teko. It has Anglican and Roman Catholic churches, a court-house, police station, two commodious hotels, five stores, two native schools, one European school, a flax mill, public library, racecourse, waterworks, and a breakwater or esplanade. A weekly steamer and schooner connect with Opotiki, Tauranga, and Auckland. In 1869 Te Kooti and his Maoris visited the village, sacking and burning the few houses that were then in existence. Land in the vicinity is principally fit for grazing purposes, and is largely owned by the natives, but it is being brought into cultivation, and found to grow maize well. At the back of the village is the University Reserve of 10,000 acres, which has been cut up into six runs, and all are occupied. Population (census 1896) of town, 119; of riding, 411 Newspaper: *Whakatane Times* (semi-weekly).

WHANGAPOUA (prov. Auckland, Coromandel co., Harataunga riding), a post town, with telephone station, 50 miles from Auckland. Gold mining district; headquarters of Kauri Freehold Gold Estate Company, who are erecting 80-stamper battery. Weekly steam service to Auckland. Population, exclusive of natives, about 800.

WHANGAREI (35° 51′ S. lat., 174° 31′ E. long.), a post town, with money-order, savings bank, and telegraph office, on the river Hotea, at the head of navigation, and 20 miles from the Heads, in the co. of Whangarei, riding of Maunu, provincial district of Auckland, about 80 miles (95 postal) N. of the city of Auckland, with which there is bi-weekly steamer communication, fare, 15s., saloon, £1 return. Coach from Kawakaua; Sunday. Hotels: Commercial, Whangarei and Settlers'. Bank: Bank of New Zealand. It has a literary institute with library of 700 vols., five places of worship—Presbyterian, Wesleyan, Catholic, Episcopalian, and Plymouth Brethren, two Government schools, high school, private schools, court-house, numerous stores, Masonic, Good Templars', and Oddfellows' halls. Train runs to Whakapara three times daily; distance 17 miles. Volunteer rifle company is here. The district is an agricultural one, but coal, ironstone, lime, manganese, marble, and fine pottery clays abound, though only coal and lime are as yet being developed. Valuable medicinal springs at Kamo are effecting extraordinary cures in rheumatism. The locality is naturally suited for manufacturing industries, as water power is obtainable throughout, and coal is on the spot. There are four coal mines working at Hikurangi, one at Kamo, and one at Ngunguru, all producing good coal. These coal measures are said to be the most extensive in the Southern Hemisphere. Puhipuhi Silver-field is being reopened by an English Company. The Puhipuhi Kauri forest, which is at the end of the railway line, is the largest reserve of Kauri in the colony. Grapes and citrus fruits grow magnificently here. Much fruit is grown in the district. Population (census 1896), 744—males 392, females 352; of riding, 1,845; county, 6,847. Newspaper: *Northern Advocate*.

WHANGAREI HEADS (35° 51′ 9″ S. lat., 174° 22′ 15″ E. long.), a knoll at the inner entrance to the harbour (co. of Whangarei, riding of Manaia, prov. district Auckland), a post town, with telephone communication, about 74 miles from Auckland, and about 16 miles by the river from Whangarei township. A customs officer is permanently stationed here, and there is a public school. The harbour of Whangarei is situated about midway between Auckland and the Bay of Islands. On the northern side the land is very mountainous, and capped in places with rocky peaks of the most grotesque and fantastic appearance. Especially so are those on the top of the Manaia mountain, as seen from the inside of the harbour, which, according to the Maori legend, represent the old chief Manaia, his wife, and two children turned into stone, and it is certainly a most remarkable natural resemblance. The residents rear cattle and sheep, and live partly by this occupation and the tillage of their land, and partly by fishing. In 1886 gold was discovered on the ocean beach, in a narrow inlet, about 6 miles N. of the Whangarei Heads, but the stone is so impregnated with other metals as not to be payable. Steamer runs thrice a week to Auckland. There is a store, public school, Presbyterian church, public hall, and several well-appointed boarding-houses. Coach runs from Marsden Point, opposite side of harbour, to Waipu, in connection with steamers. The grandeur of the scenery commences at Bream Head, the well-known promontory. It rises to the height of about 1,200 feet. On its summit are two turreted rocks, an unmistakable mark to the seafarer. Thence follow rugged hills and crags, with low "saddles" between until they culminate in Manaia, thence gradually dimi. Viewed from up the harbour these hills become more close grouped, and hence the term "Heads." The locality is a favourite resort in holiday time. Formation:—The Manaia Road district is composed principally of igneous formation, trachydolentes, and trachytic breccias, which form the hills that are so conspicuous a feature of Whangarei Heads. This volcanic mass has protruded through and overlays the cretaceo-tertiary beds, showing on the western shore of Manaia, also at Tanrakura Bay and at Donald McGregor's. Both the typical limestones of the country—viz., Whangarei limestone and hydraulic limestone, the latter extensively developed, are in this series, as well as a superior fireclay. The eastern part of the district is covered with blown sands and the superficial deposits forming the swamps surrounding Lake Ararariki. Population, 151; of riding, 719.

WHANGAROA (34° 58′ S. lat., 173° 47′ E. long.), a post town, with money-order, telegraph station, and savings bank, in prov. Auckland, co. and riding of Whangaroa, 168 miles NW. from Auckland (reached by steamer weekly), situate on one of the most magnificent harbours in New Zealand, whether as regards its anchorage accommodation, or the beautiful and picturesque scenery lining its shores. It is approached by a narrow passage of about 200 yards in width, and opens into magnificent bays, thoroughly landlocked on every side, presenting to the view a wonderful range of varied and beautiful scenery. The harbour is about 7 miles in length, about 4 miles in is situated the township. Has one hotel, district school, Anglican, Wesleyan and Roman Catholic places of worship, police-court, public library, hall, Freemasons' and Rechabites' lodges, stores, and commodious wharf. Slightly pastoral and agricultural, but chiefly a Kauri gum and timber district. This place has had notoriety from being the scene of the massacre by the natives, in 1809, of the crew and passengers (64 in number) of the *Boyd*, Captain Thomson, a large homeward bound ship (from Sydney) that visited the port for a cargo of spars The vessel was burned to the water's edge, and her remains still lie partly imbedded in the mud near the upper end of the harbour, though a quantity of timber, copper sheathing, &c., has been obtained from her. A number of the natives who took part in the massacre were killed by the explosion of the gunpowder when the *Boyd* was burning. Industries: Saw-mills, ship-building, Kauri gum digging. Maoris of the Ngapuhi tribe still inhabit the vicinity. Population: town, 200; district, 600.

WHATAWHATA (37° 50′ S. lat., 175° 10′ E. long.), (Waikato co., Newcastle riding, Auckland prov.), 90 miles from Auckland, reached by coach to Frankton (6 miles), thence rail. A post town, with telephone station. Has hotel, Anglican church, hall, creamery, public school, in which religious services are held. District is agricultural and pastoral. Population of town and district, 150.

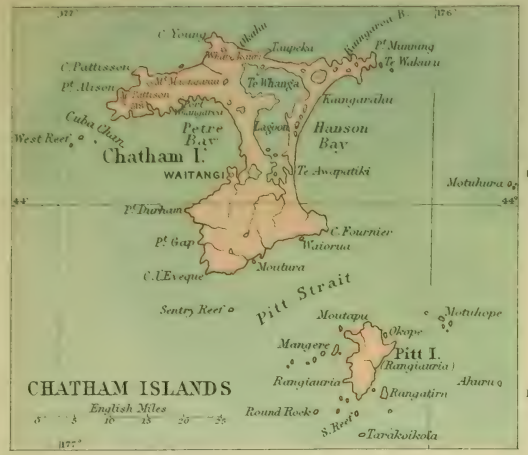
WHITE CLIFFS (43° 28′ S. lat., 171° 56′ E. long), (prov. Canterbury, Selwyn co., Malvern riding, electoral and police district, Selwyn), a post town, with money-order office, savings bank, telephone and railway station, 42 miles from Christchurch. Fares, 5s. 4d. and 3s. 7d. Has public school, Baptist church, and library. Industries: potteries, lime-burning

and coal-mining. District is mining and agricultural. Volcanic formation. Population of township, 120, and district about 200.

WINCHESTER (44° 20′ S. lat., 171° 23′ E. long.) (Geraldine co., Temuka riding, Geraldine electoral district), a post town on the Waihi river, with money-order office, savings bank, telegraph and railway station 8 miles from Pacific shore, 15 miles from Timaru, 85 from Christchurch, and 145 miles from Dunedin; fares, 18s. 3d. and 12s. 2d.; from Christchurch, fares 10s. 9d. and 7s. 2d. Has two hotels—Wolseley and Winchester; public school, mechanics' institute, Masonic lodge; Anglican church—St. John's. Flour and flax mills, wool-scouring works. Agricultural and pastoral district. Good trout fishing in the rivers. Mount Peel and ranges afford beautiful scenery. Population of district, 300.

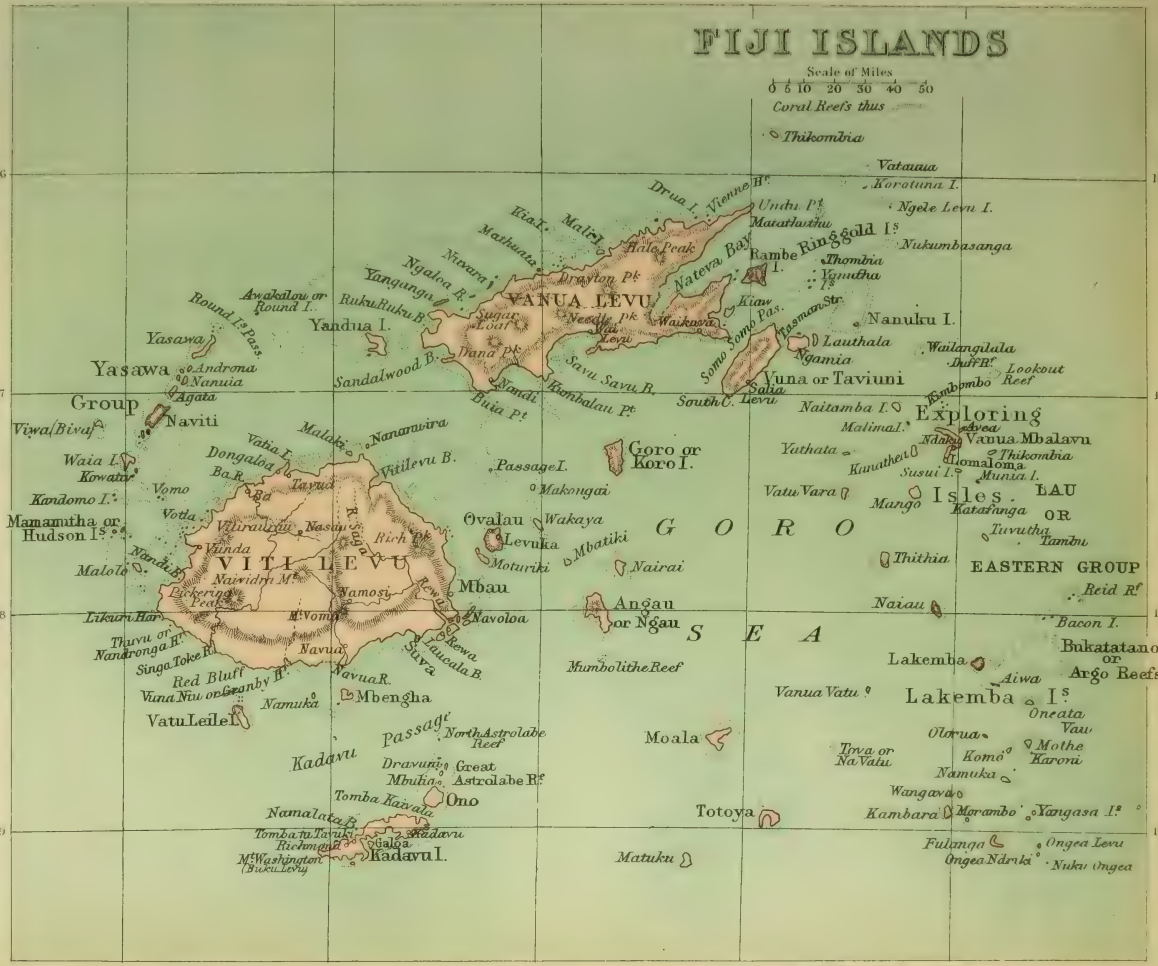
WINTON (46° 10′ S. lat., 168° 23′ E. long.), a post town, with money-order, savings bank and telegraph and railway station 19 miles from Invercargill, in the county of Southland, prov. dist. Otago. Fares, 2s. 6d. and 1s. 8d. Hotels: Winton, the Railway, and Commercial. There are churches for the Presbyterians, Episcopalians, and Roman Catholics; Bank of New Zealand, Masonic, Oddfellows' and Good Templars' lodges. The Government buildings comprise police quarters, courthouse, and school, and there is a flour-mill, cheese factory, meat preserving works, a public hall, the Oddfellows' hall, an Athenæum, a public library, stores, brass band, and Farmers' Club. In the district are four saw-mills. Agricultural and pastoral locality. Formation, limestone. Population (census 1896) of borough, 398 now 400; of riding, 3,178. Newspaper: *Winton Record.*

WOODEND (43° 31′ S. lat., 172° 40′ E. long.), a post town, with money-order office, telegraph station and savings bank, on Grisson's Creek (Ashley co., and riding of Mandeville) in North Canterbury, 16 miles from Christchurch. A conveyance runs to Kaiapoi, fare 1s., train thence. It has a mechanics' institute, circulating library, and Oddfellows' lodge; Royal hotel, flour and flax mills, several stores, public school, Church of England and Wesleyan places of worship. Agricultural district. Population, 498.



WOODLANDS (46° 20′ S lat., 168° 45′ E. long.), a post town, with telegraph station, savings bank, money-order office, and railway station, in Southland co., and Waihopai and Awarua ridings, prov. dist. Otago, 12 miles NE. from Invercargill, on the river Waihopai and the railway line to Dunedin; fares from Invercargill, 1s. 7d., 1s. 1d. There are two hotels—Railway and Woodlands—stores, State school, Foresters' lodge, Presbyterian church, meat preserving works, dairy factory, and saw-mills. Agricultural district. Population about 200.

WOODSTOCK (42° 44′ S. lat., 170° 59′ E. long.), a post-town, in the co. of Westland, and riding of Kanieri, situated on the south bank of the Hokitika river, nearly opposite to Kanieri, about 4 miles from Hokitika, to which a coach runs twice daily, fare, 1s. Hotels: Royal Mail and Carrier's Arms. The locality has for years supported a mining population. Saw-mills. Has Presbyterian church, school, and Good Templars' lodge. Population about 250.



WOODVILLE (40° 22′ S. lat., 175° 52′ E. long., in county Pahiatua), a municipal borough, with post, money-order office, savings bank and telegraph station, 95 miles from Napier in the electorate of Pahiatua, police district of Hawke's Bay, on the Manawatu River. Hotels: Club, Commercial, Post Office, Central, and Masonic. It has a public library, a good reading room, public schools, youths' institute, school also at Maungaatua, a theatre, drill shed, rifle club, volunteer corps, several stores, a branch of the New Zealand Bank. Churches; Episcopal, Wesleyan, Catholic, Presbyterian, and Christadelphian. Woodville is now the centre of rail system of North Island. There are lodges of the Masons, Oddfellows, Rechabites, Foresters, and Good Templars. It is situated at the junction of the Wairarapa, Manawatu, and Napier roads, in the Seventy-Mile Bush. It is a fine forest district, giving work to several saw-mills. An extensive cheese factory, belonging to the New Zealand Farmers' Dairy Union, is here; bacon-curing factory, and freezing works; there are several butter factories and creameries in the district. Copper ore has been found on the Ruahine ranges adjacent, and, for the second time, steps are being taken to prove the value of the deposit. A concession has been made to a Water Gas Company to light the town for ten years with patent water gas. A hill nearly 3,000 feet high overlooks the town, and a splendid view is obtained from the top. The Manawatu Gorge is only about 3 miles from the town, while the Makuri is a little farther. The rivers and lakes are well stocked with trout, and there is plenty of game in the surrounding district. Population (census 1896) of borough was 1,060, district about 3,000. Newspaper: *The Examiner* (tri-weekly).

WYNDHAM (46° 20′ S. lat., 168° 48′ E. long.), a post-town, on the Mataura river, with savings bank and money-order office, telegraph, telephone, and railway station, in the county of Southland, and riding of Toi Toi (Otago provincial district), 27 miles from Invercargill and about 120 SW. from Dunedin. It is connected with the main line of railway. Fares to Invercargill, 3s. 6d. and 2s. 4d. Coaches run to Edendale, 1s. each way; to Fortrose, 12s. 6d. return. Hotels: Farmers' Club and Railway. Branch of the New Zealand Bank is here, also a public school, two public halls, and Presbyterian, Anglican, and Catholic churches, Masons', Oddfellows', Foresters', and I.O.G.T. lodges. A fine Athenæum building was opened on Record Reign Day, June, 1897. There are several stores and a dairy factory; most of the trades are represented. Lighted with kerosene. District is pastoral and agricultural. Monthly sales of horses, sheep, and cattle held. Good trout fishing in the Mimihau, perch in local lagoons, and good feathered game in the district. Population (census 1896) of town district, 483; of riding 2,729. Newspapers: *Wyndham Farmer* (tri-weekly); *Herald* (weekly).

THE COLONY OF FIJI.

THE COLONY OF FIJI.

THE COLONY OF FIJI, an archipelago, comprising about 255 islands and islets, nearly 100 of which are inhabited, was ceded to the Crown of Great Britain in 1874.

The first European who made the existence of the Fijian group of islands known to the civilized world was the enterprising Dutch navigator, Captain Abel Jansen Tasman, who discovered them on March 5, 1643. He entered the group from the eastward, somewhere between 16° and 17° South latitude, and not finding anchorage, worked his way northward, clearing the islands by way of Undu Point and Cikobia. He named the group "Prins Willhem's Eylanden" (Prince William's Land). After his voyage they remained unvisited until Captain Cook touched at one of the Windward (eastward) Islands, now called Vatoa, which he named "Turtle Island." In 1789 they were passed by Captain Bligh in his tedious and dangerous voyage in the *Bounty's* launch, when he was chased by a canoe from the Island of Waya, and subsequently, in 1792, while commanding the *Providence*. On September 13, 1797, Captain Wilson, in a missionary ship, while following almost the same course as Captain Tasman, nearly lost his vessel by touching the reef off Taviuni, having previously tried to land missionaries, from which he was deterred by the hostile attitude of the natives.

About the year 1804 twenty-seven convicts, who had succeeded in their attempt to escape from Norfolk Island in an open boat, settled throughout the islands, mostly at Rewa and Bau, giving their assistance to the native chiefs to carry on their fightings, receiving in return almost whatever they demanded. Shortly after Charles Savage, a Swedish slaver (wrecked on the Horse-shoe reef, near Nairai), was taken with some of the crew of his vessel to Bau. Possessing a few muskets, firearms being hitherto unknown to the natives, they became useful allies of the Bau chiefs, who thus obtained great power, conquering Verata and then Rewa, but outside of the territory subjugated each chief remained supreme in his own district, as represented by the provinces of Fiji at the present time. In the second decade of this century a few adventurers commenced trading with Fiji in the district of Bua, Vanua Levu, for sandal-wood, which brought a high price in the Chinese markets; this led to the enquiry for Bêche-de-mer, which the natives were taught to fish and cure by Bêche-de-mer men from Salem, United States.

The first official notice of Cakobau took rise in the notorious fine of 45,000 dols. levied upon him under the style of Tui Viti by Commander Boutwell of the United States ship of war *John Adams* in 1856. This fine was in after and recent years actually paid by a syndicate of Victorian gentlemen operating as the Polynesian Company, who acquired several grants of land in consideration. The first governor, Sir Arthur Gordon, curtly disallowed these transactions, permitting the company to retain certain lands they had obtained possession of, and refunding to the company the £9,000 advanced by them, converting it into a debt of the new colony. The United States of America appointed a consular agent in Fiji as early as 1847, a Mr. Williams from New Zealand, who dying, was succeeded by Dr. J. M. Brower in 1859. The first notice taken of Fiji by the British was the introduction of the missionaries of the Wesleyan mission in 1835, whose remarkable success was proclaimed in their Jubilee commemoration in 1885. It was not until 1859 that the British Government appointed Mr. W. H. Pritchard to be H.M.'s consul. In 1860 an equally important event took place in the establishment of Messrs. F. and W. Hennings as agents for the German firm of J. C. Goddefroi and Co., of Samoa. In 1863 Messrs. Hennings removed to Levuka and commenced business on their own account, and by their spirited enterprise and generous support of the pioneer settlers they were the foremost in opening up these islands to the notice of the Australian colonies. Consul Pritchard recognised the suitability of the climate and soil of Fiji to the growth of cotton, drew up a deed of cession, obtained the consent and signature of the leading chiefs, and the native King Cakobau (pronounced Thakombau, who died in February, 1883) offered the sovereignty of the Fiji Islands, under certain conditions, to Great Britain. A Royal Commission was appointed, consisting of Dr. Berthold Seeman, a botanist, and Colonel R. Smythe, R.A. Doctor Seeman sided with Mr. Consul Pritchard's views; Colonel Smythe on the other hand sided with the missionaries who, perhaps, apprehensive that colonization might interfere with their work of evangelization of the natives, were averse to annexation of the group to Great Britain. Their ideas bore reflection in Colonel Smythe's report, which tended to lead the British Government for thirty years to decline this first offer of cession. Mr. Pritchard was deposed in 1863, and Mr. W. Owen acted until the arrival of Captain H. M. Jones, V.C., in 1864, by which time the action of Mr. Consul Pritchard had borne fruit; the attention of the Australian Colonies had been drawn to Fiji; a few settlers had arrived, and the cultivation of Sea Island cotton had been commenced. Consul Jones resigning, the late governor, Sir John (then Mr.) Bates Thurston, acted until the arrival of Mr. March, in 1868. At this period fighting was prevalent among the natives, and Sir John Thurston did good service in keeping the natives within bounds. South Sea Island cotton became recognised as the best in the market. Cakobau and Maafu were the rival chiefs for many years: the former, by the support of the Wesleyan Mission and his warlike skill, became the chief in the Leeward Islands; the latter, the ruling power over the Windward. In 1871 the European settlers becoming more numerous, and therefore desirous to establish a settled government chose Cakobau, he being more under control and less stubborn than Maafu. A constitution was framed which provided a king, Cakobau, with a ministry of twelve rokos, a legislative council elected by the whites, a supreme court consisting of a chief justice, with one native and one European judge. A revenue was raised by a tax of one pound per man, and four shillings per woman. Each roko was governor and chief magistrate in his own district, with a white secretary. This lasted for two years only; a crisis came, the Treasury was not only empty, but with a deficit of £80,000; Maafu's smouldering feelings showed signs of rekindling. At this juncture Consul Layard and Commodore Goodenough arrived under orders from Great Britain to report on the desirableness of annexation. In March, 1874, a renewed offer from the colony was declined by the British Government, but in October of the same year by a deed of cession* dated the 10th, the sovereignty of the islands was ceded to the British Crown, and a charter was soon after issued erecting them into a separate colony. Sir A. H. Gordon, G.C.M.G. (now Lord Stanmore), arrived on June 25, 1875, and formally assumed the Governorship on September 1. He was succeeded in December, 1880, by Mr. now Sir G. W. Des Vœux, K.C.M.G. During the absence of His Excellency the Governor, the Honble. J. B. Thurston, C.M.G., was appointed administrator. He left the colony in October, 1884, when the Honble. the Receiver-General (now Sir Wm. McGregor) succeeded to the administratorship, which he filled for a period of ten months until the 3rd of August, when Mr. Thurston was sworn in and resumed the reins of government. During a depressing period in the history of the colony the administration of the Government by Dr. McGregor gave general satisfaction to the people. Sir Charles B. H. Mitchell, installed in January, 1887, made a searching investigation into the financial condition of the colony, which resulted in the reduction of the number of employés in government offices. Sir Charles left in November, 1887, his successor, Sir J. Bates Thurston, K.C.M.G., who had held respectively the posts of Auditor-General and Colonial Secretary since the Cession of the Islands, assuming office in February, 1888. Sir John left the colony in January, 1897, in ill-health, and died on a trip between Sydney and Melbourne in February, 1897. He was succeeded by Sir George Thomas Michael O'Brien, K.C.M.G., who arrived in the colony on July 10, 1897.

An annuity of £50 is paid to each of the late Sir J. B. Thurston's children, to the boys till of age, to the girls till they marry.

The natives have neither traditions nor records that would throw any light on the early history of the islands, and it is therefore believed by them that their occupation must have taken place at a very remote date, and a confirmation of this is to be found in the fact that the still popular belief of the natives is, that their forefathers were born, that they lived, and that they died upon the land on which their descendants now dwell.

Resources.—Iron ore of fine quality is abundant; gold, copper, and plumbago have been found in its soil, and other valuable minerals may be discovered. Searches made in 1884 and 1886 for gold in Viti Levu were abandoned. Since 1887 prospecting has been persistently prosecuted in Vanua Levu by experienced miners, and although the colour and indications of gold have been found in the upper waters of the Yanawai river, it is only sufficient to warrant private search with cheap labour. Its forests abound with valuable timber; its rivers, which are navigable far inland, contain fish of various species though not in very great abundance. It has granite in its mountains; is abundantly supplied with water; pearl shell is numerous on its coral reefs, and turtle, both green and hawksbill or shell, are plentiful throughout the group. The climate is, for nine months of the year, most delightful and free from disease; though during the hot season persons, unless careful in their mode of living, may be seized with dysentery.

Fiji possesses most descriptions of soil and climate, as instanced in Viti Levu by the wet climate of half the island (in a line drawn from Viti Levu bay on the chart to Mbusa on the coast opposite Vatulele Island), the provinces of Tai Levu, Rewa, and Naitasiri

* By this Act of Cession all lands in Fiji passed to the Crown. During the ten or twelve years previous, the chiefs of tribes had granted numerous blocks of land to both Europeans and Americans. All such grantees were required to submit their claims to a Land Commission appointed to investigate. In the course of a period of six years this Commission adjudicated on 1,327 cases; 517 of these were granted in full, 390 in part, 49 were withdrawn, and the remaining 361 were disallowed. The claimants of 140 out of those disallowed were German subjects. Feeling themselves aggrieved, they made representations to Europe. Some fifty despatches passed between the British and German Governments from July, 1883—when the sums claimed were about £140,000—to May of 1885—when the differences had been amicably settled. A joint Commission was agreed to—Mr. R. E. Wright, a barrister of Britain, and Dr. Kraul, German Consul-General of Australia. Four claimants only, representing fifteen claims, came before the Commissioners in March of that year. The amount of compensation agreed on was £10,620 (£9,300 of this to Mr. Sahl), with a recommendation that "the cases be met by compensation in money, and not by reopening titles to the land." In May following the German Government had signified its acceptance of the terms, and within three days the £10,620 was remitted through the Foreign Office to Germany.

being situated in the wet climate in the eastern half, and the provinces of Nadroga, Ba, and Ra, in the dry climate or western half; whilst in Vanua Levu the districts of Wai Levu in Savu Savu bay and Wainunu form the wet climate, and the climate of the rest of the island is much drier. These great differences of climate have to be considered in the selection of land for a given purpose, and in the absence of statistics the pioneer settlers encountered great disadvantages. Rice may be cultivated in its swamps; its rich virgin land is peculiarly adapted to the growth of the sugar-cane, coffee, cotton, tea, sweet potatoes, tobacco, yams, bread fruit, bananas, cinchona, arrowroot, and all other tropical productions: while in suitable soil, beans, cabbages, lettuces, and most semi-tropical plants will thrive. The cocoanut tree is generally supposed to be indigenous; large areas have been, and still are being, planted, requiring only time to yield an enormous quantity of copra, and consequent profit to the planters, with an increased value to the lands. The yield of melons, pine-apples, oranges, lemons, limes, tomatoes, cucumbers, &c., is unsurpassed in quantity and quality in any other portion of the globe. In spite of the depressed state of sugar markets, there are five sugar mills in working order, turning out sugar equal to any produced in the Mauritius or the West Indies. The manufacture of this staple article steadily increases. A mill is also at work near Nadi on Viti Leon. The establishment of a more extended and frequent steam communication has given an impetus to the culture of bananas and other fruits. Tramways are constructed on most of the sugar estates. Water has been laid on to the capital and Levuka. Public roads get more extended, as horses are imported; but the cost attendant on bridging the many rivers and creeks is so considerable as to retard improvement in land communication.

There are two tea factories, five sugar mills, sixteen boat-building yards, two soap-works, and two saw-mills.

Survey, Area, Dimensions, &c.—The Fijian Archipelago is situated between the parallels of 15° and 22° south latitude, and the meridians of 177° west and 175° east longitude,* occupying the central portion of Western Polynesia, about midway between the Tongan Islands and the French Colony and island of New Caledonia, being scattered over an ocean area of 200 miles from north to south, and 300 miles from east to west. The total area of the islands is estimated at 4,953,920 of statute acres (about one-tenth of which is owned by Europeans), and the inhabited islands at 7,500 square miles; the whole of the group 8,034 square miles.

Partial Surveys were made by Commander C. Wilkes, U.S.N., in 1840; by Capt. H. M. Denham, R.N., in 1857; and by Navigating Lieutenant Hosken, R.N., in 1873. A trigonometrical survey of the coasts, harbours, and ports by Capt. W. M. Moore, R.N., selected for this arduous task by the Admiralty, was completed during a three years' cruise with H.M.'s schooner *Alacrity*. The ordnance charts have been issued from the Hydrographer's Department.

The Colony is in a flourishing condition, and the survey of the interior is being pushed on as rapidly as circumstances will permit, but surveying in Fiji is, as a rule, a far more troublesome and tedious business than in many other countries; chiefly on account of the dense tropical growth which almost everywhere prevails. The surveys of land granted by the Governor in Council, after investigation by the Lands Commission, are completed. The Real Property ordinance came into force on March 15, 1877. During 1899 only seven Crown grants were issued, representing 2,168 acres, making the total number of acres granted in the Colony 425,186, leaving 4,528,734 ungranted.

Notices to Mariners. (All bearings magnetic, var. 9° 45′ E. 1884). On the island of Wailagilala, south side of Nanuku passage (position—lat 16° 45′ S., long. 179° 6′ W.), is a fixed white light, showing 100 feet above high water, and visible about 16 miles from a ship's deck: light obscured for 5 points between the bearings of NNW. and W. by N. taken from seaward. On the SE. extreme of the reef off Nasilai, Viti Levu (position—lat. 18° 8′ 10″ S., long. 178° 42′ 20″ E.), is a fixed dioptric light of the 4th order, the light being double flashing at intervals of thirty seconds, and visible 12 miles, N.E. by N. through S. to S.W.¼ West.

The lighthouse on Solo Rock, Astrolabe Reef, Kadavu, shows a dioptric light of the 3rd order from sunset to sunrise, white and single flashing at intervals of 30″, visible all round for 15 miles, except where islands intervene between the bearings of S. by E.¼E. and S.¼W. The light is 96 feet above high water, on an iron tubular pillar 106 feet long and painted horizontally red and white bands. Position—Lat. 18° 38′ 15″ S.; long. 178° 32′ 15″ E.; 31¾ S.¾ W. from the double flashing light at Nasilai.

On the 29th September, 1898, the red catoptric lower leading light into Suva harbour was replaced by a 4th order red dioptric light. The arc of visibility is from north 50° west to north 28° east (magnetic), and can be seen, on a dark night with a clear atmosphere, at a distance of 14 miles.

On the 16th June, 1899, the white catoptric upper leading light into Suva harbour was replaced by a 4th order white dioptric light. The arc of visibility is from north 45° west to north 45° east (magnetic), and can be seen, on a dark night with a clear atmosphere, at a distance of 24 miles.

A black beacon, surmounted by a white square top, has been placed on the point of Lami Reef, instead of the black buoy, hitherto moored there. A light is exhibited on the beacon when large vessels are leaving the port at night.

On the wharf in Suva harbour is a fixed light, showing *green* over the harbour, and *white* shoreward over the wharf.

A light vessel, painted red, is moored at the north extreme of the reef forming eastern side of the harbour entrance, and turning point for vessels proceeding to an anchorage. From vessel two white lights are exhibited at vertical distances apart of 10 feet. The upper light being 40 feet from water's edge should be visible on clear nights 4 miles. *Caution.*—Vessels should keep the leading lights in line when south of the light ship. The red turning light situated to the north of the town on the eastern side of the harbour is now discontinued.

In addition to the leading lights in Levuka harbour is exhibited, from sunset to sunrise, a fixed green turning light, 25 feet above high water line on the south of Nasova point, showing a sector of 23° between N.¼W. and N. by E.¾E. Vessels entering the harbour on the leading lights and opening the green light will be clear of the entrance reefs on each side. Those anchoring to the southward of the leading lights should keep within the green sector, but if proceeding to the northern anchorage the course should be altered for that anchorage on first opening the green light.

The following memo by H.M.S. *Alacrity* will prove a useful guide to vessels entering the group from the North.

Somo Somo Strait is the channel between Vanua Levu and Taviuni. The navigable portion, between Koro Levu and the Navukana promontory is 1½ miles broad, and from 120 to 200 fathoms deep. The irregular reefs on both sides rarely break. The west limit of the narrows being formed by sunken banks, upon which are strong tide ripplings, difficult to distinguish, the east or Koro Levu side is preferable. At night, unless Koro Levu islet can be seen, it is hazardous to pass the narrows. The flood sets S.S.W., ebb, N.N.E.. the turn of the stream being two hours late, and varying from 1 to 3 knots, according to wind and moon's age. The passage through Somo Somo Strait is generally tedious for sailing vessels, often taking three days, owing to the baffling winds and calms caused by the lofty island of Taviuni obstructing the trade wind. Between Koro Levu and Taviuni there is no passage for ships. On the coast of Taviuni anchorages can be obtained at Vuna Point, Wairiki, Somo Somo and Ngilamate. Vessels waiting for daylight to pass through the narrows should keep Koro Levu in line with the extreme of Taviuni. If near to the Champion rocks, vessels drawing over 12 ft. should be careful that no part of Koro Levu is open of the extreme. Koro Levu islet is wooded, 320 yds. long, 200 broad, and 150 high; situated 7 cables from the eastern limit of the narrows, a most useful landmark to vessels navigating the strait.

Phillip's rock is a small coral bank 9 cables N.¼E. of Koro Levu islet, separated from the reef of that islet by a passage 5 cables wide, with from 7 to 9 fathoms in it: the least water over this rock is 15 feet. In cloudy weather it is hard to see and it never breaks. McPherson rock is a coral head with 18 feet over it, 1¾ miles N.E. from Koro Levu and 1 mile N. by W.½W. from the anchorage at Somo Somo. Champion rocks are two banks of coral 6¼ miles N.N.E.½E. from Koro Levu, and 5½ miles N. by E. from the anchorage of Somo Somo; the shallower and more westerly of the two has 12 feet on it at low water; the other 15 feet. Breaknot rocks lie 2½ miles N.W.¼W. from Naiseileseile (the N. point of Taviuni); at low water they have 7 feet on them, and Mate rock, 2¾ miles N.,¾W. from the same point has 18 feet. Gangway rocks are shallow spots in mid-channel, between Taviuni and Budd reef; two of them are awash at low water. They break occasionally. When the light is not good vessels anchoring or leaving Somo Somo pass to the north-east of the Phillip's rock; the course from the anchorage is N.W. by W.¼W. The Kiaw reefs is a line of sunken coral dangers 1½ miles S.E. of Kiaw (Kea of chart 209), these reefs seldom break; a connection can be traced between them and those around the Navukana promontory, also with the Florida reefs to the north-east. All these reefs form one barrier. Between the Budd reefs and the reefs off Rabi is the Rabi channel, 5¼ miles wide at its narrowest; to the southward it joins the Somo Somo strait. The reef seldom breaks. The barrier reef off the N.E. cape of Rabi is called the Texas reef, and stretches 6¼ miles N. by E.¾E. from the cape. Two cables from the north extreme of the reef is a double rock, 3 feet above high water. Capt. Callaghan, of Government s.s. *Clyde*, reported a strong current setting to westward during the S.E. trades.

Islands.—These are numerous, and among them every form of outline is to be found, from the rough and bold grandeur of volcanic structure to the simple form of the coral islet. Nearly all are surrounded by coral reefs, either "barrier" or "fringing," with numerous deep-water channels through the barrier reefs; inside are many excellent harbours, as those of Suva, Levuka, Savu Savu, &c. Commodious roadsteads, where large vessels can safely anchor, are scattered throughout the group. The islands situated on the western side of the group are far larger and more diversified in their general resemblance to each other than those on the eastward side. The two largest islands are Viti Levu (big Fiji), and Vanua Levu (big land).

* Viti Levu, containing about 50,000 people, is about 90 miles

* To assist readers in the pronunciation of *native proper names* the following hints will be found useful:—The vowels are thus pronounced; *a*, as a in father; *e*, as a in rate; *i*, as e in me; *o*, as o in wrote; *u*, as u in bull, or oo in wool; *ai* is sounded i. The consonants have the same or nearly the same sound as they have in English, with the exception of *b*, which is pronounced as *mb* in number; *c*, as *th* (thus Cakobau is as though spelt Thakombow); *d*, as *nd* in lend; *g*, as *ng* in ding dong; *q*, as *ng* in longer, or as *nk* in rank; *f*, *j*, & *p* are used in introduced words only, while *x* & *z* are wanting; *h* is only found in a few dialects. There are many different dialects in the group, but that spoken on the island of Bau is the one generally understood, and in which all the few books there are are printed.

* Owing to the 180th degree running through the group, an ordinance was passed in 1879 fixing the days to assimilate with Australian days of the month.

ong, by 50 wide, area about 4,110 square miles, and boasts of some of the highest mountains in the group, ranging up to an altitude of between four and five thousand feet. Its soil is not equal to that of Vanua Levu for producing cocoa-nuts, but, mainly owing to Suva harbour and the new capital, is fast thriving. It is the chief seat of the sugar-growing industry; its extensive flats, with proper drainage, yield abundant crops. Mangrove bushes and other tropical shrubs enrich the scenery of this island, which, in size alone, surpasses the Samoan group. Several rivers run inland (navigated by small steamers), the Rewa, Navua, Ba, Sigatoka, Nadi, and many smaller streams; of these the Rewa is the largest. The Navua empties itself by two mouths, one called the Naitata, and the other Duliwalu.

Vanua Levu is next in size to Viti Levu, being about 100 miles long, and averaging 25 miles wide; area nearly 2,500 square miles. Its eastern extremity is indented by a bay, called Natewa, and named by the natives Na Wai Tui Matei, making, in English meaning, "Dead Sea." This inlet is about 40 miles in length; its head is only seven miles from the head of an extensive bay, called Savu Savu, which is an excellent harbour, on the southern side, 5 miles broad by 10 in length, water deep, and protected by high land; on the shores are several superior business sites; good roads are being constructed. There are eleven country stores open in various portions of this bay. Remarkable springs, about 9 feet above water level, are situated a short distance inland from a small harbour formed round an island in Savu Savu bay. The main spring is so hot that yams and taro are cooked in 20 minutes by the natives. The water is salt. This island contains extensive forests of most durable and useful woods, while for many miles the southern shore is planted with cocoa-nuts, and the cultivation of the sugar-cane is being pursued at Labasa. It boasts of the highest mountain in the group named Ulu Marika.

Taveuni, one of the finest islands of the group, has a coast of about 60 miles, the centre being upwards of 4,000 feet above sea level, and having at its summit a lake—apparently the crater of an extinct volcano. Probably there is no portion of the group either so lovely in its scenery or, from its supreme luxuriance of soil, so well calculated to produce abundantly all kinds of tropical products. A good road is made round it. This island is 30 miles long by seven miles wide, containing 217 square miles, and lies 5 miles from the E. extremity of Vanua Levu, being separated from it by Somo Somo passage. It is the third island in size and importance in the archipelago.

Kadavu, with a population of over 7,000, is mountainous. It is the principal island in the S.W. portion of the archipelago, and the fourth largest of the group. It is upwards of 26 miles in length, with an average breadth of from 4 to 8 miles, containing about 150 square miles, and abounds in most valuable timber. It lies 41 miles from the nearest point of Viti Levu, directly south, and is the first island of importance sighted on the passage from the colonies by the mail steamers. Tavuki bay, to the westward of Malata bay on the west side of the island, is frequented by whalers. On the east side, opposite the island of Ono, is a large and well-protected harbour.

Mago is a small island of the eastern group, its middle being a fertile valley, with no other outlet for water to the sea than by a small subterraneous passage through the hill-rocks, so that a portion remains flooded for several days after a heavy rainfall. This productive island, together with the neighbouring ones of Kanacea (9 square miles) and a part of Cicia (2 square miles), are the property of a Melbourne Company, employing 600 coloured labourers, with corresponding staff of European overseers, in the improvement and cultivation of its islands.

Vulaga, though a small island, is most peculiarly picturesque, of volcanic origin, the shore alone having a coral base. Its rocks are nearly 200 feet high, thus rendering it a haven in stormy weather to the mariner. It lies 25 miles S. from Lakeba, and is 8 miles in length.

Yacata and Vatuvara are from 2 to 7 miles in circumference; very fertile, a rich vegetable mould covering the substratum of coral and sand. These islands have one village each only, and from 60 to 100 inhabitants. Yacata is situated 46 miles SE. of Lakeba, in the eastern group.

Lakeba, with a population of nearly 2,000, is in shape nearly round, and about 18 miles in circumference. It is one of the largest of those to the eastward, containing about 12 square miles, and is a well-wooded and productive island.

Vanua Balevu, containing only about 25 square miles, is a very picturesque island. On it is Loma Loma, containing several stores and hotel; until 1882 it was a port of entry.

Moce, though small, and having less than 400 inhabitants, is very fertile and less wooded than most others. It is 2 miles in diameter, and has a picturesque appearance. It lies 25 miles SE. by S. from Lakeba.

Bau is a small island connected by a coral reef with Naviti Levu. The town of the same name was once a principal (native) town with about a thousand inhabitants. A memorial edifice has here been erected to the late King Cakobau.

Besides those not already named, and classifying them according to their size in estimated square miles, are the *Yasawas*, a range of islands the most westerly, extending 70 miles N.E. and S.W. and the *Windward* groups, containing nearly 60 square miles each; *Koro*, a productive and picturesque island, also of about 60 square miles; *Ovalau* and *Gau* contain about 43 square miles each; *Moala*, *Rabi*, and *Qamia* have each about 25 square miles; *Vatu Lele*, 20 square miles; and *Ono*, *Beqa*, *Yadua*, *Matika*, *Totova*, *Naivai*, and *Nitaba* from 8 to 12 square miles. *Mokagai*, *Batiki* and *Wakaya* are of about 5 square miles each. The population of these islands vary from 800 to 7,000, and bear similar characteristics to those more fully described.

Towns.—Fiji possesses but two—viz., Suva (lat. 18° 8′ S. long. 178° 26′ W.) the present, and Levuka, the former capital (lat. 17° 45′ S., long. 178° 47′ W.) The majority of Jews who are inhabitants of the Colony reside at the former town, of Germans at the latter. Water is laid on, and both towns are lighted with kerosene. Native dances are prohibited between sunrise and sunset.

Suva, selected in 1880 by a commission appointed to choose a site for the capital, is situated on the south coast of Viti Levu (the largest and most populous island of the group, with the largest rivers). It is distant from Honolulu 2,780 miles; from Vancouver 5,215; Melbourne 2,227; Sydney 1,770; Brisbane 1,540; Noumea 760; Auckland 1,140. The harbour is a good one and landlocked, but the funnel-shaped entrance makes it necessary for sailing vessels to be careful in entering or leaving, lest the wind fall unexpectedly. The water with which the town is supplied is conveyed from the mountains a distance of 5 miles, at an elevation of 300 feet. The principal thoroughfare is Victoria Parade, which is wide, and nearly a mile in length, and is constructed of soapstone. Suva has a Masonic lodge (Fiji 1,931 E.C.), Mechanics' Institute, four hotels, a Roman Catholic, a Presbyterian, and an Episcopalian church, Rifle Association, many stores, warehouses and cottages. It has a custom-house, post-office, hospital, and lunatic asylum, jail, and Government buildings (including the governor's residence), which, for insurance purposes, are valued at £18,000. Rates collected by the Town Board in 1899 £1,497, Government grant £150, total revenue, £1,710; expenditure, £1,639. Mr. F. E. Riemen Schnieder was Warden, and H. E. Ambler, Town Clerk. Total revenue of School Board, £759; expenditure, £716. The Mechanics' Institute was opened in 1884. Its library possesses 2,000 vols.; it is supported by members' subscriptions. There is a telephone from Suva to Ba, 105 miles *viâ* Nausori, Nadurulolo, Viria, Vatuvula and Nadarivatu.

Levuka is on the east coast of Ovalau, which, though small, is the most centrally situated island of the Archipelago. Levuka covers an area of about 40 acres. The hills around, are dotted with pretty villas, and the town is capable of extension both north and south. The general prevalence of the S.E. trade winds makes Levuka a most agreeable and healthy place of residence. A good water supply can be obtained from its two creeks. The harbour is an excellent one, though smaller than that of Suva; the barrier reef forming it is about a mile from the shore, and has two passages which enable vessels to enter and leave with any wind. Skirting the harbour is the main thoroughfare, called Beach Street, which is extended outside the town by a road nearly environing the island of Ovalau. Branch buildings of some of the Government offices are seen here. The hospital, though nearly self-sustaining, was closed in 1887, and its furniture removed to Suva; it was re-opened in 1889, to be again closed in 1894, and has since been pulled down. Its churches are Episcopalian, Wesleyan, and Roman Catholic; the last was rebuilt in 1889 on a larger scale, and is in fact a cathedral; two schools, public and Marist Sisters. Rates collected by Town Board for 1899 amounted to £869 14s. 6d.; the Government grant was £100 and pound fees; total revenue, £1,511. Disbursements £1,511 4s. 1d.; total revenue of School Board, £548; expenditure, £560. It has a post-office, two hotels, branch Bank of New Zealand, Masonic, Oddfellows', M.U., and Good Templar lodges, and a private boarding-house. There are two bathing places, on the Totoga and Levuka creeks respectively. The Mechanics' Institute which was opened in 1879 was blown down in January, 1895, and the Oddfellows' Hall is used as a reading room. In 1898 the Governor established a Volunteer force in Fiji; D Company formed in Levuka under command of Capt. R. C. Bentley.

Geology.—The principal islands are hilly and mountainous, rising more or less abruptly from the shore to a height of about 3,000 feet, a few even reaching to an altitude of 4,000 or more feet above sea-level. These hills are for the most part composed of old volcanic lavas, basalt, trachyte, trap, and conglomerates, and covered to their summits with forests, rich grasses and jungle. Many of the islands are of volcanic origin, and that interior heat still exists is testified by the hot springs found in many parts also by occasional slight shocks of earthquake. Most of the shores have a fringe of coral. The occurrence of soapstone, in which no fossil has yet been found, seems to point that the islands must be composed in part of metamorphic rocks, This is opposed to the theory of the origin of the Pacific Islands, Mr. H. Brady, naturalist, examined the Fijian soapstone, and found it of comparatively recent formation—certainly of a Post-tertiary age—from the fragments of porous shells it contained.

Climate.—The climate of Fiji, as a whole, is agreeable and healthy; and, considering its proximity to the Equator, is not nearly so hot as might be expected, the fierceness of the sun's heat being lessened by the sea breezes. For six months of the year the climate is delightful, and free from endemic diseases, though during the hot season dysentery sometimes attacks those who live carelessly. As in the colonies, immigrants from cooler regions derive great benefit from a visit, say, every two years, to a more genial and cooler clime. The mean temperature of the colony is about 80°, the greatest extremes being experienced inland, 60° is the lowest at the sea level, but 42° has been recorded in the hills, and 122° is the highest hitherto noted in the sun. June, July, and August are the coolest months. From Christmas to March inclusive is called the "hurricane season." There is a dry and a wet season; the former is cool, and lasts from May to October; the latter is hot, and lasts from October to May, when the rainfall is heavy, particularly so when vegetation most needs it. The meteorological observations taken during 16 years, from 1871 to 1886, at Delanasau, Bua, Vanua Levu

(S. lat. 16° 38′, E. long. 178° 37′) by Mr. Homes, F.R.M.S., averaged as follows :—Barometer 29·897, thermometer, highest reading, 98·6, lowest, 56·3, mean, 79·3. During 1899 rain fell on 247 days ; 22·54 inches fell during the month of May. Official meteorological observations taken at Suva, in 1899, at an altitude of 10 feet above sea level were :—

Month.	Mean Barometer.	Highest Thermometer.	Lowest Thermometer.	Rainfall (total).	Days on which rain fell.
1899.					
January	29·855	89·2	73·8	8·48	17
February	29·818	87·7	74·5	12·95	23
March	29·875	89·9	73·7	7·10	21
April	29·875	86·0	73·5	19·89	28
May	29·944	80·8	70·5	22·54	24
June	29·968	82·2	68·1	3·60	11
July	29·981	79·2	67·4	3.71	18
August	29·985	79·9	69·7	9·93	22
September	29·965	78·1	68.3	14·81	28
October	30·009	83·0	70·7	5·00	17
November	29·932	84·7	73·5	5·77	17
December	29·872	84·5	74·1	16·62	21

The highest temperature in the shade during 1899 was 93·0 on March 2, the lowest 61·1 on September 23. The highest reading of barometer 30·146 on July 28, and the lowest 29·585 November 15. The greatest rainfall 13·18 inches on April 19.

Rivers.—These are numerous, and, during the wet seasons, subject to floods from the hills which skirt the foot of the mountains. The Rewa [the Wai Levu (Great River) of the natives in Viti Levu] is the largest, suitable for vessels of light draught to a distance of 40 miles from its mouth ; at 25 miles from its mouth it is 200 yards broad. Several large streams fall into it, among others, the Waimanu, the Waidina, and the Wai na mala. Other rivers are the Navua, Wai Delice, Sigatoka, the Nadi and Ba ; and in Vanua Levu, the Dreketi, the Labasa, the Wailevu, the Yanawai, and the Wainunu. A singular incident is noticeable in the watershed of Viti Levu—viz., that the Sigatoka and Rewa rivers, flowing into the sea at almost opposite ends of the island, take their rise in the same spring, and the source of the Ba river flowing in another direction, is only about a mile from that of the Rewa and Sigatoka. A rock at the entrance to the last-named, which impeded navigation, was removed during 1897. There are very many other smaller water-courses,and Fiji is essentially a well-watered country.

Animals.—There are no indigenous animals in Fiji, except bats, or flying foxes, and a small rat. Of lizards there are many varieties, some of them extremely beautiful. Snakes abound, from one to six feet in length, but they are of a harmless species. Insect life is prolific ; prominent are mosquitoes, flies, beetles, butterflies, fire-flies and leaf and stick insects. Domestic animals have been imported, and many thousand head of cattle as well as horses are scattered amongst the planters of the group, pigs innumerable run wild in the woods. Angora goats have been introduced. Of Birds—owls, parrots, kingfishers, robins, and hawks abound, also swallows, pigeons, ducks, and black ducks ; while larks, canaries and minas have been introduced. Domestic poultry thrive well, but soon become bush fowl, unless carefully tended. Ligurian bees, and more recently carrier pigeons, have been imported. For the former there does not appear to be very plentiful supply of food. The latter are principally used to notify arrivals of steamers and other vessels at the various ports. Mongoose have been introduced on several of the sugar plantations to lessen the ravages of rats ; but unfortunately, they are very destructive to poultry, and spread like the rabbit in Australia.

Fish.—Many varieties of fish exist and thrive in the Fijian waters. The mullet, the golden-tailed variety of which is common ; the silver fish, the trevala, the saka, the cumtertine —a species of the flying fish—also the gard, the pike, the skate, the schnapper, the sole, the stingaree, the John Dory, and many other varieties are, during the proper season, caught by the natives and the European settlers, the native women netting the fish for their husbands and fathers, who seldom attempt to catch them. Prawns and crayfish are plentiful. Oysters, from want of protection laws, are becoming scarce; the beds of many of the rivers are suitable for breeding these delicious bivalves, which were introduced several years ago into the island of Mago and are now of large size. Recently an ordinance was enacted to regulate fishing on the reefs and in the tidal waters of the Colony.

Flora.—According to Mr. John Horne, the flora indigenous to Fiji, so far as known, amounts to 1,086 species of flowering plants and 245 species of ferns and allied plants. Of these, 635 species (620 flowering plants and 15 ferns) have as yet been met with only in Fiji. During Mr. Horne's visit he added to the previously known flora 3 natural orders, 34 genera, and 363 species. "Ferns abound everywhere, from sea-level to the highest mountain top, and of all sizes, from the tiny *hymenophyllum* to the gigantic *alsophila* tree-fern, having a trunk 50 feet high." The number of distinct species of ferns and allied *lycopodiums* and *selaginellas* indigenous to Fiji amounts to 246, and this number, Mr. Horne thinks, will be raised to about 300 species.

The contrast is strongly marked between the slopes turned toward or from the trade wind. In the former there is but slight difference between the dry and wet seasons, and accordingly the slopes are richly wooded ; palms flourish, together with tree-ferns, bamboos, and atmospheric orchids. Rather more than half of the flowering plants are exclusive, a quarter are Indian, and the rest consist entirely of tropical or Pacific varieties.

In arboreous vegetation are several conifers, consisting of *Dammara Vitiensis, Dacrydium* and *Podocarpus*. Also the Vaivai (*Serianthes Vitiensis*), Casuarina, pandanus, several kinds of figtrees, and cocoa-nut palm are plentiful. The following list embraces the names (native and botanical) of 70 specimens sent to the Colonial and Indian Exhibition in 1886, with remarks as to the proved qualities of those tested. Bua bua (*Guettarda speciosa*), light yellow coloured ; Vesi (*Afzelia bijuga*) ; Cevua (*Premna Taisensis*) ; Tavutavu, or Yaro, are hard, heavy, and durable woods ; Sauca, considered good for wharves ; Sagali (*Luxanitzera coccinea*) ; and Vocea, hard and excellent for piles in salt water ; the Rosawa is tough, used for oars ; Vesi Vesi (*Pongamia glabra*) ; Yadavu (*Olacinea speciosa*) ; Tadiri (*Pittosporum*) ; Yasiva ; Mena ; Rauta ; and Doi (*Alphitenia franguloides*), all useful for general carpentry ; Dabi (*Kylocarpus granatum*) ; Dawa* (*Nephelium pinnatum*), excellent for boat timbers ; Qumu (*Acacia Richii*) ; Dedara and Vola (*Metrosideros speciosa*), all good for furniture ; Vai Vai (*Serianthes vitiensis*), an acacia, best wood in Fiji for boat planks ; Vau (*Hybiscus Tiliaecus*), and Savairabunidamu are very tough, excellent for boat timbers, knees, &c. ; Kura* (*Morinda citrifolia*), yellow, and Vuna, are fit for turning ; Bau Vudi* (*Euphorbiaceæ*), resembling cedar, good for boat planks ; Caukuru, (*Casuarina speciosa*), like oak in grain, and very hard, made into clubs ; the Dogo* (*Rhizophora macronata*), growing in mangrove or taro swamps, is hard, heavy, and close grained ; the Yaka or Caukalou (*Casuarina*), a very handsome wood ; Bau Loa (*Euphorbiaceæ*) ; Calavia, yellow ; Galali ; Tavola (*Terminalia Catappa*) ; Olo ; Makita (*Parinarium laurinum*) ; Cara ; Cibi Cibi (*Pterocarpus Indicus*) ; Sea* (*Eugenia jambosa*) ; Losi (*Ficus speciosa*), and Rou Rou are all tough, hard, or durable, or all qualities combined. The Damanu (*Calophyllum Burmanni*), useful in housebuilding. Of soft woods are Bua (*Fragræa Beiteriana*) ; Maku (*Trichospermum Richii*) ; Vula Valu, similar to Poplar, not durable ; Macou (*Cinnamomum speciosa*) ; Waci Waci, light ; the Dakua (*Damera vitiensis*), is similar to New Zealand Kauri ; Dakua ; Salu Salu (*Dacrydium elatum*), a sound wood ; also Yasi Yasi (*Eugenia speciosa*), durable ; the Koka Damu (*Bischoffia speciosa*) is a dark red wood, hard ; Cavuna Tabua (*Podocarpus Cupressina*) ; Tabu Koka (*Bischoffia speciosa*) ; Moliwai (*Citrus speciosa*) ; Malawaci (*Trophis Anthropaphagorum*), the juice burns ; Mali (*Myristica macrophilla*) ; Tarawau Coqe (*Dracontomelan Sylvestre*) ; Dregaquruquru (*Alstonia vitiensis*) ; Voder ; Nawanawa ; Yasi, sandal wood ; Vutukaloa, of two kinds, one poisonous the other edible, both handsome ; Yasi Yasi ; Mavota ; Sarosaro ; Bau ; Uru ; Cibicibi ; Baluwai ; Mawawa ; and Dilo (*Callophyllum*) (*Mophyllum*), very durable ; from its nuts is extracted a most valuable oil for curing wounds.

Population.—The white population of the colony in 1876 numbered 1,683 men, women, and children. At the end of 1879 it was estimated at 2,000 persons, composed of British, Colonial, American, and German extraction. In 1859 it was estimated that the native population numbered 200,000 ; in 1874 it was reduced to 140,000, and still further lessened by the epidemic of measles, which in 1875 swept over the entire group. Since 1876 foreign labour has been introduced from the New Hebrides, Solomon, and other islands of the South Pacific Ocean, also from the East Indies. According to the census of 1891 there were registered 4,335 births, 5,948 deaths, and 1,065 marriages. The death-rate for the years 1880 to 1890 shows a mean of $15\frac{56}{1000}$.

The estimated population of Fiji in January, 1900, was : — Europeans : Males 2,759, females 1,614 ; total, 4,373. Half-castes : Males 624, females 634 ; total, 1,258. Indians : Males, 8,875, females 4,407 ; total, 13,282. Polynesians : Males 1,672, females 289 ; total, 1,961. Fijians : Males 52,354, females 46,124 ; total, 98,478. Others : Males 471, females 679 ; total 1,150. Rotumans : males 1,033, females 1,138. Grand total, 122,673. Among the Fijians there were 3,395 births, 1,655 marriages, and 3,871 deaths.

A comparison of the census returns of 1891 with those of the earliest official census, taken in 1884, shows that the (1) *European* population is reduced to ⅘ (the male portion to one-half the female by one-fifth only), while the (2) *half-castes* have multiplied one third, the female increase being somewhat in excess of the male. The number of (3) *Indians* is two and a half times greater; the increase of females largely in excess—probably due to the fact that many time-expired immigrant coolies have made Fiji their home. The (4) *Polynesian* returns show a reduction of more than one half ; since the removal of some restrictions placed upon the engaging of the native Fijian, fewer foreign labourers (except Indian) are employed. (5). The *Fijians*, appear to be slowly dwindling ; they number 4 per cent. less than a few years back, the falling off of the female portion slightly preponderating—very many die in infancy. In the total population the reduction of 3 per cent. was, within a small fraction, among the males ; the females nearly held their own.

Strenuous efforts are being made to stay the decrease of the Fijian population, and to this end purer water is being provided in various districts where it seems to be required, and European inspectors have been appointed to supervise the carrying out of such sanitary measures as are found necessary.

* The fruit of these is edible.

Natives.—The Fijian aborigines are a handsome, powerful-looking set of people; a dark copper is their principal colour; they are shrewd in the management of their petty affairs of business, and have a keen eye to climatic changes and peculiarities; cowardly and untruthful, lazy and tricky, but with a very little management the white man can make them subserviently useful. They are cleanly in their persons, in fact so fond of the water that they are (both male and female) semi-amphibious. They indulge in several habits repugnant to Europeans—anointing their bodies with cocoa-nut oil, which is done to counteract the effects of extreme heat and cold, and plastering their hair with damped lime, in order to make it stiff and straight. Those who have apparently undergone a change in a moral point of view are almost severely attentive to their religious duties. The subordination of the natives to their chiefs, and the respect of the young for the aged and the white man, so noticeable a dozen years or so ago, has slightly decreased. Things new to the old are equally new to the young, hence the trust of the youth in themselves is equal to their trust in their fathers. Generally speaking, reserve, suspicion, and distrust mark many of the family relationships.

Analogically speaking, there can be little doubt, from comparing colour, language, bodily formation, &c., that a blending of the Asiatic and African races may be traced. The distinctive features of the different races are strongly marked; at the east side of the group the Asiatic peculiarities prevail, while to the westward the African (*not negro*) characteristics exist.

Religion.—Numerically speaking, counting the Natives, the Wesleyan body is by far the strongest, and most wealthy; but the Mission is not self-supporting; it owns a large portion of the land in Levuka, where it has a stone church for Europeans. The Rev. Wm. Brown is stationed at that town; services are held twice every Sunday, and a Sabbath school in connection therewith. It has been said that the late history of Fiji may be almost considered identical with the record of missionary enterprise. In few places has missionary effort been more successful, or its fruits been more apparent. It was in 1835 when the first missionaries, the Revs. William Cross and David Cargill, M.A., landed at Lakeba. They found the Fijians at nearly the lowest depths of degradation—bloodthirsty, and addicted to cannibalism and all manner of vice. To-day finds all of them professing Christians; cannibalism has ceased since 1876, polygamy is rare, the heathen worship of past ages has given place to the worship of the true God, and there is peace. Many of the converts are said to maintain a consistent life, and in all a great revolution, in outward morals at least, has taken place, even if there has not been a real change of heart. The following are the returns of the Wesleyan Church at its first district meeting held in Fiji, in December, 1838. Church members, 264; 89 on trial; 57 marriages; 178 adults and 56 children baptised; Sunday schools, none; day schools, 62 teachers, 604 scholars (confined to Lau Island alone). For the year 1899: Churches, 945; other preaching places, 345; missionaries, 10; native ministers, 71; catechists, 65; teachers, 1,076; local preachers, 2,331; class leaders, 5,043; Church members, 33,435; on trial for membership, 7,750; Sabbath schools, 1,599; Sabbath scholars, 32,439; day schools, 1,499; and day scholars, 26,464. Total adherents, 94,032. The local contributions amount to about £3,000 yearly, and the actual expenditure to over £5,000. The Jubilee of this Mission was held in 1885 and 1886; £4,500 was raised towards its ordinary income. A large new wooden church for natives, called the "Jubilee" Church, was erected at Suva in 1887. It has an average attendance of 200. The Missionaries and their stations are:—Revs. A. J. Small, chairman of the district and president of the Navuloa College; H. H. Nolan, Rewa; W. Heighway, Kadavu; T. J. Wallis, Taviuni; W. Slade, Ba; W. Burns, Lomaloma; G. H. Hewitt, Ovalau; C. Williams, Bua; J. C. Jamison, Naduri Macuata.

The Rev. W. Floyd, a Church of England clergyman, is located at Levuka, and the Rev. A. Packe, M.A., is the incumbent of the Church of England at Suva. In 1893 the Polynesians built a church at their own cost (£400), to hold 250 persons, and to be presided over by a native minister. Average attendance 140.

There is a Presbyterian church in Suva, with an average attendance of 110, under the charge of the Rev. P. Mathew.

The Catholics have for some time had a mission in the islands, named the Vicariate Apostolic of Fiji, established as such by Pope Leo XIII. in May, 1887; it is governed, under the dependance of Rome, by the Right Rev. Dr. J. Vidal. Numerically their influence is smaller than the Wesleyan, but in church building, educational matters, school houses, &c., efforts are more varied and extended. The number of church adherents is about 9,200. The Mission publishes monthly a periodical printed in Fijian. The Missionaries and stations are: Rev. A. Marion, at Levuka; Revs. F. Trillot and P. Liogier, St. John's College, Cawaci, Ovalau; Rev. V. Thierry, Loreto; Revs. J. Nicolas and C. Pichesit, Suva; Revs. J. de Marzau and F. Nicoulieu, Lomary; Revs. E. Rougier and P. Gonnet, Rewa; Revs. E. Rideau and A. Pepin, Natovi; Revs. H. Bousquet and E. Babonneau, Naiserelagi; Revs. F. Dupont and Clement, Ba; Revs. G. Lahaye and J. B. Schneider, Solevu; Revs. J. Calvaic and J. Leberre, Na Savu Savu; Revs. L. Robert and A. Villanie, Tunuloa; Revs. F. Terrien and M. E. Bertreux, Wairiki; Revs. J. Trouillet and J. B. Chevreuil, Rotumah. Eight Marist Brothers and 25 Sisters are also devoted to Missionary work. They have two schools for the European population in Suva, and one in Levuka. They have an English teaching school for chiefs' children at Cawaci; also another school for Indians in Suva.

In April, 1892, a new and large stone church was opened at Wairiki, and in July, 1894, Archbishop Redwood, of New Zealand, laid the corner stone of a stone cathedral at Suva, still in progress of erection, the stone being imported from Pyrmont, New South Wales. There are five other concrete churches in course of completion.

All the above named are licensed to celebrate marriages, [illegible] also are about 70 Wesleyan native preachers.

Education.—The means for the education of the young has much improved within late years. There are now in Levuka a public school with about 59 white and half-caste children in average attendance, and two teachers; also a school with 63 children, European and half-caste, under the direction of the Marist Sisters. An orphanage has been opened by the Catholics, who in 1892 established (at Cawaci, 6 miles from Levuka) a large station for training teachers, and more recently a school for teaching smart native youths the English language. These institutions are under the care of three Marist Brothers, Brother Vincent, Director. In 1884 a public school, with compulsory attendance of children, was opened at Suva, this school having about 90 scholars on its roll, and three teachers. The three Catholic schools at Suva are under the direction of the Marist Brothers and the Sisters of Cluny. There are also institutions (about 1,500) in the different provinces, attached to each Wesleyan European missionary circuit, where persons (native) are trained for the ministry, and others are educated, and having about 26,000 scholars. At Navuloa, a fair education, native and English, is given to those who are preparing for ordination, and to a number of others of the best native families in Fiji, not intending to enter the ministry, but who will be all the better qualified for their life's work by the training and education obtained there. In 1887 the Rev. W. Floyd, Levuka, gave a piece of land, erected a school-chapel and opened, at the desire of fifty Polynesian labour boys, a night school; the benefits resulting from this induced Suva to entertain a like institution. The Native Industrial School is an Institution started by Government in 1881 at Yanawai, Savu Savu Bay, on Vanua Levu, and recently removed to a new site near Suva on Viti Levu. The superintendent and the instructor of sawing, carpentry, and boat building, are Europeans. The other officers, 3 teachers, and 1 elder, are Fijians. The students, 76 in number, enter the school for a term of 5 years; some of those who exhibit skill in their trades are permitted to remain longer. They are taught to read and write, arithmetic, and colloquial English; also to saw timber, house carpentry, and boat-building; ultimately other trades will be taught. In each of the provinces Government purposes to establish a workshop (fitted up with sawyers' and carpenters' tools), wherein students, as their time expires, will work for the benefit of their respective province. Substantial hardwood structures with shingled roofs are erected, consisting of workshop, houses, church and school-room; the whole, from the felling of the trees to completion, being the work of the students. A staff of medical students, Fijians, who were under the instruction of Dr. McGregor (now Sir William McGregor) and the present chief medical officer, Dr. Corney, have been examined and licensed to practise in medicine and surgery. In June, 1891, the Catholics opened a concrete building in Levuka as an orphanage and boarding school for Europeans. There is a Mechanics' Institute at Ovalau, Levuka; and one at Viti Levu, Suva.

Sanitary.—For the preservation of the public health five districts have been erected—viz., Suva, Rewa, Ba and Rakiraki, Labasa, and Ovalau. The medical officer attached to each district is the local authority. The Medical Staff of the Colony consists of the chief medical officer, a senior medical officer, five district medical officers, the Government M.O. at Levuka, thirteen native assistants in the provinces, and a resident medical superintendent, dispenser, steward, matron, nurse, and probationers at the Colonial Hospital. The Senior M.O. for Suva is *ex officio* also resident medical superintendent at the Colonial Hospital, to which institution the Chief M.O. is visiting surgeon, and the Chief M.O. is also superintendent of the Public Lunatic Asylum. The chief medical officer and the S.M.O. are health officers for the Port of Suva. All the medical officers and native assistants are public vaccinators.

There is a Board of Health, of which the Chief Medical Officer is president. Its members are appointed by the Governor.

The principal Ordinances of the Colony governing its sanitary and medical administration are:—

(1) Public Health Ord., 1875, and Amendments.
(2) Quarantine Ord., 1880, and Amendments.
(3) Medical Registration Ord., 1881.
(4) Vaccination Ord., 1888.
(5) Native Medical Practitioners' Ord., 1888.
(6) Labourers' Medical Care Ord., 1891.
(7) The Lepers' Ord., 1899.

Medical Institutions.—The medical institutions of the Colony are the Colonial Hospital and the Public Lunatic Asylum, both at Suva, and both conducted exclusively by the Government. A provincial Hospital for native patients has been inauguated at Ba, and another at Taveuni. Three others are in course of construction.

The Hospital at Suva is a self-sustaining Government institution, and accommodates 12 Europeans and 99 Native patients. 1472 patients were admitted during 1899: the death-rate was 3·12 per cent. The charge for European patients is 5s. per diem; for Natives, 2s. per day, exclusive of stimulants, which are charged at cost price. There is no hospital at Levuka. Capitation rates levied in the medical districts are variable; since July 1, 1887, as follow:—Taveuni and Suva, 2s.; Ba and Rakiraki, 1s. 9d.; Rewa, 1s. 3d. The rate, however, must not be

aken as a sign of the healthiness of the district ; for instance, Taveuni is more healthy than Rewa, but has not so many inhabitants, and therefore the fee is higher *per capita*. There are 13 provincial vaccinators (native practitioners). The Lunatic Asylum will accommodate 5 Europeans and 11 natives ; the charges are : Europeans, 10s. per day for first three months, 6s. 8d. per day aft— ; Natives, 2s. per day for first three months, 1s. 6d a day after Ten persons were admitted during 1899.

The Quarantine station is situated on the islets of Nukulau and Makuluva, about four miles from Suva Harbour. A steam disinfecting apparatus of the "Reck" pattern is maintained here ; and there are wooden quarters for persons detained under observation, with separate wards for the sick on one of the islets apart. There is steam communication with Suva daily, under the usual restrictions.

Another isolation station for quarantine of observation is at Naikorokoro, and a hospital for infectious diseases has been built and equipped near Suva, to meet contingencies to which the possible introduction to the Colony of bubonic plague might give rise. Connected with this is a Second Reck's patent steam disinfector, of the portable pattern, and supply of Haffkeines's prophylactic has been provided and distributed to the medical officers.

Criminal Statistics.—During the year 1899, 7,342 offences were reported, 757 being against the person ; 2,170 cases were tried in the Provincial Courts under native regulations.

Labour.—The importation of labourers from the Melanesian and Polynesian Islands is carried out under governmental supervision in sailing vessels chartered for the purpose, the cost of introduction being paid by the employers requisitioning such labourers to the owners or charterers. This cost of late years has amounted to £15 or £16 per adult from the New Hebrides and Solomons Groups, and £8 from the Gilbert Group. A Government charge of 21s. for depôt and indenture fees is also payable. The employer is also bound to pay the return passage and a depôt fee of 10s. on each labourer on completion of the three years' service for which he engages. The charge for return passage is estimated annually, and of late years has been £5 to the Gilbert Group, £5 10s. to the New Hebrides, and £7 to the Solomon Islands.

The labourers are engaged for three years' service, at £3 wages per annum (or £6 per annum if they have already worked under indenture in Fiji, Queensland, &c.), in addition to which they receive free lodging, food, and clothing, according to Government scale, and medical care. All these, and the conditions of labour, are regulated by law and under Government supervision. On the expiration of the term of service the labourer is paid his wages in cash, and is free to return home or to continue in the country and work, either under indenture or contract, placing him under Government supervision or otherwise. Those who choose to work are usually able to get it at £1 per month with rations. These re-engagements or contracts are usually for one year. The introduction of this class of labourers has for various causes very considerably diminished of late years, and it appears probable that before long it will entirely cease.

Indian Introduction.—This commenced in 1879, when, under arrangements concluded with the Indian Government, a number of coolies were introduced in the "Leonidas," only a part of whom found immediate employment on estates, owing largely to ignorance of the capabilities of this class of labourers and the fear inspired by an outbreak of small-pox on the "Leonidas." The rest were utilized by the Government for some time, and were finally allotted to employers desiring their services. Introduction was resumed in 1882 and has been practically continuous since that year, the only break occurring in 1887, this being found indispensable by the larger employers The cost of introduction has diminished considerably of late years, and may now be estimated at about £16 per adult. (In 1898 it cost £16 8s. 5d. ; in 1897 £13 7s. 7d). The immigrants engage for five years' service, and are entitled to free lodging and medical care for their term of service under the law and Government regulations. They receive food for six months after arrival on a prescribed scale, for which deduction may be made from their wages at the rate of 4d. per diem. Wages are paid weekly, and are at the rate of 1s. per day or per task (if tasked) for men, and 9d. per day or task for women. Applications are made on or before October 1 in each year, a sum of £6 per adult applied for being then paid ; the balance on their arrival and allotment in the subsequent year, usually in April or May. These labourers are found indispensable by the larger employers, and their value is rapidly being recognized by the small employers, by whom they are engaged on the completion of their indentured service, either under annual contracts under the law or as "free" labourers. Their return passage is provided by the Colony out of public funds. At the end of 1899 there had been introduced 18,553 immigrants, including children, and nearly 4,000 births had occurred in the Colony. After deducting deaths and emigrants there were estimated to be over 13,000 Indians (including children) in the Colony on January 1, 1900. Many of these have settled, after completion of term of service, on land leased from the Government and private owners, and cultivate rice, sugar-cane, bananas, &c., on their own account, while a large number are employed by Europeans in agricultural and pastoral work, and the difficulty at times complained of, from scarcity of labour, may be expected to decrease as more of this class of workers is introduced.

Estimates of varying character have been made of the annual cost, including wages, of Indian and Polynesian labour. The Indian is believed to be the cheaper labourer, but the Polynesian being better known has hitherto been preferred by small employers, especially on fruit and cocoanut plantations, where his more powerful physique gives him the advantage in certain kinds of work.

Manufactures.—Sugar Mills in Fiji.—On the Island of Viti Levu :—(A) *Nausori*, River Rewa, capacity 80 tons (Sugar refined in Sydney) ; *Rarawai*, R. Ba, capacity 45 tons ; Proprietors of these two mills—Colonial Sugar Refining Company (Ltd.), Sydney. *Tamanua*, R. Navua, capacity 25 tons. The Fiji Sugar Company, Limited ; *Penang*, Raki Raki, capacity 9 tons, Fraser & Co., Limited ; (Ellington). On Island of Vanua Levu :—*Labasa*, capacity 45 tons, The Colonial Sugar Refining Company, Limited. There is a tea factory at Wainunu, and 16 boat-building yards in the colony, a soap-works at Suva, and one at Levuka, a saw-mill at Cakaudrove, and one at Lomaiviti.

Agriculture.—Maize is extensively cultivated ; cotton, too, used to be largely grown, but nearly died out in 1895 ; a revival took place in 1896, and 38 tons were exported, but it fell off again in 1898. Sugar has to a great extent taken the place of maize and cotton, the difficulty in planting large areas being the paucity and cost of labour. The cocoa-nut is remunerative, its oil, copra (the dried kernel cut into slices), and fibre all being marketable articles commanding a value, though fluctuating. Copra ranks next to sugar in importance in the list of exports. The attention of the settlers is given to the cultivation of this picturesque palm, which flourishes best on the seaboard. Each tree produces about 100 nuts per year, and is estimated to be worth from three to five shillings yearly to the proprietor. It has this great advantage—it can be worked with few labourers when once in full bearing. Coffee was first exported in 1877. Average yield 4 to 5 cwt. per acre. Tea has been cultivated of late years, and that placed on the market received favourable report. Its yield is about 400 lb. per acre ; when in full bearing its probable returns will be nearly 600 lb. Tobacco is cultivated by the natives, chiefly for their own consumption, and to assist in payment of the taxes ; few planters grow it, but increasing attention is being paid to its cultivation. Arrowroot is produced favourably, owing to the nature of the soil and climate. Peanuts, beans, cardamons, and turmeric are also cultivated and exported. Rice is being cultivated with excellent results. Colonial distilled spirit, a by-product of the sugar industry, has also increased from *nil* in 1892 to £16,343 in 1899.

The cultivation of bananas received a serious check some years ago from a disease which attacked and almost entirely destroyed it in some districts, but it is coming again into prominence, the disease having apparently worked itself out in some of the formerly infected districts, and their cultivation having been commenced in other parts where the disease is not known. During 1899 464,000 bunches of bananas, and 47,000 cases of bananas and pineapples were exported.

Although many cattle run wild, yet butchers import them, as also sheep from New Zealand. On the older cocoa-nut plantations cattle are useful, saving much labour in weeding undergrowth, and ripping off shoots of trees. Sheep might be reared to a greater extent ; they thrive well in open country on hilly ground with a low scrub, and can be grazed on the natural grasses of the country. The cost attendant on fencing and conveyance to market may be the causes that cattle and sheep are not more generally reared.

Stock returns are not issued, but are estimated at :—Horses, 2,083 ; cattle, 16,900 ; sheep, 1,000 ; goats, 9,150 ; pigs, 1,460—they also run wild in the bush.

Estimated acreage of cultivated lands in 1899, 48,803, of which 20,891 were, in 1899, cocoanuts, 23,160 sugar-cane, 210 tea, and 2,228 bananas, which produced 368,075 nuts, 321,838 tons sugar, 348,045 bunches bananas, and 40,600 lbs. tea ; uncultivated, 4,905,117 ; estimated acreage of colony, 4,953,920.

TRADE AND COMMERCE.

Shipping.—The total number of merchant vessels entered at the Ports of Suva and Levuka for the years 1899 and 1898, exclusive of local craft of 1,500 vessels, aggregating nearly 20,000 tons entered inwards and outwards every year and engaged in the inter-island trade was :—1899, 130 vessels of 128,791 tons ; 1898, 127 vessels of 133,752 tons. Cleared, 1899, 125 of 126,656 tons ; 1898, 127 of 132,767 tons.

A comparison of steam and sailing vessels in 1899 and 1898 gives the following result :—

	STEAM VESSELS.		SAILING VESSELS.	
	No. of Vessels.	Tonnage.	No. of Vessels.	Tonnage.
1899	96	115,237	34	18,554
1898	103	126,228	24	7,524

The increase is due mainly to the fact that the steamers of the Canadian-Australian line have called regularly at Suva throughout the year.

Steamers running between Fiji and New Zealand and Victoria are subsidized by the Government.

The nationality of these vessels for 1899 and 1898 was as follows :—

Nationality.	1899		1898	
	No.	Tonnage.	No.	Tonnage.
British	115	120,916	115	129,302
American	2	553	2	680
Norwegian	8	4,685	7	2,857
German	2	1,881	1	468
Tongan	2	92	1	46
Danish	1	664	—	—
Russian	—	—	1	399
	130	128,791	127	133,752

Vessels sail between Europe, India, America, &c., the first ship to London direct, the *Brunette*, was despatched in the early part of 1876. The steamers running between Vancouver and Australia, calling fortnightly at Suva, are a commercial boon to the colony.

The following statement shows the number and tonnage of vessels entered and cleared at the two ports for the years 1899 and 1898, distinguishing steam from sailing, and British from foreign :—

SUVA.

Entered.

Nationality.	1899		1898	
	No.	Tonnage.	No.	Tonnage.
British Steam	82	98,169	89	112,614
British Sailing	8	4,478	5	2,264
Foreign Sailing	5	2,717	5	1,753

Cleared.

British Steam	81	98,454	91	113,172
British Sailing	6	4,425	4	2,217
Foreign Sailing	4	2,025	2	680

LEVUKA.

Entered.

Nationality.	1899		1898	
	No.	Tonnage.	No.	Tonnage.
British Steam	14	17,068	14	13,614
British Sailing	11	1,201	7	810
Foreign Steam	—	—	—	—
Foreign Sailing	10	5,158	6	2,697

Cleared.

British Steam	13	15,538	13	12,481
British Sailing	12	1,252	8	705
Foreign Steam	—	—	—	—
Foreign Sailing	9	4,961	9	3,512

Many of the steamers which enter and clear the port of Suva visit that of Levuka.

General Foreign Trade.—Returns published by the Receiver-General for 1899, total imports and exports, £744,900 6s. 3d. ; imports, £263,043 16s. 7d. ; exports, £481,856 9s. 8d. ; for 1898, total foreign trade, £768,954 ; imports, £234,849 ; exports, £534,105.

The value of the total trade of the year 1894 was greater than that of any other year of the Colony's history.

The total trade of the Colony with the Australian Colonies during the year 1899 was divided as follows :—

	Imports.	Exports.	Total.
	£	£	£
N. S. Wales	217,116	73,910	291,026
New Zealand	29,054	281,060	310,114
Victoria	—	69,326	69,326
South Australia	—	—	—
Total for the Australasian Colonies	£246,170	£424,296	£670,466

Exports.—Domestic and Foreign.—The value of South Sea Island produce imported for exportation in 1893, £1,314 ; in 1894, £10,784 ; in 1895, £14,358 ; in 1896, £5,212 ; in 1897, £4,236 ; in 1898, £5,187 ; in 1899, £3,911.

Total value of imports from British Possessions, Polynesian Islands, and other countries for 1898 was :—From British possessions, £226,405 ; from Polynesian Islands, £5,523 ; from other countries, £2,921 ; total, £234,849. For 1899 the figures read : £256,761, £4,331, £1,952 ; total, 263,044.

Value of exports to British possessions and to other countries during 1898 was :—To British possessions, £522,586 ; to other countries, £11,519 ; total, £534,105. For 1899 the figures read : £426,703, £55,154 ; total, £481,856.

It will be noted that over 90 per cent. of the total trade of the colony was transacted with the three Australian Colonies of New South Wales, New Zealand, and Victoria, the proportion being 39·1, 41·6, and 9·3 per cent. respectively.

Principal Imports.—The following table shows the values of the principal articles imported into the Colony during five years, and embraces nine-tenths of the whole imports. Those not included in this list amount to about £11,000 in each year. The value of imports is according to the invoice price ; no addition is made for enhanced value when brought to the local market.

Articles.	1895.	1896.	1897.	1898.	1899.

Woodenware	1,255	1,061	1,729	529	901

With the exception of a few articles, this table includes only those whose value is upwards of £1,000.

The notable fluctuations during 1899 consist of increases under the heads of galvanised iron goods, iron and iron pipes, machinery and drapery, and a decrease in breadstuffs and biscuits.

The amount of Customs' duties collected in 1898 amounted to £45,363 ; in 1899 to £52,627.

Chief Articles of Export.—The following List of Items shows the quantity and value of each of the eighteen principal articles exported from the colony during the years 1894, 1895, 1896, 1897, 1898, 1899. A large proportion of agricultural produce, particularly maize, tea, and tobacco, remaining for home consumption does not come within the scope of the shipping dealings.

1. Bêche-de-Mer. In 1894, 16 tons, £808 ; 1895, 9¾ tons, £483 ; 1896, 10 tons, £378 ; 1897, 19 tons, £812 ; 1898, 32 tons, £1,876 ; 1899, 36 tons, £2,344.

2. Cocoanuts. In 1894, 9,984 sacks, £2,496 ; 1895, 3,849 sacks, £962 ; 1896, 7,181 sacks, £1,803 ; 1897, 8,843 sacks, £1,876 ; 1898, 7,834 sacks, £1,749 ; 1899, 8,247 sacks, £1,726.

3. Cocoanuts (desiccated). In 1893, 37⅞ tons, £2,122 ; 1894, 14½ tons, £801 ; 1895, *nil.* ; 1896, *nil* ; 1897, *nil* ; 1898, *nil* ; 1899, *nil.*

4. Copra. In 1894, 5,833 tons, £57,261 ; 1895, 9,243½ tons, £79,726 ; 1896, 5,487 tons ; 1897, 8,257 tons, £74,413 ; 1898, 6,985 tons, £68,252 ; in 1899, 7,617 tons, value £77,330.

5. Cotton (Kidney). In 1894, 19 tons, £740 ; 1895, 4½ tons, £545 ; 1896, 35 tons, £1,632 ; 1897, 34 tons, £1,615 ; 1898, 17 tons, £820 ; 1899, 15 tons, £705.

6. Curiosities. In 1894, £593 ; 1895, £534 ; 1896, £358 ; 1897, £127 ; 1898, £334 ; 1899, £115.

7. Fruit. In 1893, 348,600 bunches bananas, 17,421 cases pine-apples and bananas, and but 1 case of dried, total value £36,599 ; 1894, 390,746 bunches, 33,014 cases, £49,114 ; 1895, 20,725 cases 114,024 bunches, £20,987 ; 1896, 207,352 bunches, 34,934 cases, 28 lbs. preserved, £18,490 ; 1897, 31,308 cases, £16,513 ; 1898, green, 364,486 bunches, 40,730 cases, £25,477 ; in 1899, 463,985 bunches, 47,226 cases, value £30,606.

8. Hides. In 1894, 933 hides, £700 ; 1895, 1,236 hides, £927 : 1896, 984 hides, £280 ; 1897, 1,020 hides, £292 ; 1898, 1,037 hides, £310 ; 1899, value £466.

9. Maize. In 1894, 1,000 bushels, £125 ; 1895, *nil.* ; 1896, 2,568 bushels, £300 ; 1897, 16,312 bushels, £1,453 ; 1898, 23,960 bushels, £2,473 ; 1899, 13,660 bushels, £1,366.

10. Molasses. In 1894, 8,478 gals., £53 ; 1895, 37,476 gals., £46 1896, 16,272 gals., £157 ; 1897, 18,252 gals., £228 ; 1898, 49 gals., £634 ; 1899, value £414.

11. Peanuts. In 1894, 130 tons, £2,435 ; 1895, 87 tons, £1,623 1896, 191 tons, £3,649 ; 1897, 185 tons, £2,636 ; 1898, 162 tons £2,615 ; 1899, 220 tons, £3,182.

12. Shell (Pearl). In 1894, 6 tons, £246 ; 1895, 11 tons, £4 ;

1896, 14 tons, £575; 1897, 31 tons, £1,281; 1898, 34 tons, £2,329; 1899, 39 tons, £3,092.

13. Skins. In 1896, value, £954; 1897, £885; 1898, £1,644; 1899, £1,992.

14. Spirits, Colonial distilled. In 1893, 106,921 gal., £13,365; 1894, 133,971 gals., £16,746; 1895, *nil*; 1896, 78,890 gal., £10,163; 1897, 15,041 gals., £1880; 1898, 11,088 galls., £13,886; 1899, 132,440 gals., £16,343.

15. Sugar. In 1894, 27,265 tons, £436,245; 1895, 23,209 tons, £208,889; in 1896, 27,334 tons, £336,929; 1897, 26,900 tons, £323,829; 1898, 34,156 tons, £409,883; 1899, 28,403, £340,602.

16. Tea. In 1893, 1½ tons, £253; 1894, 1¼ tons, £205; 1895, 9 cwt., £79; 1896, 5 tons, £542; 1897, 3½ tons, £352; 1898, 14 cwt., £72; 1899, value £40.

17. Tobacco. In 1893, 20 lbs., 16s. 8d.; 1894, 19 cwt., £95; 1895, 1 cwt., £5; 1896, 17 tons, £3,798; 1897, 10 tons, £2,051; 1898, 2¼ tons, £257; 1899, *nil*.

18. Wool. In 1893, 4½ tons, £417; 1894, 12½ tons, £1,161; 1895, 6½ tons, £524; 1896, 3¾ tons, £225; 1897, 10 tons, £1,719; 1898, 5¼ tons, £196; 1899, 5 tons, £166.

The export trade shows a tendency to concentrate round the major products, viz., sugar, green fruit, and copra—although fruit, which since 1887 had occupied the second place on the list of exports, receded to the third place in 1893, and still retains that position. It is also found that the export of minor products is a diminishing quantity.

Commenting on the foregoing list, frequent reference being made to statistics published in former issues of the Hand-Book, the most noticeable features are—(1.) *Bêche-de-mer*.—One of the exports that, for several years, shows a considerable falling off. (2.) *Cocoanuts*.—Exports revived during 1896.

(3) The export of *desiccated cocoanuts* fell off altogether in 1895, 1896, 1897, 1898 and 1899. (4.) *Copra*.—The local consumption of nuts for home use continues to increase, therefore the shipping returns do not show the quantity actually raised; the 1899 export showed a slight decrease due to drought. (5.) *Cotton*.—Since 1887 only the kidney variety has been shipped. It is not a favourite crop with the natives, and it continues to decrease. (6.) *Curiosities*.—The exportation of curios decreased considerably in 1899. (7.) *Fruit*.—The export of fruit attained its greatest height in 1894, fell off in later years, but increased again in 1898 and 1899. Large areas are being put under cultivation at Sigatoka, Savusavu, Taviuni and Viria. The quantity of bananas shipped in cases shows a decrease. (8.) *Hides*.—Of these about three-fifths are usually shipped from Suva, mostly to Melbourne and Auckland. (9.) *Maizè* export showed considerable decrease in 1899. There is, however, a large local consumption, amounting probably to 20,000 bushels annually. (10.) *Molasses*.—This is closely connected with that of Colonial distilled spirits, the exportation of which began in 1878. It is also used as a fertilizer, and this use may prevent or reduce its export in future. (11.) *Peanuts*.—The market increased during 1899. (12.) The output of *Pearl* and *Tortoiseshell* has not varied extensively either in quantity or value. (13.) *Skins*.—Shows a considerable increase. (14.) *Spirits*.—The exportation began in 1878, and died out in 1895, but resumed in 1896, and decreased considerably during 1899. (15.) *Sugar*.—Since 1883 sugar has held first place (from Copra) in the list of exports. (16.) The export of *Tea* fell off in 1899. (17.) *Tobacco*.—There never has been a regular trade, but the finer classes are being cultivated, and trade fell off in 1898. (18.) *Wool* is not extensively exported, although reported on in the Melbourne market as being "fine haired and of good quality, light in condition, and quite free from burr or seed of any description." Showed falling off in 1899.

The total trade for 1899 and 1898, and the duties collected thereon at the respective ports of entry were :—

Ports.	Imports.	Exports.	Customs Dues.
1899	£	£	£
Suva	193,900	425,972	35,392
Levuka	65,233	55,885	17,235
1898			
Suva	173,635	471,252	31,558
Levuka	61,214	62,853	13,741

Condition of the Colony.—In his message to the Legislative Council in 1900, His Excellency the Governor said he regarded the financial results of the year as affording reasonable grounds for satisfaction. "We are now," said he, "within measurable distance of the financial position which I set myself to establish on assuming the government in the latter half of 1897, conferring provision for an executive staff adequate to the requirements and conditions of the colony, a fairly-assured prospect of having the means to meet the cost of the necessary Public Works Extraordinary in years to come, and the accumulation of a reserve of some £25,000 as an insurance against the temporary shrinkage of revenue, and the necessity for exceptional expenditure that may be caused by a hurricane."

During the latter part of 1900 the question of federation with New Zealand was discussed.

The **Revenue and Expenditure** for 1899 and 1898 is shown in the following table :—

Year.	Revenue.	Expenditure.	Excess or deficit.
	£ s. d.	£ s. d.	£ s. d.
1899	98,621 7 8	95,567 13 2	3,053 14 6
1898	94,164 15 6	87,594 8 6	6,483 16 0

Upwards of one-half of the total revenue is derived from customs (£52,631). The Native taxes—assessed at £20,000 yearly—are usually paid in during the latter half-year. No other sources of income need special comment.

On December 31, 1899, excess of assets over liabilities was £20,636 0s. 7d. The Public Trust account amounted to £31,588 12s. 9d. Introduction fund for Indian immigrants, £16,578 11s. 5d.; and return passages fund, £45,820 15s. 6d. The intestate estate fund was £400.

Public Debt.—At the beginning of 1899 amounted to £205,076, the original amount being £254,025, of which £48,949 has been repaid.

Postal.—The postage on Town Letters—that is, correspondence delivered within the limits of the town where posted—is one penny for each ½oz.; twopence on country and inter-insular letters. On book packets, town and country, under 4oz. 1d., and 1d. every 4oz. over; patterns and samples 2oz. 1d., town and country. On letters to the Australian Colonies and New Zealand there is a uniform rate of 2d. per ½oz. The rate on letters to the United Kingdom is 1d. per ½oz.; to all other parts of the world in the Postal Union *viâ* Orient and P. & O. lines 2½d. per ½oz.; *via* San Francisco 4d. per ½oz. The newspaper rates to all parts of the colony, to the Australias or the United Kingdom, is one penny for 4oz. Book and magazine rate to places beyond the colony is 1d. not exceeding four ounces and 1d. every additional four ounces, to the United Kingdom and other parts of the world 1d. for two ounces, and *viâ* Frisco, 1d. not exceeding four ounces, and 1d. additional per ounce, also to all other countries within the postal union. The rates on parcels to the United Kingdom (per P. & O. and Orient lines only), is 1lb. 1s., and up to 11lb., 8d. per lb., size limited to 6ft. by 2ft. girth; on parcels for other colonies and passing the United Kingdom, for 2lb., 1s. 7d., and 10d. for each pound over, in addition to the rate from the United Kingdom; to New South Wales and New Zealand 1lb. or under 8d., each additional 1lb. up to 11lb. 6d. Money Orders—The rates of commission are as follows :—On the United Kingdom and Canada : For sums not exceeding £2, 1s.; above £2 and not exceeding £5, 2s. 6d.; above £5 and not exceeding £7, 3s. 6d.; above £7 and not exceeding £10, 5s. On the Colonies of Victoria, New South Wales, Queensland, South Australia, Western Australia, Tasmania, and New Zealand : For sums not exceeding £2, 6d.; above £2 and not exceeding £5, 1s.; above £5 and not exceeding £7, 1s. 6d.; above £7 and not exceeding £10, 2s. The registration fee on letters and packets is 4d. to all parts. Revenue stamps are not allowed to be used for postage; postal cards are issued at 1d. single, 2d. reply. There are two money-order offices, and the transactions in 1899 amounted to £630 19s. 2d. paid in the Colony, and £3,175 16s. 11d. issued in the Colony. The post-offices number 40, and 421,446 letters and postcards, 53,579 packets, and 308,714 newspapers and 1,278 parcels passed through the office in 1899.

Postal Revenue for 1899 was £2,547 2s. 6d.; expenditure, £2,045 17s. 6d. Excess of revenue over expenditure, £501 5s. There are no telegraph or public telephone offices. The Colony's share of the subsidy to the P. & O. line is £47 8s. 8d; to the Vancouver line £875; the latter has been discontinued.

For the Conveyance of Mails, Passengers and Freight.—The Royal Mail steamers of the Canadian-Australian Line, in connection with the Canadian Pacific Railway, call at Suva twice monthly. Saloon fares to Sydney £10, return £15. Forecastle £6. To Vancouver £40, £60 return, fore cabin £16. Brown and Joske, agents in Suva.—The Union SS. Company of New Zealand, Ltd., run steamers monthly to and from Auckland, connecting with steamers for Sydney, San Francisco, and London; fares between New Zealand and Fiji : single, £8 and £4; return, £14 and £7. For Tonga (Friendly Group) once in 28 days, also weekly trips in and about the Fijis. Fares, the round trip, £6; to Loma Loma, £2 10s.; Vuna Point, 40s.; other places according to distance. The Fiji business of the Union SS. Company is managed by Hon. A. Duncan at Suva and Levuka. The Australasian United Steam Navigation Company, Limited, run steamers fortnightly *via* Noumea. Fares to Sydney, £10, return, £15; in steerage, £6. To Melbourne, £14; return, £23; steerage, £8 10s.; return, £14. To New Hebrides, Aniteum, £10 10s. and £6. D. Calder is the agent at Suva and Levuka, and also for the British India S. N. Co. Several small steamers, owned in the colony, ply almost daily from Suva up the Rewa, and to Navua. Fares between Suva and Levuka £1 per head; from the capital they vary from 10s. to 40s., according to distance and vessel.

Bank.—Branches of the Bank of New Zealand, at Suva and Levuka.

Notary Public.—In Suva, W. Scott, barrister and solicitor, 1 Eldon Chambers; also a Commissioner of the Supreme Court of Fiji and Victoria.

Insurance Companies.—South British Fire and Marine Insurance Company (agents, J. C. Smith and Co.); New Zealand Fire and Marine Insurance Company (agents, J. C. Smith and Co.); Colonial Mutual Life Assurance Society, Limited. (Smith and Co., agents.) The New York Life Assurance Company (A. M. Brodziak and Co., agents, Suva, D. J. Solomon, Levuka); North Queensland Insurance Company, Limited; the Mutual Life Assurance Company of New York. (Brown & Joske, Suva agents.)

Marine Board sits at Suva. Hon. W. Sutherland, President.

Friendly Society.—There is a branch of the M.U.I.O.O F. (No. 6,224) at Levuka, with about twenty members.

Chambers of Commerce.—Established in 1877 at Levuka. In 1885 at Suva. All the influential merchants and business men are members of one or other of these Chambers. At the quarterly and general meetings of both, members of either have the privilege of attending.

The Agricultural interest is represented by an Agricultural and Industrial Association in Suva; Secretary, George Moore.

Fiji Racing Club.—F. J. Barnett, Hon. Sec.

Hotels, &c.—At Levuka the "Royal," "Wharf," and the "Polynesian"; two boarding houses. At Suva the "Club," the "Pier," and the "Melbourne." Commodious ones are established on the River Rewa, one at Waimanu and another higher up the river called the "Terminus" hotel. On the Ba River, Pflugiers' Hotel.

There are photographic galleries at the capital, Levuka and Verata on the Rewa.

Newspapers.—Four newspapers are published in Fiji, the *Fiji Times*, issued twice weekly, 6d. each number; the *Royal Gazette*, about five times a month, price 12s. per quarter or 1s. each number; while the third, entitled *Na Mata*, published by the Government, is a Fijian newspaper, price 3s. per annum, or 3d. each number. These are published in Suva. Postage 1d. each number on above rates. The Wesleyan Mission publishes quarterly the *Tukututu Vakalotu*. The Roman Catholic Mission publishes monthly the *A Talanoa*.

Consuls.—Powers represented:—Paul Hoerder (Levuka) for Germany; Giovanni Branchi for Italy; Benjamin Morris (Levuka) and A. B. Joske (Suva) for the United States of America; the Honble. George Smith (Levuka) for Sweden and Norway.

Constitution.—Fiji is a Crown colony, the affairs of which are administered by a Governor and Executive Council. The laws are prepared by a Legislative Council, under the presidency of the Governor, composed of the Chief Justice and five other heads of departments, as official members, and six unofficial members. The seat of the Government is at Suva, in Viti Levu.

In legal matters the Imperial laws are followed, except where there has been local legislation. All jury cases are decided by the judge, with two assessors. Appeal, in civil cases, to the Privy Council is allowed where disputes exceed £500.

Native lands are inalienable to any person not a Fijian except through the Crown, and no lease is granted for a longer term than 21 years.

The natives have a measure of local self-government, their own arrangements as regards village and district councils being recognized. In several districts the Governor or a Stipendiary Magistrate has been appointed *Roko*, and, so far as time permits of a judgment being formed, not only with success but with the approval of the Natives. There are twelve salaried superior native chiefs exercising executive functions under the Government, and also twenty-six native magistrates. The native taxes payable to Government in tobacco, cotton, maize, or copra for 1900 are assessed as follows:—

Districts.	£	Districts.	£
Ba and Yasawa	1,383	Nadroga	800
Bua...	1,300	Naitasiri	400
Cakaudrove	2,100	Namosi	290
Colo North	258	Ra	850
Colo East	693	Rewa	1,000
Colo West	306	Serua	310
Kadavu	1,450	Tai Levu	2,000
Lau	2,100	Rotuma	500
Lomaiviti	2,000		
Macuata	2,000	A total of ...	£19,740

Social.—Rates of Wages.—On plantations: European managers from £100 to £250* per annum; overseers, £50 to £120* per annum; ploughmen from £60 to £140* per annum; Polynesians, £7 to £14,* with quarters. Coolies—men, 1s. per day; women, 9d.; Fijians, £6 to £8* per annum. Indians and Fijians may be engaged for time or task work.

Domestic Servants.—Coolies: men, 1s. to 1s. 6d. per day; women, 9d. to 1s. without rations; coolies (free), £18 to £30 per annum; Fijians, 4s. per week to 35s. per month; Polynesians, £10 to £14 per annum.

The demand for artisans and mechanics is small. Blacksmiths, bricklayers, carpenters, coopers, and painters, earn 10s. to 14s. per day; cabinet makers, 20s. per day; native sailors from £2 to £5 per month.

The retail prices of provisions, &c., are about as follow:—Arrowroot, 6d. per lb.; bacon, 1s. per lb.; beef, 6d. to 8d. per lb.; beer, 12s. per doz. quarts; bread, 4d. per 2 lb. loaf; butter, fresh 1s. 8d. per lb., salt 1s. per lb.; cheese, 10d. per lb.; coffee (Fiji or imported) 1s. 4d. per lb.; cigars, 10s. to 25s. per 100; cornflour, 9d. per lb.; eggs, 1s. 3d. to 2s. per doz.; flour, 6s. per bag of 50 lb.; ham, 1s. per lb.; kumalas, 3s. to 6s.; pressed meat, 6d. per lb.; milk, 4d. per quart; oatmeal, 4½d. per lb.; onions, 3d. to 4d.; potatoes, 7s. 6d. per cwt.; rice, 14s. 6d. per cwt.; ditto (coolie), 14s. 6d. per cwt.; salt, 1d. per lb.; soap (yellow) 25s. per cwt.; ditto (blue mottled) 34s. per cwt.; spirits (draught), 30s. per gallon; ditto per case, 50s. to 60s.; tea (Fiji) 1s. 4d., (imported), 2s. per lb.; tobacco (leaf), 1s. 6d. per lb. (manufactured), 4s. 6d. per lb.; (imported), 7s. per lb.; vegetables, about 3d. per lb.; yams, 5s. to 10s. per cwt.

* With rations.

Rotuma — This possession of the British Crown, discovered in 1791 by Captain Edwards, of the *Pandora*, is a volcanic isle situated in 12° 30′ S. lat., 177° 40′ E. long., nearly 300 miles NNW. from the nearest Fijian land and 400 miles from Levuka and N. S. Wales. It is between 4 and 5 miles wide, by about 16 in length, gradually rising from the sea to a central ridge of hills to an elevation of 800 feet, of purely volcanic formation, covered with igneous boulders. It has no harbour but a sheltered roadsted at the NE. end, and this is not a desirable anchorage during strong gales. A formal deed of cession was executed at the request of the native chiefs on the 14th November, 1879, and it was gazetted in December, 1880, as an integral portion of the Fijian group. The formal ceremony of annexation by hoisting the flag took place in May, 1881. The soil is a dark friable loam, with a strip quarter of a mile wide of red loam from the shore to far inland. The low lands are fertile, yielding taro, yams, bananas, &c., and are suitable for growing sugar and cotton. Arrowroot, which grows wild, of a very fine quality, is plentiful. The higher lands are studded with forest trees, and with cocoa-nut and other palms. A wide, serviceable public way round the island as far as Motusa, and thence on through Itumutu on the west end has been made. Roads are kept in repair by the parties through whose land they pass. The native gardens and plantations are fenced in by a stone wall 4ft. high, on the sea side of which pigs and other stock are allowed to run at large; and useful trees and grasses are preserved in the common by law. The climate is salubrious, with copious, though not unpleasantly abundant, rainfall. The chief source of wealth is the cocoanut, which here grows to a perfection unknown in any other isle of the South Seas. The annual yield is from six to eight hundred tons of copra annually; these returns will be much increased as underground water tanks are constructed, thus saving the young nuts upon which the natives rely much for drinking purposes, water not being very good. Some of the fish caught in the waters are poisonous, and frequent cases of suffering and death occur therefrom. The native inhabitants are a peaceable law-abiding race, sober, and reliable, addicted to travel from early youth. They are copper-coloured, of average size, divided into families, and number about 2,167; males 1,035, females 1,132. All are clothed, the men's heads being covered. The males cook, the women and girls fetch the water and look after the house only, and thus ignorant of the old time duties of their sex, are useless but for child-rearing. The Rotumans are hardy, make excellent sailors, are much on the water, and are far more conversant with the English language than the Fijians. Formerly they were not allowed to leave the island; they are now permitted as passengers to Fiji, Tonga, or Samoa without captains entering into bonds; but if shipped as sailors a bond of £50 is required. No woman or person under fifteen is allowed to leave except under the protection of a guardian; nor without special permission; or male adults having any relatives dependent on them for support without finding sureties for their maintenance. There is no lala; neither Buli, nor Roko. Christianity, notwithstanding persecution, spread most rapidly after the Tongans first taught them, and half of the people had embraced its tenets, when the first white missionary visited them. Attendance at school is compulsory on children from six to sixteen; about 1,000 attend, many being adults. The Catholic mission has two chapels. The Revs. J. Trouillet and J. B. Chevreuil are the Catholic priests. The cost of governing is about £500 per annum. Mr. Mitchell, appointed from Fiji, was the first Resident Commissioner, followed by Mr. W. M. Gordon; then by Mr. A. R. Mackay; by Mr. F. C. D. B. Fuller; and Mr. H. E. Leefe, who now holds the office; salary £350 per annum and quarters. The commissioner is at the same time arbitrator, adviser, conciliator, and even medical adviser. The first sitting of the court was held in November, 1881. The court house was finished in 1888. Seven district chiefs meet in council monthly. The people select their own police in each district. The assessment of native taxes amounts to about £500 annually. The population is about 2,200, and there are about 300 natives away, principally in Fiji and Torres Straits.

GOVERNMENT AND LEGISLATURE.

Governor and Commander-in-Chief, and High Commissioner for the Western Pacific, His Excellency Sir George Thomas Michael O'Brien, K.C.M.G. (1894), C.M.G. (1889). Educated at Westminster and Trinity College, Cambridge; Writer Ceylon Service, attached to Colonial Secretary's office, 1867; additional Police Magistrate, Kurunegalla, June, 1867; Police Magistrate, Harrispattu, 1869; Acting Second Assistant Colonial Secretary, February, 1870; Acting Police Magistrate, Colombo, October, 1870; Assistant Government Agent, &c., 1871; Second Assistant Colonial Secretary, 1874; Principal Assistant, September, 1876; Treasurer, August, 1886; acted several times as Colonial Secretary; Auditor-General, 1890; Colonial Secretary, Cyprus, 1891; ditto Hong Kong, 1892-95; retired 1895; Governor, Fiji, 1897. (In the event of the Governor's absence, the Government is administered by the Chief Justice.)

EXEMPTIONS.—So much of such property as descends to the husband or wife of the deceased; property held by the deceased as a trustee; and property bequeathed to or in trust for any corporation for religious, charitable, or educational purposes.

THE COLONY OF BRITISH NEW GUINEA.

THE COLONY OF BRITISH NEW GUINEA.

THE vast island of PAPUA, or NEW GUINEA, has from time to time attracted considerable attention, from its supposed wealth of precious metals and richness in vegetable productions, and from the numerous exploring and gold prospecting parties that have from time to time visited it; but during 1883 it was lifted into a prominence that could hardly have been anticipated, through the action of Sir Thomas McIlwraith, at that time Premier of Queensland, who undertook its annexation to Queensland, on the following grounds:—(1.) That its possession would be of value to the Empire, and conduce especially to the peace and safety of Australia, the development of Australian trade, and the prevention and punishment of crime throughout the Pacific. (2.) That the establishment of a foreign power in the neighbourhood of Australia would be injurious to British, and more particularly to Australian, interests.

On March 20, 1883, Mr. H. M. Chester, at that time the police magistrate of Thursday Island, was instructed by Sir Thomas McIlwraith to proceed to New Guinea and formally take possession, in the name of Her Majesty the Queen, of so much of the island as was not in the possession of the Netherlands Government. In accordance with these instructions, Mr. Chester left for Port Moresby, and on April 4, took possession, on behalf of her Majesty the Queen, of all that part of New Guinea and isles adjacent thereto, lying between the 141st and the 155th meridian of east longitude. The fact of having done this was reported in due course to the Imperial Government, and the approval of the steps taken strongly urged upon the Home authorities. The other Australasian colonies also took action in the matter, expressing a desire that the island should be brought under British rule, but not definitely endorsing the proposal that it should be included within the jurisdiction of Queensland. The Council of the Royal Colonial Institute also pressed upon Lord Derby the desirability of the speedy annexation of New Guinea; but from the first the Imperial Government appear to have considered that Sir Thomas McIlwraith had not sufficient warrant for his action, and on July 11 the Secretary of State for the Colonies addressed a despatch to Sir A. H. Palmer, the officer administering the Government of Queensland, formally refusing to endorse the act of annexation.

On the 6th November, 1884, the British Protectorate was proclaimed over the southern coasts of New Guinea to the eastward of the 141st meridian of east longitude, with great ceremony, by the Commodore of the Australian Station (Captain J. E. Erskine). Fifty native chiefs were present, and five war vessels were lying off the shore.

The Protectorate comprised the southern and south-eastern shores of New Guinea from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock (Mitre Rock, however, is now found to be some miles inside of British Territory) proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of intersection of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade Groups of islands, and all other islands lying between the 8th and 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland, and, furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude. "The Convention between Great Britain and the Netherlands defining the Boundaries between the British and Netherlands possessions in the Island of New Guinea," was signed at the Hague on May 16, 1895. The boundary line starts from the Southern coast at the middle of the mouth of the Bensbach River, situated at about 141° 1′ 47·9″ of East longitude, and proceeding north follows the meridian, which passes through the said mouth, up to the point where that meridian meets the Fly River. From that point the waterway of the Fly River forms the boundary to the 141st degree of East longitude, the 141st degree of East longitude after this forming the boundary up to the point of intersection of the boundaries of the British, Netherlands and German possessions. Navigation on the Fly River is free for the subjects of both countries, excepting as regards the carriage of warlike stores, and no duty is to be imposed on other goods conveyed by that river.

The practical outcome of the Colonial Conference of April, 1887, was the drafting of a Bill, "The British New Guinea (Queensland) Act of 1887," assented to on November 4, 1887, guaranteeing that as soon as Her Majesty assumed sovereignty over the present protectorate of New Guinea as desired by the Governments of the Australasian Colonies, the Imperial Government would be indemnified by the Colony of Queensland against the expenses of British New Guinea by the payment for 10 years succeeding the commencement of the Act of a sum not exceeding £15,000 per annum. The Colonies of New South Wales and Victoria would each bear one-third of the amount, not exceeding £5,000, so that the whole amount would be divided between the three Colonies though guaranteed in full by Queensland. Contributions from the other Australian Colonies and revenue from New Guinea itself would be applied in reduction of the £15,000 subsidy. The Imperial Government to make a reasonable contribution (by way of loan or otherwise) towards the cost of efficiently starting the government and the necessary buildings, &c. Other matters provided for in the Bill are a small Civil List for the first initiation of the Government consisting of an Administrator (salary £1,500), Private Secretary (£300), Judicial Officer (£1,000), and Secretary to Government (£500). The Imperial Government would provide a suitable steam vessel at a cost of not exceeding £18,500, with the cost of its maintenance during the first three years. Embodied in the Bill are various matters in connection with the administration of the Government and conduct of affairs after the assumption of the Imperial sovereignty.

On September 4, 1888, the then Administrator, Dr. (now Sir) William Macgregor, in the presence of Capt. Bosanquet, with the officers and men of H.M.S. *Opal*, the officers of the Protectorate, the European residents of the place, and about 200 natives, read the proclamation declaring the protected territory to be from that time a British possession.

In the Letters Patent for erecting New Guinea into a British possession, dated June 8, 1888, there is provision made for the appointment of a Governor or Lieutenant-Governor, an Executive Council, a Legislative Council, and the necessary officers. The Administrator of New Guinea corresponds with the Secretary of State for the Colonies through the Governor of Queensland, and he is advised by the Executive and Legislative Councils as in ordinary Crown colonies.

In December, 1884, a German squadron, comprising the *Elizabeth* and *Hyaene*, hoisted the German flag on the north coast of New Guinea from the 141st meridian to Huon Gulf, and in the Admiralty, Hermit, Anchorite, New Britain, and New Ireland groups—the new colony being named Kaiser Wilhelm's Land. This step appears to have been taken secretly and contrary to an understanding between the British and German Governments, that neither of them should take any step involving the annexation of any portion of the still unoccupied coasts of New Guinea without a previous agreement by means of a commission or of diplomatic negotiations.

On April 6, 1886, an agreement was come to between the British and German Governments, defining the boundaries of the British and German possessions, and engaging on the part of both not to make any further acquisitions of territory, except protectorates, or interfere with the extension of each other's influence.

In December, 1886, Germany assumed a protectorate over a portion of the Solomon Islands.

From September to December, 1888, the Administrator passed certain Ordinances, and made an important visit of inspection in the Eastern Division. In February, 1889, he returned to Port Moresby, and made journeys into the interior, both east and west. Since then he has traversed a large portion of the Possession and visited a number of places on the Coasts, many of which have been approximately mapped.

During 1899 the Rt. Hon. Sir H. M. Nelson, K.C.M.G., made an extensive visit of inspection through the Possession with his Excellency the Governor of Queensland.

During 1899 and 1900, the Lieutenant-Governor made visits of inspection to Hall Sound, Kerema, Bailala, Orokolo, Kiwai Island, Samarai, Bramble Cay, Daru, &c.

Discovery.—The earliest record of the island dates back as far as A.D. 1526, when Don Jorge de Menesis, a Portuguese navigator, narrates how, in making a voyage from Malacca to the Moluccas, being driven somewhat out of his course, he accidentally sighted land, and making for it, landed and remained there a month. This land, supposed to be the mainland of New Guinea, he called Papua, a word which means, according to some philologists, "black," and according to others, "curled hair," either of which meanings, however, will suit the inhabitants. Two years after this, A.D. 1528, another Portuguese, Alvarez de Saavedra, landed on its shores, and although he did not, so far as is recorded, penetrate inland, he called it by the high-sounding title of "Isla del Oro," from the idea which he formed of its abounding in gold. In 1545 a Spanish mariner, named Ynigo Ortiz de Retez, also voyaging to the Moluccas, sailed 250 miles along its northern coast, and gave it the name of Nueva Guinea, from some resemblance, or fancied resemblance, it bore to the Guinea Coast on the west of Africa. In 1606 Luis Vaez de Torres, in the sloop *Almiranta*, sailed 300 miles along the east coast, and doubled the South-East Point, continuing his voyage for some distance along the south, and landing in several places. He describes the natives as dark in colour, naked, except having some kind of clothing round the middle, and armed with clubs and darts ornamented with tufts of feathers. In 1616 Schouten visited the country in the Dutch ship *Unity*, and discovered one large and several smaller volcanoes, or, as he describes them, burning mountains. He also landed and found abundance of cocoanuts growing in the forests that bordered the sea-shore. In 1643 Abel Tasman explored some portion of the coast. In 1699, Dampier, in the *Roebuck*, circumnavigated the island. On landing he met with considerable resistance from the natives. In 1767 the island was visited by Philip Carteret, by whom the channel which separates it from New Britain was named. In June, 1768, the French vessels *La Boudeuse* and *L'Etoile*, under the command of M. de Bougainville, sailed along the southern and eastern coast. In 1770 Cook sailed along the coast, and confirmed the statement of its disconnection from the continent of New Holland. He met with decided hostility from the natives. There were several visitors after this, amongst others Captain

Edwards, in H.M.S. *Pandora*, in 1791 (just previous to the wreck of the vessel on the Barrier Reef), D'Entrecasteaux in 1792, Bampton in 1795, M. R. Contance, of the *L'Adele*, in 1804. Captain Blackwood, in H.M.S. *Fly*, in 1845 (when the Fly River was discovered and named), and later the French navigator Dumont D'Urville made a voyage to the east coast. He is reported to have landed several parties, and the scientists attached to his expedition made zoological collections and reported on the natural history and features of the country. In 1846–50 Captain Owen Stanley, in H.M.S. *Rattlesnake*, ran along the coast, and made a rough survey of a portion of it. In doing so, he marked off one mountain, which he estimated at 13,205 feet in height, and fifteen others, eight of which reached an altitude of over 7,000 feet. He describes the coast natives as living in huts built on stages, constructed on piles, for the purpose, as he supposed, of preventing the attacks of snakes and other venomous reptiles. The aborigines, he says, were tolerably friendly, and ready to barter. The use of firearms they did not understand, at first imagining the muskets of the party to be utensils for carrying water. The length of the island he estimated to be about 1,200 miles, and its breadth about 150 miles. In common with all others who had visited it, he described the country to be a most magnificent one, growing profusely the most valuable products of the Moluccas.

In 1858 the steamship *Etna*, of the Dutch Navy, explored the south-western coast, subsequently visiting Etna Bay and the Bay of Caimans, and made a survey of Humboldt Bay. Other Dutch expeditions were Van Der Crab in 1871, and subsequently Teysman, Correngel, Langeweldt, Hemert, and Swann.

The establishment of the London Missionary Society's New Guinea Mission, in 1871, led to additional knowledge of New Guinea and its people.

Settlement.—The earliest attempt at settlement in New Guinea by Europeans of which there is any record was made by Captain Steenboom, of the Dutch ship *Triton*, who in 1828 took possession, in the name of the Dutch Government, of all the territory from 141° E. long. westward to the sea. He built a fort at a place he called Triton Bay in the NW., the scenery around which was very beautiful; but the rankness of the vegetation caused the place to be so unhealthy that, after a few years, the settlement had to be abandoned. In 1835 the commander of another Dutch ship surveyed what was then called the River Doorga, finding it to be a strait 90 miles long, separating Frederick Henry Island from the SW. mainland.

Captain Moresby, of the *Basilisk*, in the course of his voyages made in the year 1873, discovered and named Port Moresby, a fine harbour on the south-east coast, and the islands of Moresby, Mourilyan, and Hayter, formally taking possession of the latter in the Queen's name, by right of discovery, on April 24, 1873.

In July, 1874, the question of the colonization of New Guinea was revived. The then Colonial Secretary of New South Wales, the late Sir Henry Parkes, wrote to the Governor, Sir Hercules Robinson, advising that an effort should be made towards its colonization under British auspices. The communication was duly forwarded to Lord Carnarvon, the Secretary of State for the Colonies; but no practical result came of it.

In the following year Mr. William Macleay determined to attempt to explore the south-eastern portion of this vast island, and in the interests of science to find out some information of the flora and fauna, the geological and geographical character, and the mineral products of the country. To carry out this object he purchased the brig *Chevert*, fitted her out with ample stores, and every appliance that was likely to conduce to success. Unfortunately, notwithstanding the very favourable auspices under which the expedition started, it resulted in comparative failure.

During 1878 the island was visited by two parties of miners in the schooners *Colonist* and *Emily* for the purpose of ascertaining the existence of gold. Some of the members of the Colonist Expedition succeeded in getting to the Goldie River; they prospected it for miles, and also the branches at the head of the river. They did not find even the colours of gold for twelve miles at the head of the Goldie River, nor did they ever come on any country worth prospecting, and they returned after being out thirty-two days. Another party of diggers tried the Goldie River; they reported that colours of gold only were obtainable: the best prospect was a grain to the dish, but for every dish containing that prospect ten were washed without any signs whatever of gold. In the end all the prospectors returned to Port Moresby, their reports being unfavourable. A few grains of gold were said to have been found by Mr. Macfarlane in the sand and gravel from the bed of the Mai Kussa or Baxter River on his first trip up that river, but this has not been confirmed by subsequent examination, and Mr. Chester describes the same river as being "without a shoal or sandbank." In 1888 gold was found at Sudest, an island, and the largest of the Louisiade Group, situated about 200 miles from the eastern end of New Guinea. It is about 40 miles long by 8 or 10 miles wide. This island was visited in April, 1888, by Mr. Douglas, who came across a quartz reef from which a large bag of specimens was got, which all the party thought "looked very likely stuff for crushing, which might yet tell a tale." It, however, yielded nothing. Later on a party of prospectors visited the island, and in a short time were able to secure from 15 to 18 oz. per man in the space of three weeks. Other miners followed, and a considerable quantity of gold was obtained. At the Island of Misima also gold was obtained by sluicing, which was carried on by Europeans, assisted by the natives. Prospecting operations on this island are now practically at a standstill. Gold associated with cinnabar has been discovered by Mr. Wm. Nettle near the S.E. end of Normanby Island, and specimens of it are now in the museum of the Geological Survey of Queensland. Colours of gold have also been reported from the Mekeo district.

Mission Work.—New Guinea has for many years been a field of missionary enterprise. In 1870 the Rev. Dr. S. MacFarlane was appointed by the Directors of the London Missionary Society to superintend the establishment of a mission on that island. Having completed his preparations by the middle of the following year, he and the late Rev. Mr. Murray proceeded in the schooner *Surprise* (chartered for the purpose), with eight Loyalty Island teachers and their wives, to Darnley Island in Torres Strait, where the first evangelists were located, this central and tolerably healthy island having been selected as the sanatorium and "city of refuge" for the mission on the mainland. The first mission stations established on New Guinea were at *Katau* and *Tureture*, large villages situated between the Mai Kussa, or Baxter, and Fly Rivers, where native evangelists from Lifu and Mare were located. In the following year a mission was commenced in Redscar Bay by the Revs. Murray and Gill, where native evangelists from Raratonga were located, but this part of New Guinea, like Katau and Tureture, proved to be exceedingly unhealthy and the teachers had to be withdrawn. A year later Port Moresby was made a centre of operations on the SE. peninsula. In 1874 Dr. W. G. Lawes joined the mission, and took charge of this station. Three years later the mission was further augmented by the arrival of the Rev. J. Chalmers from the South Seas.

Mission operations were at first much hindered by the general unhealthiness of the visited parts of the island.

In 1875 the Rev. Dr. S. MacFarlane established a mission station at Yule Island, from which he subsequently withdrew the teachers, owing to the massacre of Dr. James and Mr. Thorngren, and the consequent excited state of the natives. The mission was reopened by the Rev. Dr. W. G. Lawes, but as the Roman Catholic priests had determined to occupy Yule Island permanently, "in the interests of peace and goodwill," Dr. Lawes removed his teacher. Dr. MacFarlane strongly recommends this port as the most suitable on the peninsula for a European settlement. The Administrator reports that, "with the exception of only a few fast-diminishing gaps, the whole of the coast from the Wasikussa to Goodenough Bay is more or less under missionary influence. About half of the d'Entrecasteaux group, part of the Kiriwina group, and half the Louisiades, and practically all the intervening islands have been brought under the influence of the Wesleyan church."

Mr. Chalmers is successfully working an English mission in the Fly estuary.

The London Missionary Society established a new Training College at Kapa Kapa during 1895.

New stations have been established at some distance inland, in the hill country back of Vatorata, also in the island of Mailu.

In 1885 a French Roman Catholic mission (of the order of the Sacred Heart) was established on Yule Island, and they now occupy a large part of the Mekeo district on the mainland. From the latest reports the Roman Catholics there are steadily extending their operations, building houses and churches, and are also cultivating the land around the mission stations. The Rev. Dr. Genocchi is proving a worthy successor to the late Bishop Verjus, who founded the mission.

An Anglican mission was established at Bartle Bay. The natives near the head station have made great progress in school and church work. The pioneer missionary, the Rev. A. A. Maclaren, contracted fever towards the end of 1891, to which, after a short illness, he succumbed. Other members of the mission have also been disabled. The mission during 1899–1900 added to the number of its stations. The Rev. Copland King is now in charge, and he has been materially helped by Bishop Stone-Wigg. The headquarters of the mission are now at Mukawa, near Cape Vogel. The most advanced part of the mission is in Collingwood Bay.

In 1891 the Wesleyans commenced operations, the first party having arrived from Sydney, accompanied by the Rev. Dr. G. Brown, and established themselves on Dobu Island. The Chairman of the mission is the Rev. W. E. Bromilow, and under his leadership wonderful progress is being made. There are now four substantial establishments at Dobu, Duau in Normanby Island, Panaieti, and Kiriwina; the attendants on public worship in these districts number 11,500. A new station has been established on Goodenough Island.

Sir William MacGregor considers that the Papuans have not as yet been deeply impressed by the truths of the Gospel. To religious fervour they are strangers. They cannot be said to be devotees to the Church, or to be otherwise than indifferent to her teaching. It can, however, be affirmed without reserve that the labours of the missionaries have to such an extent modified the ways of thinking and the social relations of the natives with whom they have come in contact—a small part of the whole—that the good they have done is incalculably great. In a recent despatch he said, "The lapse of time has steadily strengthened the conviction that mission labour is of immense value and importance in the Possession."

The Rev. Dr. W. G. Lawes, F.R.G.S., in speaking of his work in New Guinea, said that the mission cause in New Guinea was largely dependent for its prosperity on the Polynesian teachers. The missionary ardour and enthusiasm of the islands had been intensified, and the difficulty experienced was to select the most suitable men from the numerous candidates there were for the work. The most interesting fact he had to mention in connection with New Guinea was the establishment of a native ministry. The large mortality among the Polynesians had been a source of grief and anxiety to them, and they felt that if New Guinea was to be evangelised it must be through the agency of

its own sons and daughters. The native missionaries were doing good and valuable work. A good many of the children who were in attendance at the schools could read fluently in their own language, while at the principal station they were versed in the wonders of geography and arithmetic, and learned the use of tools. He, Dr. Lawes, had an English class of boys and girls who made fair progress. They would, however, never learn to speak English correctly, unless they went to an English-speaking place. Their mission had introduced maize, the papaw, melons, pumpkins, pineapples, and oranges. They found, however, that the people were intensely conservative, and slow to adopt anything new, even though it made an important addition to their bill of fare. That their ancestors (or *tuputama*) did not cultivate such things was an all-sufficient reason for their declining to do so. In every attempted reform the missionaries found *tuputamaism* the greatest hindrance. The climate and soil were suited to the cultivation of other tropical products, which in years to come might be of commercial value ; some parts would make good cattle country, although the areas in comparison with Australian were limited and small, and the native population was larger. The wealth of New Guinea would probably be in its minerals, but these were at present practically undiscovered. Speaking more recently on the progress of the mission he further says :—"The Papuans might fairly be said to be an industrious class of people, and their reputation for ingenuity was established by the fact that they built very creditable houses and canoes with the most primitive implements. Moreover, they cultivated the soil very carefully ; and what was more, notwithstanding the great heat, they managed to do without any beverage stronger than water."

During recent years some decided advances have been made, principally by the L.M.S., under the Rev. Dr. W. G. Lawes, F.R.G.S. (Central District), and the Rev. A. E. Hunt, Port Moresby ; the former has put through the press an extended and much improved edition of his Grammar and Dictionary of the Motu dialect ; and the Wesleyan mission, under the Rev. W. E. Bromilow, who are training a number of native teachers, who it is expected will become most useful in the future work among their countrymen. Much credit has been given to the lady workers in the mission.

Geographical Features.—New Guinea lies immediately S. of the Equator, and N. of Australia, between the Asiatic and Arafura Seas on the W., and the Pacific Ocean on the E., the waters of the North Pacific Ocean laving its northern shores, and those of the Arafura Sea, Torres Strait, and the Coral Sea its southern coasts. It is as it were a link connecting the Indian Archipelago on one side, and the Polynesian group on the other. The general direction of the island is WNW. and ESE., the Northern point being called the Cape of Good Hope, which is situated in 0° 19′ S. lat., the W. point Cape Salu, in 131° 12′ E. long., and the SE. point, Cape Moresby, in 10° 34′ S. lat., and in 151° 2′ E. long. The dimensions of the island have been variously estimated, but the latest surveys give them at about 1,500 miles in length from NW. to SE., with a varying breadth of from 200 to 400 miles, and an area of 250,000 square miles, being about one-sixth smaller than the colony of New South Wales. The area of British New Guinea is estimated at 86,382 square miles, or 55,284,480 acres, that of German New Guinea at 68,803 square miles, or 44,033,920 acres. The coast line of the British Territory is estimated at about 1,728 statute miles on the mainland, and 1,936 miles on the islands, giving a total coast-line of about 3,664 miles. "The Island is politically divided as follows :—Holland claims half the territory westward of 141° of E. long. (this boundary is about being amended). Germany has occupied the north-west quarter and the important islands of New Britain and New Ireland, while Great Britain holds the south-eastern quarter and all islands and reefs between 141° and 155° E. long., and 8° and 12° of S. lat., which do not form part of the Colony of Queensland." The portion of the island of which most is known is that lying along the southern coast from W. to E. The part of the coast lying E. of Torres Strait (143° E. long.) forms a deep bight, called the Great Bight of New Guinea, whose E. side has a bold and rocky shore, with extensive coral reefs, and having lofty mountains in the background inland. The W. side of the bight is flat and marshy, covered with dense forests, and intersected with innumerable freshwater channels, which form a complete network of canals. The entire coast on this side seems like the delta of an immense river, with tortuous channels and branches in all directions, and having mud banks, with an average depth of only two fathoms of water running out a long distance to sea, so that vessels cannot approach within ten miles of the land. The N. coast is mountainous, and comparatively little is known of it except for a short distance from the eastern extremity. Humboldt Bay forms the boundary of the western portion of the island claimed by the Dutch. The investigations of Capt. Moresby in H.M.S. *Basilisk* led to a better knowledge of the east end, and to his ascertaining that a large portion of what was considered to belong to the mainland was detached, and formed separate islands. One large channel between Basilisk Island and the mainland, which he named China Strait, enables vessels trading between Australia and China to shorten the passage by some 300 miles.

The entire country, so far as is known and can be ascertained, is covered with dense and varied forests, and spreads here and there into wild vast alluvial plains, formed by the continual deposit of the great rivers which flow through it, and at times over it. But as far as has been learned from inspection tours, there are no large areas of fine land that are not required by natives, and, as under the Ordinance No. II. of 1888, it is illegal for the Administrator—who alone can purchase from the aboriginal owners—to buy or lease land unless it is not required, or likely to be required, by the native owners, there may not be any considerable quantity of Crown lands to deal with. The villages in which the natives live are often on the tops of ridges and hills, but they, naturally being a race of cultivators, plant their food crops in their best lands, sometimes at long distances from the village. The probability is that considerable areas of country will be regarded, after due inquiry, as Crown lands, but these lands will be generally useful only for mineral purposes and producing timber. The nearest point to the Australian continent is about 90 miles distant, and is easily reached from Thursday Island. At Yule Island, on the other side of the Gulf of Papua, is a fine harbour. It has been stated by Signor D'Albertis that here would be a very suitable basis for the colonization of New Guinea, the harbour offering facilities for shipping, and the spot being tolerably healthy, accessible, and the country on the mainland of the best.

The prevailing character of the mainland at South Cape, and of the islands in the China Seas, is (according to Mr. Douglas) that of a mountainous region covered with dense tropical vegetation. The climate is exceedingly humid, and though the scenery is very beautiful, it is not a country which is likely to attract European settlement. "I should not regard it as an exceptionally unhealthy region if reasonable precautions were taken to avoid living under insanitary conditions." Its capacity for the growth of cocoanuts and the manufacture of copra is practically unlimited. Mr. H. O. Forbes was of opinion that the gutta-percha tree (*palaquium spp.*) which is now almost extinct, should be extensively cultivated by the Government. He believed that "if the Government were to plant a few acres each year in the region beyond the Astrolabe mountains, the produce within thirty years" would more than meet the subsidy of £15,000 guaranteed by the other Colonies.

Harbours and Bays.—Among the known harbours of the island are :—Hall Sound, Redscar Bay, Port Moresby, Fairfax, Bootless Inlet, Kerepunu, Keakara Bay. Cloudy Bay, Mayri Bay, Port Milport (reported to be one of the finest harbours in the southern hemisphere), Port Glasgow, and Farm Bay. On the north-east coast there are many anchorages. Finsch Haven is reported to be the best harbour in the north, and the only good one in German territory.

Rivers.—Among the rivers may be mentioned the Fly, the Purari, the Bailala, Lake Kamu, Vanigera, Biaru, Aroa, Laloke, Aird, Mambare, Kumusi, and Musa in British New Guinea, the Empress Augusta in German New Guinea, and the Amberno in Dutch New Guinea.

Mountains.—The loftiest known are Mount Victoria (Owen Stanley range), named after the commander of H.M.S. *Rattlesnake*, 13,205 ft., Mount Suckling, 11,226 ft., Mount Obree, 10,246 ft., Mount Yule, 10,046 ft. ; there are also numerous others of great altitude. In the Dutch territory the Charles Louis Mountains attain to greater heights, one of the peaks being estimated to be 16,730 feet above sea level. The Bismarck Range in German New Guinea is also estimated at upwards of 16,000 feet in height.

Geological Formation.—Mr. Maitland, after a cursory examination of various portions of the coast and of some of the islands, has reported as follows :—"With very few exceptions, I found the coastal districts and many of the adjacent islands occupied with a number of extinct craters, deposits of basic lavas and ashes, and more particularly on the north-east coast with a large area of nearly horizontally-bedded coral limestones. The igneous rocks form a very conspicuous figure ; they may be grouped into three main classes, viz., volcanic (lava and ashes), plutonic (granite, etc.), and intrusive (granite, diorite, etc.). In some parts of the D'Entrecasteaux Islands and the NE. coast near Collingwood Bay the volcanic fires have not yet died out. In the former locality there are large areas of solfataras, and from Mount Victory, a cone 4,000 feet in height, volumes of steam and smoke still issue.

Climate.—The climate of New Guinea contrasts strongly with that of the opposite continent of Australia—where vast barren wastes of sandy, waterless, and almost treeless deserts exist—being remarkable, except in the central districts, for its humidity, owing, no doubt, to the equatorial stream of vapours, and to its high mountains. According to the report prepared from the notes of Sir Peter Scratchley, "the climate must doubtless be considered one of its greatest drawbacks. In the first place it is enervating, and Europeans are incapable during the summer of performing much continuous labour ; and secondly, the fever, which is everywhere prevalent, is of a severe character. It seems not improbable that in proportion as settlement advances and the soil is worked, so the pestilential character of the climate will become modified.' Writing in 1898 Sir William Macgregor says, "The experience of the last ten years would seem to show that the climate of the Possession is not nearly so unhealthy as was at first supposed." In the dry season it is not unfavourable to the European constitution, but when the wet sets in the fever comes with it. Many of the first gold miners were prostrated by it, and several died. The sea coast has been found very unhealthy, even the natives suffering ; as the elevated land is reached it has been found to be more salubrious. The unhealthiness is mainly due to the rank vegetation and to decayed vegetable matter, which, partial clearance of the ground would, no doubt, ameliorate, if not altogether remove. According to Mr. H. O. Forbes, who established a meteorological observatory at Sogere, about 25 miles inland from Port Moresby, the rainfall from October to May was not so great as he had expected. The heaviest amount recorded was 3½ inches, which fell in about 2½ hours ; the highest temperature in the shade, *i.e.*, 100°, occurred in the month of December ; the lowest night register, *i.e.*, 59°, also in December, giving 41°

as the extreme range of the thermometer during these six months; the maximum range actually recorded (also in the month of December) was 40°.

The rainfall taken at Port Moresby (9° 27′ 33″ S. lat., 147° 8′ 56″ E. long.), for the year ending June 30, 1899, was 44·25 inches, at Daru (9° 27′ 33″ S. lat., 147° 8′ 56″ E. long.), 82·70 inches. At Port Moresby the prevailing wind is generally from the north-west from January to April, at other times from the south-east.

The commencement of the seasons are Spring, September 23; Summer, December 21; Autumn, March 20; Winter, June 21. The rainy season commences in December, and lasts with more or less rainfall until April.

His Excellency the Administrator says the soil generally is not rich, although here and there are considerable patches of good land. He is of opinion that were it not for fever, British New Guinea would be a healthy country. Dysentery and sunstroke are rare. Elephantiasis, sporadic among natives, has not been known to affect a European in the Possession. Leprosy is not an uncommon native disease, but it does not present its worst form, and has not been communicated to any white person. The only contagious skin disease of any consequence from which the natives suffer, is the most loathsome form of ringworm, "Tinea Desquamans."

With regard to the fever, its chief characteristic is its uncertainty. It is uncertain in its advent, often coming on without premonitory symptoms, of uncertain duration, and of uncertain severity. With some it lasts a few hours, with others it produces complete prostration, and it will often lie dormant in the system, breaking out after one has left the country. Fever will always be a serious matter in the country, for a lengthened residence does not seem to lessen the risk of the infection. The death-rate from fever is, however, extremely low.

Productions.—Much of the timber is of considerable size, and comprises, amongst numerous others, the sago palm and the wild nutmeg. The natives cultivate, with more or less success, maize, yams, cocoanuts, sago, sugar cane, bananas of various kinds, and other tropical productions. The hills immediately surrounding Port Moresby are dotted with plantations of bananas and yams, and the native women bestow great care upon the cultivation of these patches. Besides the products of their gardens, the natives have the cocoanut, the native mango or vaivai, the breadfruit, and two or three species of large chestnuts. The available products of the country for commercial purposes are the sago palm, the sugar-cane, small quantities of cocoanuts, and native flax. There appears to be a supply of cedar, which will in time to come be an important export; some other woods will also probably be utilized, such as the Malaoa, indiarubber tree, massoi, ebony, hardwood, tamonu, &c. Considerable quantities of sandalwood are shipped, the total value exported during 1897–8 was valued at £2,940; during 1898-9, £2,920. Sago in time to come will be a most valuable export: it is said that thousands of tons are available. In some parts the natives appear to live entirely upon it. Cocoanuts would not yet form a staple article of export, as the dense population of the country is sufficient to consume almost the whole of the present crops. The Government have been large planters of cocoanuts. Bananas have been found growing wild among the rank forest vegetation in some parts of the possession. There are several distinct varieties of sugar-cane, all of them reported to be free from disease. Among the natural productions of the country may be mentioned tobacco, which is grown by the mountaineers. The cultivation of sponges has recently begun. "There is abundance of wild sponge in the coral lagoons of the possession." Indiarubber is now appearing as an export; during 1897–8, 15 tons, valued at £3,683, were exported; during 1898–9, 8 tons, valued at £1,935, were exported. Pearl shelling has been carried on to some extent, the principal seat of the industry being on the Western extremity of the territory. Larger finds have been reported in the Louisiade group, particularly in Joannet Harbour. There is plenty of shell, but the water is very deep, and many divers have succumbed to the fatal effects of remaining below in water over 20 fathoms in depth. Unless shell can be found in shallower water, it is not expected that there will be any great extension of the pearl shelling industry. A fair amount of shell has been obtained in China Straits and in Fortescue Straits. During 1898 104 tons of pearl shell were exported, valued at £8,468. During 1899, 123 tons, valued at £10,284 were exported. The pearl industry is chiefly confined to the Kiriwina group; pearls, valued at £500, were exported in 1898, the value in 1899 was £345; 312 tons of copra, valued at £2,425, were exported during the year 1898; during 1899, there were 337 tons, valued at £2,907. Bêche-de-mer is found in quantity, and there was a revival in 1898, 37 tons, valued at £3,395, being exported; in 1899 it fell off to 22 tons, valued at £1,644.

Minerals.—Gold in a fair quantity has been found on Sudest and St. Aignan's Islands, but has fallen off of late years. Colours of gold are found in several of the rivers, and a fresh discovery was made at Sudest, in the shape of a line of reef at an elevation of 1,200 feet above the sea, but mining fell very low in 1899–1900.

The Mambare (Gira) goldfield attracted many miners during 1899–0, but owing to the dense forests, the winning of gold is a laborious and difficult task. Gold has also been found in the hilly country, a few miles inland from the head of Milne Bay, where there is a large native population; the nature of the country is rugged and broken.

Sir William Macgregor, in his report to Lord Lamington, January 8th, 1897, says:—"My attention has been drawn to the fact that many sensational, probably misleading, items of news have recently been appearing in the Australian Press with regard to the gold-bearing districts of this colony. It seems well that the matter should be put at once in its true light, to prevent, perhaps, much disappointment, risk to health, and loss of time. 2. There can be no doubt that the Woodlark (Murua) goldfield is already much overmanned. There is no reason to suppose that the present mining population can remain there long. It would therefore be unwise for parties of men to come to this colony with the idea of working on Woodlark Island. 3. The islands of Misima (St. Aignan) and Sudest are practically abandoned by the surface miner. 4. As regards Mount Scratchley and its vicinity, where the head waters of the Mambare River take their rise, all that can be said is that there is a large area of country, composed principally of slate and quartz, with colours of gold in many, if not in most, creeks, with occasional traces of osmiridium and cinnabar; but at the present moment it is not known to me that any new patch has been discovered that yields payable gold, while the McLaughlin Creek, where nearly all the gold found in that part of the country was got, must be about worked out by this time. The position of the Upper Mambare district, therefore, is this—that there seems to be a large area of gold-bearing country there, but what it requires is the prospector. There is not a goldfield there in the sense of any area of payable gold, but it seems to be well worth the attention of good prospectors. 5. At present there are four parties in the interior. (*a*) About a dozen men on the Upper Mambare, apparently at work chiefly on the McLaughlin Creek. They were understood, by latest reports, to be getting but little gold. (*b*) Ten or eleven men in the Moni Valley. The Moni is the western and larger branch of the Musa river beyond the first range of hills. This party has gone up the branch of the Musa that appeared to Messrs. Simpson and McLelland to give the best prospect. They have some native carriers and probably three or four months' provisions. They may be able to prospect a part of the valley if the weather permits them to do so. Up to the present I have no information as to payable gold in the Musa or Moni Valley, but it is a country worth examining. (*c*) A small party of five or six men and ten horses have gone inland from Port Moresby, intending to reach the Upper Mambare if they can. No news has been received from them. They are traversing a district which a party from Port Moresby recently visited in an indirect way, under circumstances that appear to have been somewhat irregular, and which ended in the party being attacked, robbed, and driven back by the natives. The district has been subsequently visited by a magistrate, a Government agent, and a force of constabulary, but the natives are probably still unsettled there, and may cause this last party of miners some trouble. I cannot send the constabulary to patrol that part of the country at this season. (*d*) A party of three men are said to have followed up the path recently cut across the main range from the Mambare to the Vanapa, and to have reached the top of Mount Scratchley. Nothing further has been heard of them. All these men have been warned against going inland at this season of the year, but they disregard all advice in such things, and being free agents in the matter they take their own way. It will be a suprise to me if they all come back alive. To try to cross the main range at this season with native carriers would be very imprudent; but it is understood that the two parties that have gone inland from the south side have no engaged native carriers with them. Any others they may employ on the way will be nearly sure to desert before they suffer too much. 6. The wet season has set in late—about the middle of January—at Port Moresby. It is not, therefore, to be expected that prospectors can travel inland before the end of April. 7. A word of warning will not be out of place as to the stamp of men that should attempt prospecting in the interior here. It is a hopeless undertaking for old or sickly men at any season. Only young and healthy men should try it at any time. For a man that has no means at his disposal this prospecting is practically impossible. For the necessary outfit a man would require from £50 to £100, to be chiefly expended in provisions, carriers, and medicines. The magistrates will not engage native carriers to men that cannot guarantee the wages of the carriers; and the Government cannot furnish carriers to prospectors. The knowledge at present in the possession of this Government does not justify any considerable additional outlay on its part in cutting more new paths. Some are needed in any case for ordinary administrative purposes, but they cannot be started until the end of the rainy season."

The export of gold for five years ended 30th June was—1895, 728 ozs., value £2,565; 1896, 1,373 ozs., value £4,735; 1897, 7,148 ozs., value £25,018; 1898, 6,830 ozs., value £25,612; 1899, 12,012 ozs., value, £44,185.

Plumbago has been seen at various places along the south-west coast. As regards iron, Mr. Maitland, F.G.S., states that "none of the ores yet discovered appears to be of any commercial importance."

Native sulphur is known to occur in some of the islands of the D'Entrecasteaux Group, and cinnabar has been reported from Merani, in Cloudy Bay, and the island of Normanby.

Specimens brought from the upper reaches of the Fly River were shown by Mr. Jack to contain gold, topaz, beryl and lignites, the last of no value.

During 1898–9, 23 packages of natural history specimens, valued at £1,145, were exported; and 16 cwt. of turtle-shell, valued at £1,274 were exported.

Population.—The present European population does not exceed 500, the majority of these being miners. Mr. Chalmers believes the population of New Guinea to be small, at the very outside not more than 2,500,000, but this is a mere conjecture. He judges from what he knows of the coast from Bald Head to East Cape. Another estimate has been made,—supposing there is one native to every 42 acres, which is about the proportion of some of the known portions of the island, then, if the E. island

contains 230,400,000 acres, or, according to another authority, 202,163,000 acres, the population would be 5,485,954 or 4,765,790, according to the area adopted. This, however, is believed to be in excess of the actual numbers. Some parts of the interior are densely populated, while others are only visited by wandering tribes, so that it is difficult to form anything like a correct estimate. As regards British New Guinea, Mr. Chalmers reckons that there are about 460,000, basing his calculation on there being probably 87 acres to each unit of population. In 1890–91 they were estimated by the Administrator at not less than 300,000, and probably 350,000, but Sir William Macgregor thought it impossible to form any more approximate estimate. The natives are of a great variety of feature—Malay and Papuan—as well as of colour, in the same community. Mr. Wallace, Signor D'Albertis, and other ethnologists, regard the tribes of New Guinea as belonging to one race; and Sir William Macgregor's experiences lead him to the same belief, although the aborigines have of course undergone a great change in some parts of the country. There is a great multiplicity of languages, but that, he is convinced, does not arise from difference of race, but from exclusiveness of habit. Dr. Lawes believes that the coast tribes from Yule Island eastward belong to a distinct race from the inland or mountain tribes. He considers that from East Cape to Aird River there are fifteen principal coast tribes, and there are many subdivisions and inland tribes. On the western shores the natives are of the first-mentioned type, large numbers of Malays having formed settlements there; and it is probably owing to their influence that the hostility of the natives to Europeans may be ascribed. The Papuan aborigines are of small stature, distinguished from the African negroes by their narrowness and lateral compression of head, and the almost disappearance of chin. All have, however, woolly hair frizzled out in moss-like fashion, and are nearly beardless. The men tattoo and paint their bodies in hideous fashion, and some of them go naked; the women wear petticoats of strips of the pandanus leaf, frequently one layer over another in the form of flounces; some, however, go naked. Both men and women wear large rude and heavy ornaments hanging from their ears and noses. The natives on the east coast have large canoes (cut out from hollow trees), with outriggers and double lateen sails. The aborigines of Kerepunu, on the eastern side of Hood Bay, are described by Dr. Lawes as a fine, healthy, strong, and active people, understanding well how to drive a bargain, and are to be considered a commercial people in a much higher state of civilization than many of their neighbours. One part of the people devote themselves to fishing, and the other to planting, neither interfering with the special work of the other, but each returning in the evening from fishing and planting to barter their provisions. The fishing portion of the community, however, are not natives of Kerepunu, but came originally from Hula, a village on the coast, and by permission of the inhabitants of Kerepunu, settled close to their village. The two tribes, though friendly, keep themselves distinct. The agriculturists never try to catch fish, nor do the fishermen plant, although they live together. A large plot of land is turned over very systematically and quickly by a number of men standing in a row with a pointed stick in each hand, which they raise and plunge into the ground simultaneously, and then use them as so many levers to turn over the soil. They make and use a great number of canoes; some have outriggers, though they are mostly double, two lashed together about 18 inches apart. In the making of canoes stone axes are used, which are said to cut very much better than many of the common axes sold to natives by Europeans. On every side are evidences of intelligence, industry, and cleanliness. The houses were well built, their canoes neatly made, their gardens carefully cultivated, and their streets kept clean. The natives of Hanuabada, and the adjacent villages, closely resemble the Polynesians of the New Hebrides group, especially those from the island of Motu, and, strange to say, these people call themselves Motu. Their colour is a light bronze, and their hair varies in different individuals, from curly and bushy to light wavy. The total number of Motu natives in Port Moresby is upwards of 600. A distinct race, called Koiari, inhabit the large mountain ranges further inland. To the westward of Yule Island the natives gradually become darker in colour, and different in language and customs until the head of the Papuan Gulf is reached, where the true Papuan cannibal is to be found. The natives in the vicinity of Hood Bay are the finest race yet discovered in New Guinea. From Orangerie Bay eastward the natives are physically inferior and cannibals. The demeanour of the natives towards the white men has varied with the localities. Signor D'Albertis, who, in September, 1876, penetrated upwards of 400 miles up the Fly River, found them very hostile. Mr. Goldie, who travelled the country round Port Moresby, experienced no ill-feeling nor received anything but kindness and assistance from their hands. The various tribes frequently engage in hostilities, but it is said that the loss of a man or two where the combatants are evenly matched is sufficient to induce them to treat for peace. At present all business between the whites and natives is carried on by a system of barter, and for this purpose tobacco is found to be almost convenient article of exchange. Knives and tomahawks are also in request. This applies to the people from Yule Island to Keppel Point; on the rest of the coast the "current coin is comprised in stout hoop iron, beads, looking-glasses, American tomahawks, pearl-shell, fish-hooks, and sheath-knives. Among themselves they are reported to have a very complete system of barter, consisting of pottery, nets, necklaces, armshells according to the locality, which are exchanged for other ornaments or implements, but especially for food. They now understand the value of money, and they prefer shillings or half-crowns, and even sovereigns to their equivalent in rice or tobacco.

When purchasing land from the natives on behalf of the Special Commissioner (much of the land is owned by families, each member having his own plot), the purchase-money consisted generally of a tomahawk, a handkerchief, and ½ lb. of tobacco for each portion, with occasionally a shirt and knife thrown in.

In a paper read before the Royal Colonial Institute the Hon. T. H. Hatton Richards says:—"The character of the Papuans is infinitely better than is generally supposed. They have a keen sense of justice, and possess good traits in their disposition, which tend to make them a comparatively easy people to get on with, if they are approached in the right spirit. Among themselves they are very affectionate. I have seen some very heartrending instances of this. Most decidedly they are not bloodthirsty, and the thrilling tales one hears of cannibalism should be received with great caution; while one should also be slow to place credence in tales of so-called savagery, without knowing what has happened in the past (perhaps years ago) to lead up to what might appear, without the knowledge of both sides of the story, to be acts of inhumanity. The Government have found the natives to be useful workers. The constabulary force in the Possession is being formed out of their numbers, and they appear to respect the trust reposed in them, while in moments of difficulty or danger they have been proved to behave admirably."

The religion of the natives consists in a belief in some superior being who dwells in the mountains. They all seem to have one great spirit, who is known in each district by a different name. Among the bush tribes of the Fly River, Dr. MacFarlane says he found that cremation was in some cases practised, and in other parts of the island the rite of circumcision is also in vogue. From their language (believed to be one of the oldest extant), poetry, legends, and customs, he considers that these natives have fallen from a higher civilization; that their progress is downwards, and that they are merely the remnant of a worn-out race.

According to the report of Sir H. Nelson, the natives on the south-east coast appear to be healthy, happy, and on the best terms with the Government, also generally well conducted, with a readiness to conform to our laws, which is mostly due to the hard labours of the missionaries, who for years have devoted their lives to the Christianizing of these people.

Native Manufactures.—Pottery and rope making are among the principal industries. The natives are reported to be very skilful in the manufacture of earthenware vessels of various kinds, and other natives, bringing with them yams and sugar-cane for exchange, come from distant parts of the island to purchase earthenware from the Port Moresby people. This earthenware is made from a kind of clay and rotten granite mixed, and the material is moulded into pots, jars, plates, bowls, and frequently into a sort of large water monkey with a short neck, which they call a "hodu." When first made the vessels are dried in the sun and then baked by fire. The ropes are made from a fibre obtained from the inner bark of a tree, which is prepared by seawater and beating, and then twisted by hand. A little is also done by the natives in collecting rubber, mostly from a pine, which they cut down to extract the juice, but their manipulation of the substance is so rude that its market value is seriously depreciated.

Animals.—The larger animals indigenous to the country are the kangaroo (two species of which are tree-climbers), wallaby, anteater, the cuscus wild-pig, and dingo; the kangaroo and dingo are similar to those found on the Australian continent, but the dingo is much smaller. The pig is the most useful animal on the island, and furnishes the principal food for the natives, and among some of the tribes is domesticated. Alligators are very numerous in the creeks and rivers. Fresh water turtles are found in some of the creeks and others in the still waters inside the reefs; there are, too, a variety of fish in the rivers. Sharks are said to be numerous.

There are known to be sixty species of birds, most remarkable for the richness of their plumage, among them are eleven or even more varieties of the beautiful bird of paradise (*Paradiseidæ*), pigeons, kingfishers, some remarkable species of flycatcher, innumerable flocks of parrots, and cassowaries. New Guinea is believed to be one of the richest countries of the world as regards the beauty and variety of its land and flying birds, and recently provision have been made for their protection.

The insect world is numerously represented. Butterflies of the most gorgeous hues flit in the heated air, and ants are numerous and exceedingly voracious; while a little way inland the traveller meets with an insufferable torment in the shape of a minute reddish insect, which covers the body from head to foot with pimples, causing the greatest irritation It is locally known as scrub-itch. Out of ten species of snakes collected in 1888 two were reported to be dangerous—a death-adder and a whip snake.

Exploration.—Explorations in the interior of New Guinea have been made by Mr. A. R. Wallace in 1858, Dr. M. Macleay in 1871, Dr. Beccari and Signor D'Albertis in 1872, and later by numerous expeditions and individual explorers. Mr. Chalmers, as will be seen from the following note, has perhaps seen as much of the coast part of the island as any white man prior to the annexation:—"In 1879 I travelled several hundreds of miles, and in 1880 four or five hundred, accompanied by Mr. Beswick and Mr. Neville Chester. In 1881 I explored the coast line to Bald Head and travelled inland at Vailala, ascending the Annie many miles. In 1882 I travelled many miles inland of Maiva, accompanied by Dr. Ridgley. Before the above, I crossed from Catamaran Bay to Milne Bay, explored all round Cloudy Mountain on to Poroai Lagoon, all round Orangerie Bay,

Amazon Bay and inland, Cloudy Bay, Sandbank Bay, Cheshunt Bay, Kiakalo Bay and inland, and Hood Bay and inland.

Mr. E. H. Minton claims to have explored the coast of Papua in 1869, discovering several rivers and harbours, which he named.

In 1875 the Rev. Dr. MacFarlane, in quest of healthy localities for mission stations, made the first voyage up the Baxter and Fly Rivers, ascending the former, he says, 90 miles and the latter 160 miles. Plans of the rivers and full reports of these interesting and important explorations appeared in the *Sydney Mail*, and the Proceedings of the Royal Geographical Society. Dr. MacFarlane, gave the name of Baxter to the first river he explored, in honour of the lady who supplied him with the little steamer in which the discoveries on the SE. peninsula were made.

In December, 1877, Mr. Chester, the police magistrate of Thursday Island, visited that portion of the New Guinea coast lying to the north of Thursday Island, with a party of ten Europeans and sixteen South Sea Islanders. He reached the mouth of the Baxter on the 5th, and describes it as a magnificent river, nearly a mile wide at the mouth, without a shoal or sandbank to obstruct navigation, with 9 fathoms of water at the entrance, deep water to the very head, and upwards of 18 feet of water alongside the banks.

In July, 1878, Mr. Chester, who was appointed by Sir Arthur Gordon to represent his commission among the natives, made another voyage to New Guinea, visiting Port Moresby and other settlements on the coast.

In November, 1879, Mr. Andrew Goldie, an old New Guinea pioneer and settler, made a cruise along a part of the coast in the *Alice Meade*. Starting from Port Moresby he sailed to Yule Island, a distance of some 60 miles. On the whole he was well received by the natives, who are described as living in large, clean, well-kept villages, and having the land in a high state of cultivation.

In April, 1880, Mr. Neville Chester, a son of Mr. H. M. Chester, visited New Guinea, and, in company with the Rev. Mr. Chalmers made a three months' cruise on the coast, including a five weeks' journey inland. Mr. Chester subsequently visited the Laughlan Islands; the natives were on the whole friendly, though some of them were at war with each other.

The *Argus* and the *Age* sent special commissioners to the island-continent to report upon its resources and capabilities for colonization. The *Argus* expedition was commanded by Mr. W. E. Armit, for some years an officer of the Queensland Native Police. It consisted of seven white men, an Australian half-caste, and some fifty native bearers who were engaged at Port Moresby. Professor Denton, a geologist of some note, also attached himself to the expedition from a love of science. On July 14, 1883, Mr. Armit left Port Moresby for the Astrolabe Ranges, and passed through many villages, of which he has given a graphic description. Owing to native wars, it was found impossible to proceed further inland. On the way back, fever attacked the party and carried off Professor Denton. He died at Berigabadi on August 26. The expedition returned to Port Moresby and thence to Queensland.

A second expedition, undertaken by the *Argus* proprietary, under the command of the late Mr. Julian Thomas ("The Vagabond"), left Thursday Island for New Guinea on November 20, but the results were of little moment, owing to the impossibility of making extensive journeys through the near approach of the rainy season. The expedition was disbanded in December.

The special commissioner of the *Age*, Mr. G. E. Morrison, accompanied by two white companions, and some black boys as bearers, made a bold attempt to penetrate inland in a north-easterly direction from Port Moresby. From the first he encountered opposition from the natives, who were very numerous, treacherous, and inveterate thieves. The expedition resulted in failure, Mr. Morrison narrowly escaping with his life.

Later on Mr. Chalmers travelled over the same ground, to make peace with the natives, in which he was to some extent successful. His party consisted of the late Mr. F. Lawes (son of the Rev. Dr. W. G. Lawes), Messrs. Lawrie and Horsley, Ruatoka, native teacher of Port Moresby, Peter Lifu, one of the mission boatmen, and George Belford, late of the *Argus* expedition, besides carriers.

A second expedition was sent to New Guinea in 1884 by the proprietary of the *Age*. This, as regards exploration, was more successful, but in other respects, owing to the opposition of the natives, ended in disaster.

In 1884 the late Mr. Denis Gleeson visited New Guinea. He prospected Mount Belford and Mount Irving, and found quartz country, but no gold. He passed Professor Denton's grave, and with the assistance of natives fenced it round. About the same time Captain Williams claimed to have discovered a new river about twenty miles west of the Fly, navigable for forty miles from its mouth (probably one already mentioned by Dr. McFarlane). He describes it as being about a quarter of a mile broad all the way, deep water with a rocky bottom, and workable by any vessel drawing up to fourteen feet, with low banks, on which the sago palm grows in profusion. He named it the Tate River. The natives in the various villages were very friendly, their only weapons were bows and arrows; they said they had never seen white men before, and allowed some of the crew to sleep ashore unharmed.

In 1884 Mr. Theodore F. Bevan, F.R.G.S., went to New Guinea to inquire into its geographical features and industrial prospects. During the following three years he visited many portions of the coast, and also travelled inland. In 1887 Mr. Bevan successfully conducted two expeditions to the previously unexplored regions of the Papuan Gulf. Among the most important results were the discovery of two new rivers, viz., the Aird and Purari, which were traced into mountain ranges. The so-called Aird reported by Captain Blackwood, of H.M.S. *Fly*, in 1845, proved to be but one of many tidal estuaries in the delta. Sir William Macgregor says of the Purari that it is navigable by steam for at least 120 miles; is capable of supplying 40 gallons of pure fresh water per day to every person of the present population of the globe, and is infinitely more interesting and picturesque than any other river in the Possession. In his Official Report, dated 3rd May, 1893, Sir William Macgregor states:—"Mr. Theodore Bevan was the first to ascend, to examine in detail, and to map these deltaic arms; and to see, traverse, and chart any part of the Purari itself." In 1888 the New South Wales Government published an account of Mr. Bevan's expedition; and in 1890 his complete work, entitled "Toil, Travel, and Discovery in British New Guinea," was published in London by Messrs. Kegan Paul, Trench & Co.

In September, 1885, Mr. H. O. Forbes, with a small party, consisting of Mr. Hennessy, Mr. Anderson, and twenty-four Malay carriers, started on a journey of exploration into the interior, principally with a view to investigate from what family the biological features of what seemed the more easily accessible of the higher mountains, the Owen Stanley Range, had derived their origin. At Sogere, about 50 miles from Port Moresby by road, though only 22 miles in a direct line, a camp was formed consisting of a dwelling-house, Malay quarters, trade and provision store, a plant-drying shed, and a meteorological observatory. Here the various plants and botanical specimens were dried, and six times daily for the space of six months meteorological observations were taken. But as the main object of the expedition was the ascent of Mount Owen Stanley, Mr. Forbes, accompanied by the Rev. Mr. Chalmers, made a great effort to accomplish this. Owing, however, to the defection of the natives the undertaking could not be accomplished, and the party had to return to Sogere and thence to Port Moresby.

Captain John Strachan, of the schooner *Herald*, left Sydney in September, 1885, with several members of a company for the purpose of ascertaining the capabilities of the country as regards trade and commerce. The schooner first called at the Island of Dauan (or Tuan), then at Biggs, after that ascending the river Maicussar (Pearl Shell River), mai being the native name for pearl shell, and cussar for river—passing up and through this stream into the Leopold River, anchoring at a distance of 56 miles from the river entrance. From that point some of the party proceeded upwards in a steam launch, exploring both sides of the river, finding much good land besides timber, especially on the ridges. The Tobio Cussar, a large tributary of the Mai Cussar running to the NE. was followed to the end of navigation, and explored on either bank.

In June, 1886, the Geographical Society of Australasia despatched a well-equipped expedition under the leadership of Captain H. E. Everill. The *Bonito* with the party on board, proceeded up the Fly River for about 250 miles, when a large affluent was discovered flowing south-east. The *Bonito* steamed up this branch, which was named the Strickland, after Sir Edward Strickland, for a distance of upwards of 250 miles, at which point the stream had a width of about 600 yards and a depth of from 2 to 2½ fathoms, but with many sand banks in the channel, on which the steamer frequently grounded, at last landing on one, on which she remained for about eight weeks. Other discoveries were also made. It may be added that the expedition was much hampered by instructions.

In the early part of 1887 an exploring expedition under the leadership of Mr. Bevan made some important discoveries.

Mr. Bevan claims that his chief work was to discover and explore the Aird river system and the great "Purari" (Queen Jubilee River); thereby proving the existence of two great "independent highways of commerce" into the interior, the notification of which (where they disembogue through a dozen great estuaries and channels into sixty miles of the littoral of the Gulf of Papua) had, up to the time of Mr. Bevan's explorations, been erroneously confused with, and conjectured to be affluents of the great Fly River, hundreds of miles to the west.

In 1887 the Roman Catholic missionaries at Yule Island in the course of their progress inland ascertained that the Ethel and Helda Rivers discovered by Captain Runcee were comparatively insignificant streams. They discovered a new river, which they named the San Joseph, and suggested that it ran almost due north, to the base of Mount Yule and to the western base of Mount Owen Stanley. They reported the country on the other bank of the river as exceedingly fertile, and very thickly populated. The natives were very friendly. The missionaries, in all, visited fifteen villages, some of them of great size, one containing 2,000 inhabitants. In August, Mr. Edelfelt, accompanied by the Rev. Father Couppé and the late Rev. Father Verjus, of the Mission of the Sacred Heart, Yule Island, set out to explore the Mekeo district—the priests, if possible, to find suitable places for the extension of their mission work, and he for geographical discoveries, and to make the ascent of Mount Yule. The party passed through several villages, among others, Inawabui, with 78 houses and 400 people, Eboa, 96 houses and 500 people, and Raral, and they were well received by the natives. Owing to the incessant rain and the refusal of the carriers to proceed, the attempt to reach Mount Yule was a failure.

About the middle of 1887 an exploring party, consisting of Mr. George Hunter and Mr. Hartmann, of Toowoomba, made a successful journey. They ascended the eastern branch of the Kemp-Welch River, and pushed forward with the intention of going to the top of the main range between Mount Obree and Mount Brown, a height of 5,000 feet or 6,000 feet, but did not succeed in this. They reported magnificent country

on the other side of the range, and brought back a large collection of specimens. The visit of Mr. Hartmann is likely to be attended with permanent good to the country, as he took over with him not only choice fruit trees and seeds, but also many economic plants, such as cinnamon, pepper, cinchona, &c., which would be distributed throughout the country. Two swarms of Italian bees were also introduced. From the hardships incurred on this journey Mr. Hartmann contracted a sickness, which soon after his arrival in Brisbane terminated fatally.

In July, 1887, Messrs. Cuthbertson and Sayer, accompanied by Mr. George Hunter, and having the use of the Government horses, set out on an exploring expedition with the intention of ascending Mount Obree, which they accomplished. After a most successful trip the party returned to Port Moresby in September. Later in the year Mr. Douglas fitted out an expedition, under Mr. H. O. Forbes, for the purpose of ascertaining if Mount Owen Stanley could be ascended from the head of the Goldie. Mr. Forbes met with much opposition from the natives, which culminated in his retreat, his camp being attacked and looted.

In August, 1887, Mr. Livesey, formerly on the Brisbane *Courier* staff, and a party of four, started from Port Moresby, and were said to have visited some of the villages on the south-western outliers of Mount Owen Stanley.

In the early part of 1888 Mr. Strode Hall made a flying survey of the Mai Cussa, and Wasi Kussa inlets. He arrived at the conclusion that the country in the immediate neighbourhood of these rivers is very sparsely populated. This is believed to be due to fear of the Tugeri pirates; the country is described as low lying open forest country, covered with long grass and in some places swampy—soil very poor generally.

In June, 1889, Sir William Macgregor ascended the highest point of the Owen Stanley Range (Mt. Victoria), attaining a point 13,121 feet in altitude. The Fly River has been ascended for 610 miles, and a new and important river has been discovered, since called the "Morehead," lying to the west of the Fly. He has made several voyages along the coast and visited many of the inland districts.

During 1891–92 he visited, among other places, the D'Entrecasteaux and Kiriwina groups of Islands, and made an examination of part of the coast of Fergusson Island. Starting from Samarai, the Maiwara district was traversed; also the Mekeo district. He inspected the coast east of Port Moresby, the island of Sanaroa (Welle Island), part of the Louisiades, Mabuduan, all the villages on the Omati River, and examined the Aird River. Since then he has made many journeys and voyages to other places in the possession. It has been said that the exploration of the island, so far as the coast line is concerned, is practically completed. Nearly every mile of the coast from the boundary of Dutch New Guinea to that of German New Guinea has been traversed, and all the rivers of any importance are now known.

On the 4th September, 1895, Mr. C. Kowald and party started on a visit to villages on the Mount Yule Ranges, and report that although no results of any commercial value attended the trip into the interior, yet they visited new tribes of four villages, and found a shorter and better road to Mount Yule. Mr. Kowald further says that if ever an expedition be undertaken there in the future, the natives will be friendly to any European who may pass their way, and give assistance; a most important item in travelling in this country.

An expedition fitted out in Kaiser Wilhelm's Land, and led by Herr Otto Ehlers, accompanied by Herr Piering, with forty-three coloured carriers and a creole servant, suffered great privations, meeting with no natives for sixty-seven days; more than half the number succumbed, including the leader, Herr Ehlers, who behaved with great fortitude up to the last, for it was owing to his directions that any of his followers reached the coast and escaped with their lives.

On July 1st, 1896, Mr. George Clark led a prospecting party, including Thomas Drislane, Samuel McClelland, Anthony Linedale, Edward Braddon, with two native Queensland blackboys. Starting from the mouth of the Mambare River; on about the 12th July, the leader was murdered whilst hauling the boat over a rapid. Accordingly the party having lost their leader, and being badly provided with firearms and trade, decided to return to the coast.

On August the 4th Mr. M. P. Cosgrove, leader of the prospecting party, sent out to New Guinea by an influential association, returned to Adelaide and reported the utter failure of the expedition. His party, though well equipped, failed to reach the interior. The native followers deserted them, and several men suffered from malarial fever. He condemned strongly New Guinea as a goldfield. Notwithstanding this unfavourable forecast the gold returns, although showing a considerably less output than is known to be the case, exhibit a steady yearly increase, and the development of the gold mining industry in the last year under review 1898–99 was of a highly encouraging character. The value of the increased production is stated at over £18,500, while the prospects for claimholders and prospectors in both the "Gira," and the "Murua" (Woodlark) Goldfields have been enhanced to an important degree.

Port Moresby is situated at latitude 9° 20′ 33″ S., and longitude 147° 8′ 56″ E., access to the port being obtained through the Basilisk opening in the New Guinea Barrier Reef. The distance from the reef to the entrance of the harbour is about five miles, and food anchorage is obtainable under the south head in about six fathoms of water, at a distance of a mile-and-a-quarter from the shore. Deep water is found close up to the eastern head. The entrance itself is about a mile-and-a-half wide. From the eastern head a native track runs round the harbour to the village of Hanuabada. A range of high mountains forms the backbone of the peninsula, and between these and the Port Moresby coast is first a stretch of level country and then a series of low hills, which at some places run down steeply to the sea, and at others are succeeded by a considerable stretch of comparatively level ground. These hills skirt the harbour from the eastern head to Hanuabada, where they lie back from the beach sufficiently far to give abundant room for a township. Opposite to Hanuabada, a range of hills, dividing the harbour from the sea, forms an effectual barrier against the north-west monsoons, and renders Port Moresby absolutely landlocked.

Port Moresby is the seat of Government, and, excepting Samarai and Daru, the only port of entry. Government House is built on a commanding site at the eastern side of the bay, about 130 feet above the beach. There is a church, an hotel, reading room, constabulary barracks, &c.

The other buildings at the settlement are the Mission house, Burns, Philp & Co.'s store, about 150 native houses or huts, and the church, a building about 66 feet by 24 feet, the frame and roof of native timber, neatly dressed, the sides and roof covered in with leaves of the pandanus. This building also serves as a schoolroom for the children on week-days, and is attended by about one hundred children twice every day. (About 4,000 children in all are under instruction in New Guinea.) There is also a building, known as the Training College, used as a place of instruction for young men and women—mostly from South Cape, New Guinea, who are being educated as native teachers. The class-room is fitted up exactly like a State school. A large building, 60 feet by 30 feet, suitable as a Government store and bonded warehouse, has been erected at Ela.

Mr. Douglas says: "Port Moresby, as the headquarters of the London Missionary Society, is the best known and most important point on the Coast of British New Guinea. It is a magnificent harbour, though a good deal cut up by coral patches, and it will require to be well buoyed and beaconed before it can take rank as a first-class port. The Inner or Fairfax Harbour is completely landlocked, with fairly even soundings giving four and five fathoms. The surrounding hills do not leave much level ground on the shores of the harbour, and the country has often been spoken of by visitors as dry and comparatively barren. . . . I am led to conclude that the climatic conditions of Port Moresby are not so unfavourable to cultivation as they have sometimes been represented to be. The native village of Hanuabada, built in the shallow water between the island of Elevara and the rising ground on which the Mission premises are situated, is a collection of somewhat fragile tenements built on piles. The native population numbers about 800 men, women and children."

Samarai.—A great field for capital exists in the Western Division of B.N.G. in the prosecution of natural industries. To the eastward of Port Moresby a fertile and diversified country extends for 250 miles to Samarai, the commercial entrepôt for the east end of the possession. In this interval are the stations of the Government at Rigo, several of the L.M. Society, and of traders and planters. Copra and rubber are the chief industries at present; but the scope for fresh enterprise is unlimited.

Samarai is a bustling place, and is most beautifully situated on a small island—one of a perfect archipelago—at the SE. extremity of the mainland of New Guinea. Samarai contains three or four stores, the same complement of hotels, shipwrights, &c. The island has been most tastefully planted with palm trees and other tropical vegetation by prison labour. The prosperity of this place is largely accounted for by the fact that it has enjoyed all the trade incidental to the various alluvial diggings of B.N.G.—Sudest, St. Aigans, and Woodlark Island, and the more recent ones on the mainland at the Mambare and Gira rivers. Quite lately great excitement was caused by fresh discoveries of alluvial gold at Milne Bay close to Samarai, but it is too soon yet to estimate the value or permanency of this new find. Altogether, from one field or another, a few hundred miners have drawn supplies from Samarai for several years past, and present appearances point to an increase in this direction.

Apart from gold mining Samarai has always been the centre for an extensive system of trading in raw products—such as pearl shells, bêche-de-mer, copra, rubber, &c. Traders in small vessels, by a system of bartering with calico, tobacco, tomahawks, beads, &c., secure these products from the natives and dispose of same to the storekeepers. It is a common sight to see thirty or more of these small vessels in Samarai at the one time, and when supplemented by contingents of diggers with gold to sell, and pearlshellers likewise with their booty to dispose of, business waxes brisk.

The Government Station at Tamata, about 250 miles up the NE. Coast from Samarai, is the centre for the Mambare-Gira Goldfield. A township of a primitive nature has been created, and stores there are regularly supplied from Samarai, and sell the necessaries of life at reasonable rates. Woodlark Island, about 160 miles NE. of Samarai, has been a first-class poor man's goldfield in the past, but a company has now been floated in Sydney to work the famous Koolamadow Lode. The gold was so fine that machinery was absolutely necessary in order to prevent great waste.

Sudest, about 100 miles east of Samarai, contains the only quartz battery so far erected in B.N.G. The results obtained with 10 head of stampers were considered good enough to warrant the placing of the mine on the London market lately.

The township of Granville has been formed on a site which is likely to prove much more healthy than the neighbourhood of the native village, where some European habitations have been erected. There is, moreover, deep water close inshore, and a jetty has been built which provides the requisite facilities for

landing. A building containing one large room, together with four smaller rooms, suitable for offices, has been erected close to the landing-place. The small rooms are utilized as shipping office, post-office, and store-rooms, the larger room is utilized as a reading room on week days, and as a place of worship on Sundays for the white people of Port Moresby.

A guest and accommodation house is available.

There are also a prison, a powder magazine, a stone jetty, and a substantial building used as quarters for the constabulary officers, and for the sittings of the Supreme court.

The township of Granville West, situated near Paga Point, extending from the Port Moresby Beach to Ela Beach, comprises about 50 acres. There are, including the beach roads, seven streets, the inner ones being 2 chains wide, the beach frontages averaging about 3 chains. The blocks are all cut up into quarter-acre allotments.

The township of Granville East lies about 80 chains north-easterly from Granville West, and is, so far, cut up into eight sections.

Land Settlement.—The Warirata plantation of Messrs. Burns, Philp & Co., is the most interesting one in the country. It is situated on the summit of the Astrolabe Range. There are here some 20,000 growing plants of Arabian coffee ; in addition to these, the experiment of planting 16,000 holes with seed is being tried. Some crossbred and Lincoln sheep are depastured on the grassy hills.

The late Lt.-Governor, Sir William Macgregor, reserved the land now occupied by the natives, but in any part of the Possession, not required by the natives for the purpose of food production, areas may be taken up for settlement on the condition that they are to be improved. Persons are not allowed to possess themselves of large tracts of country and then go away, leaving the land to increase in value till they should either realize upon it or make other use of it.

Several blocks of land have been purchased from the natives on behalf of the Government, and other areas of land either have been, or are in course of being, purchased, partly for permanent occupation by officers of the Government, and partly for settlers.

In December, 1897, a provisional agreement was entered into between Sir William Macgregor, then Lt.-Governor, and "The British New Guinea Syndicate," by which the Company was to have had the right to purchase land suitable for agricultural and mining purposes up to 250,000 acres, the price to be 2s. per acre, payable 6d. per acre deposit on application, and the remainder in eight annual instalments of 2¼d. per acre. The Company were to spend on improvements 6d. per acre the first two years, and during the next six years a sum equal to 3d. per acre. When declared open the Company was to have the prior right of selection for six months, and the general right to acquire the 250,000 acres extends over eight years, provided that the total had not been offered to them in the meantime. The Company was to have sole property in all products of the land, a royalty of £2 10s. per cent. being payable on all gold, and metals of the platinum group. This concession met with very considerable opposition and was cancelled. Several applications for land have been received from syndicates, the areas ranging from a few thousand acres to 200,000. Personally, Mr. Le Hunte objected very much to deal with applications for large areas unless the applicants or their properly authorized agents were in the country, and the land was properly inspected. During 1899 the Lieut.-Governor visited the Premiers of the contributing colonies and discussed questions of future administration and land settlement. With respect to the alienation of lands, the Premiers concurred with the Lieut.-Governor's proposals for advertising for and dealing with applications for lands subject to the following additional conditions :—"(1) Applications for areas under 50,000 acres are to be dealt with by the Administrator of British New Guinea-in-Council directly; those of 50,000 acres and upwards are not to be finally dealt with until the Contributing Colonies have had an opportunity of considering whether they considered it expedient or otherwise to grant them, and for this purpose it was decided that notification of every such application, together with the recommendation of the Administrator-in-Council, should be sent to each of the Contributing Colonies, and that no decision should be given until after three months from the date of the Despatch or other communication from the Government of British New Guinea forwarding the application. (2) That freehold grants should for the present be limited to 50,000 acres to one grantee ; but that after the Ordinance which will be passed to amend the present Crown Land Ordinance has been in operation for six months, larger areas may be granted with the consent of the Contributing Colonies." The question of the reservation of minerals was considered, and it was decided that all minerals and mineral ores, except coal, were to be reserved to the Crown in all grants, the Legislature of British New Guinea to determine the conditions under which minerals may be worked by the proprietor of the land, or the amount of compensation to be paid to him should the Crown exercise its right of ownership of the minerals on his land. The general law of mining in the Possession will be governed by the Queensland Consolidated Mining Acts and Regulations, subject to such modification as local circumstances may necessitate. It was decided that coal should not be reserved to the Crown, but that the local Legislature should determine the amount of royalty to be paid upon it.

Land Laws.—On December 16th, 1890, an ordinance was issued by the Administrator and Legislative Council to regulate the dealing with Crown lands. This ordinance was superseded by the "Land Ordinance of 1899."

THE LAND ORDINANCE, 1899.

I. *Preliminary.*

II. *Dealings with Natives.*—Dealings in land with natives prohibited. No native may deal in land, but Administrator may purchase or lease land in the public interest which may not be required by natives, and he may transfer to private individuals such land, &c., &c.

III. *Acquiring and recording the acquisition of Crown Lands' Leases to the Crown.*—When an estate in fee simple in land in respect of which no Crown grant has ever been issued is acquired by the Crown, it shall be taken in the name of Her Majesty. The Administrator may from time to time claim for the Crown vacant lands not required by the natives, &c., &c.

IV. *Irregular settlement on Native, or Crown, or waste or vacant lands.*—No person other than a native born Papuan may settle on or occupy the land of any native tribe for agricultural or residential purposes without first obtaining a legal right to do so, and no person shall occupy, except for temporary purposes, any Crown land without obtaining a legal right, &c., &c.

V. *Alienation of Crown Lands in Fee Simple.*—The Administrator in Council may in Her Majesty's name, subject to the provisions of this Ordinance, grant in fee simple any Crown land to only a natural born or duly naturalized British subject, but any person not being a British subject may hold land in trust for religious purposes. No Crown land will be given as a reward for exploration. Lands may be granted for religious purposes as missions. All grants not to be allowed before surveyance of the land in question. Fee payable for preparation of grant is to be £1 up to 1,000 acres, and 10s. for every additional or fraction of 1,000. The Administrator has power to sell land by private contract or public auction for building allotments, &c., &c.

VI. *Lease of Crown Lands, or of lands in which the Crown has a leasehold estate.*—Leases of land held by the Crown may be had for agricultural, pastoral, trading, or fishing, or for the planting of cocoanuts, &c., &c.

VII. *Reserves for public purposes.* — The Administrator may grant lands to be held in trust for public purposes.

VIII. *General.*

Land Grants. — Crown grants issued during the year ended June 30, 1899, amounted to 666 acres :—pastoral, 451 acres ; religious, 172 acres ; cocoanut planting, 24 acres ; residential, 18 acres ; mining, 1 acre. The largest area of land taken up during the year was some ten square miles on the Musa River, Dr. Vaughan being the local representative. The cultivation of indiarubber is one of the uses to which it is proposed to put the land.

Shipping.—The total number of merchant vessels that entered during the twelve months ending June 30, 1899, is given as 92, tonnage 19,583 ; cleared, 81; tonnage, 19,191 ; all the shipping being British. The existing shipping facilities of B.N.G. with Australia are as follows :—The ss. *Merrie England* visits Queensland as often as Government business requires ; Burns, Philp & Co.'s ss. *Moresby* makes a round six-weekly trip from Sydney *viâ* Port Moresby, Samarai, German New Guinea, and the Solomons ; this Company's schooner *Alice May* plies regularly between Port Moresly and Thursday Island, calling at the intervening ports of Yule Island and Daru ; and their brig *Ivanhoe* regularly trades between Cooktown and Samarai, Mambare, Woodlark and Sudest Island. Other vessels also trade at irregular intervals with Cooktown.

Postal.—Mail communication from Port Moresby, and from the portion of the Possession which lies to the eastward of Port Moresby, is with Cooktown, Queensland. Mail communication from the western portion of the Possession is chiefly with Thursday Island. The carriage of mails is now conducted by the British New Guinea Government steamer *Merrie England*, H.M.'s ships, and various sailing vessels owned by Messrs. Burns, Philp & Co., Limited, the London Missionary Society, and traders, &c.

Postal matters in the Possession are in practice administered as if it were a postal district of Queensland, and the same stamps, rates and regulations are in use. Such changes as became necessary in Queensland on account of that Colony joining the Postal Union also became necessary in New Guinea, which joined the Union at the same time, and an Act was passed in 1892 to enable postal affairs in the Possession to be still kept on the same footing as those of Queensland under the new conditions.

The postal rate on letters is therefore 2d. per half-ounce, the same as between the other Australian colonies.

During 1898–99 letters received, 16,045, despatched 11,529 ; packets received 584, despatched 1,102 ; newspapers received 10,609, despatched 2,337.

Revenue and Expenditure.—The £15,000 per annum contributed to the administration for the past ten years by the Australian Colonies, together with the Imperial Grant of £3,000 per annum, has nearly always covered expenditure, and the Accumulated Revenue Account of B.N.G. shows a credit balance of about £33,000. This Fund has always been treated as a reserve to cover deficiencies and provide for extraordinary expenditure. The Revenue Returns for the year 1898–99 were £11,682, made up as follows :—Customs Dues, £9,884 ; Goldfield Receipts, £317 ; Fees and Fines, £356 ; Licenses, £428 ; Miscellaneous, £696. The estimated revenue for 1899-1900 was £12,462.

The expenditure amounted to £15,583, made up as follows :—Civil list salaries, £3,180 ; other salaries, £3,684 ; vessels and boats, £1,572 ; allowances, £1,373 ; Buildings and works, £484 ; Agriculture, £130 ; Mail Service, *nil* ; Miscellaneous, £5,159. The estimated expenditure for 1899-1900 was £27,264 (including £7,000 for the ss. *Merrie England* and steam launches.

Imports and Exports.—The total value of imports entered at Port Moresby, Samarai and Daru for 1898–99 was £52,170. Total value of exports, £68,496. The principal exports and their value were—Gold, 12,012 ozs., valued at £44,185; Sandalwood, 307 tons, valued at £2,920; Indiarubber, 8 tons, valued at £1,935; Copra, 337 tons, valued at £2,907; Pearls, £345; Turtleshell. £1,274, &c. The principal imports were—Drapery, £4,810; Tobacco and cigars, £4.184; Hardware, £1,486; Bottled beer, £1,400; Boats, £3,213; Flour, £1,034; Preserved Meat, £4,079; Rice, £2,816; Timber, £1,631.

Native Labour Laws.—An Act intituled "The Native Labour Ordinance of 1892" was passed on the 23rd of the May of that year, and received the Queen's assent in the following August. It was superseded by "The Native Labour Ordinance of 1900," and is comprised within 13 parts and 12 schedules, as under:

Part I. Preliminary.
Part II. Restrictions on employment or removal of natives.
Part III. Engagements of natives under this ordinance.
Part IV. Cancelling or altering written agreements of services.
Part V. Permitted removal of natives within the possession.
Part VI. Permitted removal of natives beyond the possession.
Part VII. Obligations incurred by persons employing or removing natives.
Part VIII. Payment and recovery of wages.
Part IX. Inspection of vessels and of native labourers.
Part X. Offences by native labourers.
Part XI. Other offences.
Part XII. Nature of securities required by ordinance.
Part XIII. Records of and fees for documents.

Administration.—The Government comprises Executive and Legislative Councils composed of Officials, with the exception that the latter body contains one unofficial member. Ordinances framed by these bodies require the sanction of the Colonial Office in London, also of the Contributing Colonies of Victoria, New South Wales, and Queensland, before they become Law. The Law is administered by the Chief Judicial Officer, Judge Winter, and by Resident Magistrates and Government Agents, who all travel a great deal throughout the Possession by both land and sea. Appeal to the Supreme Court of Queensland is provided for in the case of Europeans against the decisions of the Central Court, but up to the present the right has never been exercised.

The movable force at the disposal of the Government is represented by the ss. *Merrie England*, manned by Europeans, and by the efficient armed Native Constabulary, over 100 strong, composed of Papuans under a European Commandant. In addition there are over 200 village constables scattered throughout the Possession, who maintain good order in their respective localities.

GOVERNMENT.

THE LIEUT.-GOVERNOR.—His Excellency Geo. Ruthven Le Hunte Esq., C.M.G., late Colonial Secretary of Mauritius.

EXECUTIVE COUNCIL.—Sir F. P. Winter, C.M.G., Anthony Musgrave, Hon. D. Ballantine, Hon. Dr. J. A. Blayney, and Hon. H. H. S. Russell.

LEGISLATIVE COUNCIL.—Same as Executive, with the Hon. W. Gors as an unofficial member.

PRIVATE SECRETARY.—Capt. F. R. Barton.

SECRETARY TO THE GOVERNMENT.—Anthony Musgrave, £700 (including house allowance of £200).

TREASURER.—D. Ballantine. £350.

JUDICIAL.—Judicial Officer, His Honor Sir Francis Pratt Winter, C.M.G., £1,000; Resident Magistrate (Eastern Division), Hon. M. H. Moreton, £400; Resident Magistrate (South-Eastern Division), A. M. Campbell; Resident Magistrate (Central Division), Dr. J. A. Blayney; Resident Magistrate (Western Division), C. G. Murray, £500; Resident Magistrate (North Division), W. Earmit; Resident Magistrate (North-East Division), C. A. W. Monckton.

CHIEF GOVERNMENT SURVEYOR.—H. H. Stuart Russell.

GOVERNMENT PRINTER.—James Wood. £300.

GOVERNMENT AGENT (Rigo).—A. E. English. £250.

" " (Mekeo).—(Acting), A. Giulianetti. £250.

OVERSEER AND GAOLER.—J. MacDonald. £250.

COMMANDER OF GOVERNMENT STEAM YACHT *Merrie England*.—R. H. Harvey. £300.

CHIEF ENGINEER OF GOVERNMENT STEAM YACHT, W. Robertson. £252.

COMMANDANT OF ARMED CONSTABULARY.—Capt. A. W. Butterworth. £300.

SUB-COLLECTOR OF CUSTOMS.—Samarai, A. H. Symonds. £225.

SUB-COLLECTOR OF CUSTOMS.—Daru, A. H. Jiear. £150.

CUSTOMS TARIFF.

SCHEDULE. Passed in Council 19th of April, 1889.

If any of the following articles are imported in the form or shape of a bag, package, box, tin, jar, bottle, or similar thing, marked, or labelled, or commonly sold as containing, or commonly reputed to contain a specific quantity of such article, such bag, package, box, tin, jar, bottle, or similar thing, shall as against the importer be deemed to contain such specific quantity.

PART I.—SPECIFIC AND AD VALOREM DUTIES.

	£ s. d.
Arrowroot, sago, tapioca, maizena, macaroni, starch, cornflour, per lb.	0 0 1
Aerated or mineral waters, per 12 pints	0 0 6
Beer, ale, porter, cider (in bottle), per 6 quarts or 12 pints	0 0 9
Beer, ale, porter, cider (in wood or jar), per gallon	0 0 6
Boots and shoes, ad valorem	10 per ct.
Biscuits (fancy or sweetened), per pound	0 0 1
Blue, per pound	0 0 1
Bacon, per pound	0 0 1
Brushware, ad valorem	10 per ct.
Basketware, ad valorem	10 per ct.
Blacking, ad valorem	10 per ct.
Bathbrick, ad valorem	10 per ct.
Baking powder, ad valorem	10 per ct.
Barley, split peas, per pound	0 0 1
Boxes and trunks of wood, leather, or metal, ad valorem	10 per ct.
Cordage and rope, per ton	0 10 0
Cigars and cigarettes, including wrappers, per pound	0 4 0
Coffee, cocoa, chocolate, and chicory, per pound	0 0 2
Confectionery, including cakes, comfits, ginger, butterine, sweetmeats, and nuts of all kinds except cocoanuts	0 0 2
Caps (percussion), per 100	0 0 1
Cheese, per pound	0 0 1
Candles, per pound	0 0 1
Crockery ad valorem	10 per ct.
Cordials and syrups, not included under spirits, per gallon	0 1 0
Clocks and watches, ad valorem	10 per ct.
Cutlery, ad valorem	10 per ct.
Cartridges or cartridge cases, ad valorem	10 per ct.
Dynamite, per pound	0 0 3
Dates, figs, prunes, raisins, and other dried fruits, per pound	0 0 1
Drapery, including apparel and all materials composed wholly or in part of cotton, silk, linen, wool, or other woven fabrics, ad valorem	10 per ct.
Drugs, including all articles of the kind and form used as medicines, ad valorem	10 per ct.
Earthenware, ad valorem	10 per ct.
Fish, preserved, ad valorem	10 per ct.
Fruits, bottled, or in tins or jars, per 12 pints	0 1 0
Firearms, ad valorem	10 per ct.
Fuse and fireworks, ad valorem	10 per ct.
Floorcloth, ad valorem	10 per ct.
Glass and glassware, ad valorem	10 per ct.
Glue, gelatine, isinglass, per pound	0 0 1
Guttapercha and indiarubber, or manufactures of, in whole or in part, ad valorem	10 per ct.
Hams and cured pork, per pound	0 0 1
Hardware and hollowware, ad valorem	10 per ct.
Hops, per pound	0 0 1
Ironmongery, ad valorem	10 per ct.
Ink, stationery, and paper (writing and fancy), ad valorem	10 per ct.
Jewellery, ad valorem	10 per ct.
Jams, jellies, and honey, per pound	0 0 1
Kerosene, per gallon	0 0 6
Lead, including shot and bullets, per cwt.	0 2 4
Leather and leatherware, including all articles made wholly or in part of leather, ad valorem	10 per ct.
Methylated spirits, per gallon	0 2 0
Molasses and treacle, per cwt.	0 2 0
Malt, per bushel	0 0 6
Mustard, per pound	0 0 1
Matches and fusees ad valorem	10 per ct.

	£ s. d.
Matting, ad valorem	10 per ct.
Musical instruments, ad valorem	10 per ct.
Opium, or any article containing any of the active ingredients thereof, per pound	1 0 0
Oilman's stores, ad valorem	10 per ct.
Oils not otherwise enumerated, per gallon	0 0 6
Oils, perfumed, ad valorem	10 per ct.
Powder, sporting, per pound	0 0 3
Pepper, mace, and other spices, per pound	0 0 1
Pickles, including chutney and sauces, ad valorem	10 per ct.
Paper, brown, wrapping, and paper bags, per cwt.	0 2 0
Perfumery, ad valorem	10 per ct.
Potted meat and extract of meat, per pound	0 0 2
Printed forms, ad valorem	10 per ct.
Pipes (tobacco), ad valorem	10 per ct.
Pictures and picture frames, ad valorem	10 per ct.
Plated ware, ad valorem	10 per ct.
Rice, per ton	0 10 0
Spirits of the strength of proof or of greater strength than proof by Sykes' hydrometer, per proof gallon	0 14 0
Spirits and spirituous compounds under proof or of which the strength cannot be ascertained by Sykes' hydrometer, per gallon	0 14 0
Case spirits, reputed contents of two, three, or four gallons shall be charged :—	
Two gallons and under as two gallons	
Over two gallons and not exceeding three as three gallons	
Over three gallons and not exceeding four as four gallons	
Soap, hard and soft, per pound	0 0 0½

The course of price of the £20 Shares on the London Stock Exchange has been approximately as follows:

BANK OF NEW ZEALAND.

ESTABLISHED 1861. OFFICE in London: 1, Queen Victoria Street, E.C. *Manager*—C. G. TEGETMEIER.

At 31st March, 1895, the Paid-up Capital was **£900,000,** in 100,000 Shares of **£5 5s.** each, and 50,000 Shares of **£7 10s.** each, fully paid. The reserve liability was **£10** per Share. Of this reserve liability two calls each of **£3 6s. 8d.** per Share were made, the one in December, 1894, and the last in September, 1895, leaving the reserved liability **£3 6s. 8d.** per share. In September, 1895, the New Zealand Parliament ordered the assets of the Bank to be written down by **£1,340,000.** Parliament in September, 1895, authorised the creation of **£500,000** 3½ per cent. Preference Shares, guaranteed by the New Zealand Government, in addition to the **£2,000,000** of 4 per cent. Preference Stock guaranteed by the New Zealand Government, and issued in 1894. In November, 1895, the Bank of New Zealand took over the Colonial Bank of New Zealand.

At 31st March, 1900, the Capital consisted of the **£2,000,000** of 4 per cent. Guaranteed Stock, **£500,000** of Preference Shares. "Subscribed for by Government of New Zealand," and **£419,519** paid up on shareholders capital of **£500,000.**

Balance Sheet at March 31, 1900, *submitted to Meeting in Wellington, August* 17, 1900.

This Bank suspended payment on May 9, 1893, was reconstructed on the following basis, and was reopened June 19, 1893.

DEPOSITORS agreed to accept for, say, four-fifths of their deposits, negotiable deposit receipts bearing interest at present rate until due date, and thereafter at 4½ per cent., and repayable in equal amounts at the expiration of 5, 6, and 7 years from date of incorporation of new bank. For balance of one-fifth, 5 per cent (minimum) Preference Shares; or negotiable deposit receipts payable either at 12 years from date of incorporation bearing interest at 4½ per cent. for first 7 years, and 4 per cent. thereafter, or at 7 years bearing interest at 4 per cent.

The Bank has paid four Instalments of 10 per cent. each and two of 20 per cent. on the Deferred Deposit Receipts. Of the balance of £1,556,000 an instalment of one-third was paid 13th March, 1899, a further third was paid on 12th September, and the balance was paid on the 13th March, 1900.

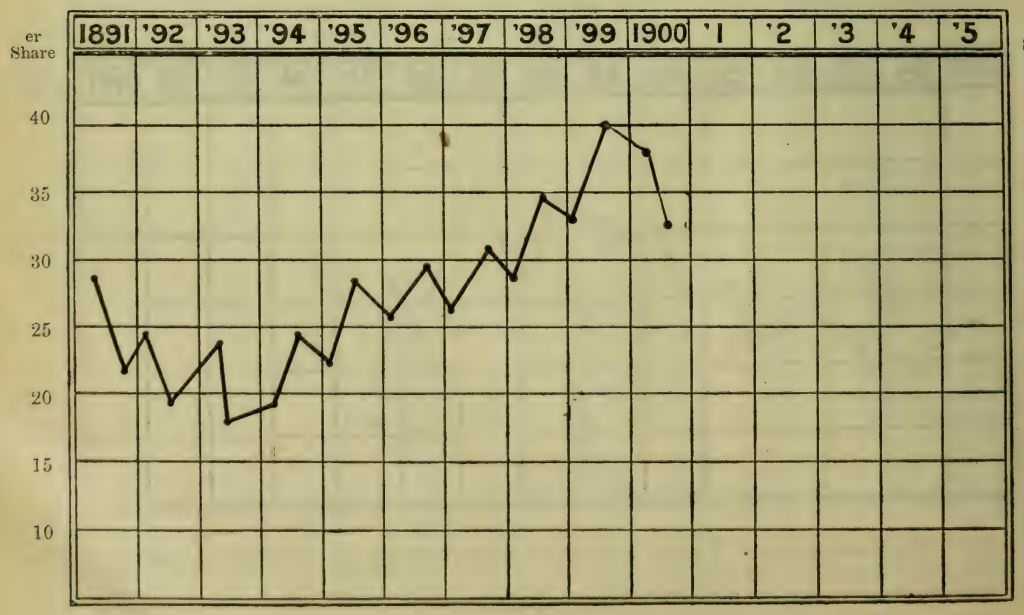
SHAREHOLDERS agreed to accept two ordinary £10 shares, £2 10s. paid up, for every share (conditions above named) held in the old bank. £2 10s. payable by half-yearly instalments within 5 years, and the remaining £5 as the Directors may consider advisable.

The course of price of the Shares, on the London Stock Exchange has been approximately as follows :—

From 1883 to 1889 the shares were £25. For these years one fifth of the quotation is given for purpose of comparison with the divided share of £5 paid.

* Suspended May 9, 1893, and dealings in the Shares ceased.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.



ESTABLISHED 1853. OFFICE in London: Hatton Court, Threadneedle Street, E.C. *Managers*—WILLIAM A. MAIN, CALEB LEWIS.

CAPITAL **£800,000** in Shares of **£20**, fully paid-up, with further liability of **£20** per Share.

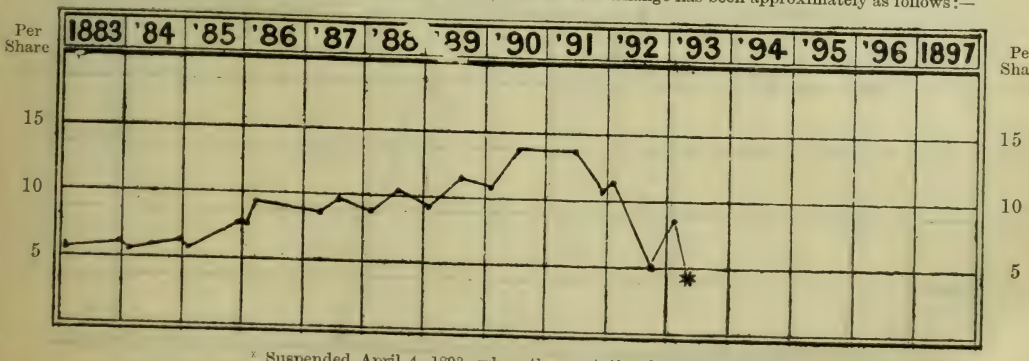
This Bank suspended payment on April 4, 1893, was reconstructed on the following basis, and was reopened May 10, 1893.

DEPOSITORS agreed to accept for, say, two-thirds of their deposits, deposit receipts repayable on the expiration of five years from the due dates of the old deposits, bearing interest until such due dates at the rate now payable, and thereafter at 4½ per cent. For the balance of one-third, 5 per cent. (minimum) Preference Shares.

SHAREHOLDERS agreed to accept one ordinary £10 share, £4 paid up, for every £10 share, £4 paid, held in the old Bank. Calls of the remaining £6 payable by quarterly instalments in 6 years. The £4 per share paid up has since been written off reducing the £10 shares to £6.



In 1896 it was found that the Bank could not carry out the plan of 1893, and the following plan was agreed to:—The new Bank to repay one-third (£1,924,600) of the Extended Deposits (£5,773,780) by instalments, one-tenth, 30th September, 1896; one-tenth, 30th September, 1897; and one-fifth each, 30th September, 1899, 1901, 1903 and 1906; the substituted Deposit Receipt to bear interest at the rate of 3 per cent. until 30th September, 1899, and thereafter 3½ per cent. (The Bank has the power of paying off all or any part of these Deposit Receipts, on giving three months notice). The balance of two-thirds of the Extended Deposits are to bear interest at 3 per cent., and to be repaid as the assets are realised.

The Preference Shares are to receive 4 per cent. dividends when earned, of which only 2 per cent. is cumulative up to 1899, and 3 per cent. thereafter.

Call of the last £3 on the Ordinary Shares was extended to twelve instalments of 5s. each, payable half-yearly instead of quarterly.

In October, 1897, the Special Assets Trust Co. was formed to take over the Deferred Deposits of the Old Bank, and these are now eliminated from the Bank's Balance Sheet. The specially assigned assets for the redemption of the deposits are held in trust by the Directors for the Assets Company.

The course of price of the Old Shares, £4 paid, on the London Stock Exchange has been approximately as follows:—

* Suspended April 4, 1893, when the quotation became nominal.

ENGLISH, SCOTTISH, AND AUSTRALIAN BANK, LIMITED.

Formerly THE ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

ESTABLISHED 1852. RECONSTRUCTED 1893. OFFICE in London: 38, Lombard Street, E.C. *Secretary*—JOHN PATERSON.

Up to November, 1897, the AUTHORISED CAPITAL was **£1,575,000**, in **£35** Shares, and the PAID-UP CAPITAL was **£970,987**, being **£22 10s.** per **£35** Share.

In November, 1897, it was resolved to reduce the AUTHORISED CAPITAL to **£1,078,875**, divided into **£25** Shares with **£12 10s.** paid up, and an Uncalled Liability of **£12 10s.** per Share.

Balance Sheet in London and in the Colonies on June 30, 1900, *submitted at Meeting in London, November* 7, 1900.

The old Bank suspended payment on April 12, 1893, was reconstructed under the title of "THE ENGLISH, SCOTTISH, AND AUSTRALIAN BANK, LIMITED," on the following basis, and was reopened August, 1893.

DEPOSITORS agreed to accept for one-half of their deposits, equal proportions of 4 per cent. Debenture Stock, and Terminable 4 per cent deposit receipts repayable in five equal annual instalments, beginning at the expiration of seven years from date of incorporation of new bank; and for the remaining half 4½ per cent. Cumulative Inscribed Deposit Stock.

SHAREHOLDERS agreed to accept one Ordinary £35 share, £10 paid up, for every share (conditions above named) held in the old bank, of which £5 was called up at once. and £7 10s. was payable in three equal instalments at 6, 12, and 18 months. It is not intended to call up the remaining £12 10s. At the meeting in November, 1897, it was decided to write off £10 per share, thus reducing the amount paid up to £12 10s. per share.

At the end of 1895, the following amendments to the original reconstruction plan were put forward: (1) To pay off two-fifths of the 4 per cent. Terminable Deposit Receipts, and to convert the remaining three-fifths into 4 per cent. Perpetual Debenture Stock; (2) To split the 4½ per cent. Inscribed Deposit Stock into two halves, *viz.*: (*a*) 3 per cent. Perpetual Preferred Stock, with interest payable as a fixed charge; (*b*) 3 per cent. Redeemable Deferred Stock, with interest payable only out of net profits, subject to setting aside 25 per cent. of the sum declared by the Directors in any one year to be available for dividend on Ordinary Share Capital, towards augmenting the interest on the Deferred Stock, up to the full rate of 4½ per cent. per annum. In the year ended June 30, 1897, the Terminable Deposit Receipts due in 1900 and 1901, amounting to £344,088, were paid off, and in 1897-8 the indebtedness was further reduced £117,545.

The course of price of the £20 Shares on the London Stock Exchange has been approximately as follows:—

* Touched £6 and the quotation became nominal, as the Bank suspended payment April 12, 1893.

LONDON BANK OF AUSTRALIA, LIMITED.

Formerly THE LONDON CHARTERED BANK OF AUSTRALIA.

ESTABLISHED 1852. OFFICE in London: 2, Old Broad Street, E.C. *Secretary*—F. J. CURTIS.

SUBSCRIBED CAPITAL **£1,645,020.** Paid-up **£742,985,** in Ordinary Shares of **£30** with **£15** paid, and **£171,930** 5½ per cent. Cumulative Preference Shares of **£10** fully paid.

In 1899 £10 per share has been written off, reducing the amount paid on the Ordinary from £25 to £15 per share.

Balance Sheet on December 31, 1899, *submitted to Meeting in London, May* 21, 1900.

DR.	£	CR.	£
Note Circulation	155,533	Coin, Bullion, and Notes of other Bank	773,223

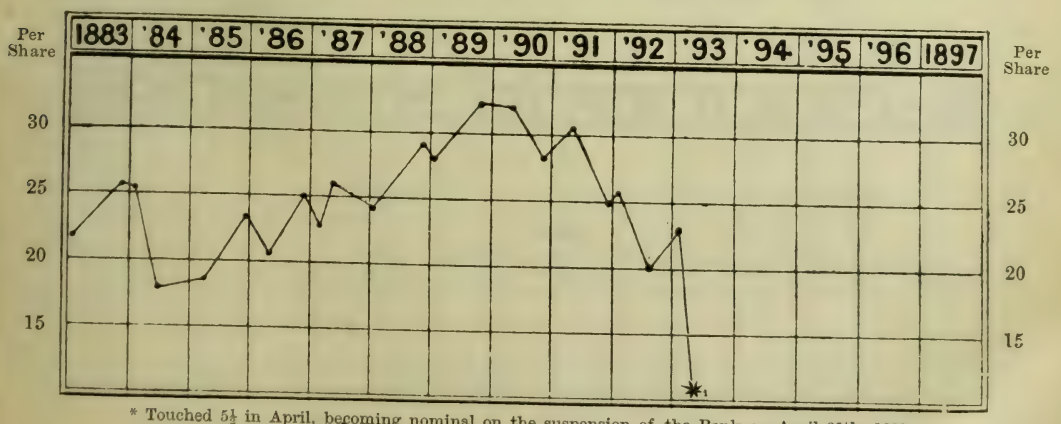
Profit and Loss	19,628		
	£6,615,174		£6,615,174

* Of this £318,953 were paid off on May 16, 1900, and a further £318,953 on January 1, 1901. The latter amount was not due till 1911.



The old Chartered Bank suspended payment on April 25, 1893, was reconstructed under the title of "THE LONDON BANK OF AUSTRALIA, LIMITED," upon the following basis, and was reopened August 8, 1893.

DEPOSITORS agreed to accept 5½ per cent. (minimum) Preference Shares equal to amount of deposits or *pro rata*. For balance of deposits unexpended in taking up Preference Shares, 4½ per cent. deposit receipts were given. All these have now been paid off, except those falling due 1st July, 1911, for £638,000, and 1st July, 1917, for £957,000.

SHAREHOLDERS agreed to accept one Ordinary £40 share, £15 paid up, for every £20 share, with a Reserve Liability of £20, held in the old bank. £10 payable by November 1, 1894, £2 10s. according to judgment of Directors, and £12 10s. only in the event of liquidation.

A modification of the 1893 plan, owing to the fall in the value of money in the Colony making it impossible for the Bank to pay 4½ per cent. on its Deferred Deposit Receipts, was sanctioned in July, 1897. The Bank now pays 3 per cent. fixed interest and a further 1½ per cent. if earned. The unpaid interest is placed to a contingent liability account and does not affect the current and new business of the Bank.

The course of price of the £20 Shares on the London Stock Exchange has been approximately as follows:—

* Touched 5½ in April, becoming nominal on the suspension of the Bank on April 25th, 1893.

NATIONAL BANK OF AUSTRALASIA, LIMITED.

Formerly NATIONAL BANK OF AUSTRALASIA.

ESTABLISHED 1858. OFFICE in London: 123, Bishopsgate Street Within. *London Manager*—A. W. CUNNINGHAM.

This Bank suspended payment on April 29, 1893, was reconstructed on the following basis, and was reopened June 26, 1893.

DEPOSITORS agreed to accept for, say, two-thirds of their deposits, 4½ per cent. deposit receipts repayable in equal amounts at the expiration of 5, 6, and 7 years from date of incorporation of new bank. For balance of one-third 5 per cent. (minimum) Preference Shares; or, a deposit receipt repayable in 12 years, and bearing interest at 4½ per cent. for first seven years, and thereafter at 4 per cent.; or 4 per cent. deposit receipts repayable in equal amounts in 5, 6, and 7 years.

SHAREHOLDERS agreed to accept one Ordinary £10 share, £4 paid up, for every share (conditions above named) held in the old bank. £3 payable over 4 years in instalments of 5s., and the balance of £3 as the Directors may consider advisable.

The Deferred fixed deposits were finally paid off on March 13, 1900.

The course of price of the Shares of £4 paid on the London Stock Exchange has been approximately as follows:—

* Fell to 4½ in April, and became nominal on the suspension of the Bank on April 29, 1893.

NATIONAL BANK OF NEW ZEALAND, LIMITED.

	£7,334,185

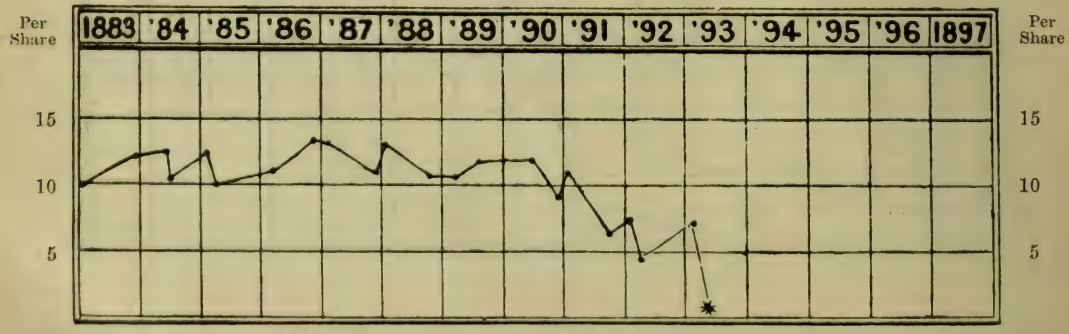
This Bank suspended payment on May 15, 1893, was reconstructed on the following basis, and was reopened August 2, 1893.



DEPOSITORS agreed to accept twelve deposit receipts in equal instalments of the amount due, bearing interest until due date at the rate now payable, and thereafter at 4½ per cent., repayable at intervals of six months, beginning at expiration of six years from the sanctioning of the scheme; or negotiable deposit receipts with coupons attached on similar terms to above; or Inscribed 4½ per cent. Deposit Stock, repayable only at the option of the Bank on six months' notice.

SHAREHOLDERS agreed to accept one share of £8, £3 paid, for every share (conditions above) held in old bank. £3 to be called up at the rate of £1 per annum.

In consequence of the renewed difficulties of the Bank, the Queensland Government, in August 1896, appointed a Committee of Investigation. This Committee revalued the property as follows:—

Total amount of securities examined, £7,791,693, amount of unproductive advances not returning interest at present, £3,000,000, of which it is estimated as bad, £2,435,423. Deducting Shareholder's Fund, £1,182,613, from the estimated losses, the deficit is £1,252,810. The Committee recommend that the private holders of deferred deposit receipts should convert their receipts into shares, and that the shareholders should surrender their equity of redemption in consideration for being released from the further liability of £2 per share, or £320,000 in all.

The course of price of the Shares of £5 paid, on the London Stock Exchange, has been approximately as follows:—

* Fell to 5s. per share in May, and became nominal on the suspension of the Bank on May 15, 1893.

UNION BANK OF AUSTRALIA, LIMITED.

Westport Harbour Board: £150,000 Four per Cent. Debentures; issued 1885; minimum price £95; redeemable 1925; coupons 1st March and 1st September.

FIJI.

Loan of £150,000 Four-and-a-Half per Cents.; issued March, 1881, at £99 10s. 6d.; £99 net ex. interest; coupons 15th March and 15th September; principal repayable by accumulative sinking fund of 1 per cent. by purchase, or repayment of debentures in rotation any time after 1886. Amount outstanding, £109,500.

COMMISSIONERS FOR TAKING AFFIDAVITS, &c., FOR THE AUSTRALASIAN COLONIES IN ENGLAND.

(Unless otherwise stated, the addresses refer to London.)

Arnold, Henry L. (Hicks, Arnold & Mozley), 35, King Street, W.C., Commisioner for affidavits for Victoria.

Aston, F. T., Commissioner for Affidavits for New Zealand, Queensland, Tasmania, Western Australia, South Australia and Victoria, (Supreme Court) 61, Gresham House, Old Broad Street, E.C.

Attlee, Henry (Druces & Attlee), Commissioner for affidavits for Queensland, 10, Billiter Square, E.C.

Baker, F. A. (Baker & Nairne), 3, Crosby Square, E.C., Commissioner for acknowledgments for New Zealand.

Bartlett, John, affidavits and acknowledgments for New Zealand, 26-7, Bush Lane.

Baxter, Wynne, E. (Wynne-Baxter & Keeble), Commissioner for affidavits for South Australia, 9, Laurence Pountney Hill, E.C.

Biddle, F. W. (Phelps, Sedgwick & Biddle), 22, Aldermanbury, E.C., Commissioner for Affidavits for West Australia.

Blyth, Edmund Kell (Blyth, Dutton, Hartley & Blyth), 112, Gresham House, E.C., Commissioner for affidavits for New South Wales, Victoria, Queensland, and South Australia.

Boydell, W. T., Commissioner for affidavits for New South Wales, 1, South Square, Gray's Inn.

Boyer, E. L., Commissioner for affidavits, Western Australia, 6, Moorgate Street.

Braithwaite, Stephen Nelson (Travers, Smith, Braithwaite, and Robinson), 4, Throgmorton Avenue, E.C., Commissioner for affidavits and acknowledgments for New Zealand.

Brandon, E. M. (G. S. & H. Brandon), Commissioner for affidavits and acknowledgements for Victoria, 15, Essex Street, Strand, W.C.

Burgin, Charles (Denton, Hall & Burgin), Commissioner for affidavits, 15, Gray's Inn Square.

Burn, M. J. (Burn & Berridge), Commissioner for affidavits for Western Australia, 11, Old Broad Street, E.C.

Campion, H. G. (H. G. Campion & Co.), 90-1, Queen Street, Cheapside, Commissioners for affidavits for Queensland, New Zealand, South Australia, and Victoria; Commissioner for affidavits and acknowledgments, married women, Western Australia.

Carter, Reginald (Sayle, Carter & Co.), Commissioners for affidavits for New South Wales, South Australia, New Zealand, Queensland, Victoria, and Tasmania, 35, Queen Victoria Street.

Charlton, J. B. A., Commissioner for affidavits for New Zealand, 17, St. Swithin's Lane.

Clark, F. H. (Edgar, Robbins & Clark), Commissioner for affidavits for New Zealand, 21, Finsbury Circus.

Corbin, Joseph John (Corbin & Greener), 85, Gresham Street, E.C., Commissioner for affidavits for South Australia.

Cox, Frank Lockhart, M.A., 107, Temple Chambers, Temple Avenue, E.C., Commissioner for Supreme Courts of Victoria, South Australia, Tasmania and West Australia.

Coxe, P. H. (Bompas, Bischoff, Dodgson, Coxe & Bompas), Commissioner for affidavits for Queensland, New South Wales, Victoria, South Australia, Western Australia, Tasmania, and New Zealand, 4, Great Winchester Street, E.C.

Curtis-Hayward, A. C. (Bowman & Curtis-Howard), Commissioner for affidavits for Queensland, 21, Bedford Row.

Darley, J. J. (Darley & Cumberland), Commissioner for affidavits for Victoria, 36, John Street, Bedford Row, W.C.

Davidson, J. H. (Davidson & Morriss), Commissioner for affidavits for Queensland, 40 and 42, Queen Victoria Street, E.C.

Davis, Mark, 26, Basinghall Street, E.C., Commissioner for affidavits for Queensland and Victoria.

Dawson, O. E., Commissioner for affidavits for South Australia and New Zealand, 12, Hart Street, Bloomsbury Square.

Dodd, G. R., Commissioner for affidavits for South Australia, 54, New Broad Street.

Donnison, Alfred (Donnison & Son), 147, Leadenhall Street, E.C., Commissioner for affidavits for Queensland and New Zealand.

Duffield, W. W. (Duffield & Bruty), 40, New Broad Street, E.C., Commissioner for affidavits for Tasmania.

Dutton, Frederick (Blyth, Dutton, Hartley & Blyth), 112, Gresham House, Old Broad Street, E.C., Commissioner for affidavits for Victoria, Tasmania, New South Wales, Queensland, Western Australia, South Australia and New Zealand.

Field, Basil (Field, Roscoe & Co.), Commissioner for Affidavits for South Australia, New South Wales, Victoria and Tasmania, 36, Lincoln's Inn Fields, W.C.

Fisher, G. H. K. (Fishers), Commissioner for affidavits for South Australia, 24, Essex Street, Strand.

Flegg, W. M. (Flegg & Son), Commissioner for affidavits for South Australia, Tasmania, Victoria, New Zealand, and New South Wales, Suffolk House, 3, Laurence Pountney Hill, E.C.

Fox, Chas. James (Snow, Snow & Fox), Commissioner for oaths, Commissioner for affidavits for New South Wales and Victoria, 7, Great St. Thomas Apostle, Queen Street, E.C.

Freeman, C. R., Commissioner for oaths and acknowledgments for Western Australia, 39, Crutchet Friars.

Galbraith, J. H. (Light & Galbraith), 32, Victoria Street, S.W., Commissioner for the Supreme Courts of New South Wales, Western Australia, South Australia, Queensland, and New Zealand.

Geare, H. C. (Geare, Son & Pease), 57, Lincoln's Inn Fields, W.C., Commissioner for affidavits for New South Wales, South Australia, Victoria, and Tasmania, Supreme Court, Fiji.

Gedge, Sydney (Gedge, Kirby & Millett), 11, Great George Street, S.W., Commissioner for affidavits for South Australia.

Girling, William B. (Blair & W. B. Girling), 1, Wool Exchange, Basinghall Street, E.C., Commissioner for affidavits for New South Wales.

Glasier, Wm. Bedford, Commissioner for oaths and affidavits, &c., for New South Wales, 47, Essex Street, Strand, W.C.

Godfrey, Edward (Godfrey & Robertson), 40, Chancery Lane, W.C., Commissioner for affidavits for Victoria and New South Wales.

Godfrey, J. Perry, Commissioner for affidavits for New South Wales, Victoria, South Australia and West Australia, 6, South Square, Gray's Inn, W.C.

Gordon E. J., 51, Lincoln's Inn Fields, W.C., Commissioner for affidavits &c., for Supreme Court, New South Wales.

Greenfield, John, 37, Queen Victoria Street, E.C., Commissioner for affidavits for New South Wales, Victoria, South Australia, Queensland and Western Australia.

Griffen, George Herbert, 36, Essex Street, Strand, W.C., Commissioner for affidavits for New Zealand.

Harper, F. B. (Lumley & Lumley), Commissioner for affidavits for South Australia, 15, Old Jewry Chambers, E.C.

Harris, Wilmer M. (Scorer & Harris and Harrison Bros.), Commissioner for affidavits for New Zealand, South Australia, New South Wales, Victoria and Western Australia. 17, Gracechurch Street, E.C., and 53-54, Chancery Lane, W.C.

Harston, E. F. B., 4, Bishopsgate Street Within, E.C., Solicitor, Supreme Court, New Zealand, and Commissioner for affidavits for Western Australia and New Zealand.

Harvey-Samuel, F. H., Commissioner for acknowledgments for Western Australia, 1, Clement's Inn, Strand, W.C.

Hepburn, W. A., Leathersellers' Hall, St. Helen's Place, E.C., Commissioner for affidavits for New Zealand.

Herbert, W. H., Commissioner for affidavits for South Australia, Western Australia, and Tasmania, 10, Cork Street, Burlington Gardens, W.

Hewlett, Richard, 31, Essex Street, Strand, W.C., Commissioner for affidavits for South Australia.

Heywood Benj. Arthur (Bridges, Sawtell, Heywood & Co.), 23, Red Lion Square, W.C., Commissioner for affidavits for Victoria, South Australia and Queensland.

Hill, Frederick, Commissioner for affidavits for Tasmania, 73, Queen Victoria Street, E.C.

Hind, J. (Hind & Robinson), Commissioner for affidavits for Victoria, 8, Stone Buildings, Lincoln's Inn.

Hodges, Oliver Thos. (Hodges & Pike), Commissioner for affidavits for New South Wales, 60, Mark Lane, E.C.

Humphreys, Charles (C. O. Humphreys, Son & Kershaw), Gilt-spur Chambers, Holborn Viaduct, E.C., Commissioner for affidavits for Victoria.

Jennings, Cecil F. J., Commissioner for affidavits and acknowledgments, New South Wales, 27, Walbrook, E.C.

Jones, Charles Edward (Young, Jones, & Co.), 2, St. Mildred's

Court, E.C., Commissioner for affidavits for New South Wales, Victoria and South Australia.
Joseph, George S., B.A. (Tamplin, Tayler & Joseph), 165, Fenchurch Street, E.C., Commissioner for affidavits for Victoria.
Joseph, Jerrold Nathan (Joseph & Hyam), Commissioner for affidavits for New Zealand and New South Wales, 17, Finsbury Pavement, E.C.
Jupp, E. H., Official Assignee of New South Wales, 7, St. Mildred's Street, Mansion House.
Keen, Grinham (Keen, Rogers & Co.), 24, Knightrider Street, E.C., Commissioner for affidavits for Victoria.
Kennedy, C. F. (Paddison, Chapell & Kennedy), Commissioner for affidavits for Victoria, Western Australia, South Australia, New Zealand, Fiji, and New South Wales, 110, Cannon Street.
Kent, Frederick (F. Kent & Co.), Law Agent for South Australia and Brisbane, 97, Cheapside, E.C.
Kimbers, Henry, M.A. (Kimbers & Boatman), 79, Lombard Street, E.C., Commissioner for affidavits for New South Wales and Queensland.
Knapp, W. R., F.R.H.S., Commissioner for affidavits for South Australia, 38, Walbrook.
Langham, A. C., Commissioner of Supreme Court of Victoria, 10, Bartletts Buildings, and 174, Blackfriars Road.
Leathley, D. W. B. (Leathley & Willes), 59, Lincoln's Inn Fields, W.C., Commissioner for affidavits for Western Australia.
Leefe, Octavius (Leefe & Leefe), Commissioner for affidavits for Fiji, 1, Quality Court, Chancery Lane.
Letts, H. (Wedlake, Letts & Wedlake), 3, Serjeants' Inn, Temple, E.C., Commissioner for affidavits for Victoria.
Lewis, Sir G. H., Kt. (Lewis & Lewis), Commissioner for affidavits for Victoria, 10, 11, 12, Ely Place, Holborn.
Light, Geo. M. (Light & Galbraith), Commissioner for affidavits and acknowledgments for New South Wales, 32, Victoria Street, S.W.
Lovibond, Henry (Lovibond & Co.), Barrister and Solicitor for Supreme Court of Victoria, 20, Gt. Eastern Road, Stratford, E.
Mander, Charles John (Mander & Watson), 9, New Square, W.C., Commissioner for affidavits for New South Wales.
Mason, R. S., Commissioner for acknowledgments and affidavits for Western Australia, 70, Lincoln's Inn Fields.
Massey, W. T. (Shaen, Roscoe, Massey & Co.), 8, Bedford Row, W.C., Commissioner for affidavits for South Australia.
Masterman, Henry Chauncey (Hughes & Masterman), 59, New Broad Street, E.C., Commissioner for affidavits for South Australia.
Minchin, J. G. C. (Minchin & Co.), 22 and 23, Lawrence Pountney Lane, E.C., Commissioner for affidavits for Tasmania and New Zealand.
Munns, Arnold S. (Munns & Longden), 8, Old Jewry, E.C., Commissioner for affidavits for South Australia.
Musgrave, J. V., 44, Gresham Street, E.C., Commissioner for affidavits for South Australia, Victoria, Tasmania, New Zealand, and Western Australia.
Nash, E. H. (Wood, Bigg & Nash), 6, Raymond Buildings, Gray's Inn, W.C., Commissioner for affidavits for Queensland.
Negus, Wm., Commissioner for oaths and affidavits for Western Australia and New Zealand, 36, Bloomsbury Square, W.C.
Nicol, Geo. (Nicol, Son & Jones), 39, Lime Street, E.C., Commissioner for affidavits for Victoria.
Nisbet, H. C. (Nisbet, Daw & Nisbet), 35, Lincoln's Inn Fields, W.C., Commissioner for affidavits for Tasmania and Victoria.
Ommanney, C. H. (Sutton, Ommanney & Rendall), 3 and 4, Great Winchester Street, E.C., Commissioner for affidavits &c. for Western Australia and South Australia.
Parish, Frederick (Parish & Hickson), 23, St. Swithin's Lane, E.C., Commissioner for affidavits for South Australia, Queensland, Tasmania, New Zealand, Western Australia, and Fiji.
Paterson, W. H., Commissioner for affidavits for New South Wales, South Australia, Victoria, Western Australia, 16, Finsbury Circus, E.C.
Pearce, Joseph, Devereux Buildings, Devereux Court, Strand, W.C., Commissioner for affidavits for Victoria, and Western Australia and Tasmania.
Peddar, S. H., Palmerston Buildings, Old Broad Street, E.C., Commissioner for New South Wales, Queensland, South Australia, Western Australia, Tasmania and New Zealand.
Phelps, Thomas (Phelps, Sidgwick & Biddle), 22, Aldermanbury, E.C., Commissioner for affidavits for Victoria and New Zealand.
Pollock, H. F., M.P., (Paine, Son & Pollock), 11, St. Helen's Place, E.C., Commissioner for affidavits for New South Wales, South Australia, Western Australia, New Zealand and Fiji.
Rawlinson, C. J., Commissioner for affidavits and acknowledgments of married women for Western Australia, 47, New Broad Street.
Reffe, R. W., Official Assignee of New South Wales, 14, Finsbury Circus.
Richardson, Frank (F. Richardson & Sadler), 28, Golden Square, W., Commissioner for affidavits for Victoria.
Rivington, Chas. Robert (Rivington & Son), 1, Fenchurch Buildings, E.C., Commissioner for affidavits for Queensland.
Roberts, Thos. V. (Young, Jones & Co.), 2, St. Mildred's Court, Poultry, E.C., Commissioner for affidavits for Victoria.
Rogers, G. R. (Chas. Rogers, Sons & Russell), 13, Victoria Street, S.W., Commissioner for affidavits for New South Wales, Victoria, and Tasmania.
Rubinstein, J. S. (Leggatt, Rubinstein & Co.), Commissioner for affidavits for New South Wales, South Australia, New Zealand, Fiji and Tasmania, 1, Gray's Inn, W.C.
Shaw, Samuel, junr. (Shaw & Son), Commissioner for affidavits for Western Australia, 52, Queen Victoria Street.
Shaw, J. E., Commissioner for affidavits for New Zealand and Queensland, Arundel Street, Blackheath.
Simpson, J. P., B.A., Oxon., Commissioner for affidavits for New South Wales, 4, New Court, Carey Street.
Sladen, St. Barbe (Sladen & Wing), 1, Delahay Street, Westminster, S.W., Commissioner for affidavits for New South Wales, Victoria and Tasmania.
Snell, F. A. (Snell & Sons), Commissioner for affidavits for New Zealand, 112, Great George Street, Mansion House.
Snow, W. E. (Snow & Fox), 7, Great St. Thomas Apostle, Queen Street, E.C.
Solomon, G. E., Commissioner of oaths and affidavits for New Zealand, New South Wales, Tasmania, South Australia and Western Australia, 8 & 9, Great St. Helen's, E.C.
Stanley, Frederick (Stanley, Woodhouse, & Hedderwick), 45, Ludgate Hill, E.C., Commissioner for affidavits for Victoria.
Steele, Harmer, B.A., Cantab, Commissioner for affidavits for New Zealand, New South Wales, South Australia, Western Australia and Tasmania, 21, College Hill.
Sykes, John William, Commissioner for affidavits for Western Australia, New South Wales, Tasmania, and South Australia, 7 and 8, Great Winchester Street, E.C.
Trinder, A. (Trinder, Capron & Co.), Commissioner for affidavits for Queensland, South Australia and Western Australia, 47, Cornhill.
Warren, G. F. (Scorer, T. Harris & Harrison Bros.), Commissioner for affidavits for New Zealand and South Australia, 53 and 54, Chancery Lane.
Warren, H., Commissioner for affidavits for New Zealand, 32, Bedford Row.
Watkin, J. W., Commissioner of affidavits, &c., New South Wales, Queensland, New Zealand, South Australia, Western Australia, Fiji and Tasmania, 11, St. Thomas Street, E.C., and 22, Abington Street, S.W.
Watts, C. J. (Duff & Watts), Commissioner for affidavits for Victoria, 4, Nicholas Lane.
Western, Edward Young (Western & Sons), 35, Essex Street, Strand, W.C., Commissioner for affidavits for South Australia.
Wild, G. L. (Kisch, Wake & Wild), 148, Aldersgate Street, E.C., Commissioner for Supreme Court of Victoria, affidavits for Western Australia.
Woodhouse, John (Stanley, Woodhouse & Hedderwick), 45, Ludgate Hill, E.C., Commissioner of the Supreme Court of Queensland.

TELEGRAPHIC COMMUNICATION BETWEEN ENGLAND AND AUSTRALIA.

TELEGRAPHIC communication with the Australian Colonies was established on Tuesday, October 22, 1872, when the first congratulatory telegram was received by the Lord Mayor of London from the Mayor of Adelaide.

In April, 1869, a submarine cable was laid between Tasmania and Victoria. In 1876, a cable was successfully laid between New South Wales and New Zealand, and in the course of 1877 the telegraph line viâ Eucla, connecting Western Australia with South Australia, was finished, thus linking the whole of the Australian group in telegraphic communication with Great Britain.

The telegraphic service to Australia is under the control of the Eastern Extension Telegraph Company, in conjunction with the Eastern Company, Limited, whose offices are at Winchester House, 50, Old Broad Street, London, E.C. Messages marked "*viâ* Eastern" may be forwarded from the Eastern Telegraph Company's Station, No. 11, Old Broad Street, or they may be sent through the Indo-European Telegraph Company, Limited: offices, 18, Old Broad Street. In the latter case the messages should be marked with the words "*viâ Teheran*," or "*viâ Indo*." Messages can be sent from any of the Post Office stations. The route and length of the Eastern and Eastern Extension Companies' cables and land lines are as follows:—

LENGTH OF CABLES AND LAND LINES FROM LONDON TO AUSTRALIA.

	Miles.
London to Porthcurno	*316
Porthcurno to Gibraltar	1,188
Gibraltar to Malta	1,118
Malta to Alexandria	925
Alexandria to Suez	256
Suez to Aden	1,445
Aden to Bombay	1,851
Bombay to Madras	*720
Madras to Penang	1,497
Penang to Singapore	398
Singapore to Banjoewangie	920
Banjoewangie to Port Darwin	1,139
Banjoewangie to Roebuck Bay, W.A. ...	890
Port Darwin to Adelaide	*2,543
Sydney to Nelson	1,283
Victoria to Tasmania	180

Exclusive of duplicate and triplicate cables.
* Land lines.

From Port Augusta to Adelaide, S.A., the length of line is 196 miles. From Port Augusta the overland wire stretches eastwards to Sydney, N.S.W., a distance of 650 miles. The connec-

tion here takes place with New Zealand, the submarine cable commencing at Botany, and terminating at Wakapuaka, a distance of 1,283 miles. From Wakapuaka the overland wire is carried to White's Bay (88 miles), thence by cable to Wellington (41 miles), from which centre all the towns and cities of New Zealand are communicated with. The Tasmanian Cable starts from Flinders, near Cape Schanck, Victoria, and terminates at Low Head (Tamar), Tasmania; length, about 180 miles. In November, 1886, a cable was laid from the extreme northern point of Queensland to Thursday Island.

In order to avoid interruption, every section of the Eastern Extension Co.'s lines has been duplicated—some triplicated—and there are two steamers kept fully equipped, and ready to proceed to sea on a very short notice to restore communication on any cable that is interrupted; a continuous service is therefore, as far as possible, assured. The following is the number of cables laid over each section between Australia and England:—

Australia-Banjoewangie-Singapore	3
Singapore-Penang	3
Penang-Madras	2
Bombay-Aden	3
Aden-Suez	4
Suez-Alexandria (land lines)	2
Suez-Port Said (land lines)	2
Port Said-Alexandria (cable, duplicate) ...	1
Alexandria-Malta	4
Malta-Gibraltar	3
Malta-Marseilles (alternative)	2
Gibraltar-England	4

From Singapore there is an alternative route *viâ* Siberia, and from Bombay there are alternative routes *viâ* Persia, Turkey, and *viâ* South Africa, so that in the event of the whole of the European routes being closed—an unlikely occurrence—messages could be sent *viâ* South Africa.

Tariff of Charges.—The Eastern Extension Company's charge for a message between London and the various Australian colonies, or *vice versâ*, is as follows:—

	s.	d.	
To South Australia	4	9	per word.
,, Victoria	4	10	,,
,, New South Wales	4	11	,,
,, Western Australia	4	9	,,
,, Queensland	5	1	,,
,, Tasmania	5	5	,,
,, New Zealand	5	2	,,

The maximum length of a word in plain language is fixed at fifteen letters, any additional letters being counted as extra words at the rate of fifteen letters to the word.

In code language and in plain language (if code used in telegrams) the maximum length of a word is fixed at ten letters. Code words containing more than 10 letters, and words not belonging to any of the languages admitted for international correspondence, are charged for at the rate of five letters to the word.

Reductions have been made in the case of Press messages, to 1s. 4d. per word for South and Western Australia and Tasmania, 1s. 10d. for Victoria and New South Wales, 1s. 11d. for Queensland, and 2s. for New Zealand. For Government messages, 2s. 6d. per word for South and Western Australia and Tasmania, 3s. 7d. for Victoria, 3s. 8d. for New South Wales, 3s. 10d. for Queensland, and 3s. 11d. for New Zealand.

Reuter's Telegram Company (Offices, 24, Old Jewry) undertakes the transmission of messages at the foregoing rates. The Company will register names and addresses free of charge.

The Sender's and Receiver's name and address, when registered, is charged as follows:—

	£	s.	d.	And for each additional word. s.	d.
To South Australia ...	0	9	6	4	9
,, Western Australia ...	0	9	6	4	9
,, Victoria	0	9	8	4	10
,, New South Wales ...	0	9	10	4	11
,, Tasmania	0	10	10	5	5
,, Queensland (*Viâ* Sydney)	1	1	0	5	3
,, New Zealand	0	10	4	5	2

The Company undertakes to remit money by cable to Australasia free of commission.

Passengers to Australia and New Zealand can have their arrival announced by telegraph to their friends or relatives at a charge of 10s. (from Queensland, £1). Reuter's Company has Agencies at Melbourne, Adelaide, Sydney, Brisbane, Charters Towers, Auckland, Wellington, Christchurch, Dunedin, Hobart, Invercargill, Napier, Perth, Coolgardie, Kalgoorlie, Launceston, and Newcastle, N.S.W. With the view of affording facilities for the economical transmission of private telegrams to and from India, Ceylon, China, Japan, Australia, New Zealand, and South Africa, the Company has introduced a feature in its telegraphic business, viz., to place its codes at the service of senders, by means of which telegrams may be sent at a considerable saving on the cost of their transmission in plain language. Telegrams so coded will in all cases be translated before delivery to the receiver, to whom a copy in plain language only will be handed. A fixed commission is charged on all messages in addition to the ordinary tariff rate. By this small payment, senders will enjoy the entire benefit of the saving resulting from the use of the Company's codes.

With a view to providing an efficient alternative service to Australia, the Eastern Extension Company, in conjunction with the Eastern Telegraph Company, have arranged with the Governments of South and West Australia and Tasmania to extend the new Cape Cable (*via* Gibraltar, St. Vincent, Ascension, and St. Helena) to Perth and Adelaide without any subsidy or guarantee, and to reduce the tariff between Great Britain and those Colonies to 4s. per word, from May 1st, 1900, to be followed by further reductions on a sliding scale down to 2s. 6d. per word as the traffic responds to the reductions. The only condition attached to the proposal is that the Company shall be accorded the same freedom of dealing directly with the public in Australia as prevails in this country and elsewhere.

The arrangement has been very favourably received by the Press, Chambers of Commerce, and mercantile communities generally in Australia, and it is expected that the new cables will be laid and opened for traffic early in 1902.

In 1893, an agreement was signed by the Government of Queensland and a French Company for the construction of a cable service between Queensland and New Caledonia, a distance of 900 miles. The French Government guaranteed a subsidy of £8,000, the Government of Queensland, £2,000, and the Government of New South Wales, £2,000. In consideration of this sum Queensland and New South Wales are entitled to the use of the cable for transmission of Government messages free of cost, up to the extent of the guarantee. The service is understood to be the first section of a proposed main Pacific cable, which is to connect Australia with Vancouver. The section was completed on October 16, 1893.

The question of a Pacific Cable to be constructed entirely under British control was one of the chief items considered by the delegates at the Conference which took place at Ottawa in 1894, and the Canadian Government afterwards obtained tenders for several different routes.

Pacific Cable.—About four years ago an Imperial Pacific Cable Board affirmed the practicability, and urged the advisability, of laying an all British Pacific cable between Vancouver and Australasia. A second representative cable board reported favourably upon the scheme during last year, and the colonies concerned—Queensland, New South Wales, Victoria, New Zealand, Canada—and the Imperial Government have all declared that they are prepared to proceed with it as proposed by the two boards.

The route decided upon is from Vancouver *via* Fanning or Palmyra Island, Fiji, and Norfolk Island, with branches from the last-named station to Auckland, New Zealand, and Queensland. The length of the cable over this route would be, allowing 10 per cent. for "slack" actually used, 7,986 nautical miles, viz., Vancouver to Fanning Island, 3,561, Fanning Island to Fiji, 2,093, Fiji to Norfolk Island, 961, Norfolk Island to New Zealand, 537, and Norfolk Island to Queensland, 834. Thereafter cablegrams would be dependent upon Canadian land lines and trans-Atlantic cables. Some 1,900 soundings over 500 fathoms in depth have been made, which relate directly to the route along the bed of the ocean, the greatest depth being 3,200 fathoms, but the general average is much less.

The original board made the following estimate of the annual expenses of the Cable:—

	Interest at 2¾ Per Cent. £	Interest at 2½ Per Cent. £
Interest	49,500	45,000
Sinking Fund	17,173	18,464
Working Expenses	22,000	22,000
Maintenance	70,000	70,000
Totals	158,673	155,464

Great Britain and Canada have agreed to defray five-ninths of the total cost—£1,800,000—New Zealand, one-eighth, and New South Wales, Queensland, and Victoria have pledged themselves to contribute the remainder between them.

The revenue to be derived from the cable cannot be more than guessed at. The Imperial Cable Board of 1896-7 selected 750,000 words as the basis for its calculation, and it further estimated that the existing Australasian traffic would increase at the rate of 10 per cent. per annum. On the assumption that the cable would come into actual use four years later, it anticipated that the returns for the first year, on a tariff of 2s. a word, would be £109,807, and that by the fourth year of its working the cable would become a payable concern. Mr. Chamberlain, Secretary of State for the Colonies, informed the Postmaster-General that it was proposed to charge 3s. a word for messages right through—that is, crossing Canada and the Atlantic, in addition to the Pacific—and 2s. for the Pacific cable section. He also intimated that he thought about five-twelfths of the Australasian traffic would go to the new cable, and as this amounted to nearly half a million of money last year, the revenue would be, on this basis, some £208,000, but the present rate of 4s. 10d. would be reduced by almost a half, and this would leave the probable receipts at £110,000 for the first year. No allowance has, of course, been made for the opening up of a possibly large cable traffic with America.

The Pacific Cable Committee have accepted on behalf of the Governments concerned the tender of the Telegraph Construction and Maintenance Co. for the manufacture and laying of the cable. Amount of tender is £1,795,000. The contract is to be completed by the end of 1902.

THE AUSTRALIAN POSTAL SERVICE.

The routes by which correspondence and other mail matter is transmitted to and from the Colonies and Great Britain, under contracts or arrangements entered into by the respective Colonial Governments, are:—

The Peninsular and Oriental Company's Service, taking mails to and from Western Australia, South Australia, New South Wales, Queensland, Tasmania, Fiji, and Victoria, *viâ* Suez and Colombo fortnightly, alternating with the Orient Company, thus making a weekly mail.

The Orient Company's line of steamers, taking mail matter for all the Colonies every fortnight.

The British India Company's Service (Queensland Royal Mail Line), conveying mails *viâ* Suez Canal, and Torres Strait, to and from Queensland, every four weeks.

The Californian Service, taking mails *viâ* San Francisco to and from New Zealand and New South Wales, every four weeks, alternating with the New Zealand Shipping Company, making a fortnightly mail.

The New Zealand Shipping Company, taking monthly mails direct to New Zealand, and alternating with the Shaw, Savill, and Albion Company's Service. Letters by this line must be marked "per New Zealand Shipping Co.'s Steamer."

The Shaw, Savill, and Albion Company's Line, taking mails direct to New Zealand every month, thus forming with the New Zealand Shipping Company a fortnightly service to New Zealand. Letters by this line must be marked "by Shaw, Savill Co."

To the above may be added the French Mail Service, worked by the Messageries Maritimes Company *viâ* Marseilles, Port Said, Suez, and Colombo, which carries mails regularly to the Colonies; also the German Mail Service, worked by the North German Lloyd's Company from Bremerhaven, Port Said, Suez, Aden, Colombo, Albany, Adelaide, Melbourne, and Sydney; and a further line from Singapore *viâ* Batavia to New Guinea; and the Australian-Canadian Pacific mail service between Vancouver and Sydney.

DESPATCH AND ARRIVAL OF AUSTRALIAN AND NEW ZEALAND MAILS AT THE GENERAL POST OFFICE, LONDON.

MAILS for Victoria, New South Wales, Queensland, South Australia, Western Australia, Tasmania, New Zealand and Fiji, are made up in London every Friday, and despatched *viâ* Italy to the above colonies.

The mail *viâ* Italy closes at 6.0 for letters and post cards, and at 5.30 for newspapers, book packets, patterns and samples, on Friday evenings at most of the central London offices. In the suburbs the time varies between 4 and 5 p.m.; in the country it is, as a rule, the preceding day. By payment of an extra fee letters can be posted at the St. Martin's-le-Grand Post Office up to 7.15 p.m. The homeward mails from Victoria, N. S. Wales, Queensland, South Australia, Western Australia, and Tasmania, *viâ* Brindisi and *viâ* Naples alternately, are due in London every Sunday throughout the year.

Letters to Australia, if specially addressed, by French Packet, are forwarded on the first of the month (previous evening when the date falls on Sunday); by German Packet, to Western Australia, South Australia, Victoria, and New South Wales, every fourth Monday (morning).

OTHER MAILS FOR QUEENSLAND.

Mails for Queensland *viâ* Torres Straits are made up about once a month on a Friday; *viâ* Vancouver every fourth Thursday; *viâ* San Francisco every fourth Saturday. By French packet, on the first of every month.

Letters, &c., to be forwarded by French packet *viâ* Vancouver, or *viâ* San Francisco, and for South Queensland *viâ* Torres Straits, must be specially so addressed.

The homeward mails are delivered in London every Tuesday, *viâ* Brindisi and *viâ* Naples alternately. *Viâ* Torres Straits the dates are unfixed, and *viâ* Vancouver uncertain. *Viâ* San Francisco every fourth Wednesday. By French packet four times monthly.

OTHER MAILS FOR NEW ZEALAND.

Mails for New Zealand (*viâ* San Francisco) are made up on the afternoon of Saturday, January 13, 1900, and thenceforward on the afternoon of every fourth Saturday; *viâ* Vancouver, every fourth Saturday, commencing with December 30th, 1899; and by French packet on the first of every month.

Letters, &c., to be forwarded *viâ* Vancouver or by French packet must be specially so addressed.

The homeward mails *viâ* Brindisi and *viâ* Naples, alternately, are due in London every Tuesday; *viâ* San Francisco every fourth Wednesday; *viâ* Vancouver on uncertain dates, and by French packet, four times monthly.

RATES OF POSTAGE TO AUSTRALIA.

The Australasian Colonies entered the Postal Union on October 1, 1891.

LETTER RATES *viâ* BRINDISI, NAPLES, SAN FRANCISCO, or TORRES STRAIT.

	s.	d.
Half-ounce	0	2½
Above half, but under one ounce	0	5
Above one, but under one-and-a-half	0	7½
Above one-and-a-half, but under two	0	10

Advancing 2½d. for every half-ounce or part of half-ounce.

Post Cards, 1d. each.

Book Packets, ½d. every 2 ounces; the parcel must not exceed 18 inches in length by 1 foot in width or depth, but if in roll form the limit is 30 inches length and 4 inches diameter; the weight must not exceed 5 pounds.

NEW ZEALAND.

REGISTRATION Letters and Book Packets are charged a fee of 2d. for each letter or packet.

Letters for Passengers on board Mail Packets for P. & O. Steamers from Brindisi, and Orient Steamers from Naples may be posted in any part of the United Kingdom, up to the time at which ordinary Registered letters, to go by the same Packets are received, but they must be Registered. The postage and registration fee must be fully prepaid, and they must be addressed to the care of the Commander of the packet.

NEWSPAPERS, ½d. not exceeding 2 ounces, and every additional 2 ounces ½d.

Insufficiently prepaid letters for the Australasian Colonies are chargeable on delivery with double the deficient postage.

CARRIAGE OF PARCELS TO AUSTRALIA.

THERE are several agencies in London through which parcels can be sent to Australia and New Zealand. The tariffs of all are about the same. Parcels can also be sent through the Peninsular and Oriental Co., the Orient Steam Navigation Co., and by the British India Company's line to Queensland ports. Full particulars can be ascertained on application to the respective offices.

Senders of parcels should attend to the following regulations:—To furnish a general description of the contents and value of their packages for Customs purposes, and to state whether they are to be insured.

When the contents of a package consist of books, stationery, hardware, or glass, the net weight is required; of china or earthenware, the number of pieces; of liquids, the number of gallons; of calico or woollen goods, the number of yards. *Letters must not be enclosed in parcels under any circumstances*, as it is contrary to Post-office regulations.

Articles of value, and goods liable to injury from damp, should be packed in tin or zinc, and if above one cubic foot measurement, enclosed in wooden cases iron-hooped.

Insurance is recommended in all cases; the premium varies somewhat according to destination and season. It averages about 6s. to 20s. for every £100.

It should be borne in mind that the Colonies, except New South Wales, have imposed duties on most imported goods, and that consequently an advice of the estimated value of the articles sent should be forwarded to the consignee, to enable him to pay the legal duty on them.

PARCEL POST.

PARCELS are despatched every Thursday morning to *New South Wales* (including Norfolk Island), *Victoria*, *South Australia*, *Western Australia*, *Tasmania*, and to *Queensland* except to the northern parts of the Colony and to British New Guinea, when they are sent about once a month *via* Torres Straits. They are despatched fortnightly to *New Zealand*. Parcels not exceeding 11lbs. in weight, and greatest length 3ft. 6in., greatest length and width combined 6ft., will be received at any post-office in the United Kingdom. The rates are—Parcels not exceeding 1 lb., 1s.; for each lb. or fraction of a lb. additional to 11 lb. 6d. To the *Fiji Islands* the rates are—For the first lb., 1s; for each lb. or fraction of a lb., 8d.

Insurance of parcels not exceeding £50 in value may be effected at the following rates:—To secure compensation up to £12, 5d.; up to £24, 7½d.; for £36, 10d.; for £48, 1s. 0½d.; and for £50, 1s. 3d. Insurance for a sum above the real value of the contents is prohibited.

The parcel should bear the words "Parcels Post" in the upper left hand corner and the sender will be required to make a customs declaration, furnishing an accurate statement of the contents and value, the date of posting, the sender's signature and place of abode. Customs duties are collected on delivery. The transmission of letters in parcels is strictly forbidden.

REMITTANCE OF MONEY TO AND FROM AUSTRALIA.

SMALL sums of money can be sent to almost any part of Australia and New Zealand by Post-office order. The rates of commission are:—Sums of £2, and under, sixpence; sums under £5, one shilling; sums under £7, one shilling and sixpence; sums under £10, two shillings. No Post-office order is granted beyond £10, and all orders issued in the United Kingdom on the Colonies must be presented for payment within twelve months of the month of issue. If a larger amount than £10 has to be sent two or more orders will be required. Larger sums can be sent by bank drafts, payable either at sight, or 30 or 60 days after sight or be remitted by cable. These can be obtained at any of the Colonial banks, whose addresses will be found in the Directory. An hour or two's notice is generally required for the preparation of the draft. The rates for remitting money from Australasia to any part of Great Britain will be found under the postal information given in each colony.

THE AUSTRALIAN AND NEW ZEALAND MAIL CONTRACTS.

The Postal and Telegraphic Conference held at Sydney in January, 1896, upheld the resolution expressed by the Hobart Conference in 1895—that white labour only should be employed in manning the ships which carry the mails between Australia and Great Britain, although it was pointed out by the Imperial

Government that to exclude coloured labour would be to discriminate between various classes of British subjects.

The Peninsular and Oriental Company.

The contract for the conveyance of mails between the United Kingdom and the Australian Colonies expired on January 31, 1898, gave place to a new contract entered into by the Imperial Government for a period of seven years ending on January 31, 1908, by an agreement dated May 25, 1897. The particulars of the contract are as follow :—A weekly service is to be performed by the Peninsular and Oriental, and Orient Steamship Companies alternately, each of the Companies' steamers sailing fortnightly. Mails to be conveyed by P. & O. Company between Brindisi and Adelaïde, and Adelaide and Brindisi in 28 days 14 hours, except during the S.W. Monsoon period, when the time would be Adelaide to Brindisi 29 days 14 hours, also from Naples to Adelaide, and *vice versâ*, by the Orient Company, in 29 days, except during the S W. Monsoon period when the time would be Adelaide to Naples, 30 days 12 hours. By the terms of the present contract, each Company has to call at Colombo on both the outward and homeward journey. Provision is made to convey mails between London and Adelaide by the long sea route. The subsidies amount to £170,000 (£85,000 to each company), on the assumption that the P. & O. Company's Australian line receives the same payment as the Orient Company, for the P. & O. contract is one which covers the India and China services as well as the Australian. The Imperial Post Office pays £95,000, and the contracting colonies £75,000, each despatching country or colony retaining postages and defraying the cost of mails to destination. The penalty for late arrival is £100 per day, there being no premium, for the early delivery of a mail. Payment by the Colonies is made on the basis of their respective populations, adjusted each year.

During the year 1900 Fremantle was substituted for Albany as a port of call for the mail steamers.

The P. & O. Company give a bond of £60,000 (as their contract embraces the India and China mail service), and both Companies are under obligation to proceed to Adelaide by way of Cape of Good Hope, should it be deemed expedient by the Postmaster-General of the United Kingdom that the mails should be so conveyed.

All the Australasian Colonies now contribute except New Zealand. Fiji joined in contribution from October 1, 1890, the proportion paid by it (about £47 annually) being divided among the other contributing Colonies.

The earliest delivery of mails at Adelaide was by the *Himalaya*, in 24 days 2 hours 9 minutes from Brindisi, and 26½ days from London, and in London from Adelaide in 30 days, or to Brindisi 27 days 13 hours and 29 minutes by the *Victoria*.

The P. and O. Company also maintain, in connection with the Australian services, communication with Bombay, Calcutta, Burmah, Persian Gulf, the Straits, China, and Japan, under a contract with H.M. Government for the conveyance of the mails to and from the East.

The time occupied in conveying the letters from Brindisi to London is about 50 hours, and from London to Brindisi 48 hours.

The Orient Steam Navigation Company, Limited.

Are official contractors to the Imperial Government for a fortnightly mail service (alternating with the P. & O.) for the carriage of mails between London *viâ* Naples and Adelaide. A new contract has been entered into from February 1st, 1898, for a period of seven years. The time allowed for the voyage between Naples and Adelaide is 29 days, and the subsidy is £85,000 per annum. There are no premiums for any acceleration of speed, but the contractors are liable to a fine of £100 a day for delay in delivery of the mails within the contract time.

The Orient Company have one or more of their steamers engaged in pleasure cruising to different parts of the world, thus affording exceptional facilities to Australians at home to see such places as Athens, Constantinople, the Riviera, Norway, West Indies, &c.

The cruises are arranged to occupy from a month to six weeks.

Union Steam Ship Company of New Zealand.

In 1885 tenders were invited for alternative services between San Francisco and Auckland, with a branch service between Auckland and Sydney, and a three years' agreement with this company was signed on October 9, 1885. The contract was renewed for another year, and in October, 1889, was further renewed on the basis of the contract providing that a steamer should leave Sydney every fourth Thursday, and Auckland the following Tuesday, for San Francisco, and that a steamer should leave San Francisco every fourth Saturday (or on arrival of London mails there) for Auckland and Sydney. The boats were not to be detained at San Francisco more than six days, and steamers on both voyages were to call at Honolulu. (This was subsequently modified). The contract time was twenty-five days between Sydney and San Francisco, and twenty days between Auckland and San Francisco. The penalties and bonuses were the same as before, except that bonuses were limited to thirty-six hours in any one trip. There were adequate provisions for detention of vessels for mails, and one that for the first thirty-six hours of such detention no demurrage should be payable. There were also provisions made for duly loading and unloading mails, cargo, and passengers. The payment was to be £30,000, less two-thirds of £4,000 that the United States were to contribute. New South Wales was to pay £10,000 of the amount, less one-third of the United States contribution, and New Zealand £20,000, also less one-third of that contribution. In other words the £4,000 was to be divided equally between New Zealand, New South Wales, and the contractors. The through service practically took the place of the one contracted for, which provided for transhipping at Honolulu. The negotiations for placing the through service between New Zealand and San Francisco on a permanent basis, and avoiding the Honolulu break, at an additional cost of £7,000 a year, were concluded about the middle of 1886 ; by this arrangement New Zealand paid two-thirds and New South Wales one-third of the extra subsidy.

The service is still in active operation.

The Queensland Line.

In 1880 a provisional contract was entered into by Sir Thos. McIlwraith, then Premier of Queensland, with the British India Steam Navigation Company for a through four-weekly steam service *via* Torres Strait, between London and Brisbane, for a term of eight years, for the yearly sum of £55,000. In 1886 this contract, with the consent of the Queensland Government, was transferred from the original parties to it, to a Company called the British India Associated Steamers, Limited. The steamers employed were to average 220 knots a day exclusive of stoppages, a penalty of £50 per diem being incurred for time over contract time, and a bonus of the like amount for every day under 56 days. The ports of call were to be Naples (if required), Port Said, Aden, Colombo, Batavia or Singapore, Thursday Island, Cooktown, Townsville, Bowen, Mackay, Rockhampton, and Brisbane (Naples was afterwards abolished as a port of call, but the steamers occasionally take coal at Colombo). The service commenced on February 11, 1881.

The Queensland Government accepted (November, 1889,) another tender of this Company, for a four-weekly ten-knot mail service by steamer between London and Brisbane and *vice versâ*, *viâ* Torres Strait, at the rate of £19,800 per annum, reserving to the Government the right of altering the contract to a fortnightly ten-knot service, at the rate of £32,500 per annum, after giving six months' notice. The contractors in either case to have the privilege of carrying all emigrants brought out by the Government at the rate of £16 per head, according to the rules and regulations for the time being. The term of the contract was for five years. The Government has the right of chartering any of the mail steamers as armed cruisers if required. A Penalty of £5 is incurred for every hour beyond the time specified for delivery of mails.

A new contract was entered into on June 19th, 1896. The agreement provided for vessels calling at Queensland ports up to ten in number, but excluding any port in the Gulf of Carpentaria. The Service was to be four-weekly as hitherto, and the boats were to manned with white crews, and fitted with not less than 100,000 cubic feet of refrigerating space. The Government has power to increase this space up to 160,000 cubic feet, (equal to about 16,000 tons), if the expansion of trade demands it. The refrigerating machinery was to be duplicated, rendering the cargo a first-class insurable risk, and special provision was to be made for dairy produce. The amount of the subsidy is £19,800 per annum as hitherto. The maximum rates of freight on beef, mutton, butter, &c., are fixed, but these are reducible to the current rates charged for similar cargo from Sydney and Melbourne by any regular line of steamers.

This service has since been amended, and the steamers still run in connection with the Queensland Government though without subsidy.

French Postal Service to Australia and New Caledonia.

The steam postal service from Marseilles to New Caledonia, was inaugurated on November 23, 1882, by the Messageries Maritimes de France. Steamers are despatched from Marseilles every 28 days, calling at Port Said, Suez, Colombo, Fremantle, Melbourne, and Sydney. Rate of passage money from Marseilles : To Australian Ports—1st class, £65 ; 2nd class, £40 ; 3rd class, £20. To New Caledonia—1st class, £70 ; 2nd class, £46 ; 3rd class, £23. Special return tickets issued for 1st, 2nd and 3rd class, available for 12 months—1st class, £100 ; 2nd class, £68 ; 3rd class, £36. These rates are for the sea journey from Marseilles only (and include the Suez Canal dues on passengers, and table wine). For the convenience of passengers travelling from London, through railway tickets to Marseilles are kept and sold at the Company's London Offices, 97, Cannon Street, E.C., for £5 1st class, and £4 2nd class. Pasengers securing their berths in London are entitled to the free conveyance of their baggage to Marseilles by steamer from London, as follows :—1st and 2nd class passengers 3 cwt., children from three to ten years of age 1½ cwt., and 3rd class passengers 1½ cwt. Company's Offices :—PARIS : Company's Head Office and Booking Office for passengers, 1, Rue Vignon (Boulevard de la Madeleine) ; Booking Office for goods, 10, Place de la Republique. MARSEILLES : General Offices, 2, Quai de la Joliette ; Passenger Office, 16, Rue Cannebiere. BORDEAUX : 20, Allées d'Orléans.

Mail Service between Germany, England, and Australia, and the Pacific Islands.

In the early part of 1885 the German Reichstag agreed to a Bill for the establishment of a steam service between Germany and Australia, with a branch service between Australia and Samoa and Tonga. The contract was secured by the North German Lloyd Company, and the steamers commenced running on the 1st of July, 1886, the Australian service being from Bremerhaven and Antwerp (calling at Southampton for passengers), Genoa, Port Said, Suez, Aden, Colombo, Adelaide, Melbourne, and Sydney, with a branch line running *viâ* Tonga to Apia, and back to Sydney. The Asian and Australian services were four-weekly, while the Mediterranean line running between Brindisi and Pt. Said was fortnightly. The vessels for the Australian service were to be of at least 3,000

tons, and those in the Pacific of 1,000 to 1,500; but the Company are now running steamers of 5,000 to 10,700 tons upon the Australian service. The mails were to take the Brindisi route, both outwards and homewards, being transferred at Port Said. The company are under contract to employ at least five steamers on the main line to Australia. Any new steamers built for this service are to be constructed by German shipbuilders, and of German materials. The coal taken in at Antwerp is to be German coal, and the agents appointed by the North German Lloyd in the various ports are to be, as far as possible, of German nationality. The German Reichstag granted an annual subsidy for fifteen years of 4,400,000 marks (about £220,000), *i.e.*: 4,000,000 marks for the Asian and Australian services, and 400,000 marks for the Mediterranean.

In the spring of 1893, the German Government agreed to the proposals made by the North German Lloyd, that the Brindisi–Port Said fortnightly mail service should be discontinued, and that the China and Australian mail steamers should call at Naples both outwards and homewards to receive and land the mails. At the same time it was further agreed that the four-weekly service to Samoa should be abandoned, and an eight-weekly service from Singapore *viâ* Batavia to New Guinea substituted.

In 1896 the North German Lloyd mail steamers commenced also calling at Albany, Western Australia, but in 1898 Fremantle was substituted for Albany as a regular port of call outwards and homewards.

During the autumn of 1896 two new twin-screw mail steamers of over 10,500 register tons each, namely, the "Friedrich der Grosse" and the "Barbarossa" were despatched upon their maiden voyages to Australia, and in 1897 the "Bremen" and "Konigin Luise" of the same tonnage were added to the service. These four vessels are remarkable as being the largest vessels hitherto sent to Australia.

The Pacific Mail Service.

The all British route from Great Britain to Australasia was completed in 1893 by the establishment of a 15 knot mail service between Vancouver and Sydney, New South Wales, calling at Victoria, British Columbia, Honolulu and Suva. In April, 1898, Brisbane, Queensland, was included in the itinerary, and the call at Fiji abandoned. The Canadian-Australian Co. is now under contract with the Governments of Canada, New South Wales and Queensland.

PARTICULARS OF PASSAGES BY THE MAIL COMPANIES' STEAMERS TO AUSTRALIA.

By the Peninsular and Oriental Company's Line of Steamers,—Rates from London to Fremantle, Adelaide, Melbourne, and Sydney, £60 to £70, first saloon; £35 to £40, second saloon. Brisbane, £61 10s. to £70 first saloon; £37 to £42, second saloon. Port Chalmers (for Dunedin), Bluff Harbour (for Invercargill), Lyttelton (for Christchurch), Nelson, Picton, Wellington, Auckland, Napier, Taranaki, Gisborne, Greymouth or Hokitika, Manukau, Russell, and Westport, £65 to £73, first saloon; £39 to £42 second saloon. From Marseilles or Brindisi to Fremantle, Adelaide, Melbourne and Sydney, £55 to £65, first saloon; £32 to £37, second saloon (except from Brindisi). There is a surtax of 10 per cent. on all passage money.

These charges include stewards' fees and table, and also bedding, linen, and all cabin requisites, and the attendance of experienced surgeons, stewards and stewardesses, but are exclusive of wines, spirits, and beer, which can be purchased on board.

In cases where a return ticket has not been taken at first, an allowance of 20 per cent. on the charge for the return voyage is made to passengers who paid the full fare from Europe to Australia (or *vice versâ*), re-embarking within six months from the date of landing, and an abatement of 10 per cent. to those returning within twelve months. Such allowances must be claimed at the time of securing the return passage.

The Company issue special return tickets from London, Marseilles, or Brindisi to Fremantle; Adelaide, Melbourne, Sydney, Tasmania, or Brisbane, and back, or *vice versâ*, available for twelve months from date of departure to that of return, from London, first class, £110; second saloon, £65; to New Zealand, first saloon, £115; second saloon, £70. Only first saloon passengers are conveyed from Brindisi in the express steamers.

The P. & O. Company's Australian steamers from London now call at Marseilles outwards in lieu of Brindisi, the mails going from Brindisi in special express steamers, performing the journey to Port Said in about 48 to 50 hours. Overland passengers are thus able to join the steamers at Marseilles, or if preferred they can travel by rail to Brindisi and change steamers at Port Said. These Brindisi–Port Said express steamers convey first saloon passengers only.

The steamer leaves London every alternate Thursday or Friday as soon after noon as tide will permit. The Company have arranged for the dispatch of special trains from the Liverpool Street station of the Great Eastern Railway to Tilbury or Royal Albert Docks, according to circumstances: hour of departure to be ascertained at the Company's offices. Fares, to Tilbury, 2s. 6d., first class; 2s., second class. Return for friend, 3s. 3d., first class; 2s. 9d., second class. To Royal Albert Docks, 1s. 6d. and 1s. 3d.; friends, 2s. and 1s. 6d. When the tide serves, vessels are dispatched from the Royal Albert Docks direct to sea. On the homeward trip the steamers call at Plymouth, where passengers can land and travel to London by rail. On the voyage to Port Said, Gibraltar and Marseilles are generally touched at, but the stay of the steamer is limited to a few hours. To Port Said 11 or 12 days in all are occupied.

Passengers proceeding to Australia by the Brindisi route can obtain their railway tickets at the P. and O. Co's office. Fare: first class, £12 0s. 0d.; second class, £8 7s. 1d. Either route, *viâ* Dover and Calais, or Folkestone and Boulogne, can be taken. Passengers can break the journey at Dover, Calais, Folkestone, Boulogne, Amiens, and Paris, and after leaving Paris, if travelling by ordinary trains, at any three principal stations *en route*.

The "P. and O. Brindisi express" runs between London and Brindisi. A special train leaves London (Charing Cross Station, South Eastern Railway), at 9 p.m., every Friday evening, connecting at Calais with the Peninsular Express proceeding direct to Brindisi. The train proceeds direct without calling at Paris, and is timed to arrive at Brindisi at 4.35 p.m. on Sunday, there being no change of carriage throughout the whole distance between Calais and Brindisi. It consists of a restaurant car, fitted with all necessary appliances for cooking, hot meals being served in the dining saloon, during the transit, in the same manner and style as in the best continental service, and there is ample sleeping accommodation provided, with every convenience for the journey. A similar train leaves on the arrival of the homeward steamer at Brindisi. The fare, including railway ticket and sleeping berth, is £17 11s. 11d. Full information can be obtained at the Company's offices. No passengers are conveyed by the evening Indian Mail Train.

An attractive route to Brindisi is open, *viâ* Dover, Calais, Paris, Genoa, Pisa, Rome, Naples, and Taranto, which gives passengers an opportunity of visiting some of the most interesting places in Italy. Railway fares, £13 0s. 3d., first class; £9 0s. 5d., second class.

As the "express" mail steamer leaves Brindisi about 9 or 10 p.m. on Sundays, passengers travelling by ordinary trains, and intending to join the steamer at Brindisi, must leave London on or before the following Thursday evening after the London steamer has left (unless travelling through by the P. and O. special train above mentioned, tickets for which can only be purchased of the P. and O. Company, 122, Leadenhall Street). No passengers are allowed to travel with the mails. The distance is about 1,391 miles. The P. and O. steamers start from Brindisi on the Sunday evening immediately the mails (which have left London on the previous Friday) are on board, and the overland passengers embarked. The steamer reaches Port Said on the following Tuesday night.

The vessels go through the Suez Canal, and touch at Aden *en route* to Ceylon.

Colombo is called at by the steamers. The Grand Oriental Hotel, situated in the Fort, is the leading hotel. The cinnamon gardens here are worth seeing. The distance from Suez to Colombo is 3,401 miles. From Colombo to Fremantle is about 3,126 miles, the time occupied in transit being about ten days. Another four days are required to steam to Adelaide (1,353 miles). The steamer anchors off the Semaphore, and passengers and the mail are landed by steam tenders at the expense of the Company. If the vessel arrives during daylight, there is usually sufficient time to allow of a brief visit to Adelaide, trains running at frequent intervals during the stay of the steamers. Thirty-six hours are generally sufficient to pass over the intervening 500 miles to Melbourne, where the steamer berths at the railway pier, Port Melbourne, continuing the voyage to Sydney after the lapse of about a day, and on arrival, after a passage of about forty hours, going alongside the Company's wharf at the Circular Quay. If the passengers wish they can leave the steamer at Adelaide and travel overland to Melbourne and Sydney. A map in the mail tables shows the mail route. The offices of the Company are at 122, Leadenhall Street, London, E.C., and Branch Office at Northumberland Avenue, London, W.C. The Australian agents of the Company will be found mentioned in the "Colonial Buyers' Guide," *post*.

The British India Steam Navigation Company.

—This company has the largest and most efficient fleet of steamships in the world. The route followed by the Queensland line of steamers, which is an offshoot of the British India Company, is through seas of (generally speaking) exceptional quietude, and scenery of the most picturesque character, affording the most agreeable contrast to the monotony and roughness of the Southern route. Passengers are conveyed by this line to all Australian ports, transhipping at Brisbane to the swift and commodious steamers of the A. U. S. N. Co., which proceed three times a week to Sydney and Melbourne. The steamers which leave London every three weeks, call at Port Said, Suez, Batavia, Thursday Island, Townsville, Rockhampton—Brisbane being the terminal port. Through tickets can be secured at the London Office (Messrs. Gray, Dawes and Co., 23, Great Winchester Street, and Craven House, Northumberland Avenue, W.C., at the following rates:—from London to Queensland Ports and Batavia, first class, £52 10s., plus 10 per cent. surtax; second class, £37, plus 10 per cent. surtax. A reduction of 20 per cent. on the return passage is made to passengers returning within six months from the date of their arrival, or 10 per cent. within twelve months.

After leaving Batavia (hotels: Hotel de Nederlander and the Marine Hotel, both centrally situated in the European quarter), the voyage is interesting and beautiful in the extreme; the sea is generally calm, with a refreshing breeze, and a total absence of the dead, dull calm and hot glare so often experienced in tropical latitudes. The Straits of Bali or Lombok are studded with charming island scenery, some of the islands having magnificent mountains towering to great altitudes: Bali Peak, for example, on Bali Island, which rises to a height of 10,080 feet, and which presents range after range and sweeping terrace after terrace of sloping hills, until it culminates in one lofty central point, the lower slopes of the mountain being generally in a high state of cultivation. In fact

he cultivation of the lower portion of these ranges seem to be pretty general on all these islands, and they present, in consequence, a very beautiful appearance from the sea; the light green and yellow of the trees and crops being relieved by the darker shades of the ravines and cocoa groves, and standing out in bright contrast to the gloomy hues of the barren rocky summits higher up. As Bali fades from the view, the large island of Lombok, with its volcano, Lombok Peak, 12,375 ft. high, comes in sight, and is passed. This island centains several towns, and produces sandal-wood, and horses of a very hardy breed. The mountain peaks nearly all contain craters, although whether extinct or merely dormant it would be difficult to say. Both European ships and Chinese junks, with numerous fleets of catamarans and fishing-boats, may frequently be met with about here. The next island passed is Sumbawa. Leaving this island to the westward, the vessel passes through Flores Strait, keeping the large island of Flores, with its active volcano at Appi Head, to the south, and three days brings her to the island of Timor Laut, or Timor of the Sea, so called to distinguish it from the much larger island of Timor, which lies to the south-west. This island is one of extreme natural beauty, and is only a day's steaming from Port Darwin in the Northern Territory. Timor Laut is the last land seen until Australia comes in sight, the first land made being Booby Island, with the high land of Cape York and its adjacent islands in the distance, and the vessel anchors off Thursday Island, this place being the Government depôt and also the rendezvous for the numerous fleets of pearl and bêche-de-mer fishing craft which visit these seas. New Guinea is about 70 miles north of Thursday Island. After a stay of a few hours the steamer proceeds onward, passing Shelburne, Temple, Weymouth, Lloyd's, and Princess Charlotte Bays and Lizard Island to Townsville, which is touched at to land passengers and cargo, and the mail, and where cargo for Cooktown, Cairns, Bowen and Mackay is transhipped. Thence to Rockhampton (Keppel Bay), is twenty hours, and after a few hours' delay the steamer proceeds onward to Moreton Bay (thirty-six hours).

As soon as the tide serves, the steamer enters the Brisbane River, and in about three hours is moored at her wharf in the centre of the town.

The special feature of this route is the extremely fine weather and smooth seas which may be confidently expected for the greater part of the homeward voyage during most months of the year.

The British India Company has upwards of 120 steamers, many of them of very large tonnage, and is, besides, closely connected with the Australian United Steam Navigation Company. Passengers and cargo can be booked for all ports in the Dutch East Indies, Burmah, India, Persia, and Arabia; also for the principal European and American ports.

Orient Line of Mail Steamers.—Managers, F. Green & Co., and Anderson, Anderson, & Co. Head Offices: Fenchurch Avenue, London, E.C. Branch Office: 16, Cockspur Street, S.W. Manager in Australia, David Anderson, 43, Pitt Street, Sydney. Australian Branch Offices: Melbourne, Branch Manager, J. N. Marshall; Adelaide, Branch Manager, M. G. Anderson; Perth, Branch Manager, Thomas Day.

Fares from London to Fremantle, Adelaide, Melbourne, and Sydney.—First Class—£60 to £70; Second Class, £35 to £40. (First and Second Class Passengers embarking at Marseilles or Naples pay £5 and £3 respectively less than the above rates.) Third Class passengers are also carried at cheap fares. Through tickets are issued to and from all ports in Australia, Tasmania, and New Zealand. Return tickets from London to Fremantle, Adelaide, Melbourne, Sydney, Launceston, Hobart, and Brisbane and back, or *vice versâ*, are issued for £110 first class and £65 second class, and to New Zealand and back for £115 first class, and £70 second class, available for 12 months, from departure to arrival on return. These tickets entitle the holder to break the journey if desired. Special round-the-world tickets are also issued for the journey from Europe to Australia, by Orient Line steamer, and back *viâ* San Francisco or Vancouver, and the continent of America, for £130. Passengers not holding Return Tickets, who may nevertheless return by the line within 12 months after landing, will, if they return within six months after landing, obtain a reduction of 20 per cent. off their fare for the return passage, according to the Company's then existing tariff, and if more than six months after landing, a return of 10 per cent. These abatements must be applied for at time of re-booking.

N.B.—To meet increased cost of working a surtax of 10 per cent. will be charged on all fares until further notice.

The steamers leave London every alternate Friday, Plymouth one day later, and proceed by way of Gibraltar, Marseilles, Naples, Port Said, Suez, and Colombo to Australia. Passengers joining at Tilbury are conveyed from London to Tilbury Pier by special train, leaving St. Pancras Station, the Midland Railway terminus, on the day of embarkation, and to the ship by steam tender from Tilbury Pier.

Plymouth.—Passengers are embarked here by steam tender, from Millbay Pier. Vouchers for travelling at reduced fares from Paddington or Waterloo Stations to Plymouth, are issued by Anderson, Anderson & Co. on application. The Agents at Plymouth are Messrs. W. Leaman & Co., 2, Millbay Road.

Marseilles.—Passengers can join the steamer at Marseilles seven days later than in London. The railway journey from London to Marseilles occupies 24 hours.

Passengers from London to Ports east of Suez will be granted railway tickets from London to Marseilles at the following rates:—First class £5, second class £4. Second saloon passengers, requiring first class railway tickets, will be charged £6. Sleeping car, Paris to Marseilles, £1 18s. 2d. in addition to first class fare. The Agents at Marseilles are Messrs. Worms & Co., 16, Rue Beauvau.

Passengers taking the Naples route can purchase railway tickets from London to Naples, *viâ* Dover and Calais or Folkestone and Boulogne, with the ocean ticket if desired. Fares—£11 2s. 7d., first class; £7 14s., second class.

The Orient Line is one of the most popular lines trading and carrying passengers between Great Britain and Australia, and a brief description may here be given of the arrangements for securing the comfort of passengers, and of the route to and from Australia. The Orient Line have been pioneers in all that concerns the comfort of the ocean-going traveller. Their last boat, the twin screw s.s. *Ortona* 7945 tons register, 10,000 horse power, is a striking example of the most recent developments of marine architecture, both in respect of the safety of the passenger, and the comfort—even luxury—of his surroundings. The route of the Orient steamers is *viâ* Suez Canal both out and home, the stay at Naples, Gibraltar, and Colombo being, as a rule, long enough to allow time for visiting some of the sights ashore. The following description of a homeward journey gives a fair idea of the voyage either way:—The last glimpse of Australia is off Fremantle, and in a few days the smooth waters of the trade winds are entered. A run of 3,140 miles from Fremantle brings the steamer to Colombo, the capital of Ceylon, where the visit ashore amidst luxuriant tropical vegetation will be appreciated. Leaving Colombo and passing the island of Socotra and Cape Guardafui, Aden, distant from Colombo 2,104 miles, is sighted. At a distance of ninety miles from Aden, the Red Sea is entered, and after a voyage past some historical places, the steamer anchors in the Suez roadstead. From Suez begins the Canal journey. On the way, Ismalia, the basis of Lord Wolseley's operations in 1882, is sighted. Here passengers for Cairo disembark. The canal has only an average width of twenty-five yards, while its depth is but twenty-six feet. At its north end is situated Port Said, an active coaling station, the Arabs performing the work. From this port the steamer ere long passes through the Straits of Messina then crossing the Gulf of Salerno and rounding the Isle of Capri, enters the Bay of Naples—where the mails for Europe are landed. Two days later the steamers call at Marseilles whence passengers can travel overland to London in 24 hours. From here the next point of interest is Gibraltar. The steamer then follows the Spanish coast line, passing on the way many places of note, till rounding the Berlingas, following the straight coast of Portugal, passing Oporto, the Douro, Vigo, and Cape Finisterre, it enters the Bay of Biscay, and after calling to land such passengers as wish to do so, at Plymouth, proceeds to the Thames and Tilbury. The Orient Company issue a magnificent guide to these routes, called the "Orient Guide" (Sampson, Low & Co., 2s. 6d.). It is a luxurious and valuable cyclopædia of travel and of sea lore, which should be in the possession of every passenger—whether by the Orient or any other line. The book, of which a fifth edition has recently been issued (45th thousand), may also be read with interest by the stay-at-home reader.

In addition to the foregoing, there are other lines of steamers running between the United Kingdom and Australia.

Bethell, Gwyn & Co., and Trinder, Anderson & Co., despatch a steamer monthly from London, and at intervals from Glasgow, to Fremantle, the Port of Perth, Western Australia. The same firms have, in conjunction with Alfred Holt of Liverpool, also a fortnightly line of steamers from English and Continental ports *via* Singapore, these steamers calling at Derby, Broome, Cossack, Onslow (Ashburton), Carnarvon (Gascoyne), Sharks Bay, and Geraldton, and going alongside the Wharf at Fremantle. Bethell, Gwyn & Co., Trinder, Anderson & Co., and W. Marden, also despatch sailers to Fremantle and Geraldton, Western Australia, from London, Liverpool, Glasgow, and Hamburg, at frequent intervals.

The North German Lloyd's Company despatch first-class mail steamers every four weeks between Bremerhaven and Sydney, calling at Antwerp for cargo and Southampton for passengers. The steamers also call at Albany, King George's Sound, on both outward and homeward voyages.

The Colonial and Sydney Line of Steamers leaves London monthly. The Shaw, Savill, and Albion Company despatch steamers once every four weeks to New Zealand, calling at Hobart; the New Zealand Shipping Company despatch large swift steamers, carrying mails and passengers, monthly to New Zealand, and cargo steamers at regular intervals, supplemented by sailing vessels as required; the Union Steamship Company of New Zealand, in conjunction with the Oceanic Company, also carry mails and passengers monthly between San Francisco and New Zealand.

The White Star Line, English agents, Ismay, Imrie & Co., 34, Leadenhall Street, E.C., have commenced a monthly steamship service from Liverpool to Albany, Adelaide, Melbourne and Sydney, calling at Cape Town.

Direct communication has also been established between Manchester and Australia for some years, the Gulf Line of Steamers sailing about once a month for Adelaide, Melbourne, Sydney, and Brisbane, from Glasgow, calling at Liverpool; also sailing boats ply from Glasgow and Liverpool, as freight demands.

FLEET OF THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

Persia, 7,951 tons, 11,000 h. p.; *Egypt*, 7,912 tons, 11,000 h. p.; *China*, 7,912 tons, 11,000 h. p.; *India*, 7,911 tons, 11,000 h. p.; *Arabia*, 7,903 tons, 11,000 h. p.; *Caledonia*, 7,558tons, 11,000 h. p.; *Sobraon*, 7,382 tons, 6,500 h. p.; *Assaye*, 7,376 tons, 6,500 h. p.; *Plassy*, 7,240 tons, 6,500 h. p.; *Australia*, 6,901 tons, 10,000 h. p.

Himalaya, 6,898 tons, 10,000 h. p.; *Oceana*, 6,603 tons, 7,500 h. p.; *Arcadia*, 6,603 tons, 7,500 h. p.; *Sicilia*, 6,600 tons, 4,500 h. p.; *Somali*, 6,600 tons, 4,500 h. p.; *Soudan*, 6,600 tons, 4,500 h. p.; *Syria*, 6,600 tons, 4,500 h. p.; *Victoria*, 6,527 tons, 7,500 h. p.; *Britannia*, 6,525 tons, 7,500 h. p.; *Candia*, 6,482 tons, 4,000 h. p.; *Malta*, 6,064 tons, 4,500 h. p.; *Socotra*, 6,069 tons, 4,000 h. p.; *Banca*, 5,995 tons, 3,500 h. p.; *Nubia*, 5,914 tons, 4,500 h. p.; *Simla*, 5,884 tons, 4,500 h. p.; *Rome*, 5,545 tons, 6,000 h. p.; *Peninsular*, 5,287 tons, 6,000 h. p.; *Oriental*, 5,284 tons, 6,000 h. p.; *Carthage*, 5,198 tons, 5,250 h. p.; *Massilia*, 5,026 tons, 5,250 h. p.; *Valetta*, 5,023 tons, 5,250 h. p.; *Mazagon*, 4,997 tons, 2,500 h. p.; *Ballaarat*, 4,890 tons, 5,000 h.p.; *Parramatta*, 4,886 tons, 5,000 h. p.; *Palawan*, 4,686 tons, 3,000 h.p.; *Sunda*, 4,674 tons, 3,000 h. p.; *Bengal*, 4,656 tons, 4,500 h. p.; *Coromandel*, 4,652 tons, 4,500 h. p.; *Chusan*, 4,636 tons, 4,500 h. p.; *Sumatra*, 4,607 tons, 3,000 h. p.; *Borneo*, 4,573 tons, 3,000 h. p.; *Shannon*, 4,362 tons, 4,500 h. p.; *Japan*, 4,319 tons, 3,000 h. p.; *Thames*, 4,258 tons, 4,500 h. p.; *Manila*, 4,210 tons, 3,000 h. p.; *Clyde*, 4,099 tons, 4,500 h. p.; *Ceylon*, 4,094 tons, 3,500 h. p.; *Java*, 4,093 tons, 3,000 h. p.; *Formosa*, 4,045 tons, 3,000 h. p.; *Malacca*, 4,045 tons, 3,000 h. p.; *Nankin*, 3,960 tons, 3,000 h. p.; *Pekin*, 3,957 tons, 3,000 h. p.; *Tientsin*, 3,950 tons, 3,000 h. p.; *Canton*, 3,317 tons, 2,500 h. p.; *Shanghai*, 3,315 tons, 2,500 h. p.; *Bombay*, 3,168 tons, 2,500 h. p.; *Isis*, 1,728 tons, 6,500 h. p.; *Osiris*, 1,728 tons, 6,5200 h. p.

FLEET OF THE ORIENT LINE.

Omrah, twin-screw, 8,500 tons register, 10,000 horse power; *Ortona*, twin-screw, 7,945 tons, 10,000 h. p.; *Ophir*, twin-screw, 6,910 tons, 10,000 h. p.; *Orizaba*, 6,297 tons, 7,000 h. p.; *Oroya*, 6,297 tons, 7,000 h. p.; *Ormuz*, 6,387 tons, 8,500 h. p.; *Orotava*, 5,857 tons, 7,000 h. p.; *Oruba*, 5,857 tons, 7,000 h. p.; *Austral*, 5,524 tons, 7,000 h. p.; *Orient*, 5,365 tons, 7,500 h. p.; *Cuzco*, 3,898 tons, 4,000 h. p.; *Lusitania*, 3,912 tons, 4,000 h. p.

Meanatchy*, 2,111 tons; *Madura*, 1,951 tons; *Malda*, 1,951 tons; *Manora*, 4,697 tons; *Matiana*, 5,264 tons; *Megna*, 1,181 tons; *Mergui*, 244 tons; *Merkara*, 3,099 tons; *Mombassa*, 4,662 tons; *Muttra*, 4,644 tons; *Nerbudda*, 2,977 tons; *Necassa*, 2,950 tons; *Nowshera*, 2,962 tons; *Nuddea*, 2,964 tons; *Obra*, 5,456 tons; *Okhla*, 5,287 tons; *Okara*, 5,500 tons; *Onda*, 5,500 tons; *Onipenta*, 5294 tons; *Oolobaria*, 5,294 tons; *Orissa*, 5,435 tons; *Pachumba*, 867 tons; *Palamcotta*, 3,413 tons; *Palitana*, 2,998 tons; *Patna*, 1,797 tons; *Pemba*, 1,536 tons; *Pentakota*, 3,418 tons; *Pandua*, 3,305 tons; *Purnea*, 3,306 tons; *Purulia*, 1,554 tons; *Putiala*, 2,998 tons; *Rajpootana*, 2,030 tons; *Ramapoora*, 910 tons; *Rangoon*, 547 tons; *Rasmara*, 892 tons; *Rewa*, 3,922 tons; *Scindia*, 2,680 tons; *Secundra*, 2,610 tons; *Simla*, 1,615 tons; *Sirdhana*, 2,698 tons; *Sirsa*, 2,610 tons; *Ugonda*, 5,300 tons; *Ujina*, 5,300 tons; *Ula*, 5,300 tons; *Umballa*, 5,300 tons; *Unta*, 5,300 tons; *Upala*, 5,300 tons; *Urtana*, 5,300 tons; *Vadala*, 3,334 tons; *Vasna*, 904 tons; *Virawa*, 3,333 tons; *Vita*, 904 tons; *Wardha*, 3,917 tons; *Warora*, 3,920 tons; *Waroonga*, 2513 tons; *Zaida*, 4,507 tons; *Zamania*, 4515 tons; *Zayathla*, 4202 tons; *Zibenghla*, 4163 tons.

FLEET OF THE NEW ZEALAND SHIPPING COMPANY.

Otarama, 3,992 tons; *Papanui*, 7,789 tons; *Paparoa* (twin-screw), 7,819 tons; *Rakaia*, 6,801 tons, *Tongariro*, (twin-screw), 9,160 tons; *Rimutaka* (twin screw), 9,160 tons; *Tekoa*, 4,240 tons; *Waikato*, 4,792 tons; *Waimate*, 6,949 tons; *Wakanui*, 7,003 tons; *Whakatane*, 7,067 tons; *Ruapeha*, building (twin screw), 9,160 tons.

FLEET OF THE MESSAGERIES MARITIMES COMPANY.

(Australian and New Caledonian Line.)

Armand-Behic, 6,537 tons, 7,000 h. p.; *Polynesien*, 6,506 tons, 7,000 h. p.; *Australien*, 6,507 tons, 7,000 h. p.; *Ville de la Ciotat*, 6,531 tons, 7,000 h. p.; *Pacifique*, 2,000 tons, 1,500 h. p.

FLEET OF THE NORTH GERMAN LLOYD.

(Imperial German Mail to Australia.)

From Southampton to Fremantle, Adelaide, Melbourne, and Sydney.

Prinz-Regent Luitpold (twin-screw), 6,500 tons; *Friedrich der Grosse* (twin-screw), 10,500 tons; *Barbarossa* (twin-screw), 10,750 tons; *Bremen* (twin-screw), 10,500 tons; *Königin Luise* (twin-screw), 10,500 tons; *Gera*, 5,300 tons; *Karlsruhe*, 5,300 tons; *Darmstadt*, 5,300 tons.

SUCCESSION OF GOVERNORS IN THE AUSTRALIAN COLONIES.

GOVERNORS OF NEW SOUTH WALES.

Captain A. Phillip, R.N., from 26th January, 1788, to 10th December, 1792.

Captain F. Grose, Lieutenant-Governor, from 11th December, 1792, to 12th December, 1794.

Captain Paterson, N.S.W. Corps, Lieutenant-Governor, from 13th December, 1794, to 1st September, 1795.

Captain Hunter, R.N., from 7th September, 1795, to 27th September, 1800.

Captain P. G. King, R.N., from 28th September, 1800, to 12th August, 1806.

Captain W. Bligh, R.N., from 13th August, 1806, to 26th January, 1808.

During Governor Bligh's suspension the Government was successively administered by Lieutenant-Colonel G. Johnstone, Lieutenant-Colonel Foveaux, and Colonel William Paterson, from 26th January, 1808, to 28th December, 1809.

Major-General L. Macquairie, from 1st January, 1810, to 1st December, 1821.

Major-General Sir T. Brisbane, K.C.B., from 1st December, 1821, to 1st December, 1825.

Colonel Stewart, 3rd Regiment of Buffs, Lieutenant-Governor, from 6th December, 1825, to 18th December, 1825.

Lieutenant-General Sir R. Darling, from 19th December, 1825, to 21st October, 1831.

Colonel P. Lindsay, C.B., Lieutenant-Governor, from 22nd October, 1831, to 2nd December, 1831.

Major-General Sir R. Bourke, K.C.B., from 3rd December, 1831, to 5th December, 1837.

Lieutenant-Colonel K. Snodgrass, Lieutenant-Governor, from 6th December, 1837, to 23rd February, 1838.

Sir George Gipps, from 24th February, 1838, to 11th July, 1846,

Sir Maurice C. O'Connell, from 12th July, 1846, to 2nd August. 1846.

Sir Charles A. Fitzroy, from 3rd August, 1846, to 17th January, 1855.

Sir William Thomas Dennison, K.C.B., from 20th January, 1855, to 22nd January, 1861.

Lieutenant-Colonel J. F. Kempt, Administrator, from 23rd January, 1861, to 21st March, 1861.

Right Hon. Sir J. Young, K.C.B., G.C.M.G., Administrator, from 22nd March, 1861, to 15th May, 1861; Governor-in-Chief, from 16th May, 1861, to 24th December, 1867.

Sir Trevor Chute, K.C.B., Administrator, from 25th December, 1867, to 7th January, 1868.

Right Hon. Earl of Belmore, from 8th January, 1868, to 22nd February, 1872.

Sir Alfred Stephen, K.C.B., Chief Justice, Administrator, from 23rd February, 1872, to 2nd June, 1872.

Sir Hercules George Robert Robinson, G.C.M.G., from 3rd June, 1872, to 19th March, 1879.

Sir Alfred Stephen, K.C.M.G., C.B., Administrator, from 20th March, 1879, to 3rd August, 1879.

Lord A. W. F. S. Loftus, G.C.B., from 4th August, 1879, to 9th November, 1885.

Sir Alfred Stephen, G.C.M.G., C.B., Administrator, from 10th November, 1885, to 11th December, 1885.

Lord Carrington, G.C.M.G., frym 11th December, 1885, to November, 1890.

The Earl of Jersey, P.C., G.C.M.G., from November, 1890, to March 1, 1893.

Sir Frederick Darley, Chief Justice, Administrator, from March 2, 1893, to May 28, 1893.

Sir Robert William Duff, G.C.M.G., from May 29th, 1893. Died March 15, 1895.

Viscount Hampden, from November 21st, 1895, to March, 1899.

Earl Beauchamp, from July, 1899 to Nov. 1st, 1900.

GOVERNORS OF VICTORIA.

Captain Lonsdale, Police Magistrate, from 1st October, 1836, to 30th September, 1839.

Charles Joseph Latrobe, Superintendent of the district of Port Phillip, 30th September, 1839; Lieutenant-Governor, 15th July, 1851, retired 5th May, 1854.

John Vesey Fitzgerald Foster, Officer administering Government, 8th May, 1854; retired 22nd June, 1854.

Sir C Hotham, K.C.B., Lieutenant-Governor, 22nd June, 1854; died 31st December, 1855.

Major-General Edward Macarthur, Officer administering Government, 1st January, 1856; retired 26th December, 1856.

Sir Henry Barkly, K.C.B., Captain-General, Governor-in-Chief, and Vice-Admiral, 26th December, 1856; retired 10th September, 1863.

Sir Charles Henry Darling, K.C.B., Governor and Commander-in-Chief, 11th September, 1863; recalled 14th April, 1866; retired 7th May, 1866.

Brigadier-General George Jackson Carey, C.B., Officer administering Government, 7th May, 1866; retired 15th August, 1866.

Viscount Canterbury, K.C.B., Governor and Commander-in-Chief, 15th August, 1866; retired 2nd March, 1873.

Sir William Foster Stawell, Knt., Officer administering Government, from 3rd March to 19th March, 1873.

Sir Redmond Barry, Officer administering Government, from 20th March to 30th March, 1873.

Sir George Ferguson Bowen, G.C.M.G., 31st March, 1873 retired 22nd February, 1879.

During Sir George Bowen's absence in England, the Officers administering Government were Sir Redmond Barry, from January 3 to January 10, 1875; Sir W. F. Stawell, from January 11, 1875, to January 14, 1876.

The Marquis of Normanby, G.C.M.G., Administrator, February 27, 1879; Governor from April 29, 1879, to April 18, 1884.

Sir W. F. Stawell, Officer administering Government, from April 18th, 1884, to July 14th, 1884.

Sir Henry B. Loch, G.C.M.G. (now Lord Loch), from July 15, 1884, to November 28, 1889. During Sir Henry Loch's absence in England Sir W. F. C. Robinson, G.C.M.G., was the acting Governor.

Earl of Hopetoun, from November 28, 1889, to March 26, 1895.

Sir John Madden, Chief Justice, Officer Administering Government, from March 26, 1895, to October 25, 1895.

Lord Brassey, from October 25, 1895 to January 13th, 1900.

Sir John Madden (acting) from January 13th, to October, 1900, when he was apointed Lieutenant- Governor.

GOVERNORS OF SOUTH AUSTRALIA.

Captain John Hindmarsh, R.N., K.H., from 28th December, 1836, to 16th July, 1838.

Just Consider now!

It is assumed

That you wish to Advertise.
That Economy must be considered.
That the Best Media alone are wanted.
That your Time is limited.
That your Clerical Staff is expensive.

Is it worth your while

In view of the above facts, to manage all your advertising matters in your own office, incurring expenses which add considerably to the actual cost of your advertising, when we undertake

To Advertise

Your business for you and will see

That you pay PAPERS' Prices only.
That your Clerical Expenses are minimised.
That your Interests are our own.
That Every Advantage is secured to you.

If so, consult us.

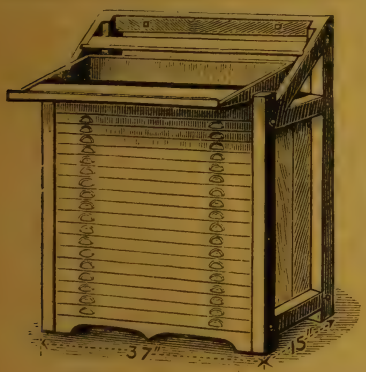
Latest Novelty in Corsets.

THOMSON'S "GRACIOSA"

Patented & Registered.

UNBREAKABLE WAIST.
NATURAL HINGE.

Extract from Madame Schild's Fashion Journals for March.



A NEW CORSET.

This novelty is a very clever arrangement of the nature of a hinge at the waist, so that the wearer does not break the steels when stooping. This alteration in the corset in no way interferes with the support which the corset should give to the body; on the contrary, it anything, it gives greater strength without pressure upon the hip bones, and yet makes the body more supple. This new corset is called 'The Graciosa,' is extremely comfortable to wear even from the first, it fits the body at once, and is as easy as a glove, and is manufactured by Messrs. W. S. Thomson & Co. Can be had of all ladies' outfitters.

Made in White, Dove, Black, and Cream.

To be had of all Dealers throughout the world at Popular Prices.

W. S. THOMSON & CO., Ltd.,
112, Fore Street, London, E.C.

GLENBOIG BRICKS

THE SPECIAL BRICKS REQUIRED IN THE CONSTRUCTION OF THE LATEST AND MOST IMPROVED SYSTEM OF GAS RETORT SETTINGS.

JAMES DUNNACHIE Managing Director
JOHN GRAY Secretary

REGISTERED TRADE MARKS.

THE GLENBOIG BRANDS HAVE BECOME FAMOUS IN EVERY METAL SMELTING COUNTRY IN THE WORLD. THEY ARE SUPERIOR TO ALL OTHER FIRE CLAY BRICKS, FOR IRON, STEEL, COPPER, GLASS, GAS AND CHEMICAL FURNACES, GAS RETORTS &c. THEY COMBINE IN THE HIGHEST DEGREE THE QUALITIES OF NOT MELTING, AND NOT SPUTTING, WHEN SUBJECTED TO THE HIGHEST HEATS AND MOST SUDDEN CHANGES OF TEMPERATURE, AND ARE IN CONSEQUENCE FOUND TO BE ECONOMICAL EVEN IN DISTRICTS WHERE THE LOCAL BRICKS CAN BE HAD AT HALF THE PRICE.

Edwards, William, & Son, 157, Queen Victoria Street, E.C.—*Patent Medicines.*

DR. J. COLLIS BROWNE'S CHLORODYNE

ONLY GENUINE.

ORIGINAL AND

IS THE GREAT SPECIFIC FOR

Cholera, Diarrhœa, Dysentery.

GENERAL BOARD OF HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally sufficient.

DR. GIBSON, Army Medical Staff, Calcutta, states: "2 DOSES COMPLETELY CURED ME OF DIARRHŒA."

COUGHS. COLDS. ASTHMA. BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.—DR. J. C. BROWNE (late Army Medical Staff) DISCOVERED A REMEDY to denote which he coined the word CHLORODYNE. Dr. Browne is the sole INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

This Caution is necessary, as many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice Chancellor Sir W. PAGE WOOD stated publicly in Court that DR. J. COLLIS BROWNE was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the TRUE PALLIATIVE in **NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.**

DR. J. COLLIS BROWNE'S CHLORODYNE is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of **EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.**

IMPORTANT CAUTION.—The IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe Trade Mark. Of all Chemists. **1s. 1½d., 2s. 9d.,** and **4s. 6d.**

PRINTERS' ROLLER COMPOSITION.

THIS well-known Composition is specially prepared for export in two qualities, R and M. Being tough and very elastic, and possessing a large amount of suction, it is suitable for all rapid Web Newspaper Printing or high-class Jobbing Machine and Hand Press Printing. It will distribute any description of black and coloured inks, and is guaranteed "Cheap," and "Lasting," and "Re-castable."

For Rotary Machines the quality "R" is recommended, and for Jobbing Machines the quality "M." For very hot climates, in the tropics, East and West Indies, Brazil, &c., for instance, it is also advisable to take quality "R" for all purposes.

This recommendation is founded on our experience, the "Acme" Roller Composition having been exported to almost all parts of the world, and having given satisfaction under the most varied climatic conditions.

PRICES: R QUALITY, 1s. 3d. per lb.; M QUALITY, 1s. per lb.

SAMPLES FORWARDED FREE ON APPLICATION.

EVERY SLAB OF COMPOSITION MADE BY US BEARS OUR TRADE MARK.

STEVENS' OINTMENT
AS PREPARED ONLY BY THE LATE
HENRY R. STEVENS
Veterinary Surgeon,
OF
9, PARK LANE,
LONDON,
AND
NEWMARKET.
The only substitute for Firing Horses.

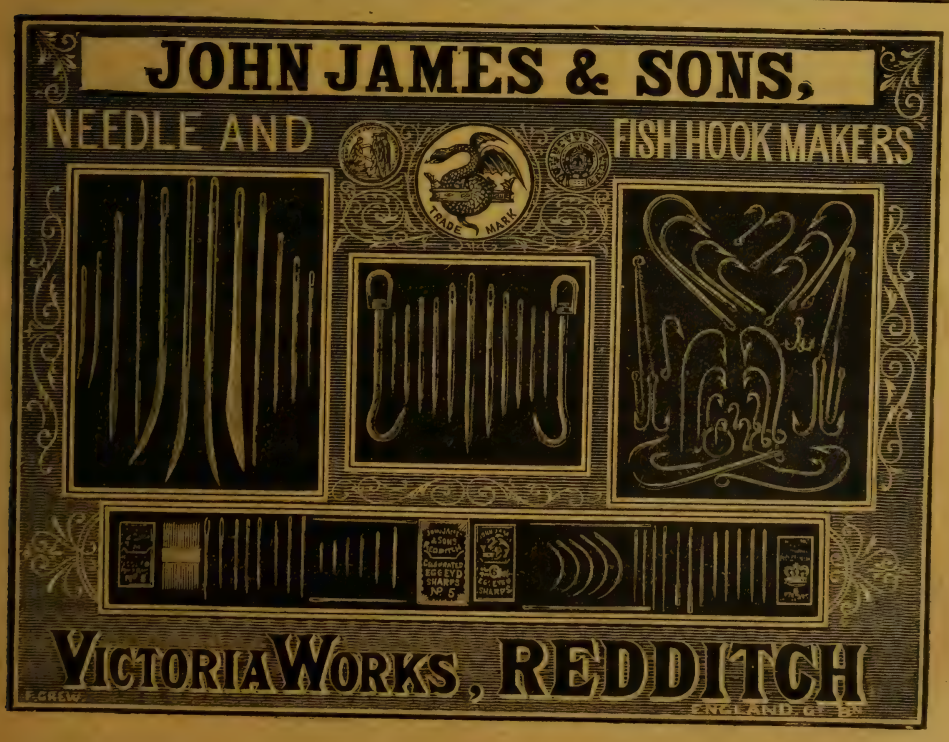
Stevens' Ointment, the Only Substitute for Firing Horses,

after fifty years' extensive use, retains its celebrity as the safest and best remedy for Curbs, Splints, Spavins, Sore Shins, Diseased Ligaments or Tendons, Ringbone, &c., in the Horse. It never blemishes, may be applied during work, and no horse will gnaw its legs after its application. It is also highly beneficial in Coughs, both recent and chronic, and Roaring.

Testimonials are daily received as to its efficacy. The following is a recent one from the Chief Veterinary Surgeon to H.M. the King of Italy:

ROYAL STABLES, ROME, *Aug. 1st, 1899.*

I, the undersigned, testify to having used STEVENS' OINTMENT for the last sixteen years for all diseases of Horses' Legs and Throats, and have always had splendid results from its employment.



(Signed) Dr. LUIGI VICCHI.

AS PREPARED ONLY AND SOLD BY THE LATE

Henry R. Stevens, Veterinary Surgeon, St. George's Mansions, Vauxhall Bridge Rd., S.W.,
(Late of 9, Park Lane, W.).

Price in England:—Boxes, 2s. 6d., 5s., and 10s. each. Sold by all Druggists in the Colonies.

Beware of Spurious Imitations. Ask for Stevens' Ointment.

(Established 52 Years.)

PUBLISHED MONDAY, WEDNESDAY & FRIDAY AFTERNOONS.

Subscription 12s. per Annum.

THE BEST ADVERTISING MEDIUM IN THE SOUTHERN DISTRICT.

THE GRENFELL RECORD.

(ESTABLISHED 1867)

Circulates throughout the great Squatting Districts of Lachlan and Bland, and is published in Grenfell, which district alone contains a population of 14,000—many being selectors of ample means, and owning large tracts of land, Grenfell being the third most important land district in the Colony. The principal localities in which the RECORD circulates are Grenfell, Forbes, Young, Cowra, Wyalong, Barmedman, Temora, Wollongough, Marsdens, Goolagong, Bimbi, Weddin, and many other smaller centres of population. Agents, Gordon & Gotch, London, Sydney, Melbourne, Brisbane and Cape Town. **W. B. HOWARTH, Sole Proprietor.**

THE HILLGROVE GUARDIAN

AND NEW ENGLAND MINING GAZETTE,

Supplies all the Mining News of the District every week; original and up-to-date.

Has a Large Circulation in the District; finds Subscribers in all important Mining Centres, and is recognised to be the Mining Paper of New England.

PUBLISHED every SATURDAY, price THREEPENCE.

NEWCASTLE MORNING HERALD,

BOLTON STREET, NEWCASTLE, N.S.W.

8 LARGE PAGES DAILY. 12 and 16 ON SATURDAYS. PRICE ONE PENNY.

THE NEWCASTLE HERALD is the largest and most popular Morning Newspaper printed in the Colony (outside of Sydney), and ranks as the Premier Provincial Journal of Australia. It is circulated extensively amongst all classes of the community, and is devoted principally to the Commercial, Shipping, and Mining Interests. It is the recognised Advertising Medium for the whole of the populous and important District of Newcastle and Neighbourhood, and the northern part of the Colony (from the seaport to the borders of Queensland) generally. As there are from 70,000 to 80,000 inhabitants within the police district of Newcastle, and upwards of 300,000 in close connection with it, Advertisers will find it much to their advantage to make use of the columns of the HERALD.

Agents: GORDON & GOTCH, Sydney, Melbourne, Brisbane, Perth, Cape Town, and London; **STREET & Co.,** 30, Cornhill, London; **AGENCE MITCHELL,** 12 & 13, Red Lion Court, Fleet Street, London; **F. ALGAR,** 8, Clement's Lane, London; **T. B. BROWNE,** 163, Queen Victoria Street, London. **CLARKE, SON & PLATT,** 85, Gracechurch Street, London, E.C.

THE WESTERN ADVOCATE, ORANGE.

ESTABLISHED 1874.

PUBLISHED WEDNESDAYS AND SATURDAYS.

The ADVOCATE is the best Advertising Medium for the Western District of New South Wales. No effort is spared to popularise the Paper, and the effect is seen in a rapidly increasing circulation and continuously expanding list of Advertisers.

Its principal constituents are found amongst Farmers, Squatters, Miners, Mechanics, and Commercial Men, and the ADVOCATE is seen in every town and village in the South, West, and North of Orange.

AGENTS—**GORDON & GOTCH, Sydney, Melbourne, Brisbane, and London; AGENCE MITCHELL, 12 & 13, Red Lion Court, Fleet Street, London: REUTER'S INTERNATIONAL AGENCY, 110, Pitt Street, Sydney; T. B. BROWNE, 163, Queen Victoria Street, London; CLARKE, SON, & PLATT, 85, Gracechurch Street, London.**

All Orders for Advertisements through any of the above Agencies will receive the best attention.

JAMES TORPY, *Proprietor.*

Oldest Established and Best Advertising Medium in the far-famed Richmond River District, New South Wales.

THE RICHMOND RIVER EXPRESS.

Published at Casino every Friday.

Agents in London:—Gordon & Gotch, St. Bride Street; Clark, Son & Platt, 85, Gracechurch Street; C. Mitchell & Co., Fleet Street; and other Advertising Firms.

GRIEVE & TURNER, Proprietors.

THERE IS ONE PAPER in the country worth Advertising in, and that is

THE WESTERN POST,

Offices:—MARKET STREET, MUDGEE.

Try an Advertisement in it, and see how it will pay you.

Sydney, London, and Melbourne Agents:—GORDON & GOTCH and REUTER'S TELEGRAM COMPANY.

SHAW, KEAR & GARLING, Proprietors.

THE TAMWORTH OBSERVER,

(Established 1875),

Is the most popular paper circulating in the district, and consequently has the largest circulation. It finds its way to most of the towns in the North of the Colony, and Advertisers will find it a cheap and effective medium of reaching the "Ear of the Public."

PUBLISHED WEDNESDAYS AND SATURDAYS. PRICE THREEPENCE.

TODD & HOOKE, *Proprietors.*

Agents—Gordon & Gotch, Sydney, Melbourne, Brisbane, Perth, London and Cape Town.

THE WELLINGTON GAZETTE,

Established 1874.

Is published at WELLINGTON, on the Western Slopes of the Interior of NEW SOUTH WALES.

The District includes **Stuart Town, Hill End, Burrendong, Bodangord,** and other Mining centres and there are large Agricultural Areas under cultivation. Yield of wheat last season about half-a-million bushels.

PUBLISHED MONDAY AND THURSDAY EVENINGS.

THE BALLARAT STAR,

46th year of publication.

THE LEADING COMMERCIAL AND AGRICULTURAL DAILY MORNING NEWSPAPER.

Stands in the forefront of Victorian Journalism.

Six pages Daily and Eight pages on Saturday. One Penny.

A Perfect Paper, with everything "Up to Date."

BUSINESS MEN, Ask yourselves this question:—

DOES ADVERTISING PAY?

We say YES. But don't take our word for it, the following remarks made by emiment men will substantiate our answer:—

Spurgeon says:—"Advertise, for the life of business is printers' ink."

Gladstone says:—"Nothing, except the Mint, can make money without Advertising."

Carlyle says:—"There is no better way to secure business than by Advertising."

Macaulay says:—"Advertising is to business what steam is to machinery—the grand propelling power."

Aspinall says:—"Business is the salt of life, and Advertising is the salt of business."

Goschen says:—"Goods are forced into sale by the energy of ambitious Advertisers."

THE STAR is the oldest, most influential, and most widely read Ballarat Journal, and is the best Advertising Medium for those who desire to reach the leading professional and commercial classes of the Golden City and surrounding districts.

R. W. BAXTER & CO., Proprietors.

THE BENDIGO ADVERTISER.

BEST PROVINCIAL PAPER IN AUSTRALIA.

HAS BY FAR THE

LARGEST CIRCULATION of any PAPER PUBLISHED in NORTHERN VICTORIA.

SPANISH BLIND.

THE HAMILTON SPECTATOR.

Published every TUESDAY, THURSDAY, and SATURDAY, at HAMILTON,

The Inland Metropolis of Western Victoria, and circulates extensively throughout about 100 towns in Western and Wimmera Districts, and South-Eastern district of South Australia.

THE HAMILTON SPECTATOR is the acknowledged organ of the landed interests in the principal Pastoral District of Victoria, and no Journal in Australia has a more wealthy constituency. The advantages to Advertisers are therefore obvious.

A LITERARY SUPPLEMENT accompanies every Saturday's Issue.

THE GIPPSLAND MERCURY,

SALE, VICTORIA.

The largest and most widely-circulated paper in Gippsland. Published every TUESDAY and FRIDAY. Has been enlarged for the fourth time within ten years, making it now equal to seven columns larger than any other paper published in the District, and it still commands fully three times more *bona fide* subscribers. THE MERCURY is the acknowledged Advertising Medium for Gippsland. The GIPPSLAND GUARDIAN is incorporated in THE MERCURY, the first paper published in Gippsland. THE MERCURY is entirely non-sectarian, and is read by ten times more people than any other Gippsland paper.

Authorised Agents for receiving Advertisements, Messrs. GORDON & GOTCH, London, Melbourne, Sydney Brisbane, and Perth.

HENRY ALFRED LUKE, Proprietor.

WARRNAMBOOL STANDARD.

Published Daily. PRICE ONE PENNY.

THE MOST VALUABLE ADVERTISING MEDIUM IN THE WESTERN DISTRICT OF VICTORIA.

Population within a short radius of Warrnambool, over 40,000.

ST. ARNAUD MERCURY,

Established 1864,

PUBLISHED WEDNESDAYS & SATURDAYS.

By many years the oldest and most widely circulated paper in the North Western portion of the colony. Unsurpassed medium for advertising.

St. Arnaud is the headquarters of the Kara Kara Electorate and North Western province, an important rising mining town, and centre of a populous and permanently settled pastoral and agricultural district.

LEWIS BROS., Proprietors, St. Arnaud.

THE MARYBOROUGH AND DUNOLLY ADVERTISER.

One of the Oldest Established (1854) and most widely-circulated of the

VICTORIAN NEWSPAPERS.

Published MONDAYS, WEDNESDAYS, and FRIDAYS. Enlarged to 32 Columns.

Office: HIGH STREET, MARYBOROUGH, VICTORIA.

London Agents: GORDON & GOTCH, C. MITCHELL & Co., BATES, HENDY & Co., CLARKE, SON, & PLATT.

The Leading Adelaide Newspapers.

THE ADVERTISER.

THE POPULAR AND BEST MORNING PAPER.

The circulation of "The Advertiser" is absolutely unapproached. It contains from 64 to 128 columns of accurate and well-arranged cable, commercial, political, mining, sporting, and other intelligence.

It is acknowledged to be the Leading Newspaper in South Australia. That it goes everywhere, and is read by everybody is proved by its advertising pages.

Price, 1d. per Copy; 6s. 6d. per quarter, or 23s. per annum, paid in advance.
Postage, 3s. 3d. per Quarter extra.

THE CHRONICLE.

AN UNSURPASSED FAMILY JOURNAL.

The circulation of "The Chronicle" is more than three times that of any other Weekly Paper published in South Australia. Its chief features include the latest agricultural, mining, and sporting news, as well as every kind of general intelligence. Particular attention is paid to literature. The best novels of the best English authors are regularly published.

The paper of the South Australian producer is "The Chronicle," which is one of the best weeklies published in Australasia.

Price, 4d. per Copy; yearly subscription, in advance, including postage, 16s.

THE EXPRESS.

THE POPULAR EVENING PAPER.

The oldest and most widely read Evening Paper published in Adelaide. It contains the latest news, attractively presented.

Price, 1d. per copy; 6s. 6d. per Quarter, or 23s. per Annum, paid in advance.

WESTERN AUSTRALIA.

CROWN LANDS OPEN FOR SELECTION.

HUNDREDS of thousands of acres of land suitable for agriculture and fruit-growing are open for selection under the exceedingly liberal Land Act, 1898, of Western Australia, which lands are rendered easy of access by Railways and Roads, which enable the selector to transport his produce where the highest prices may be obtained.

FREE HOMESTEAD FARMS.—160 acres of land may be selected by anyone upon payment of £1, and the Title-Deed of the land may be obtained upon the performance of the following conditions, viz., the selector must reside upon the block, and within two years spend £30 in erecting a house or in clearing and cropping portion of his holding, or in preparing two acres of orchard or vineyard, and within five years from the date of possession the selector must fence in one-fourth of his holding, and clear and crop one-eighth of same, and within seven years of the same date must clear and crop one-fourth of his holding and fence the whole of it.

CONDITIONAL PURCHASES.—From 100 to 1,000 acres of land may be selected under Conditional Purchase clauses of the Land Act at 6d. per acre per annum, extending over a period of 20 years, with or without residence on the land. One-tenth of the land selected must within two years be fenced on the external boundaries, and the whole of it within five years, and 10s. per acre spent in improvements within ten years; or if the land be taken up without residence the selector must spend 20s. per acre upon it in the same time.

ORCHARD AND GARDEN BLOCKS.—Small blocks of land suitable for Orchard and Garden purposes may be selected for £1 per acre, cash; the land must be fenced within three years, and one-tenth of it planted with Vines and Fruit Trees or cultivated as a Vegetable Garden. Upon the completion of these conditons the Title Deed of the land may issue.

DIRECT PURCHASE.—From 100 to 5,000 acres may be purchased at 10s, per acre, cash; the conditions are that the selector must within three years fence the land, and within seven years expend the sum of 5s. per acre in prescribed improvements, when the Title Deed may issue.

GRAZING LEASES.—(Otherwise Conditional Purchase of other than first-class land.) From 1,000 to 3,000 acres of Second Class Land, and from 1,000 to 5,000 acres of Third Class Land may be selected as a Grazing Lease, the rent extending over a period of 30 years, as follows: Second Class Land, 2½d. per acre per annum; Third Class Land, 1½d. per acre per annum. The selector, his agents or servants, must reside upon the holding during at least six months of the first year and nine

months in each of the following four years, and shall execute the following improvements: During the first two years the selector must fence at least one-tenth of his holding, and within the first five years he must fence in the whole of the land. In addition to the fencing he must expend during the first fifteen years of his lease, in statutory improvements, an amount equal to the full purchase money, viz., 6s. 3d. in respect to Second Class Land, and 3s. 9d. in respect of Third Class Land. On the completion of these improvements, and the fulfilment of these conditions, the Title Deed for the land may issue.

Along the railway line between Perth and Albany there are several surveyed agricultural areas laid out, all of which are suitable for agriculture and fruit-growing. There are besides thousands of acres of First Class Land open for Free Selection, a large portion of which was formerly held by the West Australian Land Company, but has now been acquired by the Government.

Along the Eastern Railway, within easy distance of Perth, there is a fair amount of land open for selection as Garden and Orchard lots. Continuing along the same line towards the Coolgardie Goldfields, after Northam is passed, there are large areas of Forestland, the cost of clearing which is very small, and the land is well adapted for growing Fruit and Cereals.

On the South-West Railway line, which runs from Perth to Bunbury, and thence to Bridgetown, large areas of land are open for free selection, as well as several areas which have been surveyed into lots. Most of this land is especially suited for mixed farming.

THE AGRICULTURAL BANK.—Advances are made by this Bank for the purpose of effecting either one or more of the following improvements: Clearing, cultivating, or ploughing, ringbarking, fencing, draining, wells of fresh water, reservoirs, buildings, and any other form of improvement which, in the opinion of the Manager of the Bank, will increase the agricultural or pastoral capabilities of the land.

In cases where, in the opinion of the Manager, ample security is offered, three-fourths of the fair estimated value of the proposed improvements may be advanced, but one-half is the proportion generally allowed.

All advances are paid proportionately as the improvements are effected, that is, applicants can have "draws" while the work is proceeding. All loans have a currency of thirty years; during the first five years simple interest only is payable, after which the borrower shall begin to pay the principal sum at the rate of one-fiftieth of the amount half-yearly, until the whole has been paid.

All applications must be for one or more of the following sums: £50, £75, £100, and extending up to £800.

GOVERNMENT LAND AGENTS, whose duty it is to give to intending selectors any information they may require relative to land selection, are stationed at Albany, Katanning, Beverley, York, Northam, Geraldton, Bunbury, and Vasse. From these various agents intending selectors can obtain copies of "The Land Selector's Guide," &c., containing descriptions of the land open for selection, and the conditions under which it may be selected, together with any other information they may require, as well as at the Head Office in Perth. Persons living out of the Colony, and seeking information respecting Crown Lands in Western Australia, are invited to communicate with the Department in Perth, when information, such as books and plans, will be forwarded to them free of charge.

The Jarrahdale Jarrah Forests and Railways, Limited,

WESTERN AUSTRALIA.

THIS company has a concession of 250,000 acres right in the heart of the best Jarrah country, from which the famous Jarrahdale Jarrah is supplied, second to none in quality. This company has sixty miles of private railway line connected direct with the port of Rockingham, thus giving it shipping facilities to all parts of the world. It also connects with the Western Australian Government Railways at Jarrahdale Junction, enabling the Company to load timber at its mills, and send it direct in the same wagons to any station on the Western Australian Government line.

There are five well equipped mills on this property, capable of an output at the present time of 30,000 to 40,000 loads per annum.

Jarrahdale Jarrah is the best of its kind, and is well suited for street paving, harbour works, railway building — including sleepers — and all other building purposes.

The London Office of this Company is at 110, Cannon Street, E.C., Secretary, W. D. GOATLY, and the Board of Directors there being :—

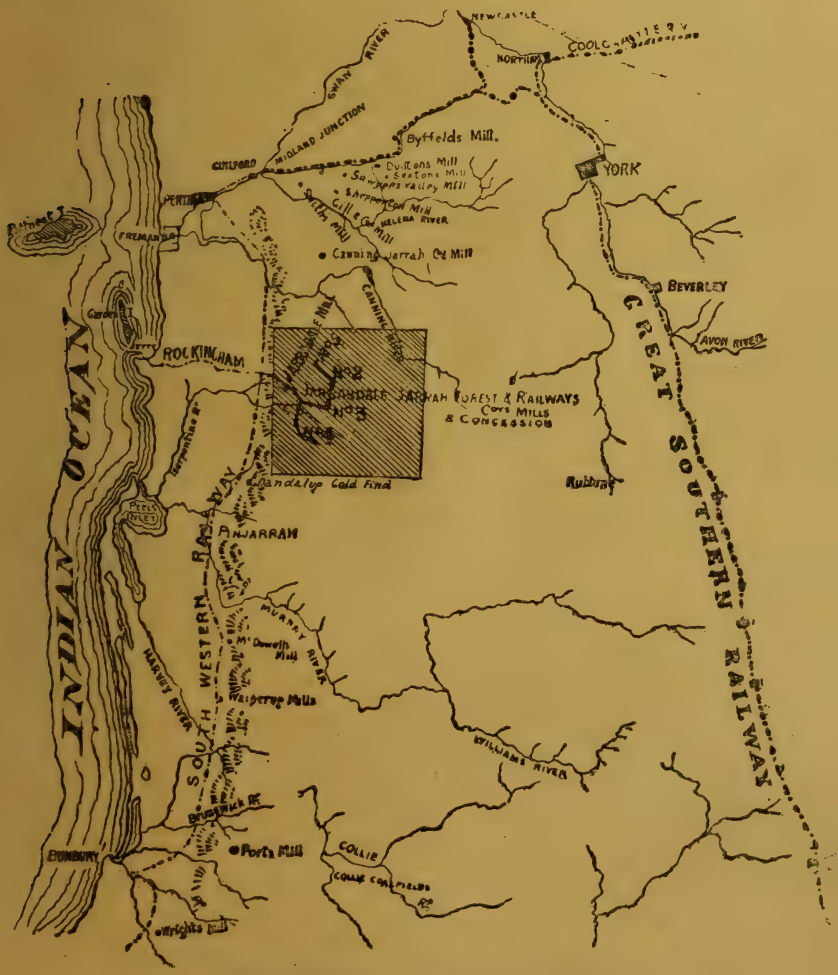
The RT. HON. LORD WENLOCK, G.C.S.I., G.C.I.E., *Chairman*
JAMES MARTIN, Esq., *Vice Chairman.*
COLONEL ALAN GARDNER, J.P., D.L.
C. PETO BENNETT, Esq.

The Local Board of Directors are :—

NEIL MCNIEL, Esq., *Chairman.*
SIR GEORGE SHENTON, M.L.C.
RICHARD SPEIGHT, Esq.

The Manager of Jarrahdale Mills, Mr. A. C. MUNRO; the local Secretary, MR. JAMES AINSLIE; and the Resident Director, RICHARD SPEIGHT, Esq. Western Australia address, Moore Street, Perth.

A large business has been established with England, Europe, Africa, and China, and Islands in the Eastern Seas in all classes of Jarrah timber, as well as locally in Western Australia, in mining and building material.



Locally the Company makes a speciality of seasoned boards, and do the majority of the trade in seasoned Jarrah Flooring, of which they have at the present time nearly two and a-half million feet lying seasoned at Jarrahdale Junction.

They also have at their Perth yard large stocks of Jarrah in wide boards for cabinet work, &c. It has been thoroughly proved that Jarrah when properly seasoned is equal to Mahogany.

In the Perth yard, all the dressed timber, including Flooring, Moulding, &c., is turned out, and it is always considered that when a contractor has Flooring from Jarrahdale, it is well seasoned and good.

The map on this page shows the private railways of the Company, their connection with the Government line, and the facilities possessed by the Company for their export trade at the port of Rockingham.

Any enquiries addressed to the London or Perth office will receive prompt and careful attention.

THE EVENING STAR,

DUNEDIN.

Established 1863. Price 1d. DAILY ISSUE - - - 10,000 Copies.

The Best Advertising Medium circulating daily in the South Island.

The STAR is delivered daily as far as INVERCARGILL and LAWRENCE on the South Line, and OAMARU on the North Line.

All Business Communications to be addressed to the Manager.

The NEW ZEALAND TIMES,

Established 1845. The only morning paper published in Wellington. Is a first-class advertising medium, having a circulation of nearly 10,000 daily in Town and Country. Eight Pages, price One Penny.

The NEW ZEALAND MAIL,

An Illustrated weekly, besides having a large town and suburban circulation, finds its way to the remotest settlement. Liberal Advertising Rates.

Publishing offices, Lambton Quay, Wellington, N.Z.

THE OTAGO DAILY TIMES.

THE ONLY MORNING NEWSPAPER PUBLISHED IN DUNEDIN.

ESTABLISHED 1861.

Circulates largely in the City, Suburbs, and Country Districts, and is the Leading Daily of Otago.

THE OTAGO WITNESS.

ESTABLISHED 1851.

Is recognised as a family paper of great merit. Its circulation among the farming, mining, and pastoral portion of the population is especially great.

GORDON & GOTCH receive advertisements for the above papers.

THE SOUTHLAND DAILY NEWS,

THE LEADING NEWSPAPER IN SOUTHLAND, OTAGO.

ESTABLISHED 1861.

THE SOUTHLANDER,

A First-class Family Newspaper, published every Friday morning.

Office :—Dee Street, Invercargill. HENRY and JOHN FELDWICK, Proprietors.

The "WAIRARAPA DAILY TIMES,"

Established 1878, Published at Masterton,

Is admittedly one of the best inland papers in New Zealand.

It is the Oldest, most Influential, and best-established daily journal in the Wairarapa District, and its circulation practically covers the whole Eastern half of the Wellington Province. In both town and country its connection is wide-spreading and effective. In short, the "Wairarapa Daily Times" is recognised as the leading newspaper of the Wairarapa.

The Wairarapa Daily Times was the first newspaper in its District to subscribe to the United Press Association, and receive its special telegrams and cable news.

ESTABLISHED 1870.

The Leading Daily Paper of the Colony.

Guaranteed Daily Circulation 16,849, exceeding by several thousands any other paper published in New Zealand. It consists of a Double Sheet of eight pages, being printed and folded by web machinery. Its large and widely distributed circulation renders it the best Advertising Medium in New Zealand.

THE NEW ZEALAND FARMER.

An illustrated agricultural and pastoral monthly publication. The only paper entirely devoted to Farming matters and circulating throughout the Colony.

The following subjects are dealt with by competent writers:—Agriculture, Stock-breeding, Dairy Work, Wool-growing, Horticulture, Fruit-growing, Special Crops, Sub-tropical Industries, Poultry, Bee-keeping, &c.

Subscription, 12s. 6d. per annum.

THE NEW ZEALAND GRAPHIC AND LADIES' JOURNAL.

A high-class weekly illustrated publication. The best printed and best illustrated in the Colony. A favourite with all classes. **Profusely Illustrated. Subscription, 20s. per annum.**

Proprietor, H. BRETT, Shortland and Fort Streets, Auckland.

London Agent, R. B. Brett, New Zealand Press Agency, 2 & 3, Imperial Buildings, Ludgate Circus, London, E.C.

THE SOUTHLAND TIMES,

INVERCARGILL, N.Z.

Only Daily Morning Journal in Southland. The Commercial, Agricultural, Pastoral and Mining Journal of the district of Southland. £1 10s. per annum; posted £2.

THE WEEKLY TIMES,

A Journal of Politics, Literature, Agriculture, Mining, and Athletics, with full reports of all matters of general importance, and the news of the week as appearing in the daily journal.

Subscription:—Within the colony, 15s. per year; over-sea postage, 20s.

ROBERT GILMOUR, Sole Proprietor.

THE FIELDING STAR

And OROUA & KIWITEA COUNTIES GAZETTE, N.Z.

Published Daily. Established 1879.

Circulating in the Manchester Block, Cheltenham, Pukeroa, Kiwitea, Birmingham (Fowlers), Pemberton, Apiti, Umutoi, Rangawahia, Ruahine, Makino, Onga, Hautapu, Waituna, Awahuri, Rongotea, Sandon, Bulls, Taonui, Aorangi, Colyton, Ashurst, Pohangina, Komako, Bunnythorpe, Palmerston North.

The MOST RELIABLE ADVERTISING MEDIUM in these Prosperous Settlements.

Circulated every evening throughout the whole of the district by coach and mounted runners.

PATENT
No. 5221-84.

This Needle is made to meet a want patent to every one, namely, a Needle that will thread without the annoying process of passing the end of the Cotton through the eye. The Cotton is slipped through a slit above the eye, as shown by the accompanying sketch. The Needles have obtained an enormous sale in Europe, and they differ essentially from all other easy Threading Needles. They are protected by Letters Patent in England, France, Germany, and America.

A Cut Out

PATTERN

Is always given.

A FAMILY JOURNAL for the Colonies.

THE ARGUS.

Published Daily in Melbourne, Australia.

(PRICE ONE PENNY.)

The ARGUS is the leading Paper in the Colonies, the oldest in Victoria, has a large circulation, and consists of 72 columns daily, 108 columns on Saturdays.

There are few houses of any note in any of the Australian Colonies in which it is not found.

ADVERTISING SCALES OF CHARGES.

"THE ARGUS."

This paper *does not* take blocks, and inserts only single column Advertisements.

	One Insertion.	Six Insertions Daily.	26 Insertions (one month) Daily.
	s. d.	£ s. d.	£ s. d.
16 words	1 0	0 5 0	1 2 0
24 words	2 0	0 10 0	1 16 6
½ inch (40 words)	3 0	0 16 0	2 18 0
1 inch (80 words)	5 0	1 7 0	4 17 6
2 inches	10 0	2 14 0	9 15 0

Advertisements inserted once or twice a week full scale.
Special Advertisements, 1s. per line, or £1 per line per month for daily insertions.
Paragraph Advertisements, 1s. per line each insertion.
Situations Vacant and Situations Wanted, 14 words for 6d.
Births, Marriages, and Deaths, 3s. each.

THE AUSTRALASIAN.

(ILLUSTRATED.)

Published Weekly in Melbourne. (Price Sixpence.)

THE LARGEST JOURNAL IN THE AUSTRALASIAN COLONIES.

It consists of 290 columns, and contains Literary, Scientific, Rural, and Sporting subjects particularly adapted to country readers.

It circulates extensively through the various Colonies of Australia, is read on the most remote stations in the newly-settled country on the Gulf of Carpentaria, New Guinea, Pacific Islands, and in the most secluded goldfields of Western Australia and New Zealand.

ADVERTISING SCALES OF CHARGES.

"THE AUSTRALASIAN."

(ILLUSTRATED.)

This Paper takes blocks and single and double column Advertisements.

	One Insertion.	Six Insertions Weekly.	Thirteen Insertions Weekly.
	s. d.	£ s. d.	£ s. d.
16 words	1 0	0 5 6	0 10 0
24 words	2 0	0 11 0	1 2 0
½ inch (40 words)	3 0	0 14 6	1 9 6
1 inch (80 words)	5 0	1 8 6	2 18 6
2 inches	10 0	2 17 0	5 17 0

Advertisements inserted once a fortnight 10 per cent. on the above scale, once a month full scale.
Special Advertisements, are charged Double the Ordinary Rates.
Paragraph Advertisements, 2s. per line each insertion.
Births, Marriages, and Deaths, 3s. each.

Special Terms for Long Series.

The above Papers thus offer to MANUFACTURERS, SHIPPERS, HOTEL KEEPERS, PUBLISHERS, and others, a medium of unequalled extent and variety for their Advertisements.

All Information respecting ADVERTISEMENTS can be obtained at the LONDON OFFICES, 80, FLEET STREET.

WILSON & MACKINNON, *Proprietors.*

Files of the above and other leading Australasian Papers may be referred to daily at the London Offices, 80, Fleet Street.
